CIRCULAR FOR ADVANCED LEARNERS' ENRICHMENT PROGRAM
(2020-2021)

Date: November 18, 2021

In accordance with university policies, the **2020-2021 Advanced Learners' Enrichment Program** will begin on **November 18, 2021**.

This year's focus will be:

- **Advanced physiotherapy workshops**, focusing on sports injury rehabilitation and neurological physiotherapy techniques.
- **Research presentations and group discussions**, allowing students to showcase their findings and refine their critical thinking skills.
- **Participation in virtual and in-person conferences**, with opportunities to present posters and case studies, representing the institute.
- **Guidance on professional certifications** and research publications for further academic growth.

Report on Participation of Advanced Learners

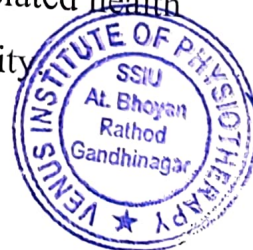

(2020-2021)

Institution: Venus Institute of Physiotherapy

Academic Year: 2020-2021

During the academic year 2020-2021, advanced learners at Venus Institute of Physiotherapy actively participated in a diverse range of activities, reflecting their commitment to both academic excellence and community awareness. Their involvement spanned across slogan-making and poster-making competitions, virtual quiz competitions, research projects, and hands-on workshops, demonstrating their engagement in both creative and practical aspects of physiotherapy.

In alignment with the observance of *World No Tobacco Day* on May 31, 2021, the students participated in a **Slogan Making Competition** aimed at raising awareness about the dangers of tobacco use. The advanced learners crafted impactful slogans that were widely disseminated within the institute and beyond. The slogans successfully conveyed critical health messages, contributing to a heightened awareness of tobacco-related health risks among the student body and the wider community.

Complementing this effort was a **Poster Making Competition**, where students designed informative posters addressing various health topics, including anti-tobacco campaigns. Due to the ongoing pandemic, the students also delivered virtual presentations of their posters. These presentations allowed them to explain their designs and the underlying health messages effectively. The creative and educational quality of the posters not only enhanced the visibility of health issues but also fostered a deeper understanding of preventative health measures among their peers.

Advanced learners also engaged in **research work** related to their projects, focusing on health promotion and the impacts of tobacco use. This research was integrated into their presentations and helped ground their creative outputs in scientific evidence. Their findings contributed to a broader understanding of health issues and demonstrated the practical applications of their research in real-world scenarios.

The **Virtual Quiz Competitions** were another platform where the students showcased their knowledge and competitive spirit. These quizzes tested their understanding of physiotherapy concepts and health education, further reinforcing their academic learning and quick thinking in a virtual format.

Additionally, students participated in a **Tapping Workshop**, which provided hands-on experience in advanced physiotherapy techniques. This workshop was essential in developing their practical skills and understanding of therapeutic interventions. The experience gained from this workshop was valuable for their clinical practice and future professional roles.

Outcomes of these activities were highly positive. The advanced learners' participation in the slogan and poster competitions, along with their research efforts, led to increased awareness about tobacco-related health issues and promoted a healthier lifestyle among the institute's community. Their virtual quiz achievements demonstrated their academic proficiency and adaptability to online learning environments. The tapping workshop enhanced their practical skills, preparing them for real-world physiotherapy challenges.

Overall, the advanced learners' engagement in these activities not only enriched their educational experience but also contributed significantly to public health awareness and their professional development. Their efforts exemplify the institute's commitment to fostering well-rounded, socially responsible, and skilled future physiotherapists.

❖ Brief outline addressed in the event:

Venus Institute of Physiotherapy celebrated World Arthritis Day on 12th October 2020. On this Day Institute organized a webinar on Advance Research in Physiotherapy Management of Arthritis on the occasion of World Arthritis Day by Dr. Ankit Sinha under the guidance of our respected Principal sir Dr. Arvind Chauhan. This webinar was organized on 12th October 2020 at 10:00 AM to 12:30 AM. Webinar was started with the welcome note given by the Dr. Sanjeeta Khatri.

"Arthritis is a common condition that cause pain and inflammation of the joints and bones. The main symptoms of arthritis include pain. It is the most common condition in all over the world and it affects more than 10 million cases in India per year. It mainly affects older age people but nowadays it affects adults as well as young adults also, addressed by our Respected Principal Sir.

Additionally, Our Chief Guest and expert lecturer Dr. Himani Swami explained very well about Physiotherapy management of Arthritis patients and various available recent form of treatment techniques which is based on the Advance research. During the session we had almost

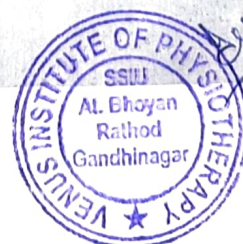

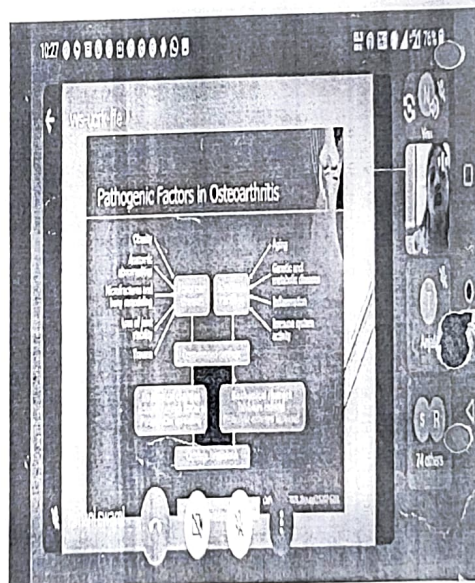

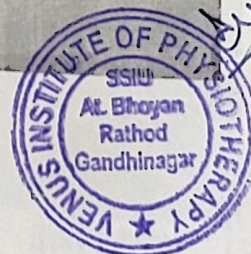

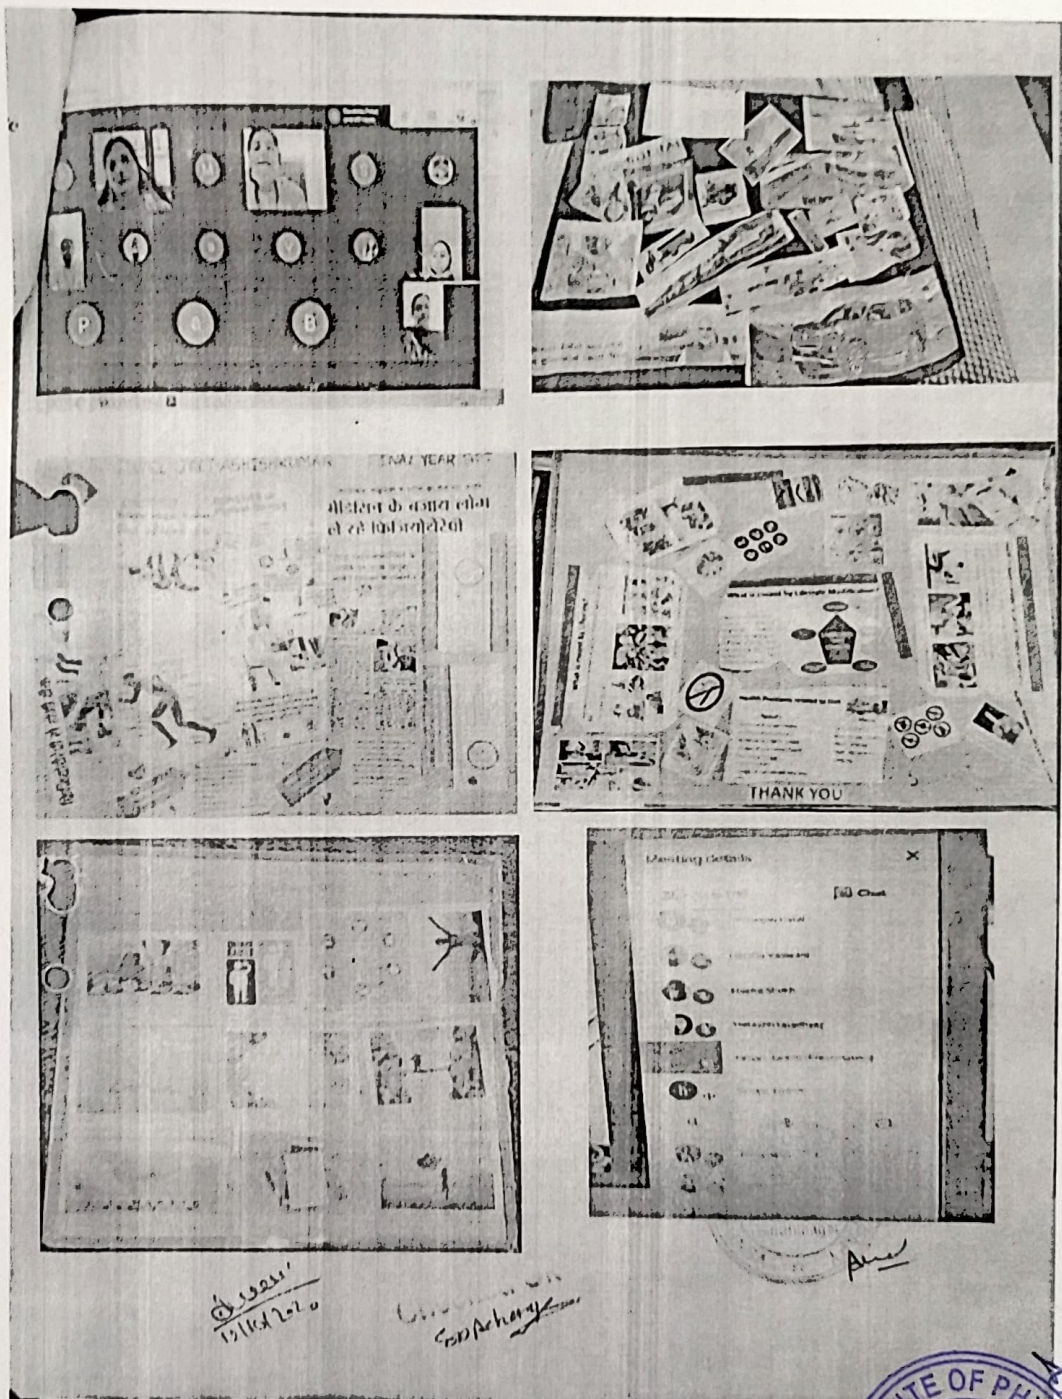

70+ participants who were quite excited about the session. Among the participants we had all the students of Physiotherapy College and the staff of swarnnim University.

Dr. Himani Swami was overwhelmed by the huge response she received from the people of swarnnim. At the end of the session students asked various questions from the expert, which she answered very patiently. The event was carried by Dr. Heena Shekh with the vote of thanks and by that the session was come to an end.

In continuation of the event, students actively participated in Collage Competition on "Lifestyle Modifications". Where they have to make Collage from old newspapers and magazines and then they have to present it for 1 -2 minutes. The event was a successful and students were given the positive feedback and were looking forward to the similar session like this in near future.

Organized by:	Swarnnim Start up and Innovation University
Department	Venus institute of Physiotherapy
No of participants	50 + students
Time	3:00 PM - 5:00 PM
CO-Ordinator	Dr. Tanvi Vyas

Brief outline addressed in the event:

Every year, World No Tobacco Day is observed in order to spread awareness of the dangers of consuming tobacco. People around the world want to get rid of this tobacco pandemic and claim their right to healthy living in order to protect their future generations. So, the World Health Organization (WHO) created World No Tobacco Day in 1987 to draw global attention to the tobacco epidemic and the preventable diseases and death it causes. In 1988, the World Health Assembly passed a resolution calling for the celebration of World No tobacco day, every year on 31 May.

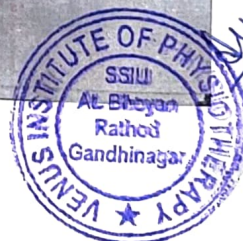

The theme for World No Tobacco Day 2021 is "Commit to Quit", which is asking millions of tobacco users to quit tobacco in the Covid-19 pandemic and sign a pledge to commit to quit today. In order to spread awareness of tobacco Venus Institute of Physiotherapy had organised various Competitions to celebrate World No Tobacco Day from 25th May 2021 to 31st May 2021.
