Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

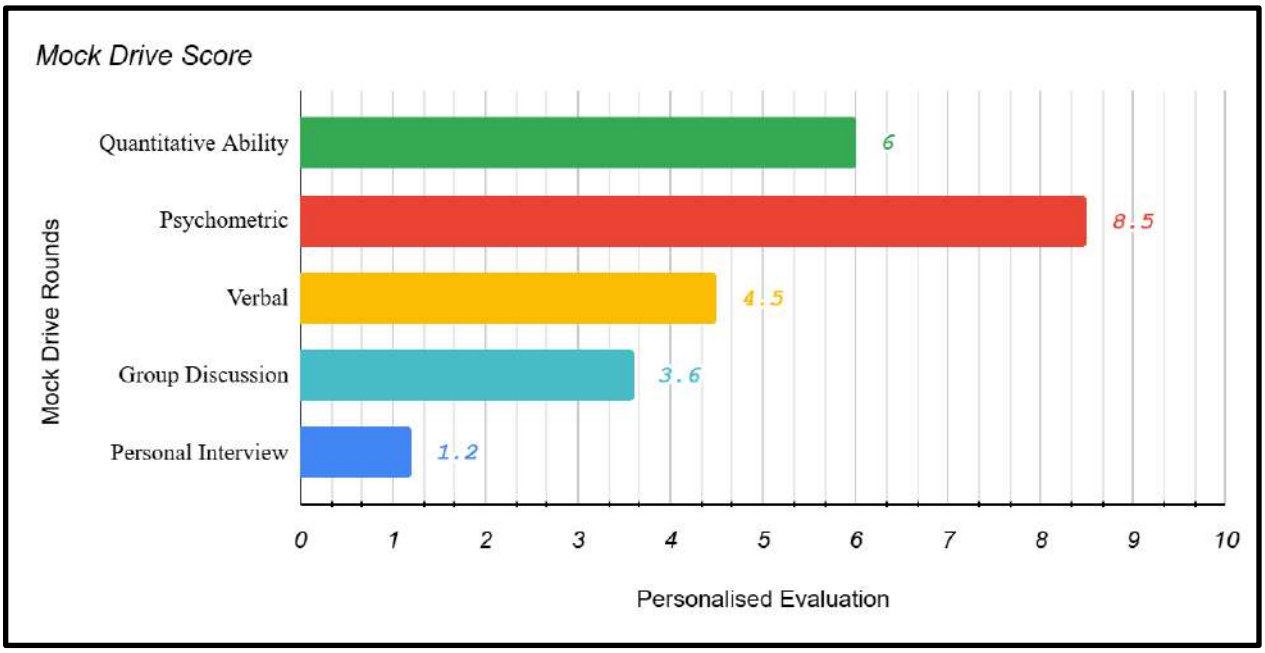
• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable

Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

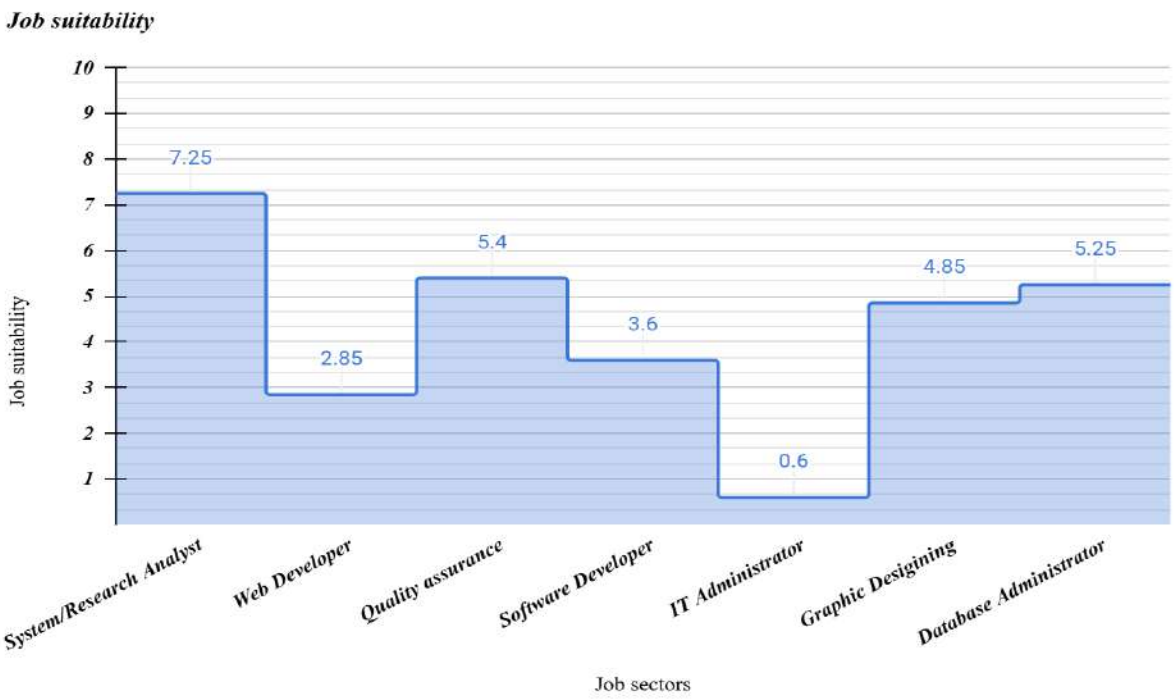
Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions..

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Blindly re- answer all questions after reviewing initial answers. 2. Write expository paragraphs and design multiple- choice questions. 3. Debate passage interpretations with a partner weekly. 4. Log idioms and practice using them correctly weekly. 5. Insert distracting questions and pause before answering
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher

		questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. Group Discussion (GD) and Personal Interview (PI) skills need to be developed and there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Psychometric (20)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

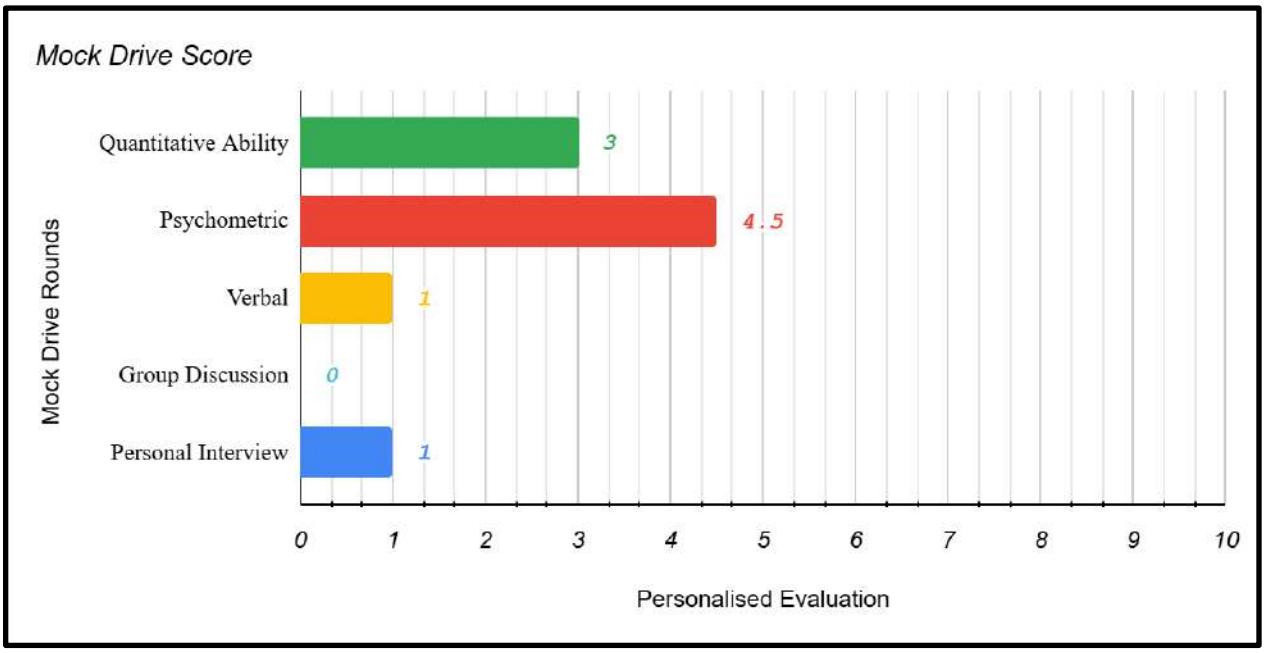
• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable

Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

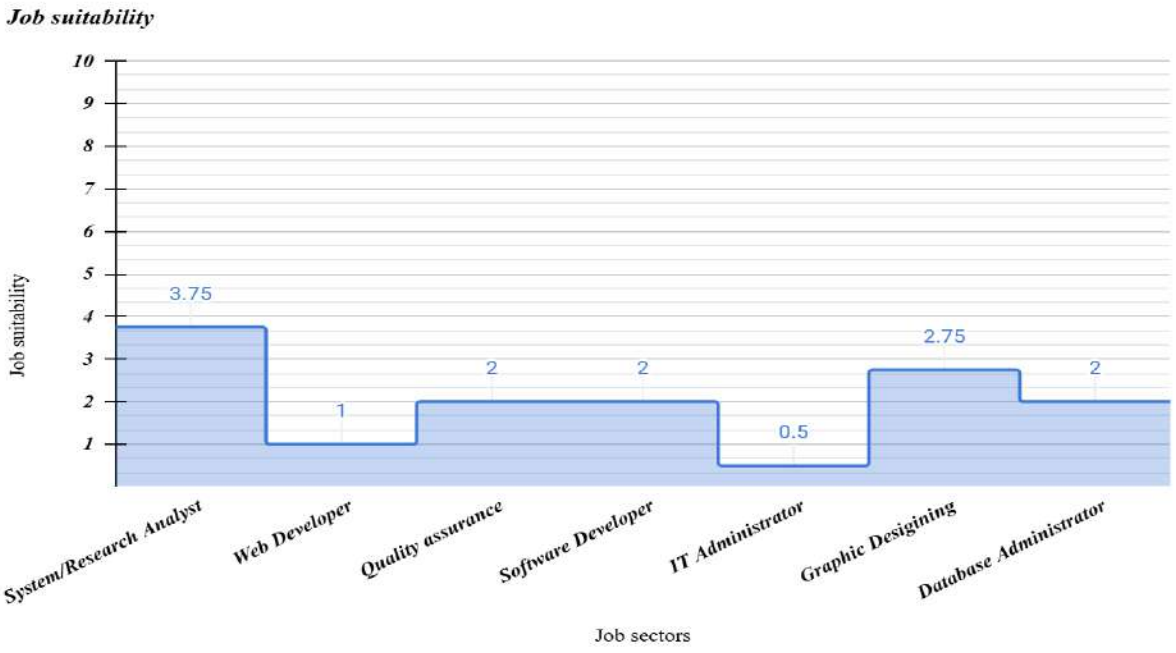
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	Your current portfolio or skill set needs more work to align with graphic design expectations. Begin with mastering tools like Adobe Photoshop, Illustrator, and Canva. Understand design principles like balance, contrast, and typography. Try replicating existing designs to learn techniques, then move on to creating original work.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Strong	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

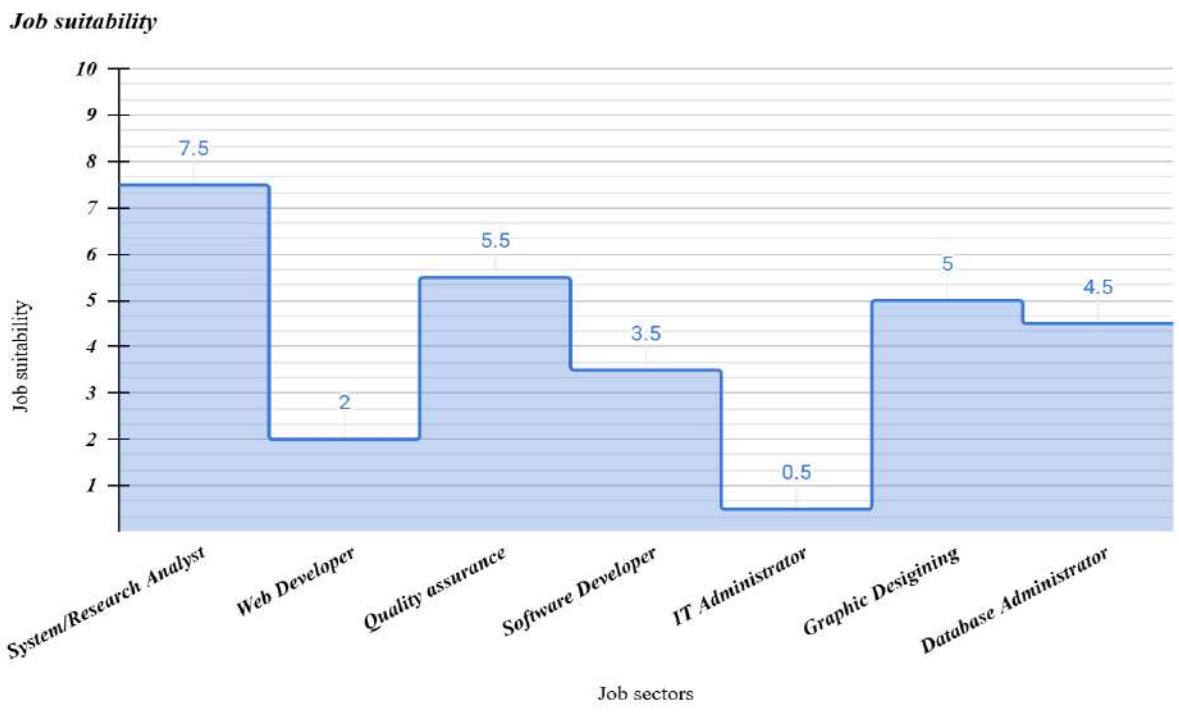
Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Blindly re- answer all questions after reviewing initial answers. 2. Write expository paragraphs and design multiple- choice questions. 3. Debate passage interpretations with a partner weekly. 4. Log idioms and practice using them correctly weekly. 5. Insert distracting questions and pause before answering
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher

		questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. Group Discussion (GD) and Personal Interview (PI) skills need to be developed and there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

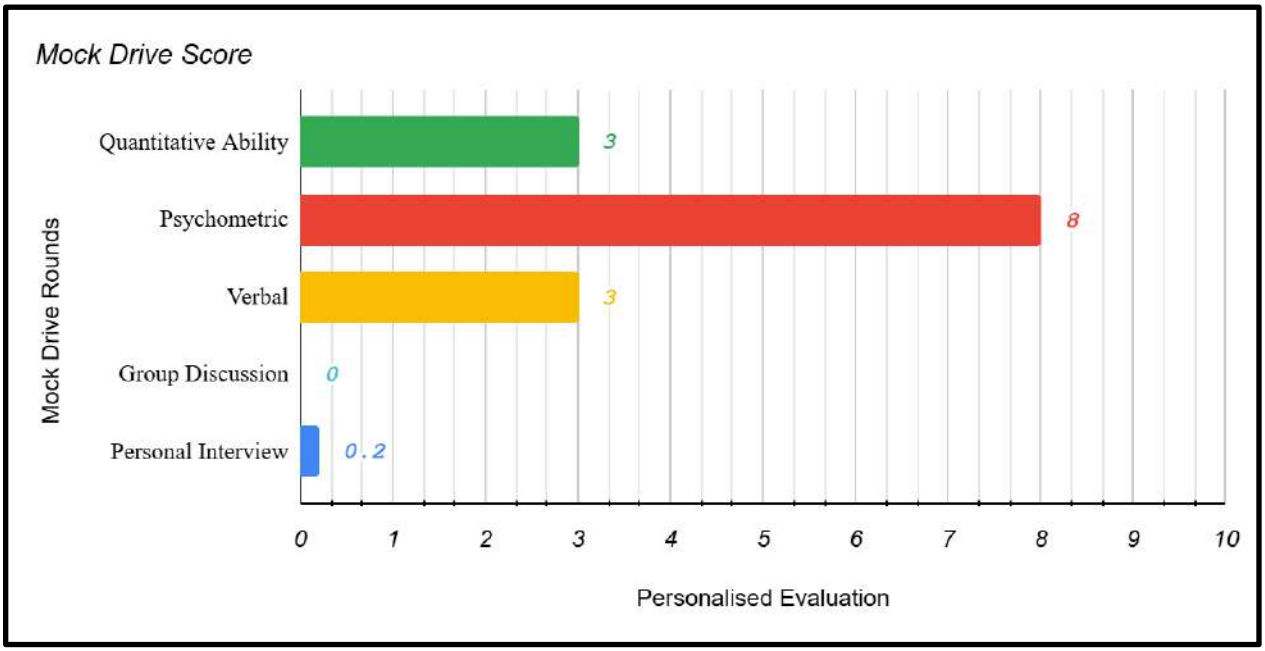
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental

concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

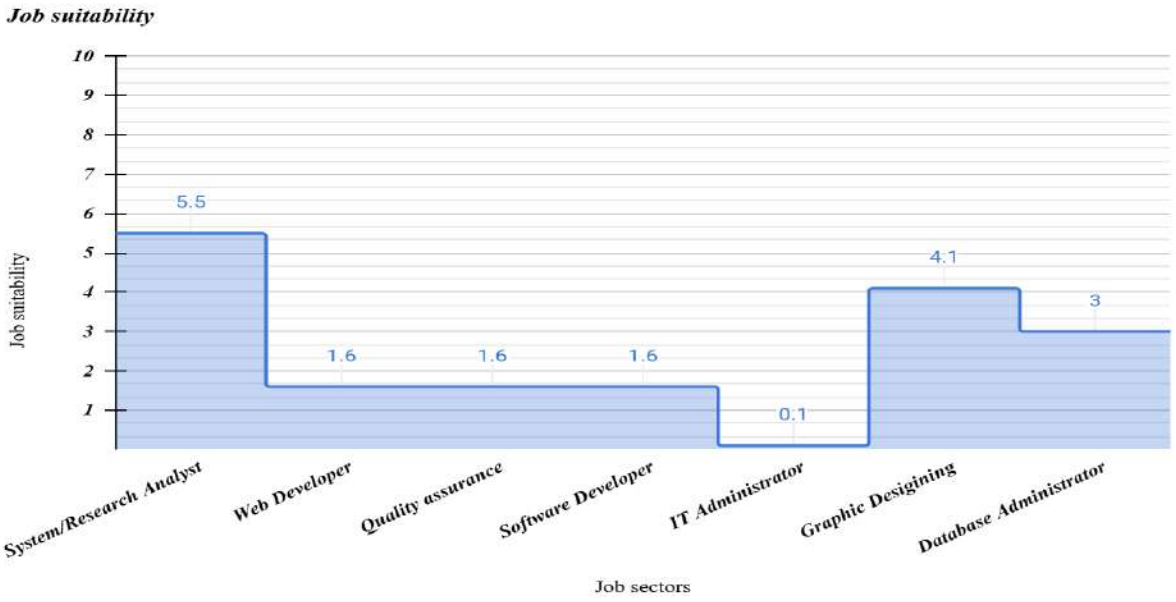
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student shows promising abilities in Group Discussion (GD) and Personal Interview (PI), suggesting average communication and interpersonal skills. Performance in Logical, Verbal, and Quantitative Ability is currently strong and has the potential to improve with strategic effort. Incorporating structured mock tests, guided mentoring sessions, and practice-focused class activities will help bridge the gap. With dedication and continuous learning, the student is well-positioned to elevate performance across all areas.

Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

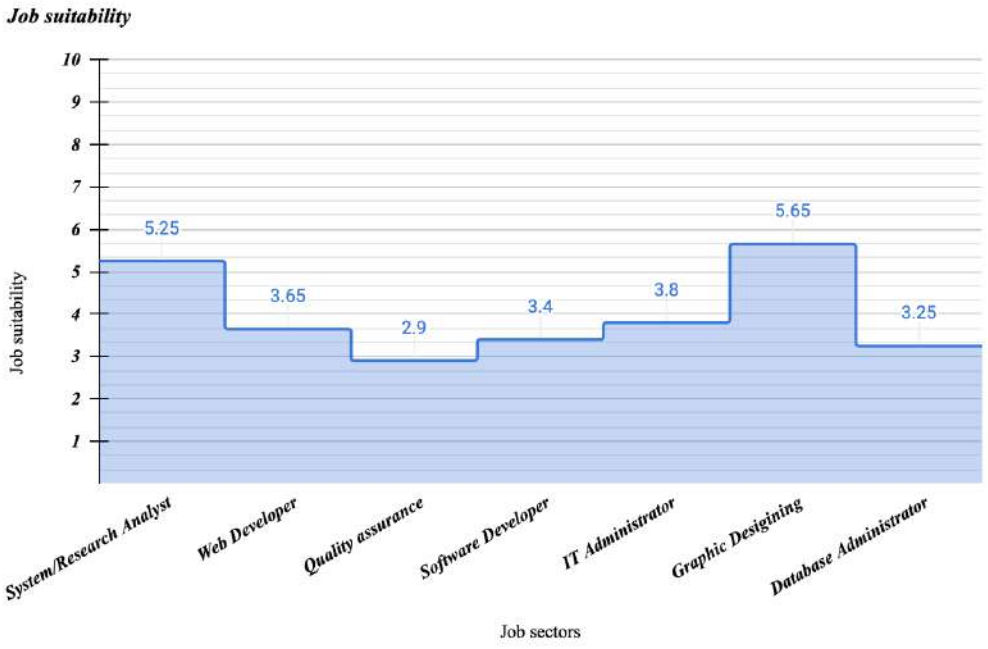
Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**MEDIUM**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech

		concepts clearly. With consistent effort, your chances of landing this role will improve.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with

		database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Strong	1. Practice timed mock tests to improve accuracy and speed. 2. Focus on improving logical reasoning and verbal ability sections. 3. Avoid overthinking questions—go with instinct where necessary. 4. Review explanations of wrong answers to understand your pattern of errors. 5. Be consistent in practice to reduce performance anxiety during the actual test.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal	Strong	1. Deeply introspect and prepare thoughtful answers to personal and

Interview		career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

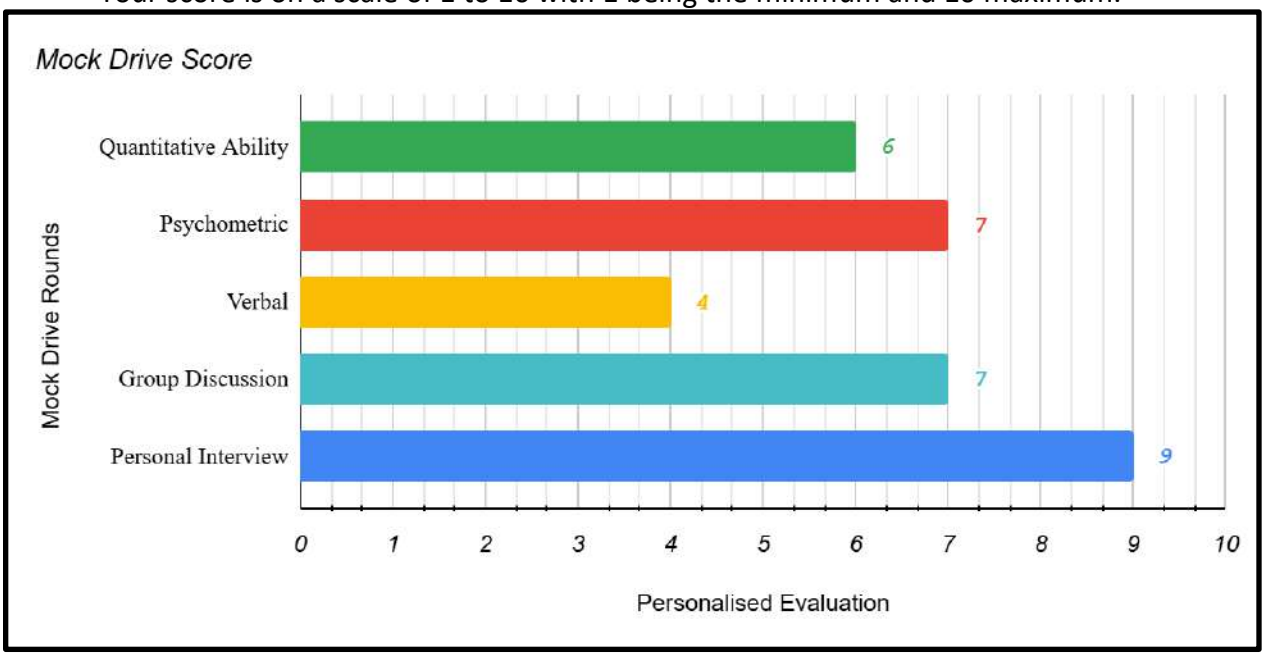
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to

understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your contributions during the group discussion were notable. You demonstrated good communication skills, expressing your thoughts clearly and effectively. Your ability to actively listen to others and engage in the conversation was evident, contributing positively to the overall dynamics of the group. While you did well in expressing your own ideas, consider actively seeking out and acknowledging diverse perspectives within the group. This can enrich the discussion and demonstrate a well-rounded understanding of the topic. Challenge yourself to delve deeper into counterarguments. While you presented your points effectively, exploring opposing viewpoints and addressing potential counterarguments can add depth to your contributions. Remember, these are just areas for potential growth, and your current

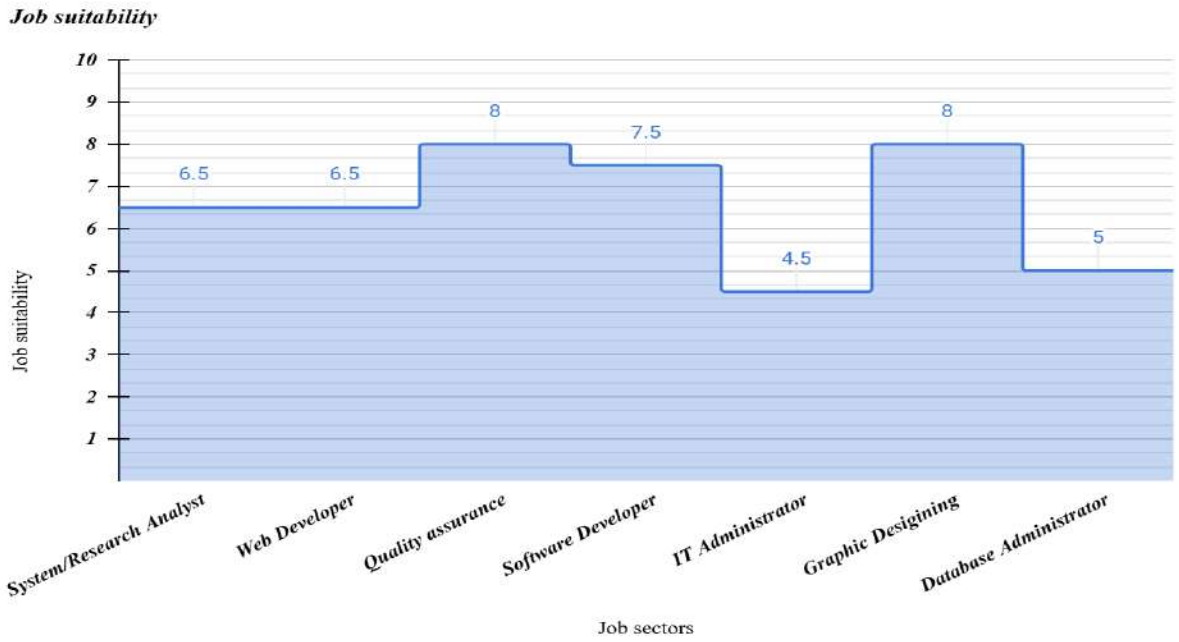
performance is already commendable. Keep up the good work, and we look forward to seeing how you continue to excel in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

You approached the PI round with professionalism and a clear sense of preparation. Your confidence and maturity came through well, which created a strong first impression. Your responses were generally clear and well-structured. To further enhance your performance, focus on backing your answers with specific, relevant examples from your experiences—whether academic, extracurricular, or personal. This will help you demonstrate depth of thought and a stronger connection between your experiences and the role you're aspiring for. In situations where a question feels vague or unclear, feel free to ask for clarification. Doing so not only reflects presence of mind but also ensures your response aligns with the interviewer's expectations. Continue building on the good foundation you've established. With more practice and reflection, you'll be well-prepared to handle even more challenging interviews. Keep up the effort, and best wishes for your next steps!

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**GOOD**	You demonstrate strong potential as a Web Developer. Your knowledge of coding languages, frameworks, and team collaboration is evident. To stand out further, keep experimenting with new tech stacks and contribute to open-source projects. Keep up the momentum—you're on track for great opportunities in this field.

Quality assurance	**GOOD**	Your skills are well-aligned with QA roles. You exhibit a structured and detail-oriented mindset, and likely have some hands-on exposure to QA processes. To build on this strength, explore automation tools and keep refining your test documentation. With this proactive approach, you are in a good position to succeed in QA.
Software Developer	**GOOD**	You have a solid base for a successful Software Developer role. Your problem-solving, logical reasoning, and adaptability to technologies are commendable. Keep building projects, exploring advanced concepts like APIs or microservices, and refining your collaboration skills. With consistent effort, you're well on your way to excellence in this field.
IT Administrator	**MEDIUM**	You're developing a good foundation for an IT Admin role. Focus on hands-on practice—set up local networks, explore admin panels, and simulate problem-solving scenarios. Learn how to manage servers, handle security protocols, and adapt to new IT tools. A proactive learning approach will significantly boost your chances.
Graphic Designing	**GOOD**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense. Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Moderate	1. Structure your arguments in a logical flow: point, reason, example. 2. Practice initiating and summarizing GDs. 3. Use simple, impactful language to express complex ideas. 4. Learn to respectfully disagree and build on others points. 5. Work on controlling voice modulation and pitch for better engagement

Personal Interview	Moderate	1. Prepare an impressive "tell me about yourself" 2. Maintain positive body language 3. Put efforts to talk more about your strengths and accomplishments 4. Answer every question confidently and with a relevant example 5. Work on your CV 6. Practice relaxation techniques such as deep breathing or visualization to calm your nerves.

6.0 Performance Summary:

The student exhibits commendable strength in Group Discussion (GD) and Personal Interview (PI), standing out as a confident and articulate individual. While some improvement areas remain in Logical, Verbal, and Quantitative Ability, these can be effectively addressed through structured training and consistent effort. With the right blend of mock tests, focused mentoring, and skill-specific guidance, the student can further sharpen their analytical capabilities and evolve into a well-rounded performer. The progress so far is encouraging and sets a solid foundation for continued success.

Corporate Readiness Chart						
PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
Psychometric (20)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

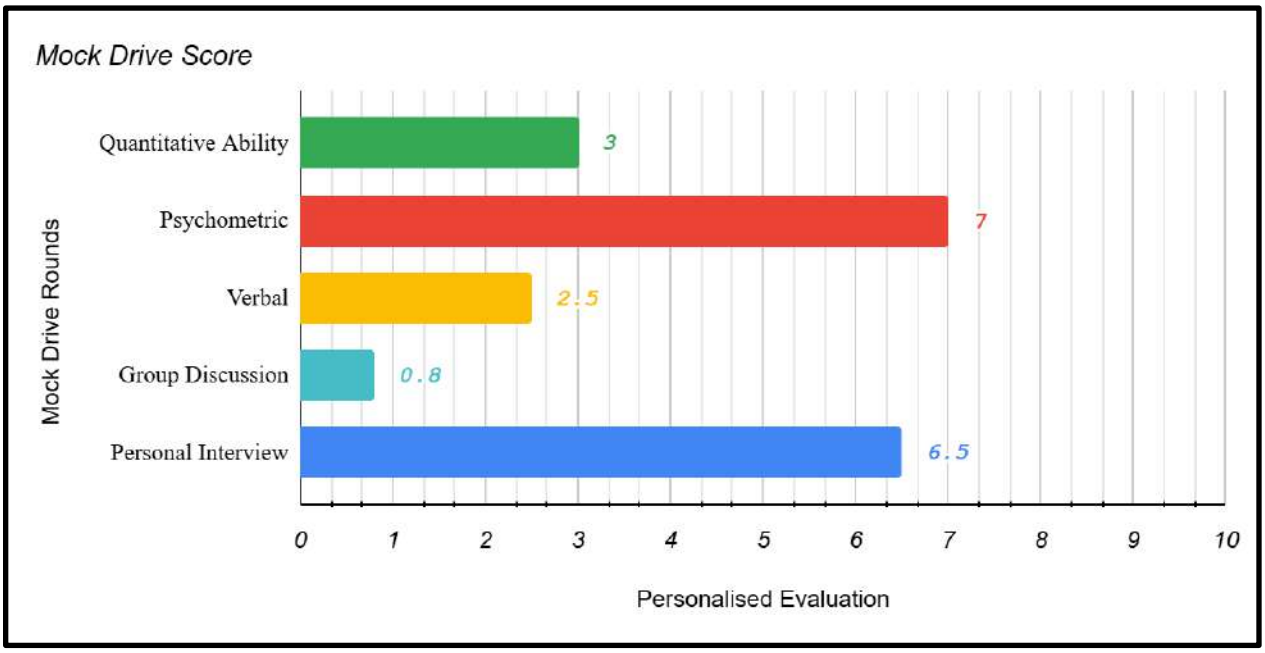
• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable

Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an

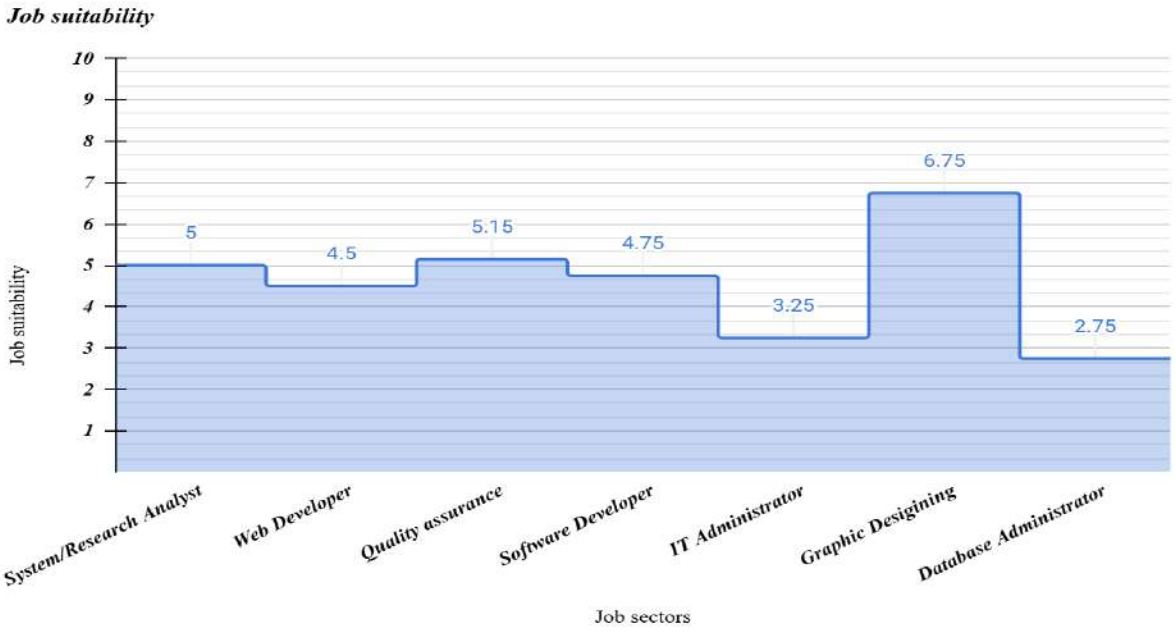
opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

You approached the PI round with professionalism and a clear sense of preparation. Your confidence and maturity came through well, which created a strong first impression. Your responses were generally clear and well-structured. To further enhance your performance, focus on backing your answers with specific, relevant examples from your experiences—whether academic, extracurricular, or personal. This will help you demonstrate depth of thought and a stronger connection between your experiences and the role you're aspiring for. In situations where a question feels vague or unclear, feel free to ask for clarification. Doing so not only reflects presence of mind but also ensures your response aligns with the interviewer's expectations. Continue building on the good foundation you've established. With more practice and reflection, you'll be well-prepared to handle even more challenging interviews. Keep up the effort, and best wishes for your next steps!.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**MEDIUM**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**GOOD**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense. Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.
Database Administrator	**LOW**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher

		questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. Strengths need to be built up in Group Discussion (GD) and Personal Interview (PI) and there is considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart

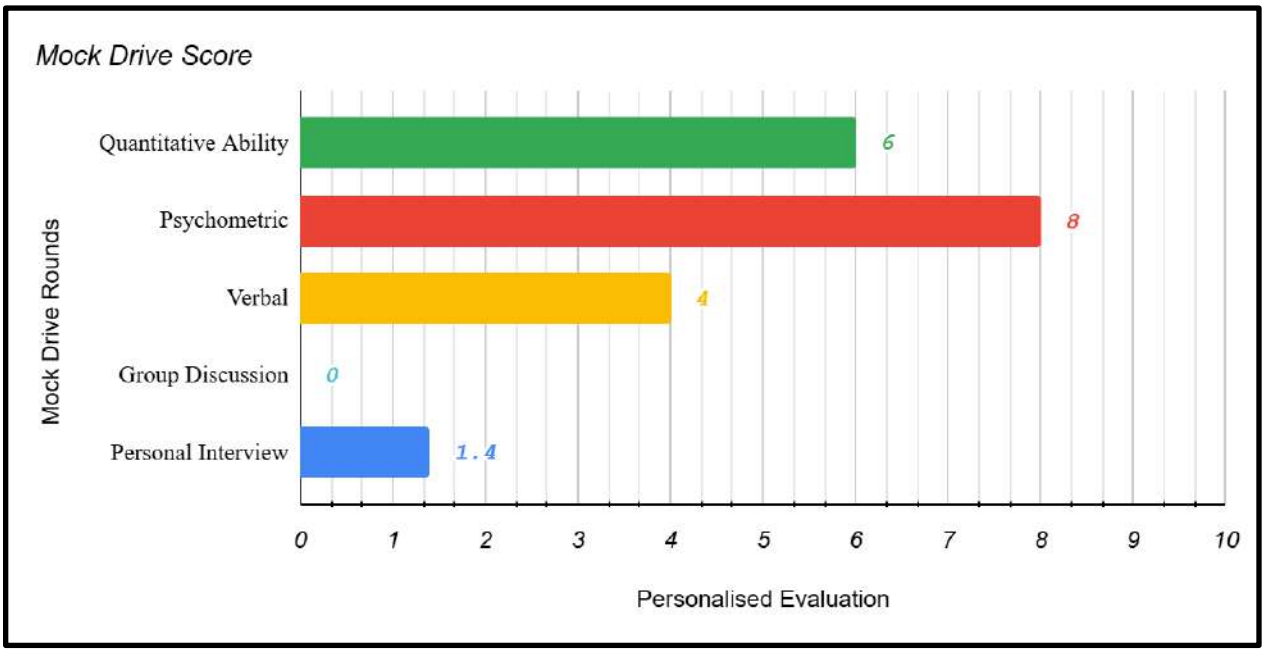
The other parameters they use for short listing are acceptable

Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an

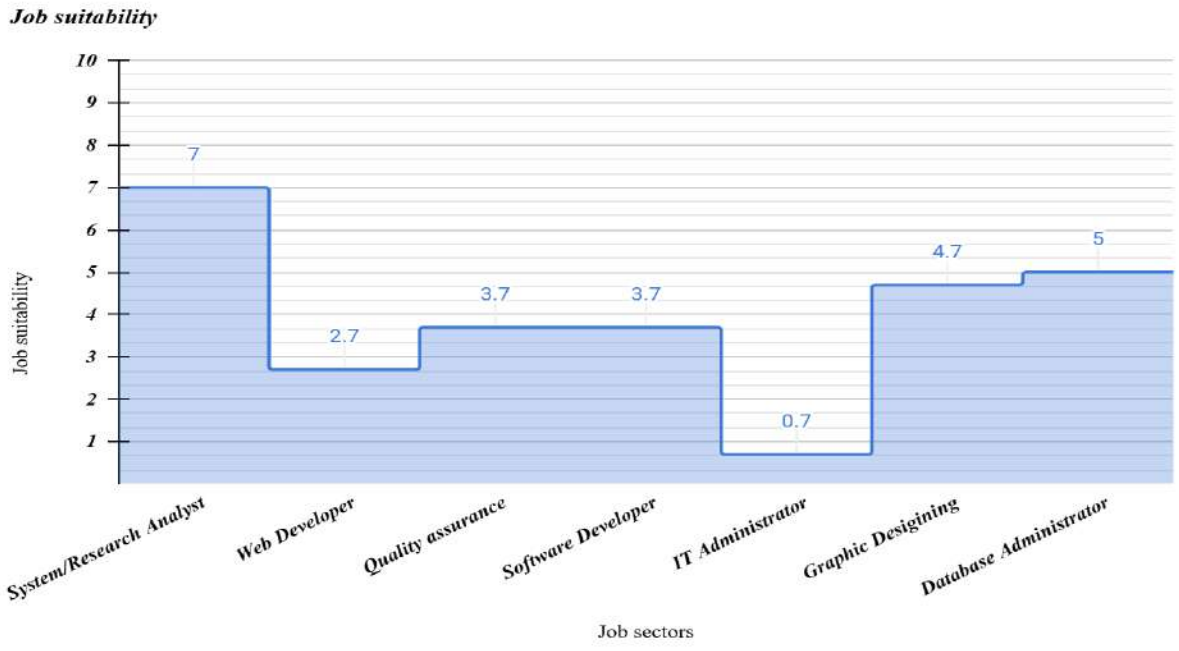
opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. Strengths need to be built up in Group Discussion (GD) and Personal Interview (PI) and there is considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Psychometric (20)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

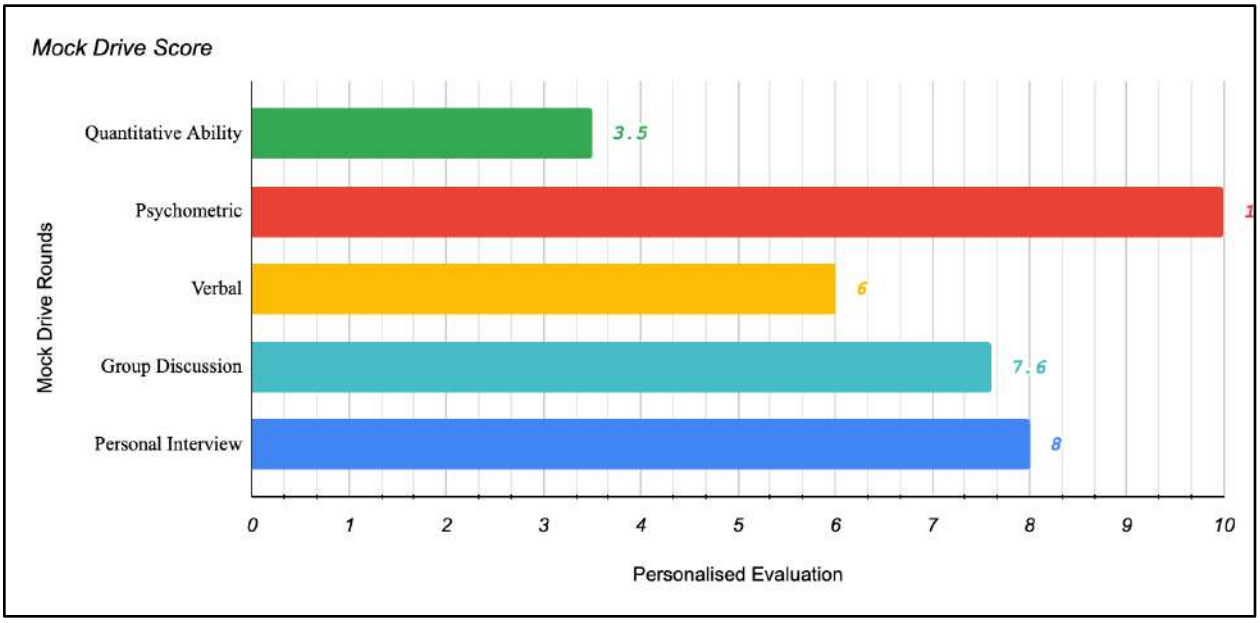
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are outstanding and reflect a high level of cognitive sharpness, emotional intelligence, and self-awareness. You demonstrate not just the ability to solve problems accurately, but also to approach them with strategic thinking and composure. Your consistency across reasoning, personality profiling, and attention-based tasks suggests a mature, well-rounded mindset ready for real-world challenges. To maintain and further polish this excellence, continue exposing yourself to diverse psychometric exercises, especially those that require adaptability and advanced decision-making. Focus on analyzing subtle patterns in data and human behavior, as these will enhance your already strong intuitive grasp. You are operating at a highly competitive level - stay curious, stay reflective, and you'll keep setting new benchmarks for yourself. Outstanding performance: truly impressive!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

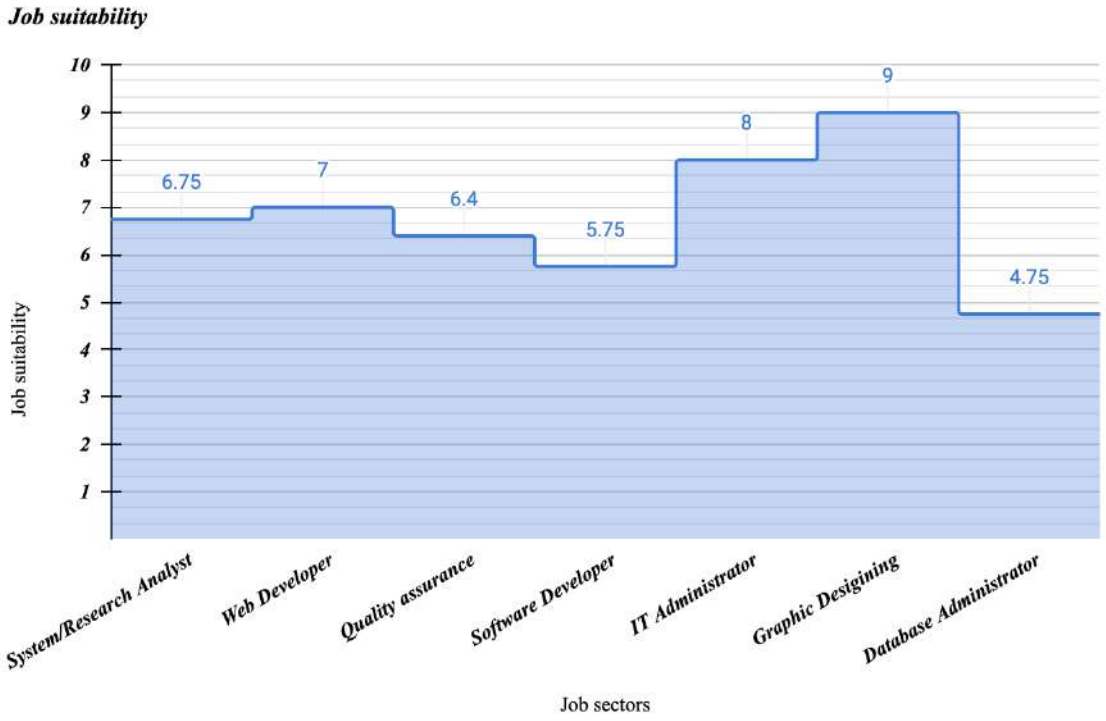
Your contributions during the group discussion were notable. You demonstrated good communication skills, expressing your thoughts clearly and effectively. Your ability to actively listen to others and engage in the conversation was evident, contributing positively to the overall dynamics of the group. While you did well in expressing your own ideas, consider actively seeking out and acknowledging diverse perspectives within the group. This can enrich the discussion and demonstrate a well-rounded understanding of the topic. Challenge yourself to delve deeper into counterarguments. While you presented your points effectively, exploring opposing viewpoints and addressing potential counterarguments can add depth to your contributions. Remember, these are just areas for potential growth, and your current performance is already commendable. Keep up the good work, and we look forward to seeing how you continue to excel in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

You approached the PI round with professionalism and a clear sense of preparation. Your confidence and maturity came through well, which created a strong first impression. Your responses were generally clear and well-structured. To further enhance your performance, focus on backing your answers with specific, relevant examples from your experiences—whether academic, extracurricular, or personal. This will help you demonstrate depth of thought and a stronger connection between your experiences and the role you're aspiring for. In situations where a question feels vague or unclear, feel free to ask for clarification. Doing so not only reflects presence of mind but also ensures your response aligns with the interviewer's expectations. Continue building on the good foundation you've established. With more practice and reflection, you'll be well-prepared to handle even more challenging interviews. Keep up the effort, and best wishes for your next steps!

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.

Web Developer	**GOOD**	To excel as a Web Developer, candidates should possess a strong foundation in coding languages coupled with problem-solving abilities. Companies value adaptability to new technologies, and proficiency in frameworks. Effective communication skills, both verbal and written, are crucial for collaborating with team members and understanding client requirements.
Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**GOOD**	You're well-suited for IT Administration. Your technical problem-solving skills and understanding of networks, systems, and protocols are commendable. Keep upgrading your knowledge on current trends in cloud services and cybersecurity. Practical exposure and staying up to date with IT innovations will ensure long-term success.
Graphic Designing	**GOOD**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense. Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.
Database Administrator	**MEDIUM**	You show strong potential as a DBA. Your understanding of SQL, data structures, and systems is impressive. Continue honing your skills with complex queries, optimize performance, and explore cloud database services. Stay updated with

		trends in data security and NoSQL systems to future-proof your skill set.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Moderate	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Moderate	1. Structure your arguments in a logical flow: point, reason, example. 2. Practice initiating and summarizing GDs. 3. Use simple, impactful language to express complex ideas. 4. Learn to respectfully disagree and build on others points.

		5. Work on controlling voice modulation and pitch for better engagement.
Personal Interview	Moderate	1. Prepare an impressive "tell me about yourself" 2. Maintain positive body language and reduce restrictiveness 3. Put efforts to talk more about your strengths and accomplishments 4. Answer every question in brief and with a relevant example (if necessary) 5. Enhance your CV by more research

6.0 Performance Summary:

The student exhibits commendable strength in Group Discussion (GD) and Personal Interview (PI), standing out as a confident and articulate individual. While some improvement areas remain in Logical, Verbal, and Quantitative Ability, these can be effectively addressed through structured training and consistent effort. With the right blend of mock tests, focused mentoring, and skill-specific guidance, the student can further sharpen their analytical capabilities and evolve into a well-rounded performer. The progress so far is encouraging and sets a solid foundation for continued success.

Corporate Readiness Chart

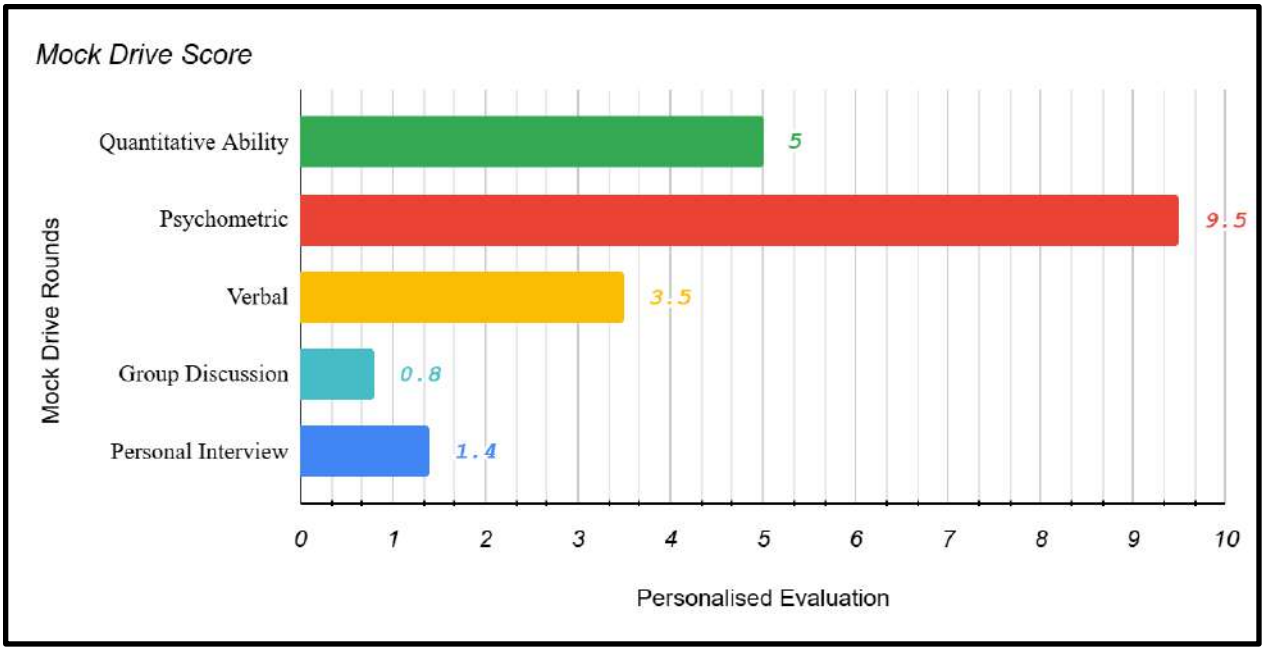
The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:

1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed

in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are outstanding and reflect a high level of cognitive sharpness, emotional intelligence, and self-awareness. You demonstrate not just the ability to solve problems accurately, but also to approach them with strategic thinking and composure. Your consistency across reasoning, personality profiling, and attention-based tasks suggests a mature, well-rounded mindset ready for real-world challenges. To maintain and further polish this excellence, continue exposing yourself to diverse psychometric exercises, especially those that require adaptability and advanced decision-making. Focus on analyzing subtle patterns in data and human behavior, as these will enhance your already strong intuitive grasp. You are operating at a highly competitive level - stay curious, stay reflective, and you'll keep setting new benchmarks for yourself. Outstanding performance: truly impressive!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

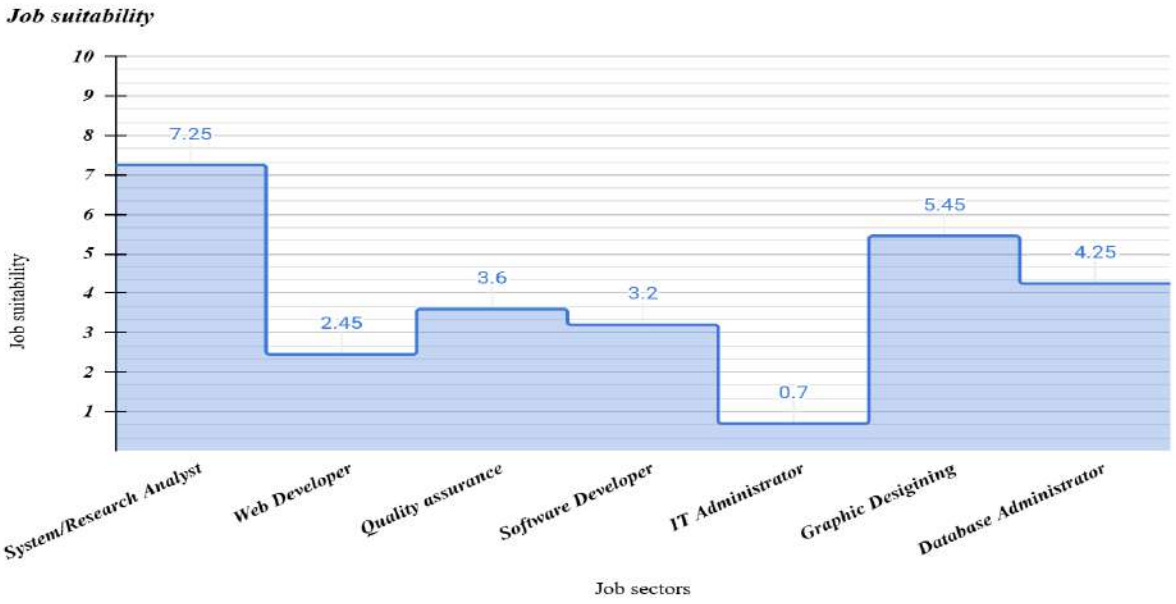
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student shows promising abilities in Group Discussion (GD) and Personal Interview (PI), suggesting average communication and interpersonal skills. Performance in Logical, Verbal, and Quantitative Ability is currently strong and has the potential to improve with strategic effort. Incorporating structured mock tests, guided mentoring sessions, and practice-focused class activities will help bridge the gap. With dedication and continuous learning, the student is well-positioned to elevate performance across all areas.

Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

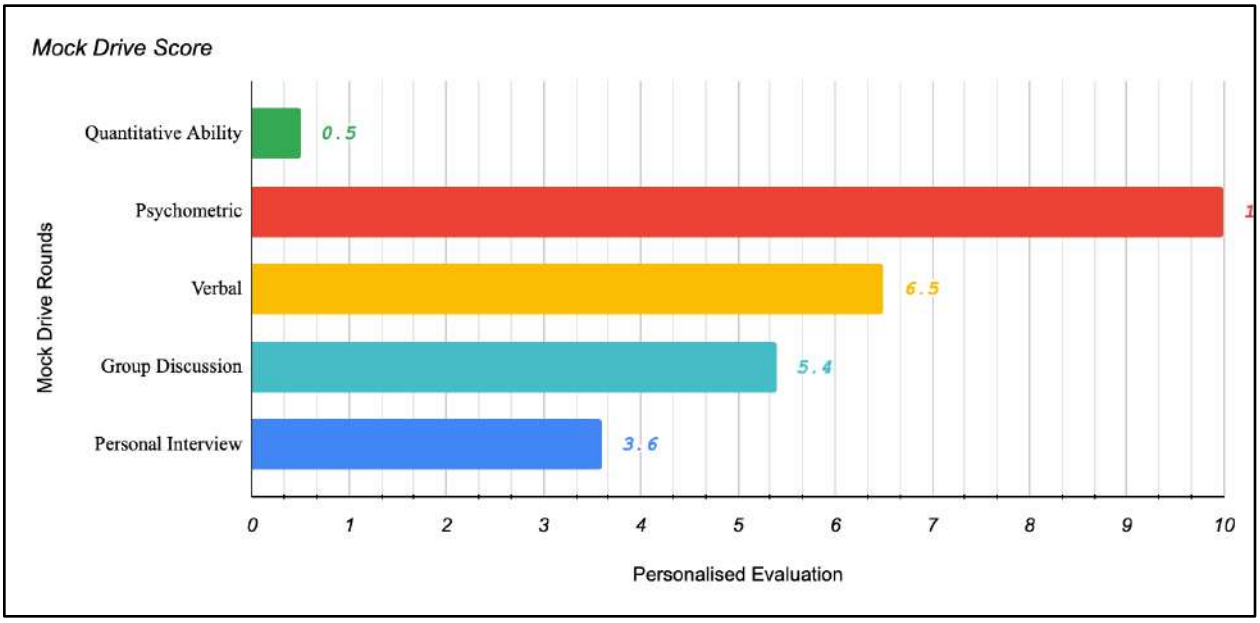
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are outstanding and reflect a high level of cognitive sharpness, emotional intelligence, and self-awareness. You demonstrate not just the ability to solve problems accurately, but also to approach them with strategic thinking and composure. Your consistency across reasoning, personality profiling, and attention-based tasks suggests a mature, well-rounded mindset ready for real-world challenges. To maintain and further polish this excellence, continue exposing yourself to diverse psychometric exercises, especially those that require adaptability and advanced decision-making. Focus on analyzing subtle patterns in data and human behavior, as these will enhance your already strong intuitive grasp. You are operating at a highly competitive level - stay curious, stay reflective, and you'll keep setting new benchmarks for yourself. Outstanding performance: truly impressive!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance with quantitative ability set appears to show that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

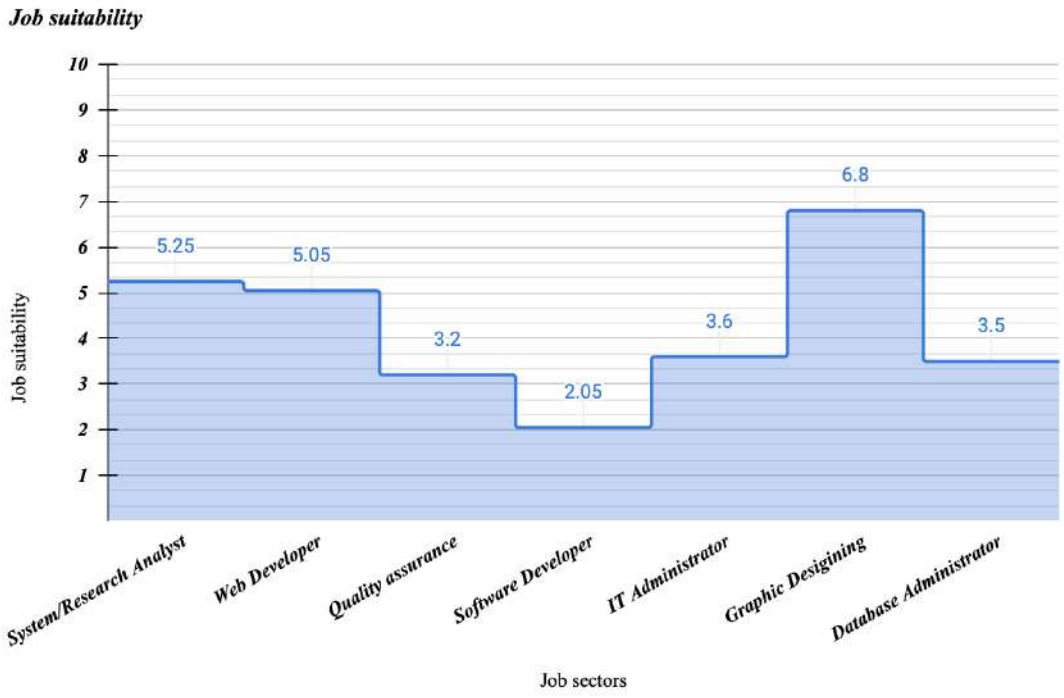
Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**MEDIUM**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**MEDIUM**	You're developing a good foundation for an IT Admin role. Focus on hands-on practice—set up local networks, explore admin panels, and simulate problem-solving scenarios. Learn how to manage servers, handle security protocols, and adapt to new IT tools. A proactive learning approach will significantly boost your chances.
Graphic Designing	**GOOD**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense. Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student shows promising abilities in Group Discussion (GD) and Personal Interview (PI), suggesting strong communication and interpersonal skills. Performance in Logical, Verbal, and Quantitative Ability is currently average and has the potential to improve with strategic effort. Incorporating structured mock tests, guided mentoring sessions, and practice-focused class activities will help bridge the gap. With dedication and continuous learning, the student is well-positioned to elevate performance across all areas.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Psychometric (20)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

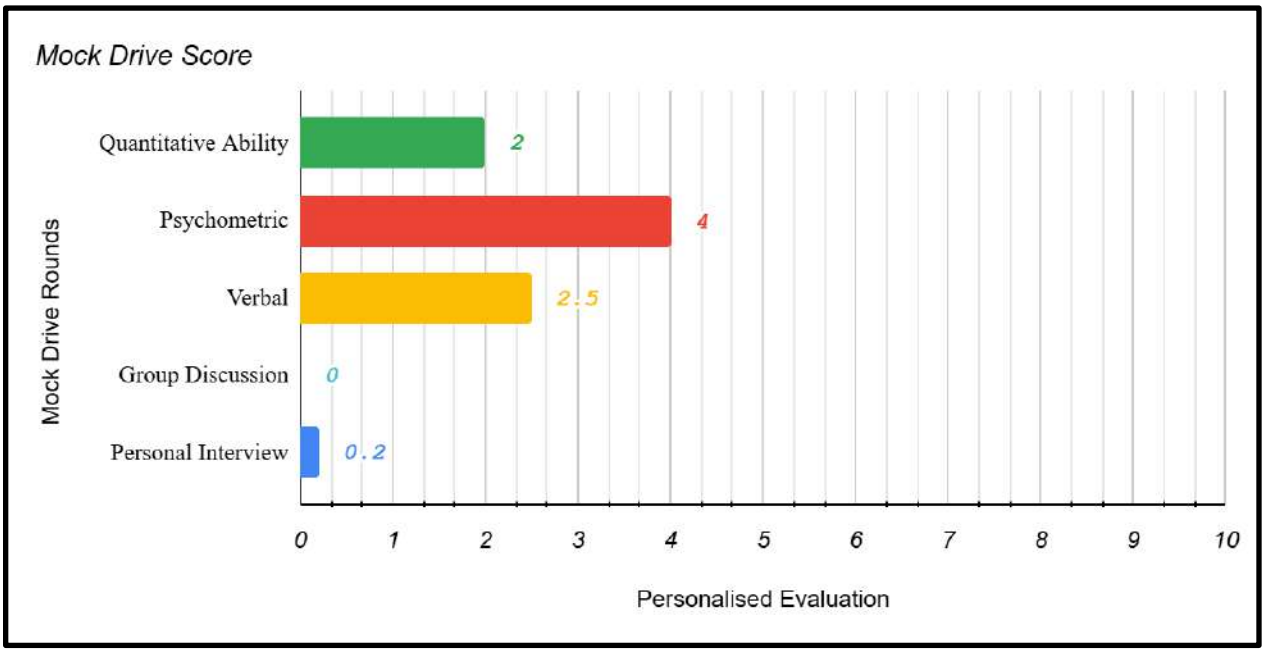
• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable

Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an

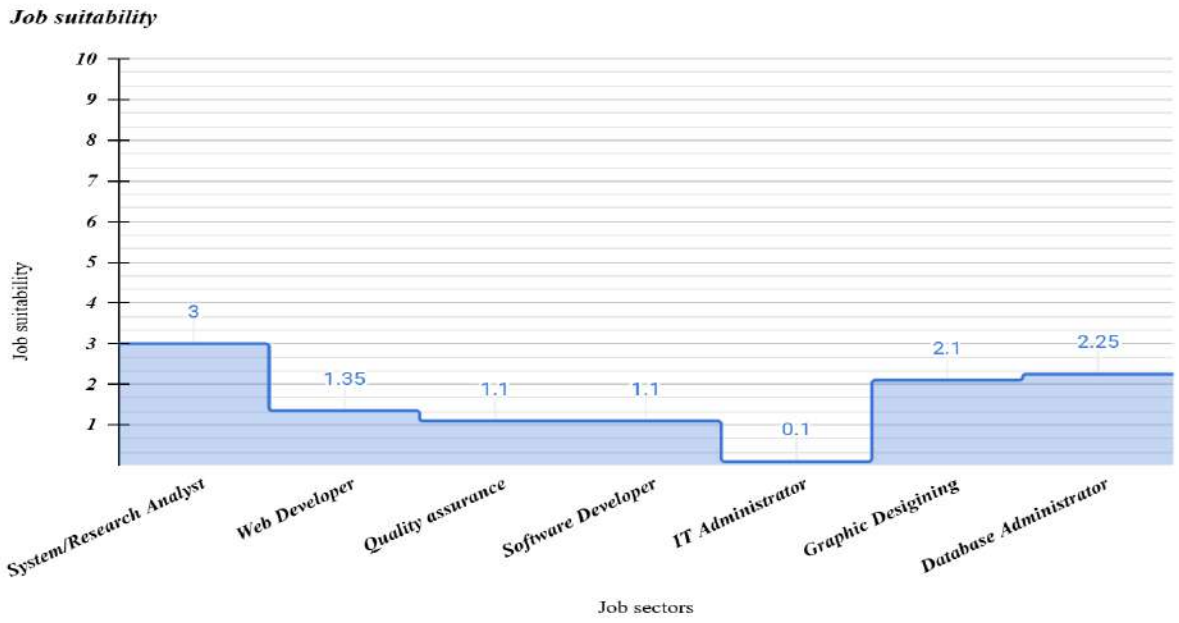
opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**LOW**	Your current profile shows limited alignment with the requirements of a System/Research Analyst. Focus on strengthening your analytical and problem-solving skills. Work on becoming proficient in tools like Excel, Python, or Power BI for data analysis. Improve your communication and presentation skills to effectively share insights. Regular practice with case studies or business analysis scenarios can also help.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	Your current portfolio or skill set needs more work to align with graphic design expectations. Begin with mastering tools like Adobe Photoshop, Illustrator, and Canva. Understand design principles like balance, contrast, and typography. Try replicating existing designs to learn techniques, then move on to creating original work.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Strong	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Blindly re- answer all questions after reviewing initial answers. 2. Write expository paragraphs and design multiple- choice questions. 3. Debate passage interpretations with a partner weekly. 4. Log idioms and practice using them correctly weekly. 5. Insert distracting questions and pause before answering
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher

		questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. Group Discussion (GD) and Personal Interview (PI) skills need to be developed and there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

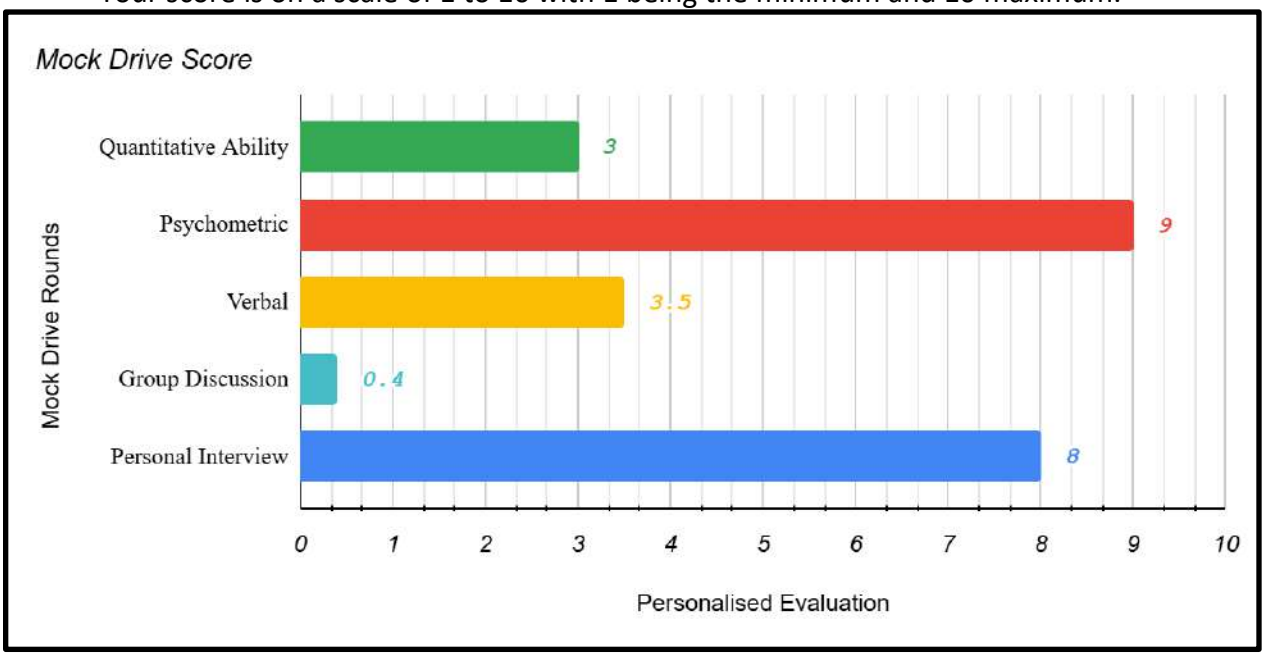
3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the

fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

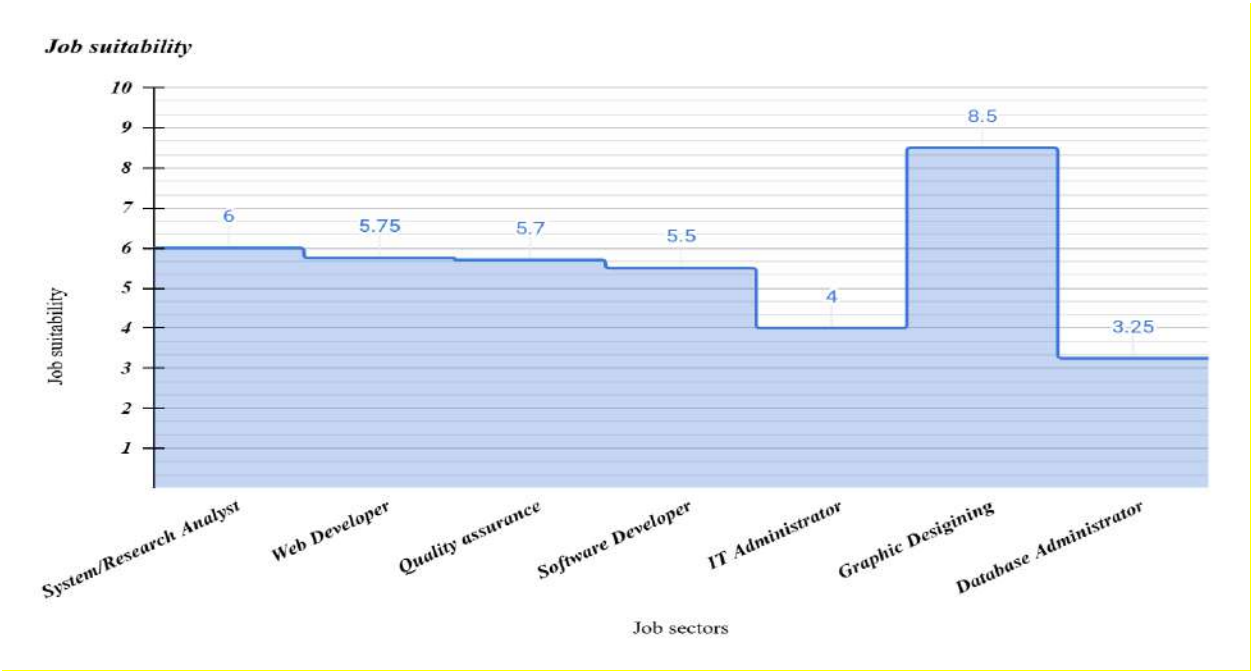
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

You approached the PI round with professionalism and a clear sense of preparation. Your confidence and maturity came through well, which created a strong first impression. Your responses were generally clear and well-structured. To further enhance your performance, focus on backing your answers with specific, relevant examples from your experiences—whether academic, extracurricular, or personal. This will help you demonstrate depth of thought and a stronger connection between your experiences and the role you're aspiring for. In situations where a question feels vague or unclear, feel free to ask for clarification. Doing so not only reflects presence of mind but also ensures your response aligns with the interviewer's expectations. Continue building on the good foundation you've established. With more practice and reflection, you'll be well-prepared to handle even more challenging interviews. Keep up the effort, and best wishes for your next steps!

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**MEDIUM**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**MEDIUM**	You're developing a good foundation for an IT Admin role. Focus on hands-on practice—set up local networks, explore admin panels, and simulate problem-solving scenarios. Learn how to manage servers, handle security protocols, and adapt to new IT tools. A proactive learning approach will significantly boost your chances.
Graphic Designing	**GOOD**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense. Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.

Personal Interview	Moderate	1. Prepare an impressive "tell me about yourself" 2. Maintain positive body language 3. Put efforts to talk more about your strengths and accomplishments 4. Answer every question confidently and with a relevant example 5. Work on your CV 6. Practice relaxation techniques such as deep breathing or visualization to calm your nerves.

6.0 Performance Summary:

The student shows promising abilities in Personal Interview (PI), suggesting strong communication and interpersonal skills. Performance in Logical, Verbal, Group Discussion (GD) and Quantitative Ability is currently average and has the potential to improve with strategic effort. Incorporating structured mock tests, guided mentoring sessions, and practice-focused class activities will help bridge the gap. With dedication and continuous learning, the student is well-positioned to elevate performance across all areas.

Corporate Readiness Chart						
PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
Psychometric (20)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %
Quantitative (20)						
Verbal (20)	Pseudo coding (30)			B (Dream Company)	6- 10 lakh	70- 79 %
GD (20)	Programming (30)			C (Ideal Company)	3-6 Lakh	60 - 69 %

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

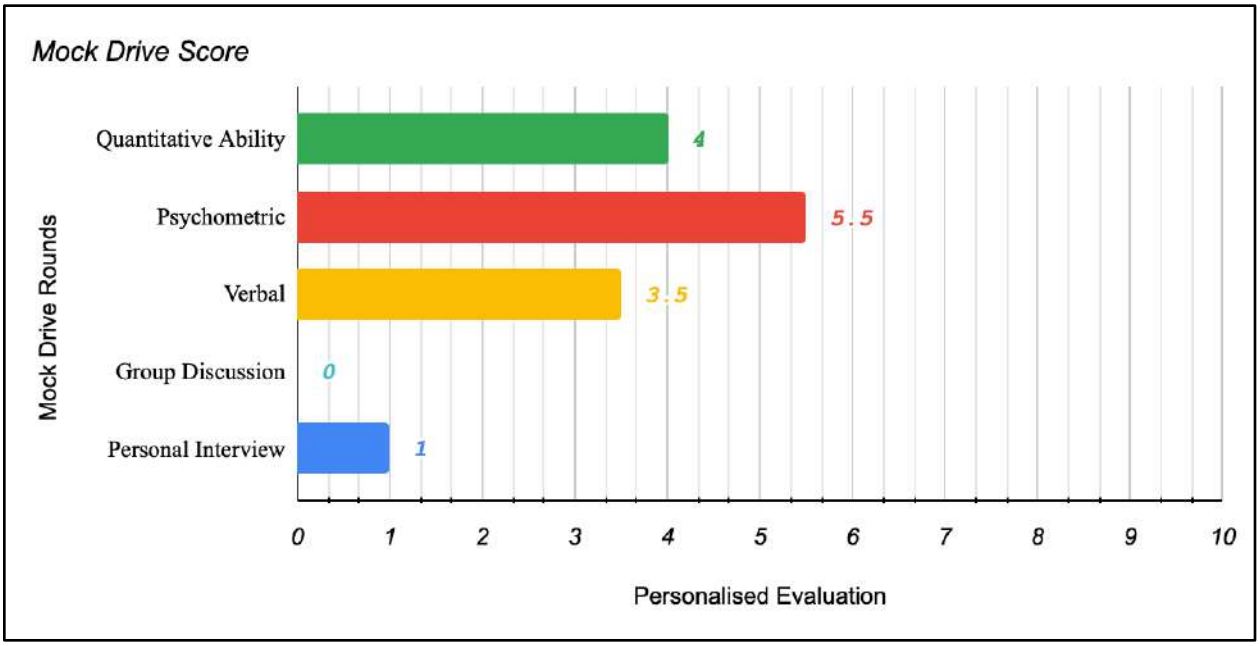
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

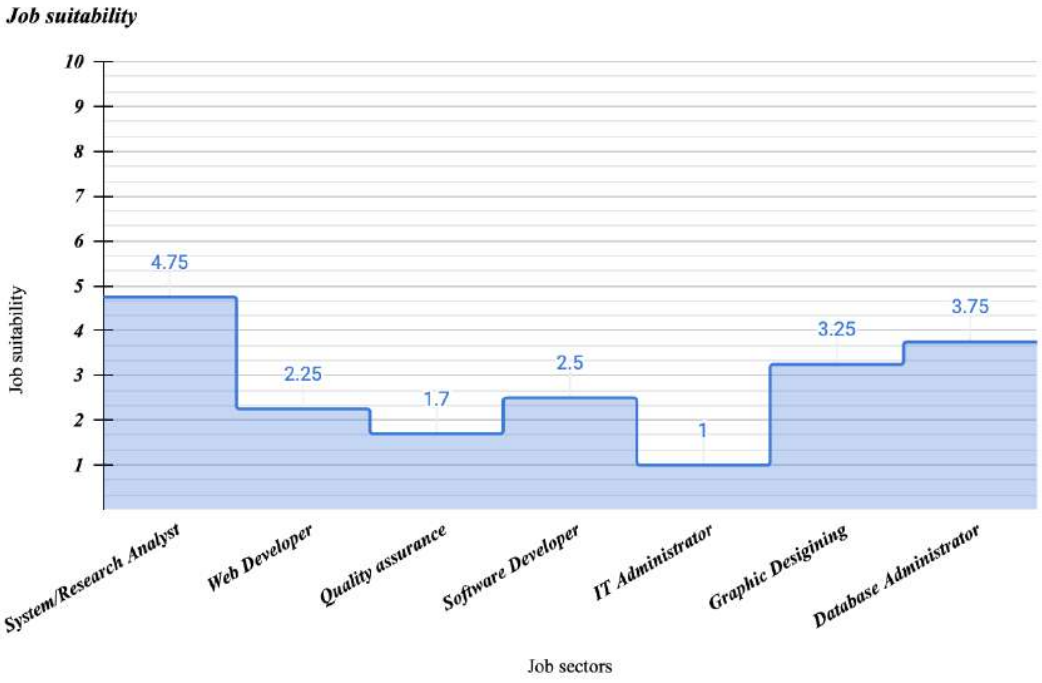
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.

Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	Your current portfolio or skill set needs more work to align with graphic design expectations. Begin with mastering tools like Adobe Photoshop, Illustrator, and Canva. Understand design principles like balance, contrast, and typography. Try replicating existing designs to learn techniques, then move on to creating original work.

Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Strong	1. Practice timed mock tests to improve accuracy and speed. 2. Focus on improving logical reasoning and verbal ability sections. 3. Avoid overthinking questions—go with instinct where necessary. 4. Review explanations of wrong answers to understand your pattern of errors. 5. Be consistent in practice to reduce performance anxiety during the actual test.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.

Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Corporate Readiness Chart						
PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

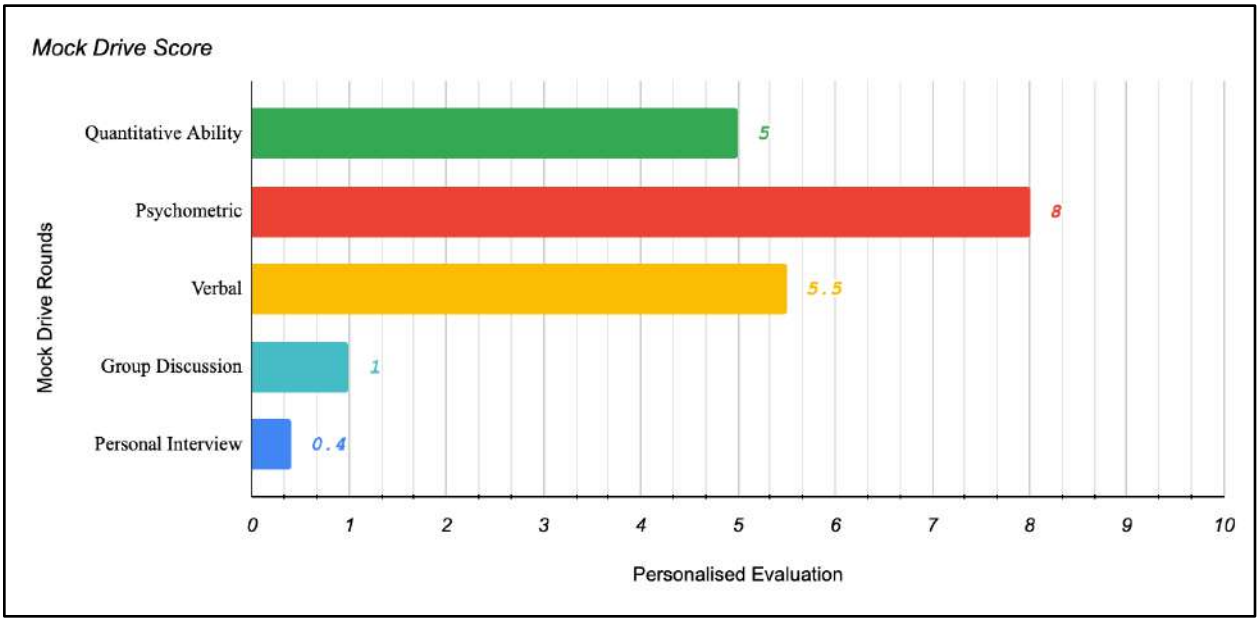
The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

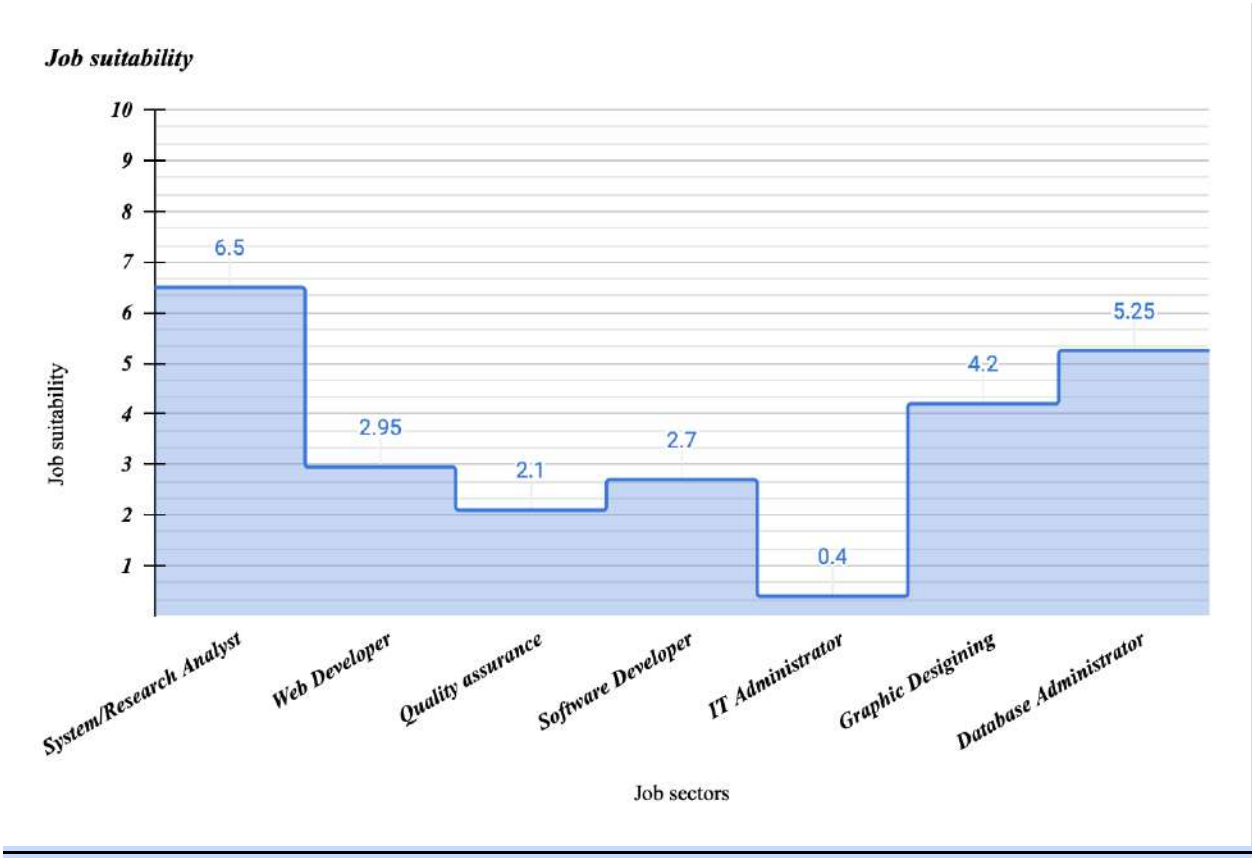
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems

		like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with

		large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Moderate	1. Blindly re- answer all questions after reviewing initial answers. 2. Write expository paragraphs and design multiple- choice questions. 3. Debate passage interpretations with a partner weekly. 4. Log idioms and practice using them correctly weekly. 5. Insert distracting questions and pause before answering
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals.

		4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student shows promising abilities in Group Discussion (GD) and Personal Interview (PI), suggesting strong communication and interpersonal skills. Performance in Logical, Verbal, and Quantitative Ability is currently average and has the potential to improve with strategic effort. Incorporating structured mock tests, guided mentoring sessions, and practice-focused class activities will help bridge the gap. With dedication and continuous learning, the student is well-positioned to elevate performance across all areas.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

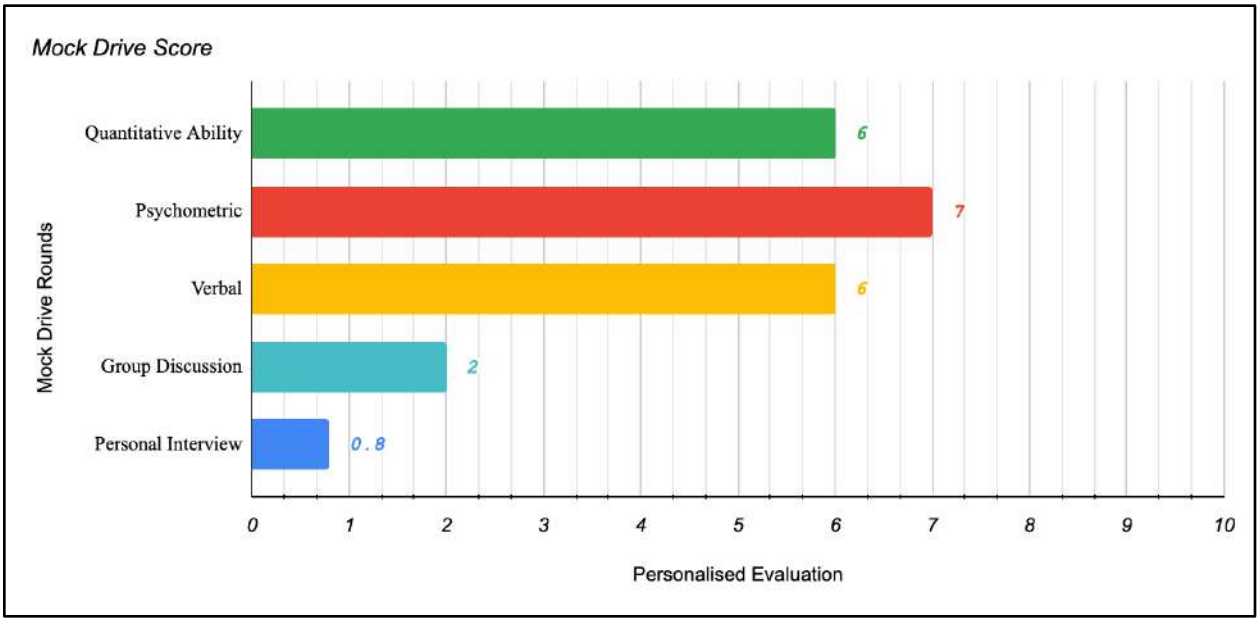
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

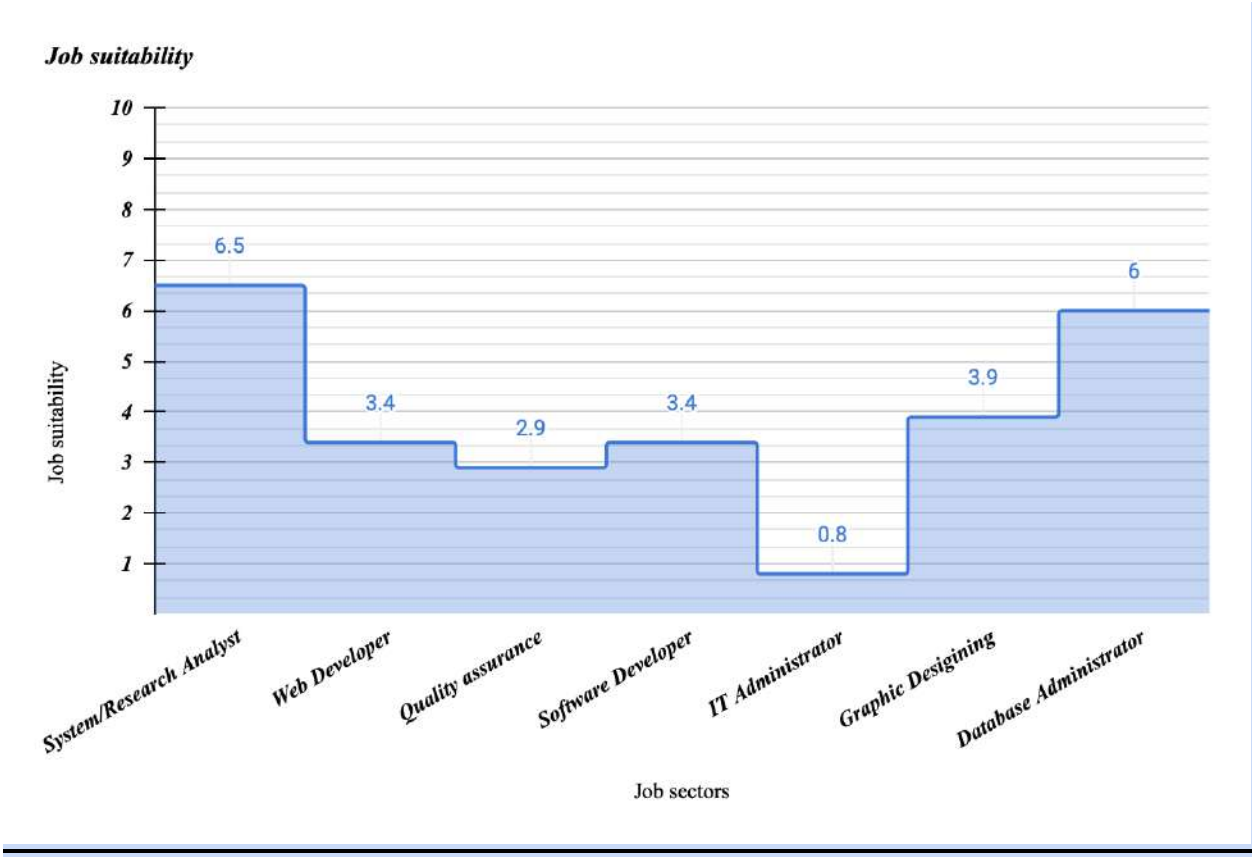
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**MEDIUM**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech

		concepts clearly. With consistent effort, your chances of landing this role will improve.
Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**GOOD**	You show strong potential as a DBA. Your understanding of SQL, data structures, and systems is impressive. Continue honing your skills with complex queries, optimize performance, and explore cloud database services. Stay updated with

		trends in data security and NoSQL systems to future-proof your skill set.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Moderate	1. Blindly re- answer all questions after reviewing initial answers. 2. Write expository paragraphs and design multiple- choice questions. 3. Debate passage interpretations with a partner weekly. 4. Log idioms and practice using them correctly weekly. 5. Insert distracting questions and pause before answering
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals.

		4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student shows promising abilities in Group Discussion (GD) and Personal Interview (PI), suggesting strong communication and interpersonal skills. Performance in Logical, Verbal, and Quantitative Ability is currently average and has the potential to improve with strategic effort. Incorporating structured mock tests, guided mentoring sessions, and practice-focused class activities will help bridge the gap. With dedication and continuous learning, the student is well-positioned to elevate performance across all areas.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Psychometric (20)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %
	Quantitative (20)						
	Verbal (20)	Pseudo coding (30)			B (Dream Company)	6- 10 lakh	70- 79 %
	GD (20)	Programming (30)			C (Ideal Company)	3-6 Lakh	60 - 69 %
	PI (20)	Technical Interview (20)			D (Average Company)	Below 3 lakh	50 - 59 %
	43.6	-			E (Not Fit for Corporate)	NFC	Less than 50 %

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

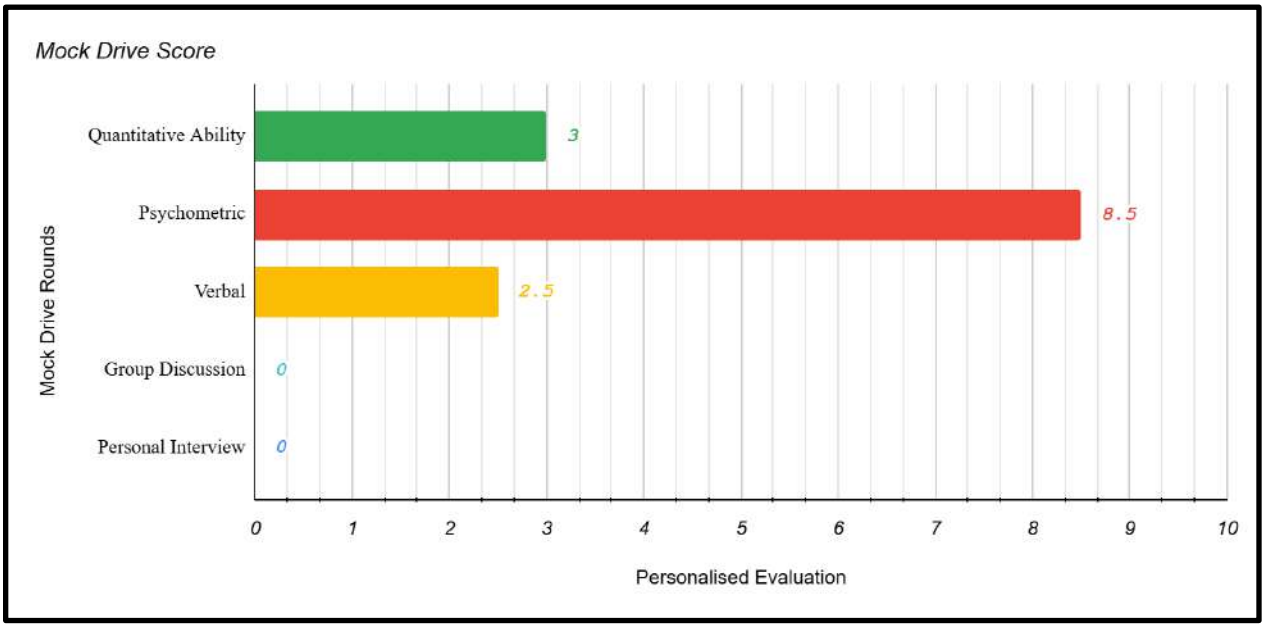
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an

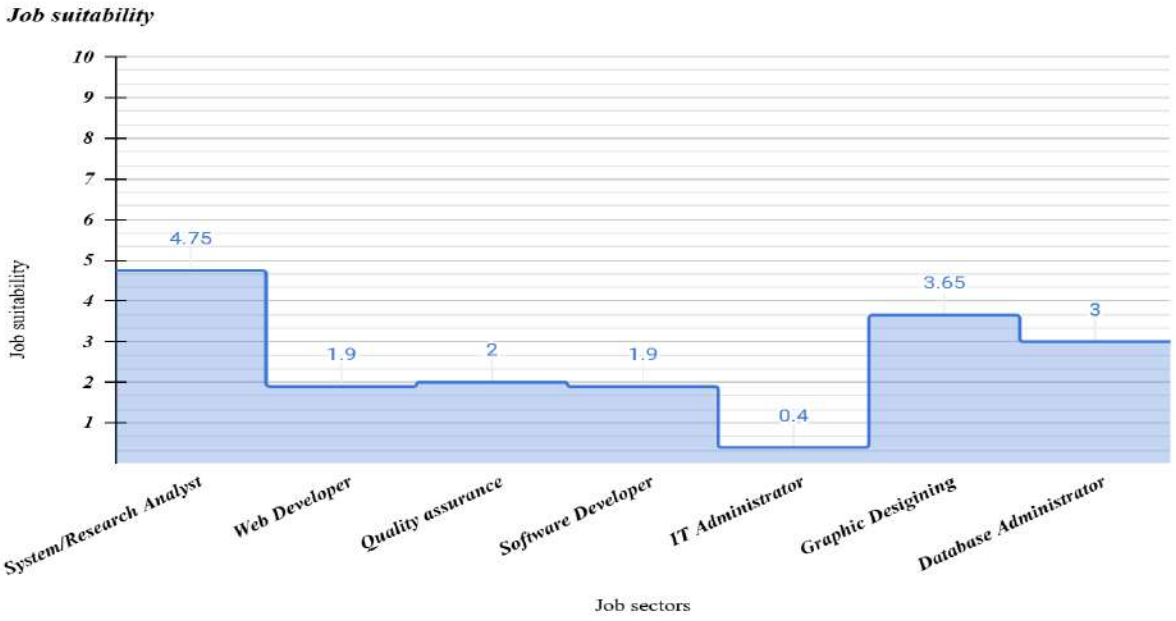
opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1.Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3.Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking.

		5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

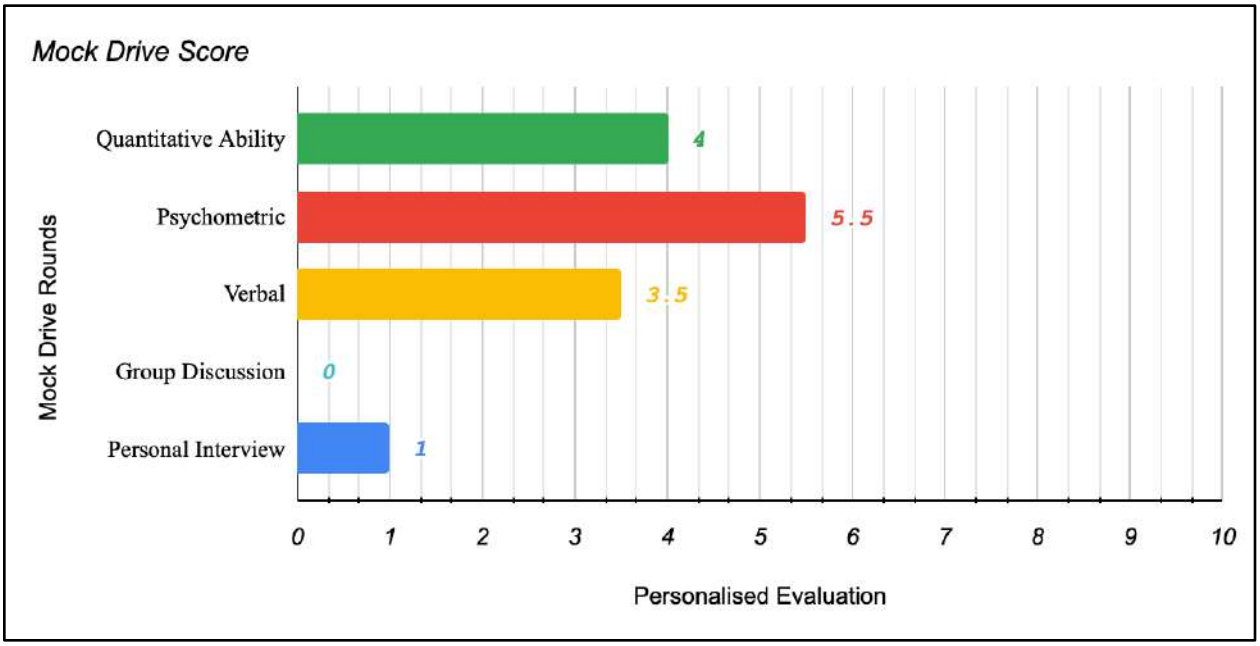
3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

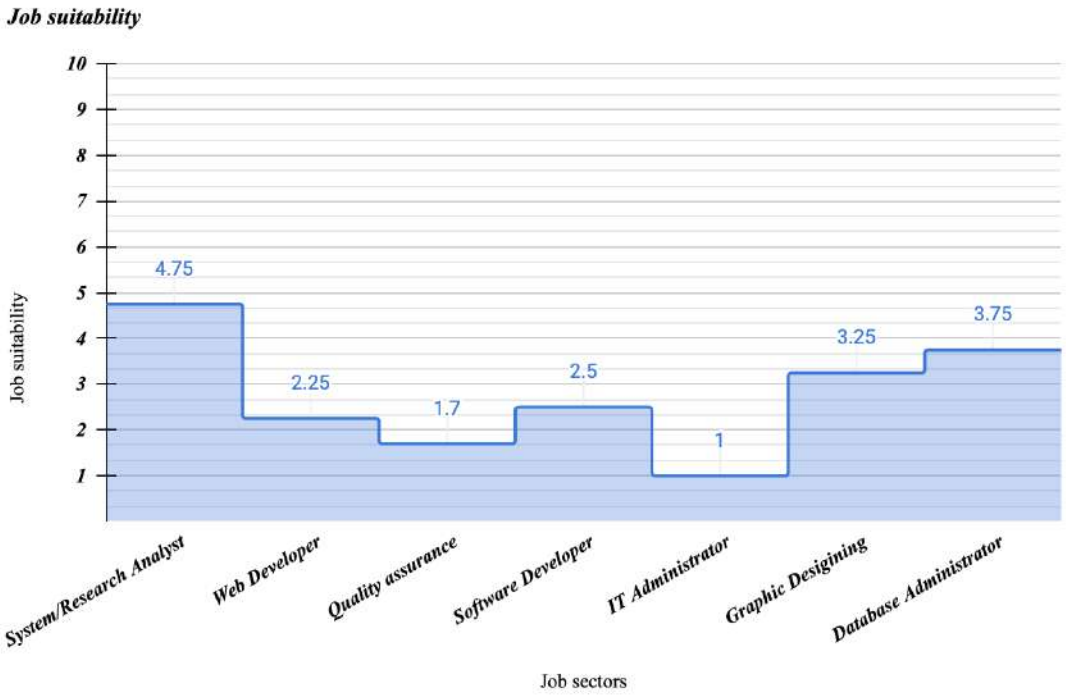
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems

		like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	Your current portfolio or skill set needs more work to align with graphic design expectations. Begin with mastering tools like Adobe Photoshop, Illustrator, and Canva. Understand design principles like balance, contrast, and typography. Try replicating existing designs to learn techniques, then move on to creating original work.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with

		large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Strong	1. Practice timed mock tests to improve accuracy and speed. 2. Focus on improving logical reasoning and verbal ability sections. 3. Avoid overthinking questions—go with instinct where necessary. 4. Review explanations of wrong answers to understand your pattern of errors. 5. Be consistent in practice to reduce performance anxiety during the actual test.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal	Strong	1. Deeply introspect and prepare thoughtful answers to personal and

Interview		career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Corporate Readiness Chart						
PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

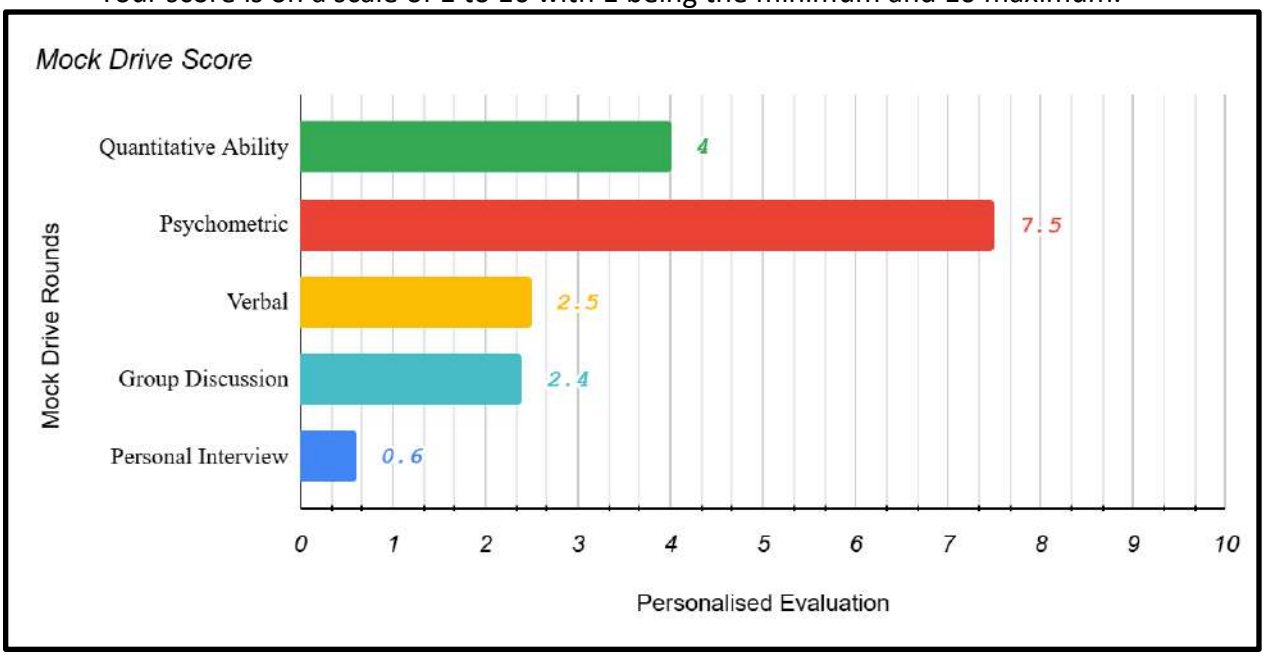
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to

understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

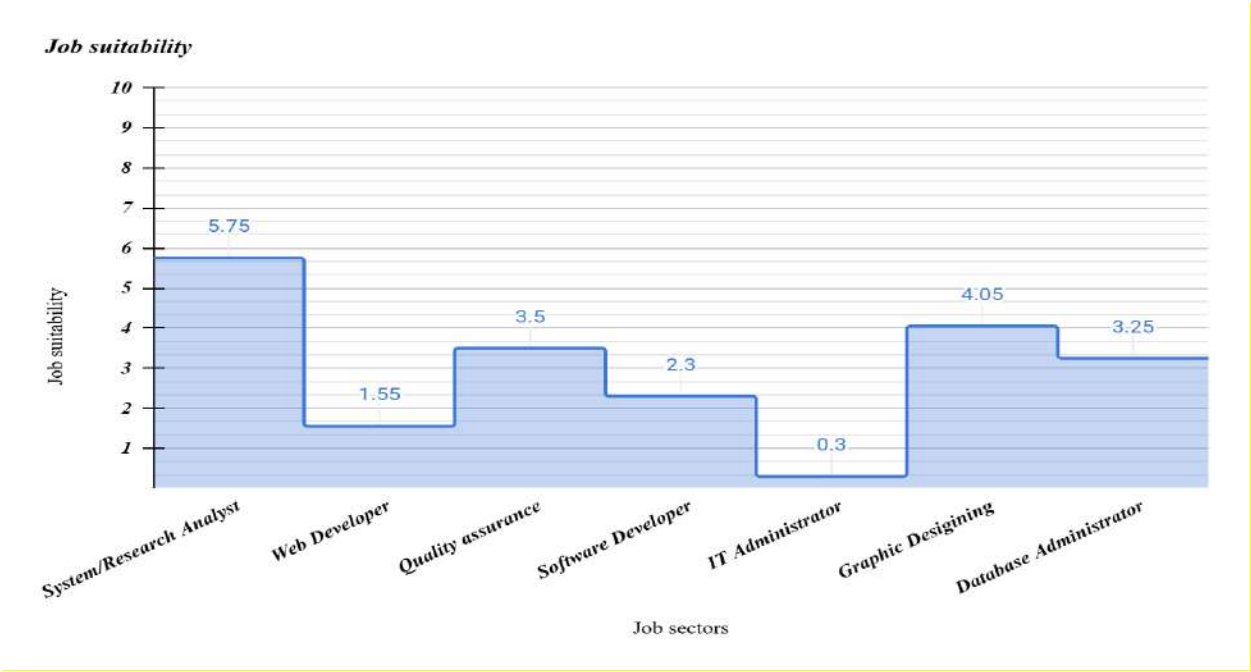
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher

		questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. Group Discussion (GD) and Personal Interview (PI) skills need to be developed and there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

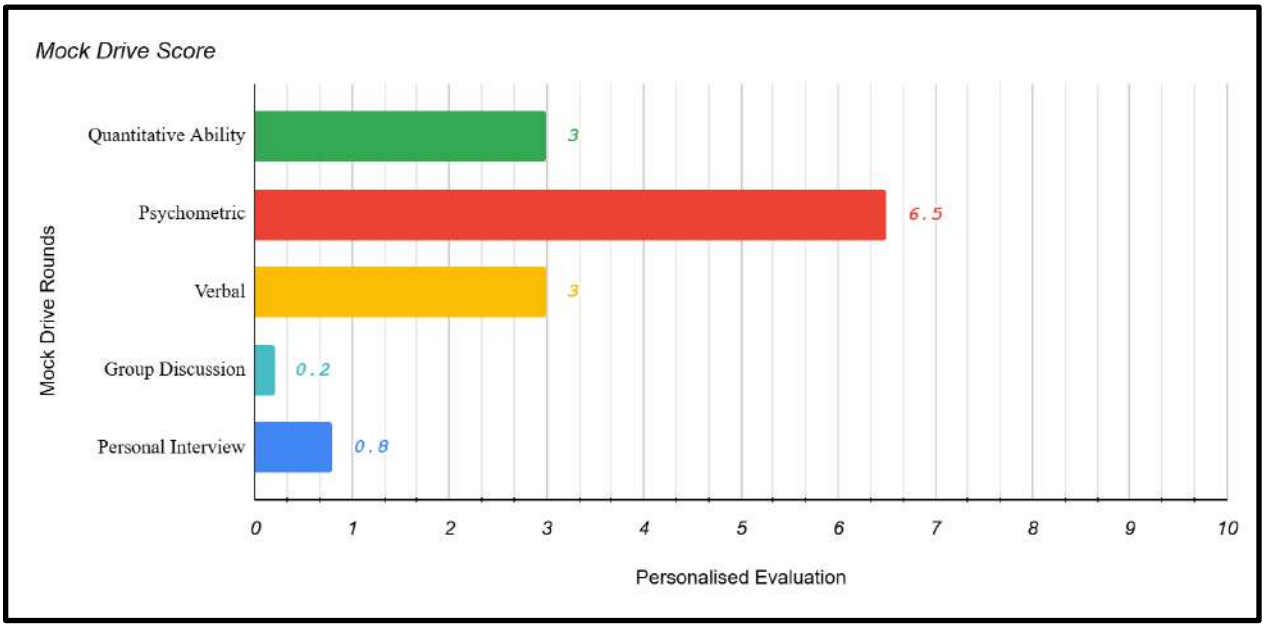
3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an

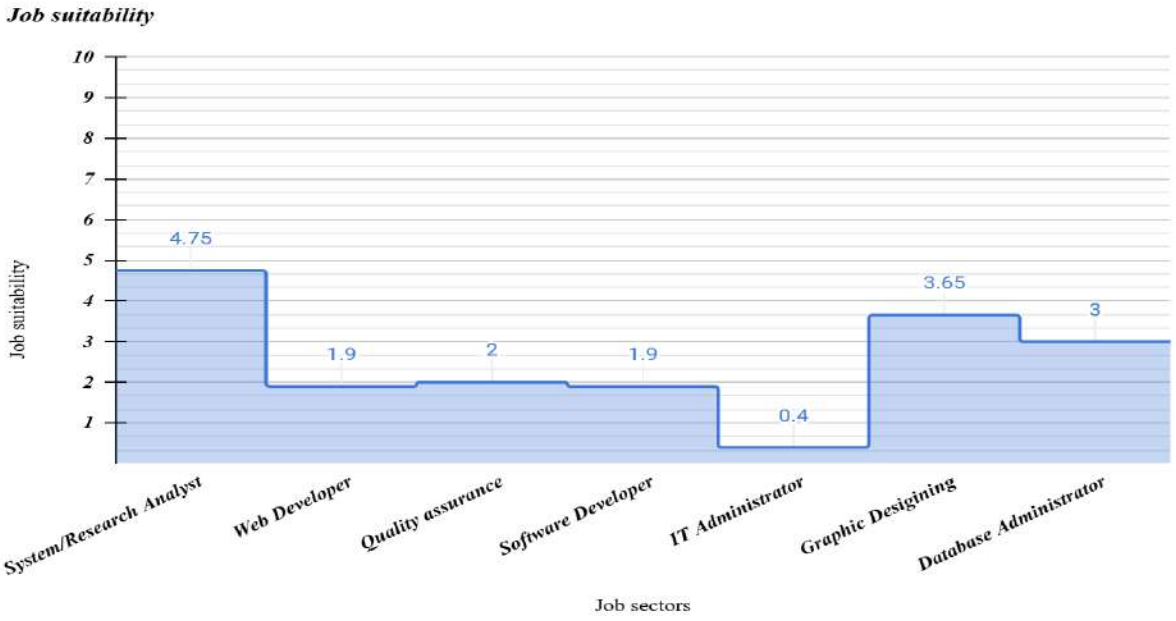
opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. • Large Services Companies

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

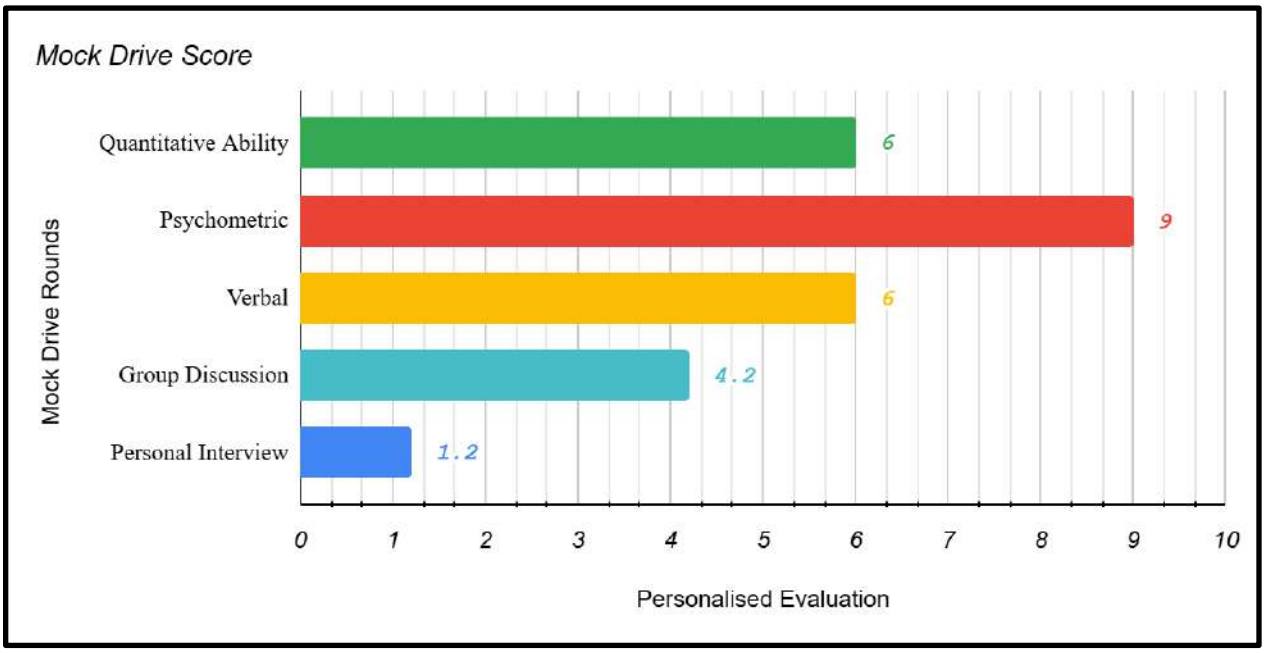
• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable

Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions..

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

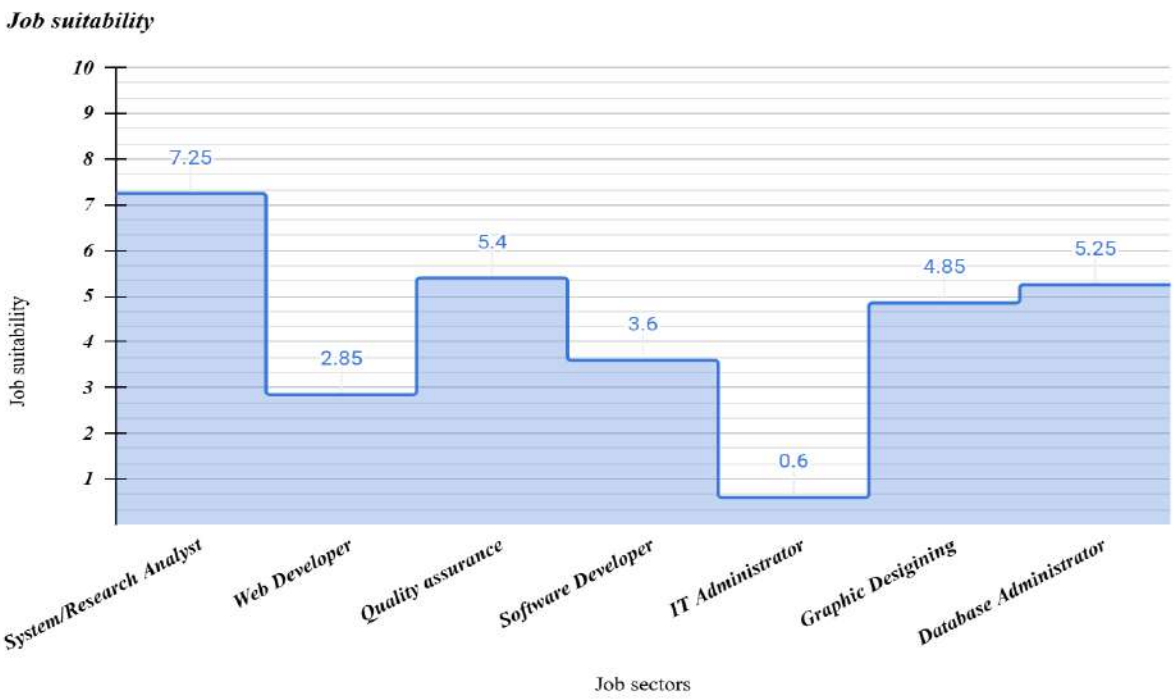
It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Moderate	1. Blindly re- answer all questions after reviewing initial answers. 2. Write expository paragraphs and design multiple- choice questions. 3. Debate passage interpretations with a partner weekly. 4. Log idioms and practice using them correctly weekly. 5. Insert distracting questions and pause before answering
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher

		questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. Group Discussion (GD) and Personal Interview (PI) skills need to be developed and there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

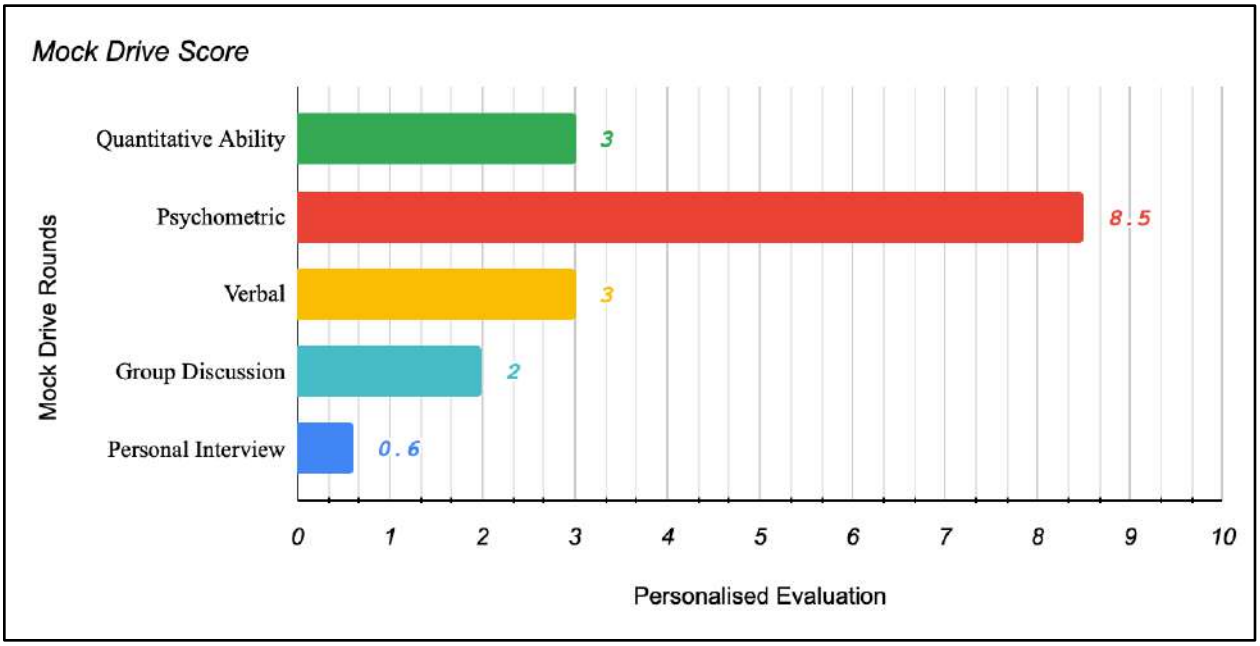
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

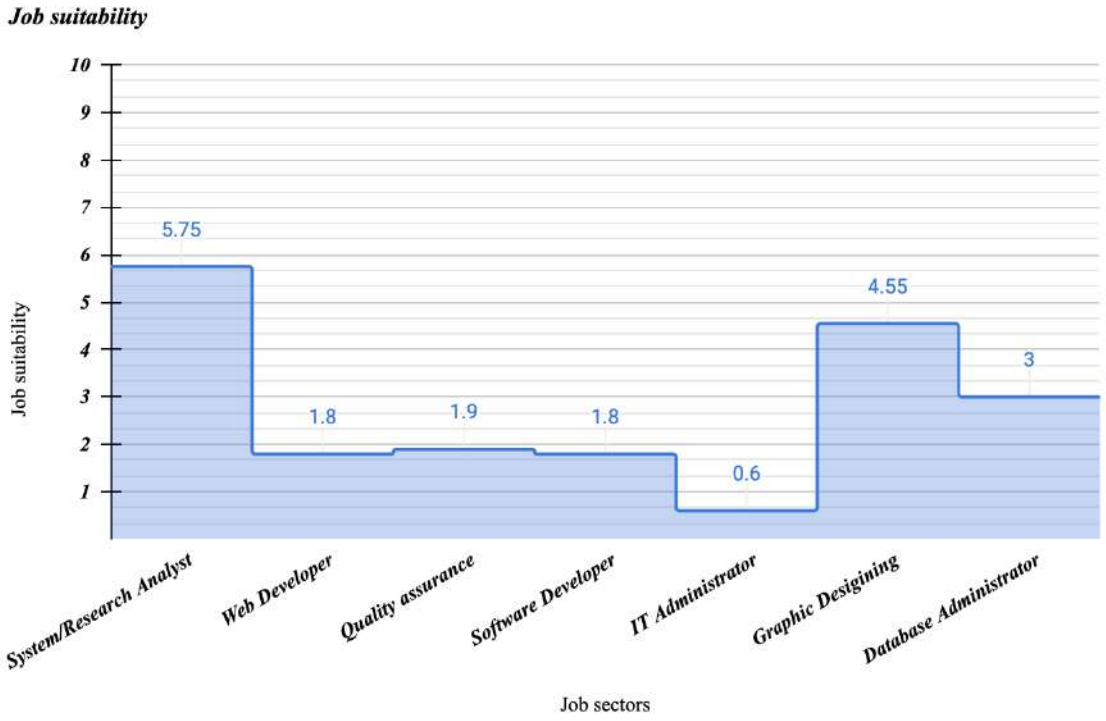
It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.

Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.

Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.

Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

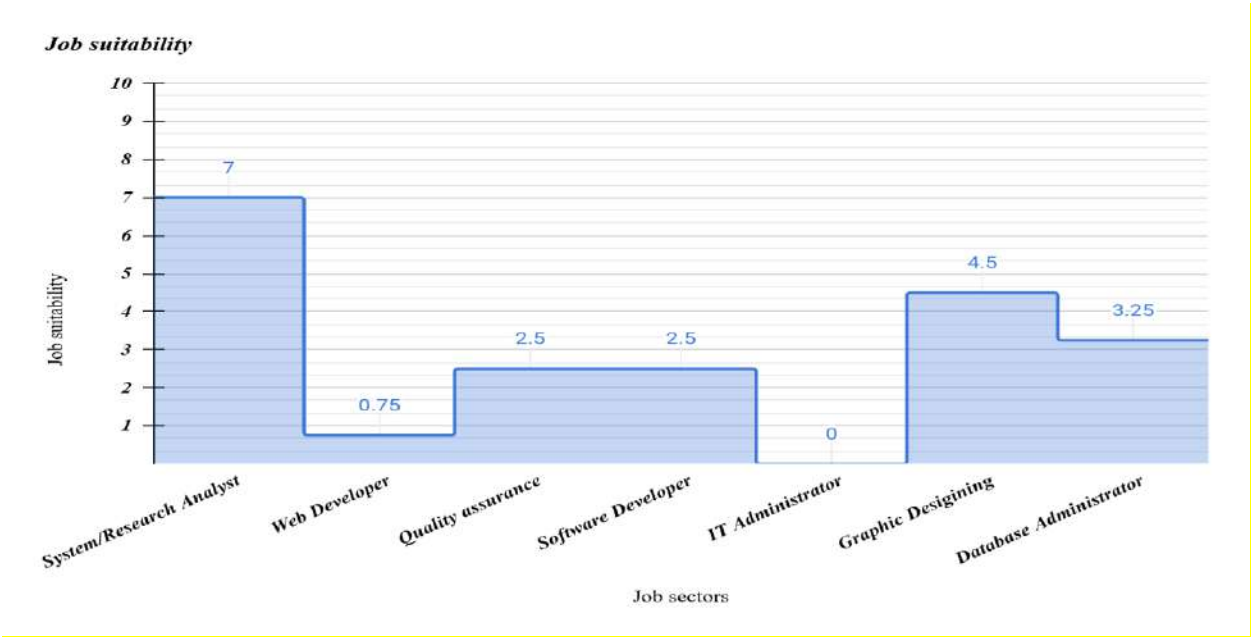
Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Blindly re- answer all questions after reviewing initial answers. 2. Write expository paragraphs and design multiple- choice questions. 3. Debate passage interpretations with a partner weekly. 4. Log idioms and practice using them correctly weekly. 5. Insert distracting questions and pause before answering
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. Group Discussion (GD) and Personal Interview (PI) skills need to be developed and there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

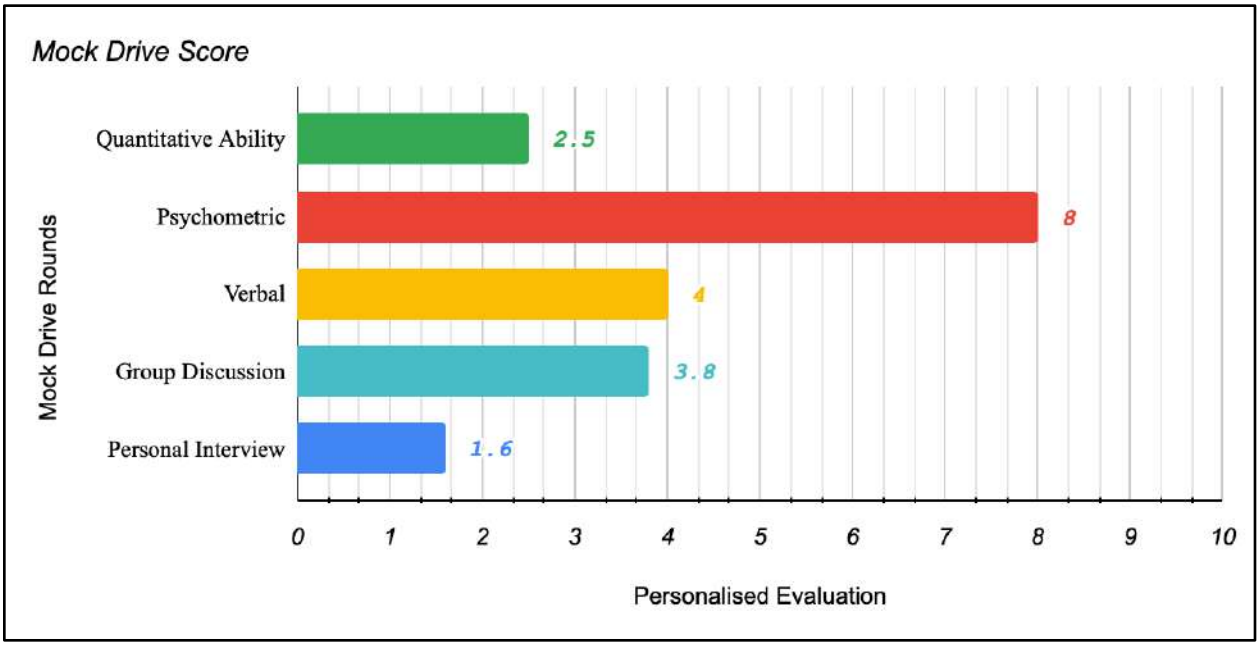
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

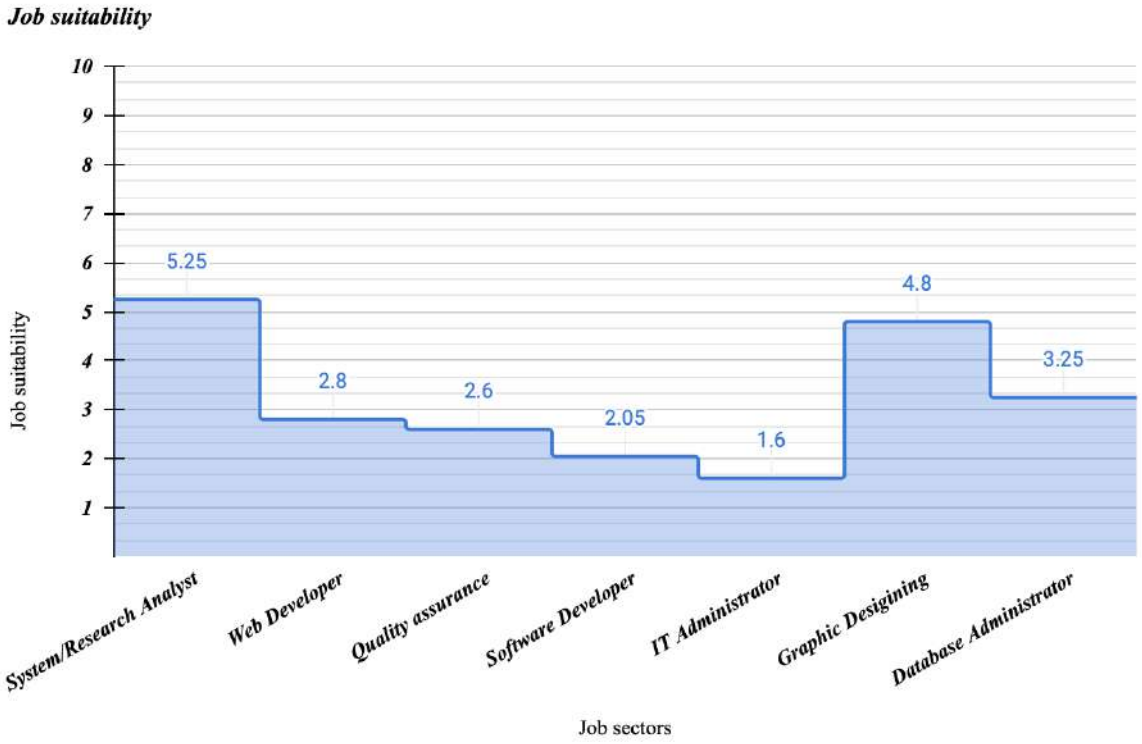
It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.

Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.

Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.

Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

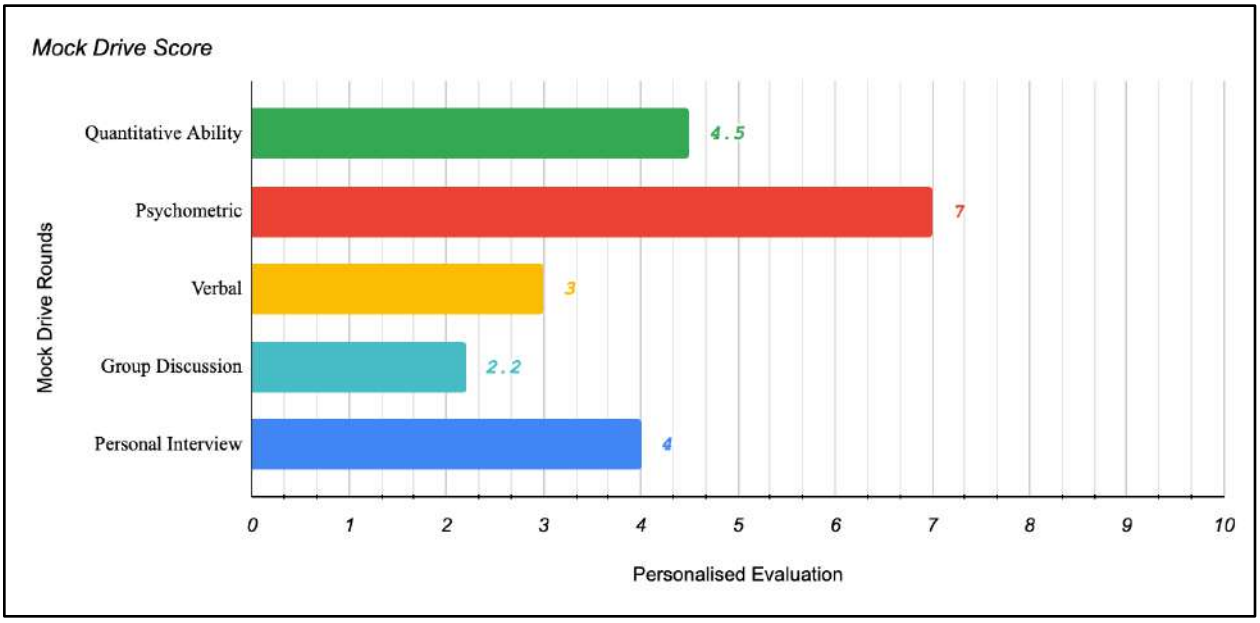
3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

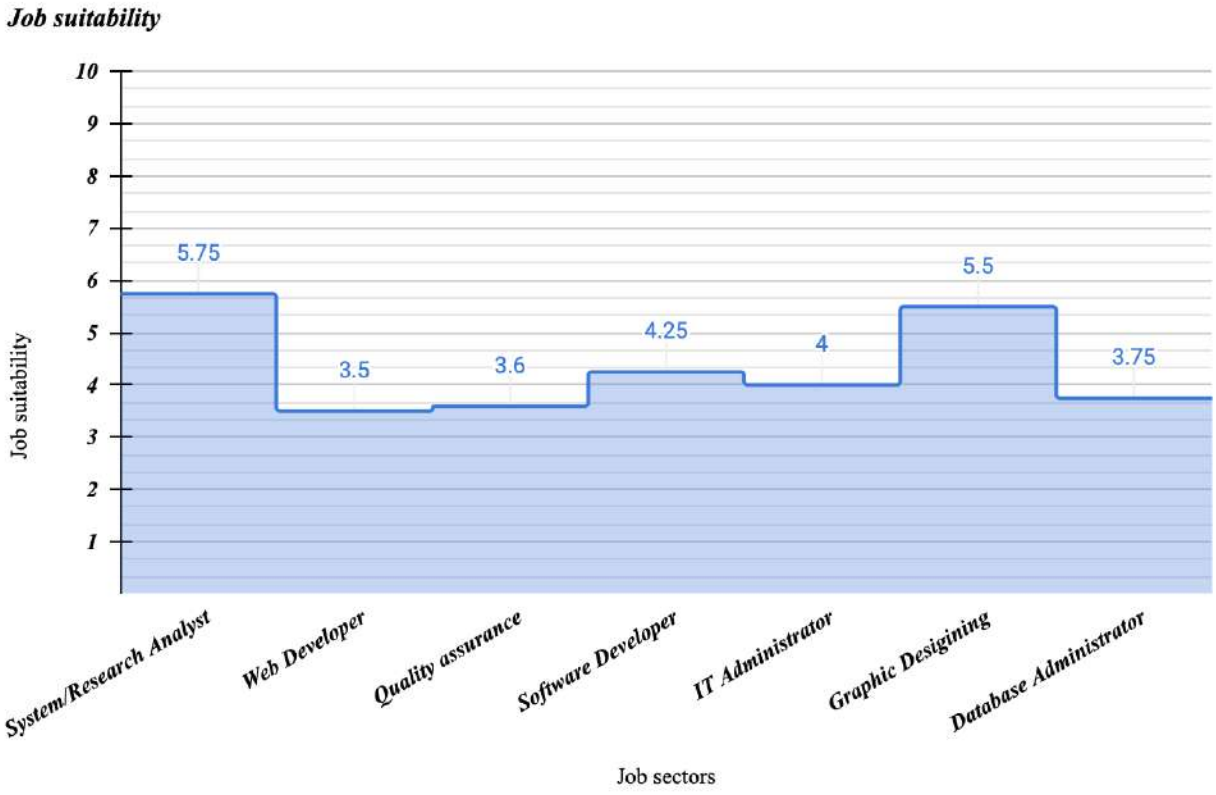
Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.

Web Developer	**MEDIUM**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.
Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**MEDIUM**	You're developing a good foundation for an IT Admin role. Focus on hands-on practice—set up local networks, explore admin panels, and simulate problem-solving scenarios. Learn how to manage servers, handle security protocols, and adapt to new IT tools. A proactive learning approach will significantly boost your chances.
Graphic Designing	**GOOD**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense. Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with

		large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions.

		2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student shows promising abilities in Group Discussion (GD) and Personal Interview (PI), suggesting strong communication and interpersonal skills. Performance in Logical, Verbal, and Quantitative Ability is currently average and has the potential to improve with strategic effort. Incorporating structured mock tests, guided mentoring sessions, and practice-focused class activities will help bridge the gap. With dedication and continuous learning, the student is well-positioned to elevate performance across all areas.

	Corporate Readiness Chart

These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

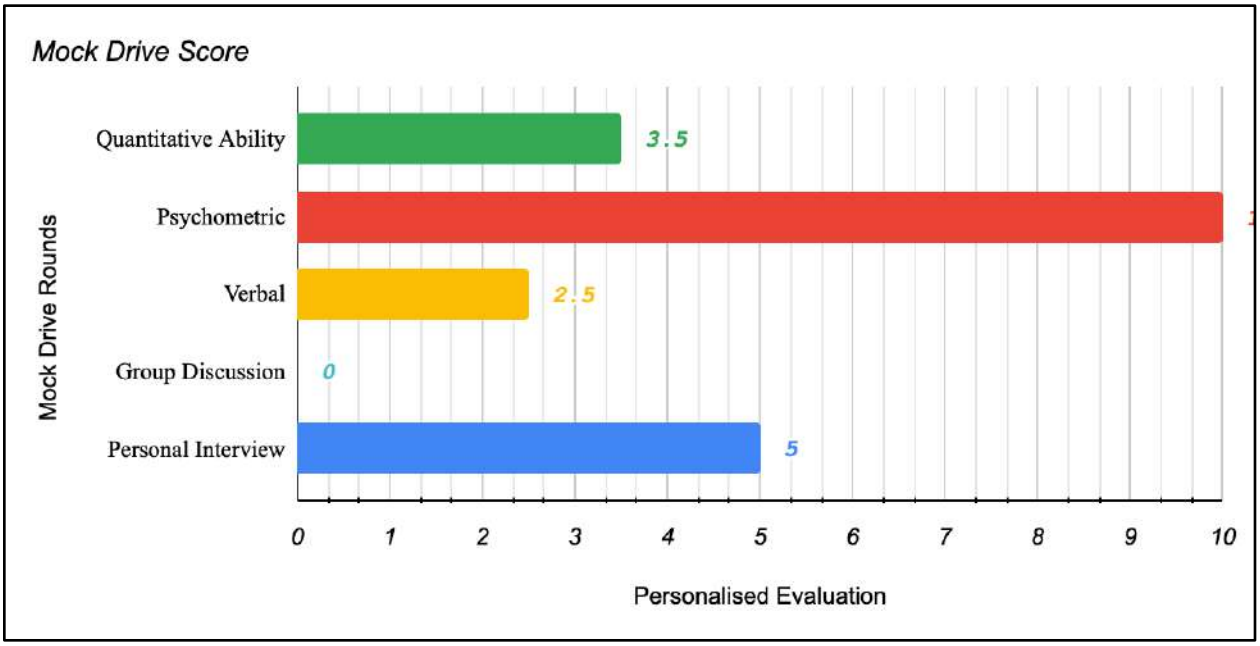
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

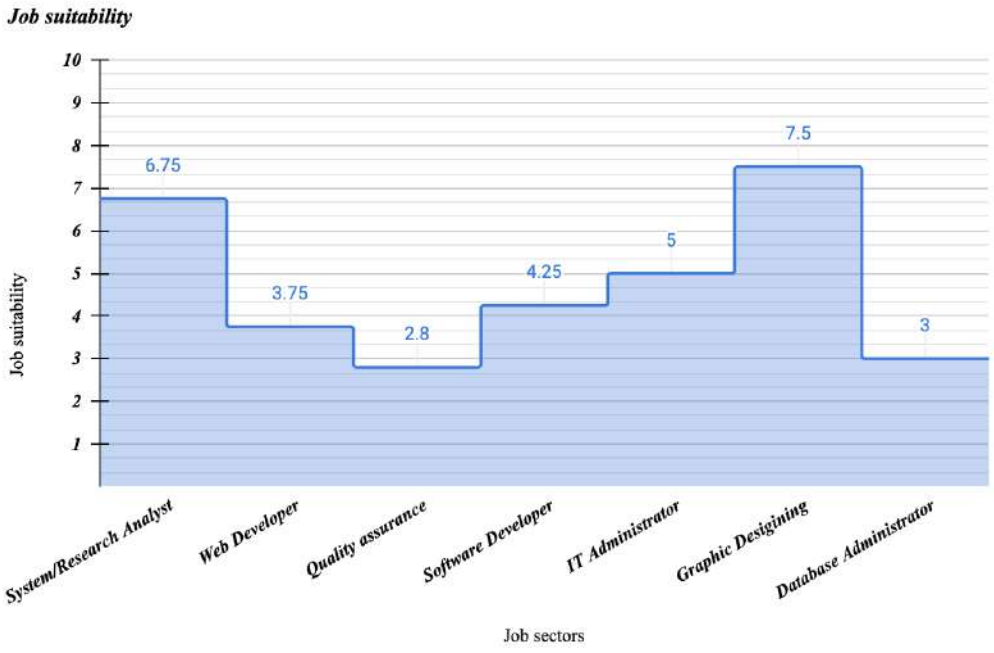
Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.

Web Developer	**MEDIUM**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.
Quality assurance	**LOW**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**MEDIUM**	You're developing a good foundation for an IT Admin role. Focus on hands-on practice—set up local networks, explore admin panels, and simulate problem-solving scenarios. Learn how to manage servers, handle security protocols, and adapt to new IT tools. A proactive learning approach will significantly boost your chances.
Graphic Designing	**GOOD**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense. Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with

		database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions.

		2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student shows promising abilities in Group Discussion (GD) and Personal Interview (PI), suggesting strong communication and interpersonal skills. Performance in Logical, Verbal, and Quantitative Ability is currently average and has the potential to improve with strategic effort. Incorporating structured mock tests, guided mentoring sessions, and practice-focused class activities will help bridge the gap. With dedication and continuous learning, the student is well-positioned to elevate performance across all areas.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Psychometric (20)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %

Mock Drive Analysis

Name:	PATEL FARJ MAHENDRABHAI
Enrollment Number:	2314405047
Course:	*BCA*
Date:	*18th March 2024*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

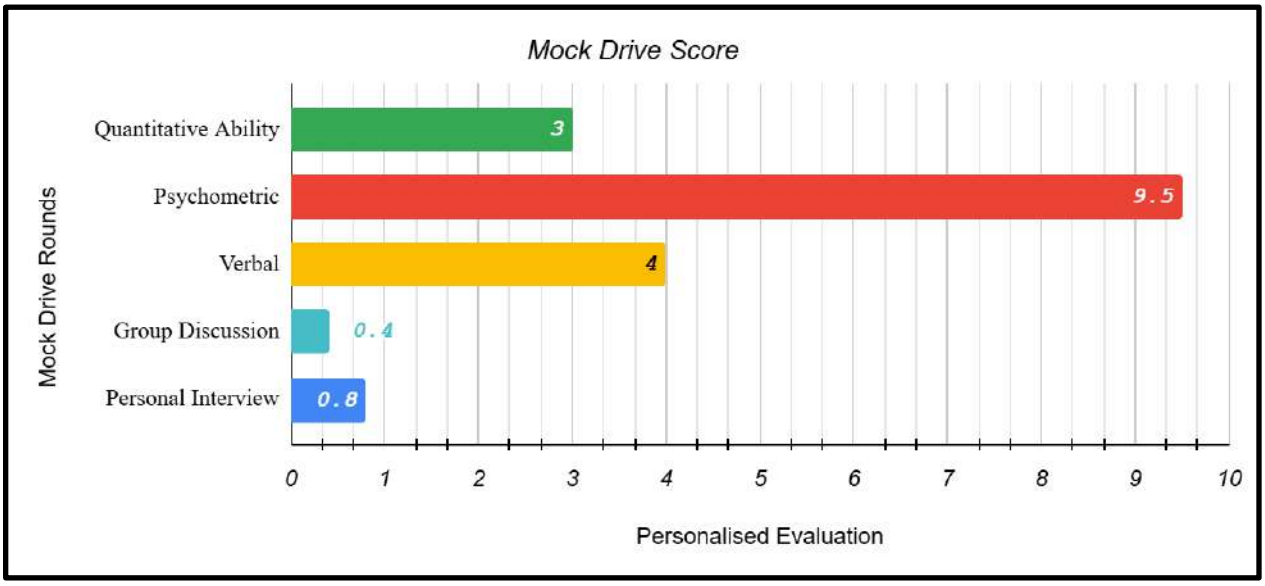
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an

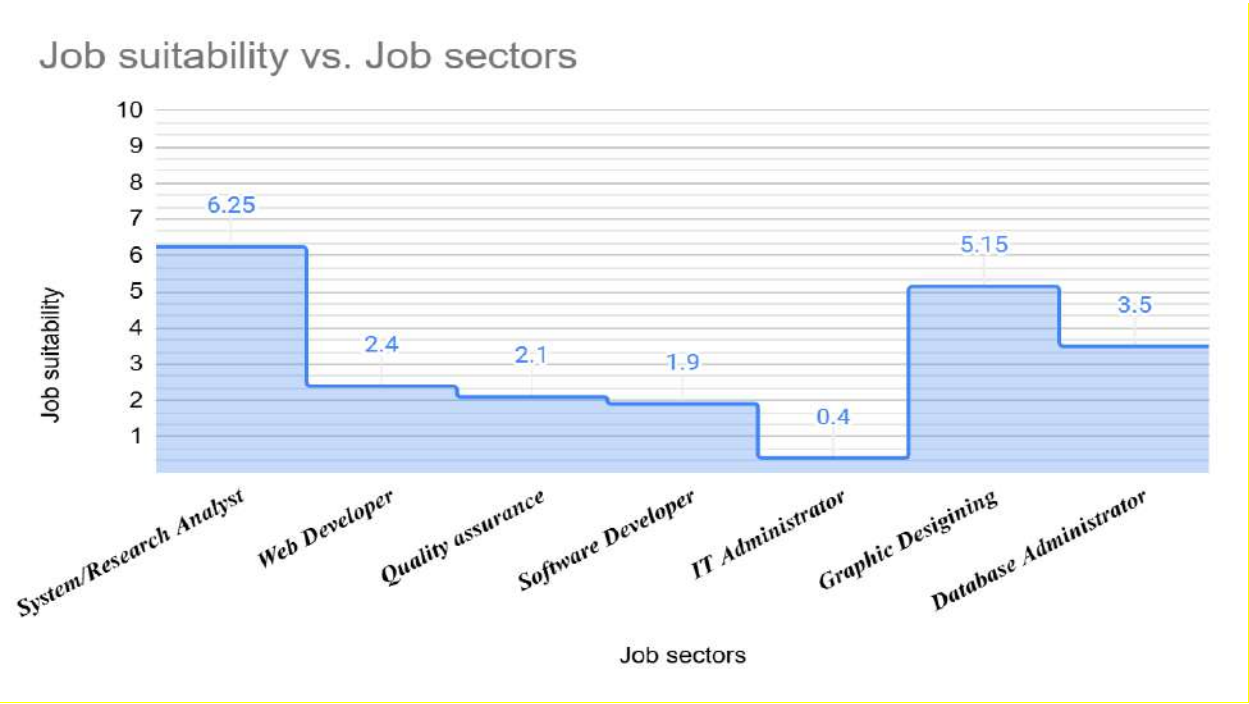
opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1.Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3.Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking.

		5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart

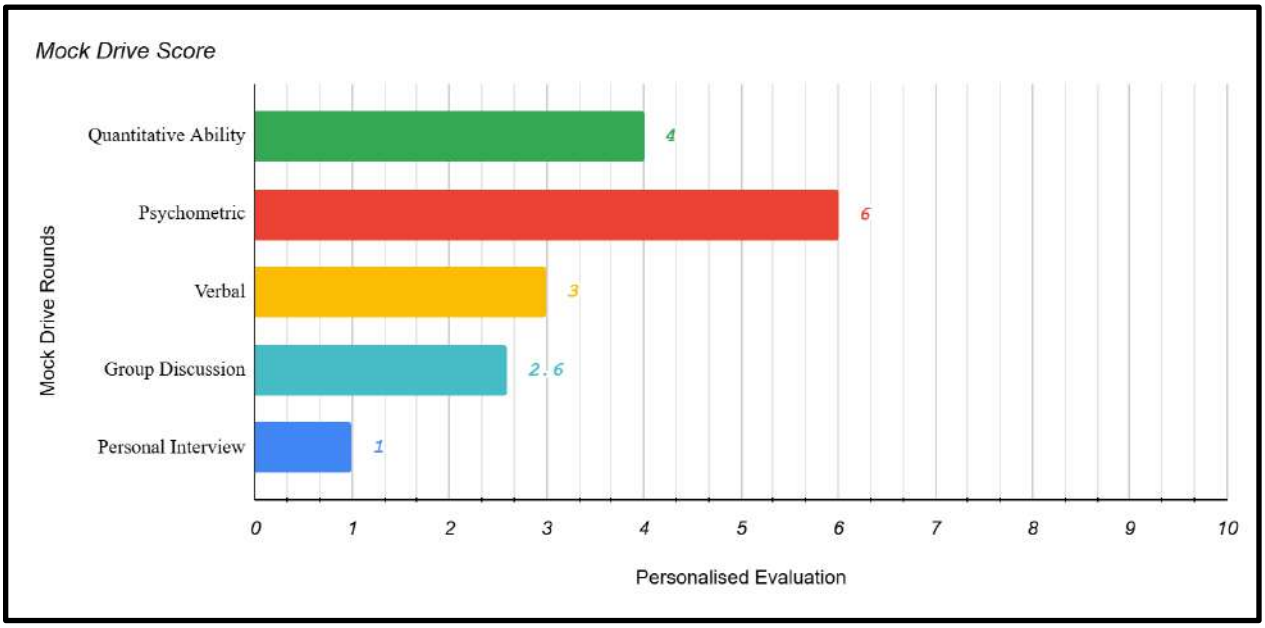
3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an

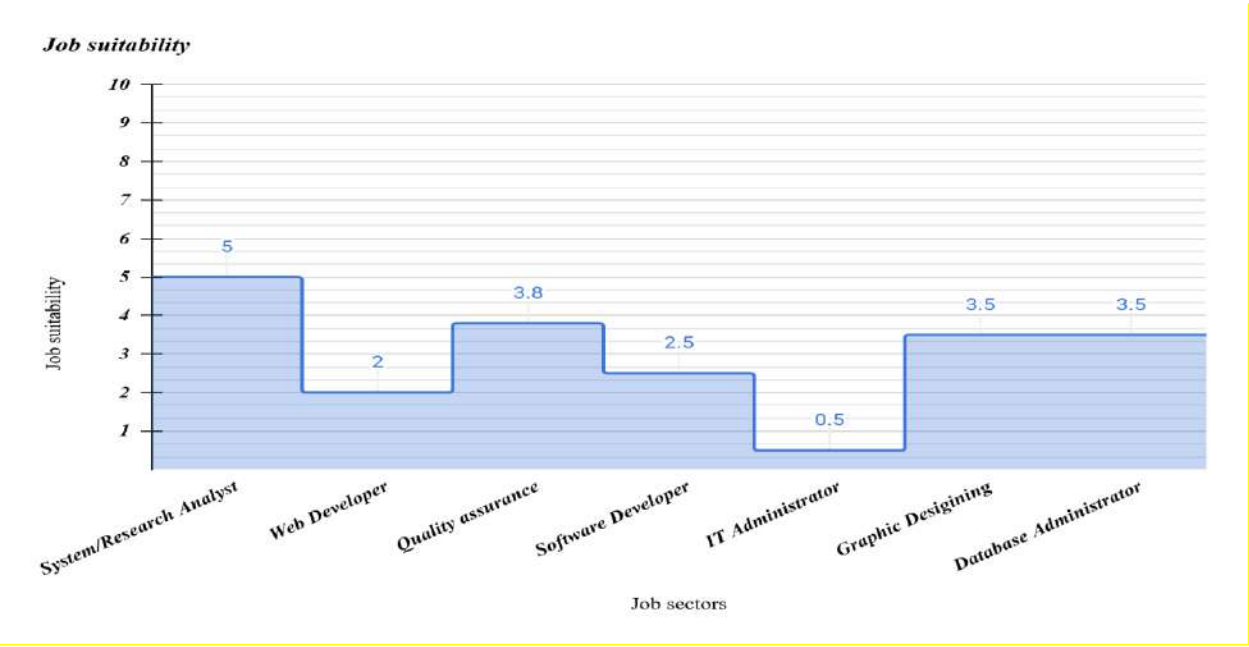
opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1.Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3.Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking.

		5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

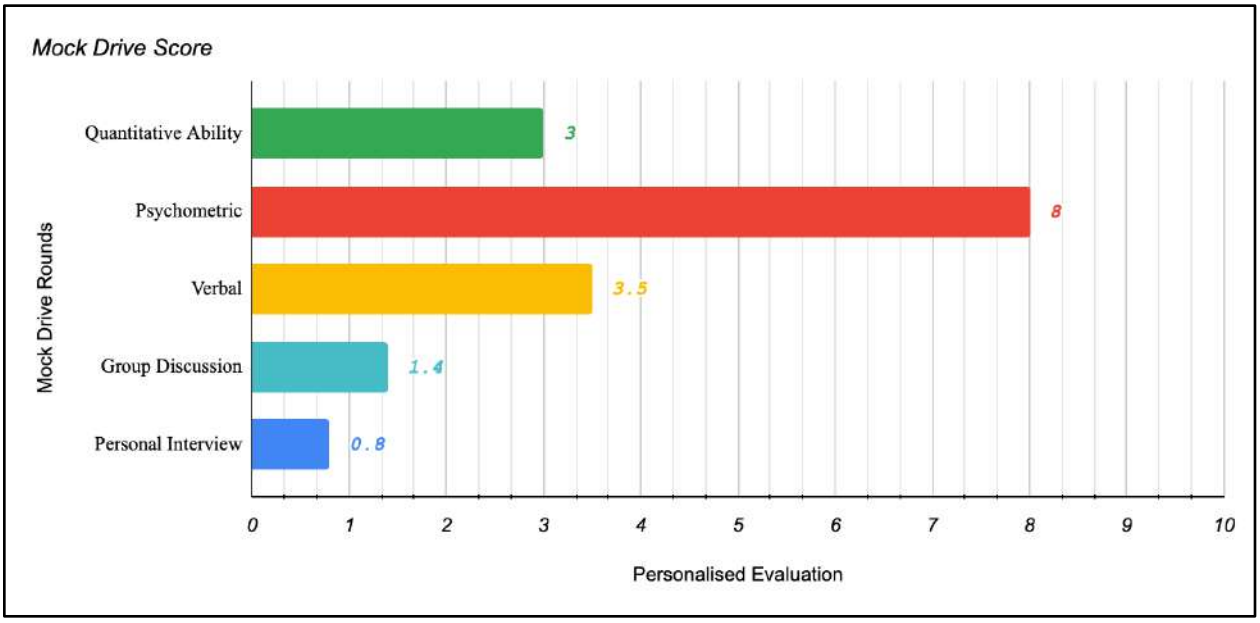
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

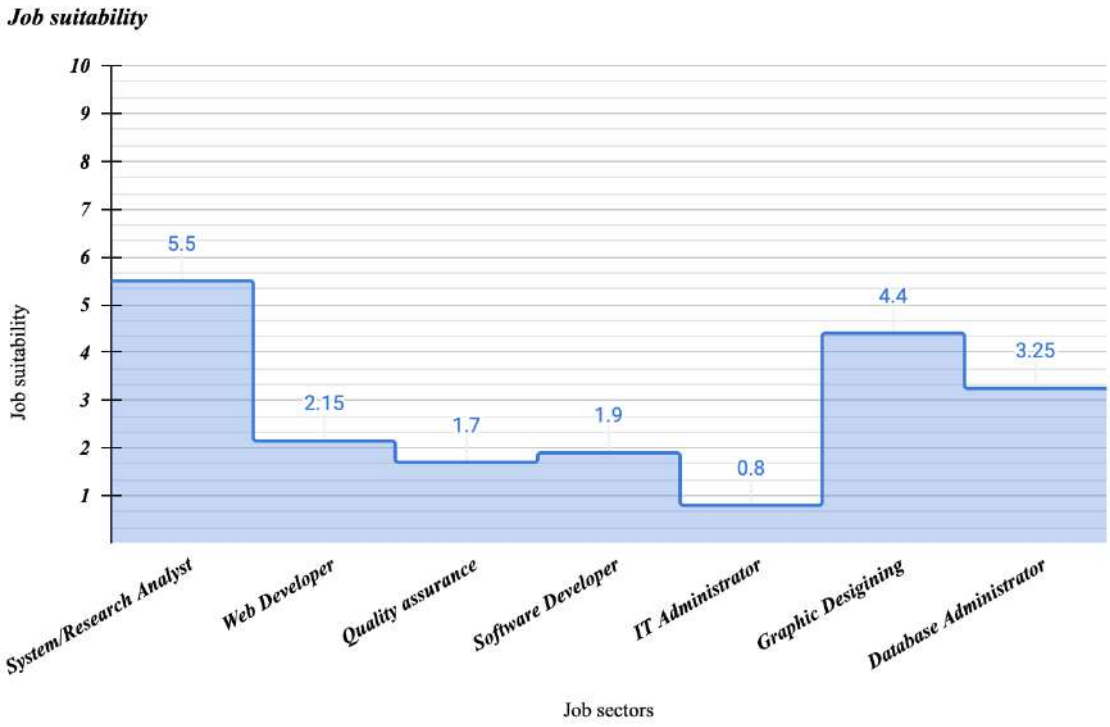
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.

Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.

Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.

Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

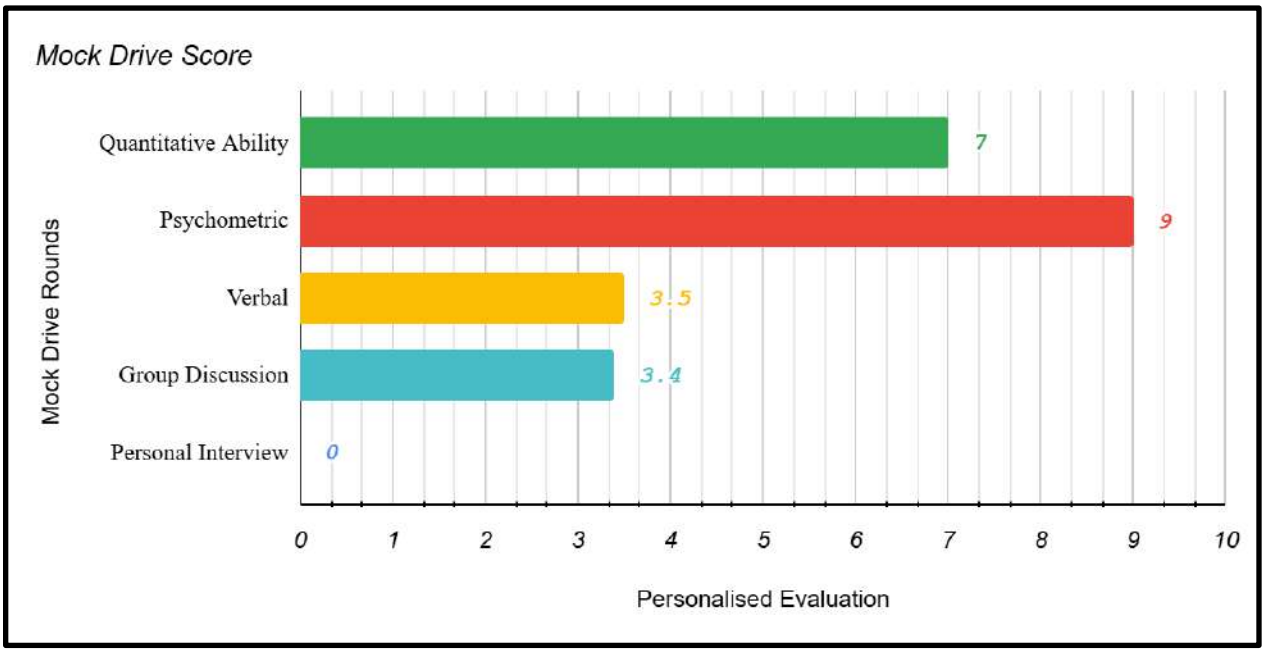
Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance with Quantitative Ability has been commendable, and we appreciate the effort you've put into mastering quantitative concepts. Your grasp of fundamental quantitative concepts is evident in your performance. Your ability to comprehend and apply mathematical principles is commendable. Your responses demonstrate a high level of accuracy. You are consistently able to solve problems with precision, showcasing a strong foundation in quantitative reasoning. Challenge yourself with more complex quantitative problems. While you excel in solving standard questions, pushing yourself to tackle more intricate scenarios will enhance your problem-solving skills even further. Remember, improvement is a continuous process, and we are confident that with your dedication and focus, you will see even greater success!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will

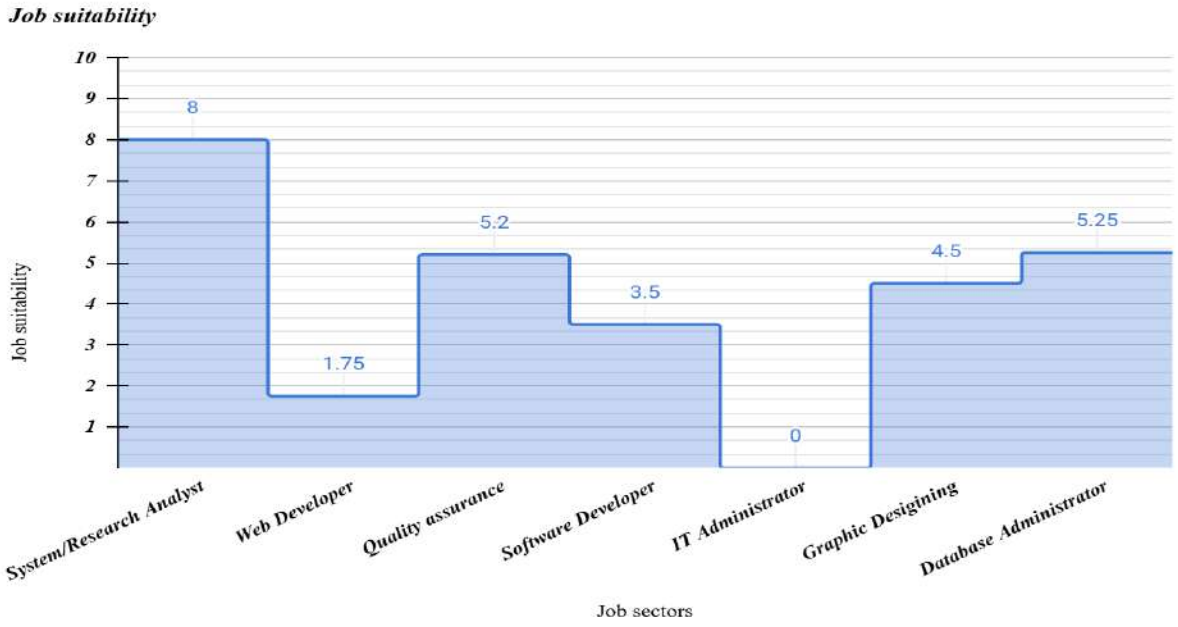
undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Blindly re- answer all questions after reviewing initial answers. 2. Write expository paragraphs and design multiple- choice questions. 3. Debate passage interpretations with a partner weekly. 4. Log idioms and practice using them correctly weekly. 5. Insert distracting questions and pause before answering
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher

		questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. Group Discussion (GD) and Personal Interview (PI) skills need to be developed and there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

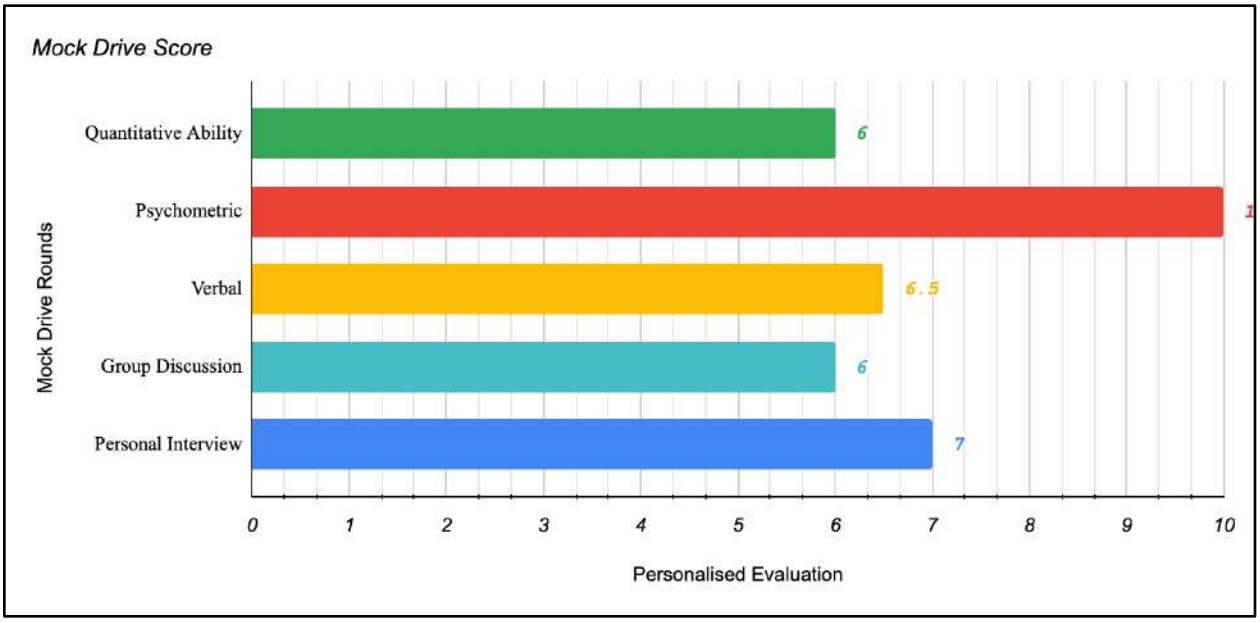
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are outstanding and reflect a high level of cognitive sharpness, emotional intelligence, and self-awareness. You demonstrate not just the ability to solve problems accurately, but also to approach them with strategic thinking and composure. Your consistency across reasoning, personality profiling, and attention-based tasks suggests a mature, well-rounded mindset ready for real-world challenges. To maintain and further polish this excellence, continue exposing yourself to diverse psychometric exercises, especially those that require adaptability and advanced decision-making. Focus on analyzing subtle patterns in data and human behavior, as these will enhance your already strong intuitive grasp. You are operating at a highly competitive level - stay curious, stay reflective, and you'll keep setting new benchmarks for yourself. Outstanding performance: truly impressive!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

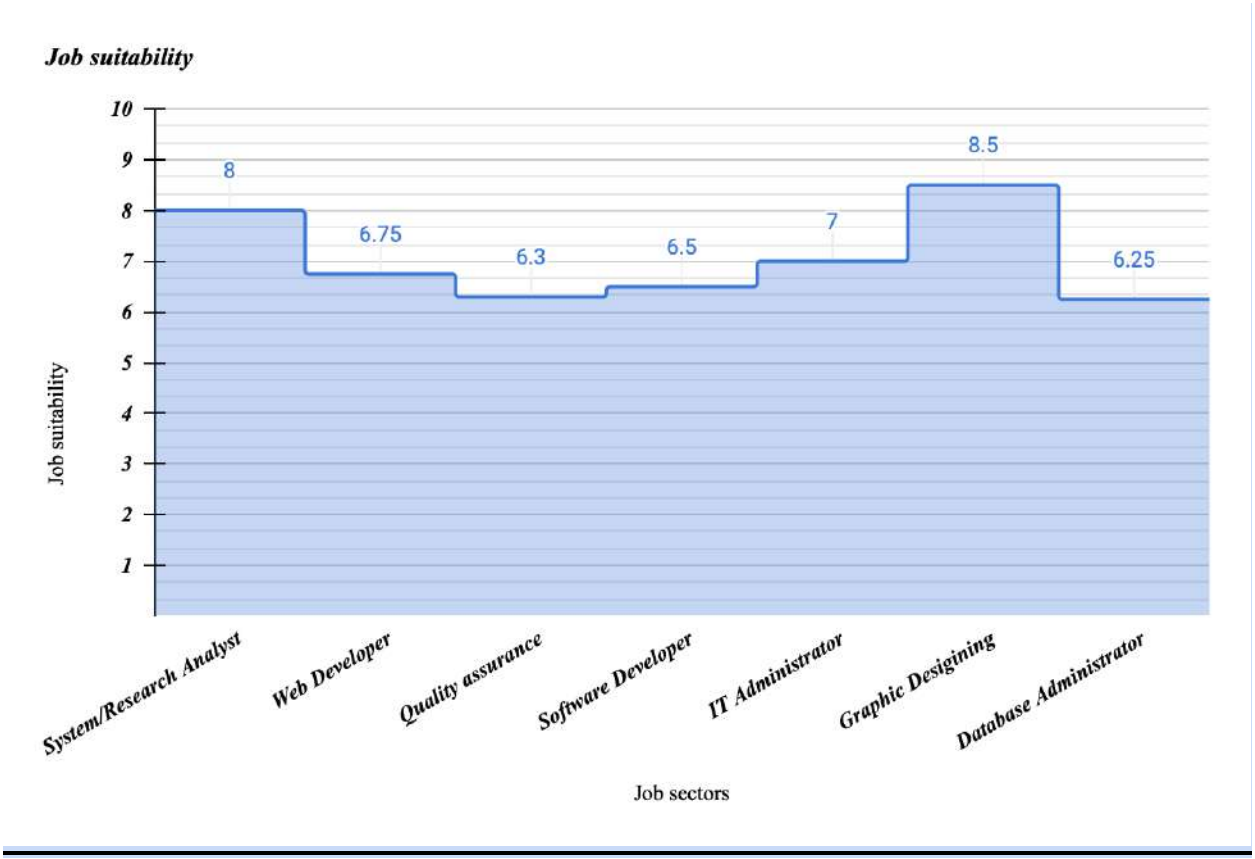
Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

You approached the PI round with professionalism and a clear sense of preparation. Your confidence and maturity came through well, which created a strong first impression. Your responses were generally clear and well-structured. To further enhance your performance, focus on backing your answers with specific, relevant examples from your experiences—whether academic, extracurricular, or personal. This will help you demonstrate depth of thought and a stronger connection between your experiences and the role you're aspiring for. In situations where a question feels vague or unclear, feel free to ask for clarification. Doing so not only reflects presence of mind but also ensures your response aligns with the interviewer's expectations. Continue building on the good foundation you've established. With more practice and reflection, you'll be well-prepared to handle even more challenging interviews. Keep up the effort, and best wishes for your next steps!

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	To thrive as a System/Research Analyst, candidates should excel in soft skills like clear communication and problem-solving skills. These companies value adaptability, proficiency in data analysis tools, and effective presentation skills.
Web Developer	**MEDIUM**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech

		concepts clearly. With consistent effort, your chances of landing this role will improve.
Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**GOOD**	You're well-suited for IT Administration. Your technical problem-solving skills and understanding of networks, systems, and protocols are commendable. Keep upgrading your knowledge on current trends in cloud services and cybersecurity. Practical exposure and staying up to date with IT innovations will ensure long-term success.
Graphic Designing	**GOOD**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense. Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Moderate	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Moderate	1. Structure your arguments in a logical flow: point, reason, example. 2. Practice initiating and summarizing GDs. 3. Use simple, impactful language to express complex ideas. 4. Learn to respectfully disagree and build on others points. 5. Work on controlling voice modulation and pitch for better engagement.
Personal Interview	Moderate	1. Prepare an impressive “tell me about yourself” 2. Maintain positive body language and reduce restrictiveness 3. Put efforts to talk more about your strengths and accomplishments 4. Answer every question in brief and with a relevant example (if necessary) 5. Work on your CV

6.0 Performance Summary:

The student exhibits commendable strength in Group Discussion (GD) and Personal Interview (PI), standing out as a confident and articulate individual. While some improvement areas remain in Logical, Verbal, and Quantitative Ability, these can be effectively addressed through structured training and consistent effort. With the right blend of mock tests, focused mentoring, and skill-specific guidance, the student can further sharpen their analytical capabilities and evolve into a well-rounded performer. The progress so far is encouraging and sets a solid foundation for continued success.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

Course:	*BCA*
Date:	*18th March 2024*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

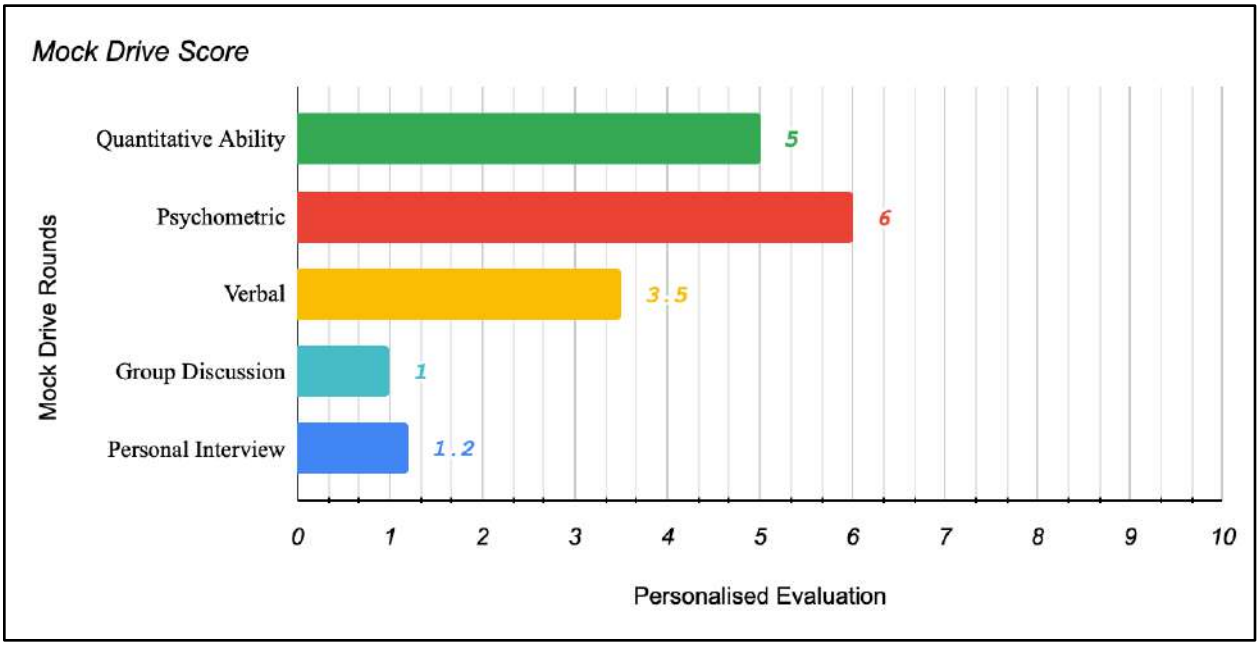
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

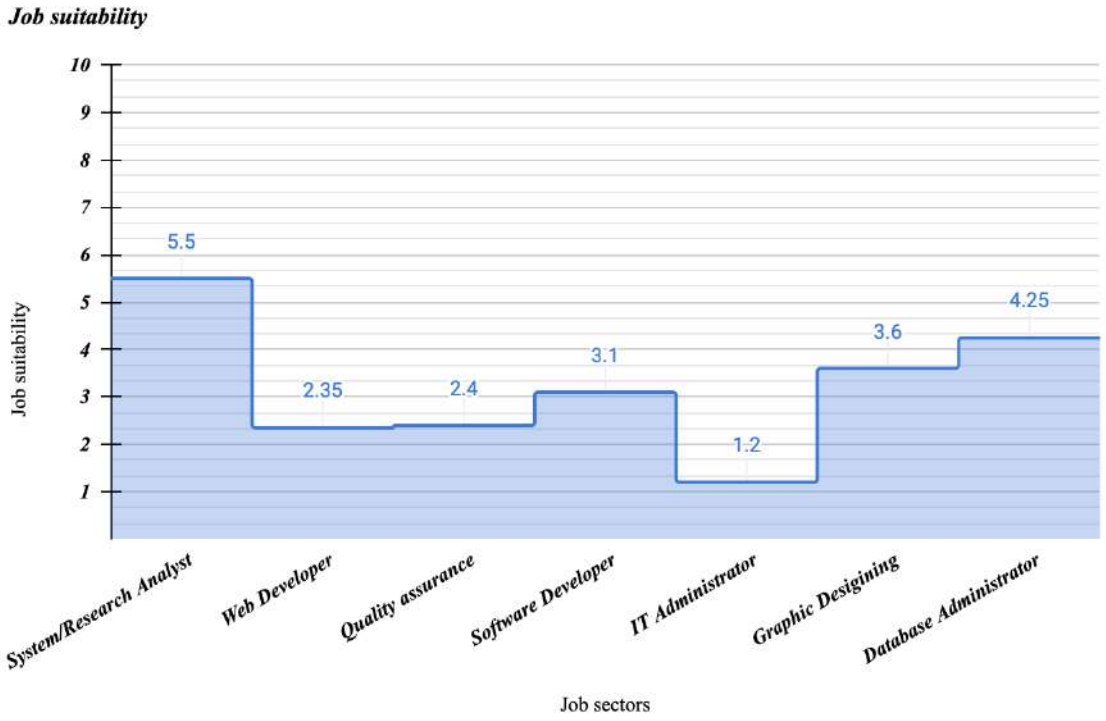
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.

Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.

Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.

Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Corporate Readiness Chart

10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an

opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	Your current portfolio or skill set needs more work to align with graphic design expectations. Begin with mastering tools like Adobe Photoshop, Illustrator, and Canva. Understand design principles like balance, contrast, and typography. Try replicating existing designs to learn techniques, then move on to creating original work.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Strong	1. Practice timed mock tests to improve accuracy and speed. 2. Focus on improving logical reasoning and verbal ability sections. 3. Avoid overthinking questions—go with instinct where necessary. 4. Review explanations of wrong answers to understand your pattern of errors. 5. Be consistent in practice to reduce performance anxiety during the actual test.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

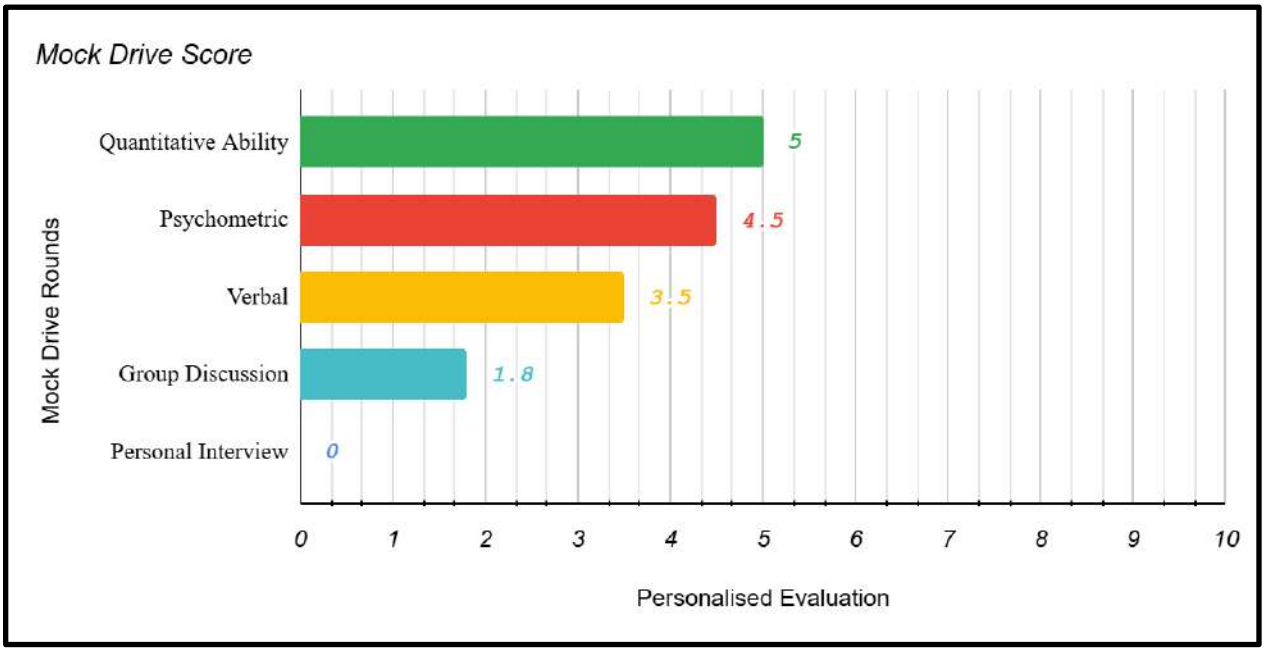
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to

understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

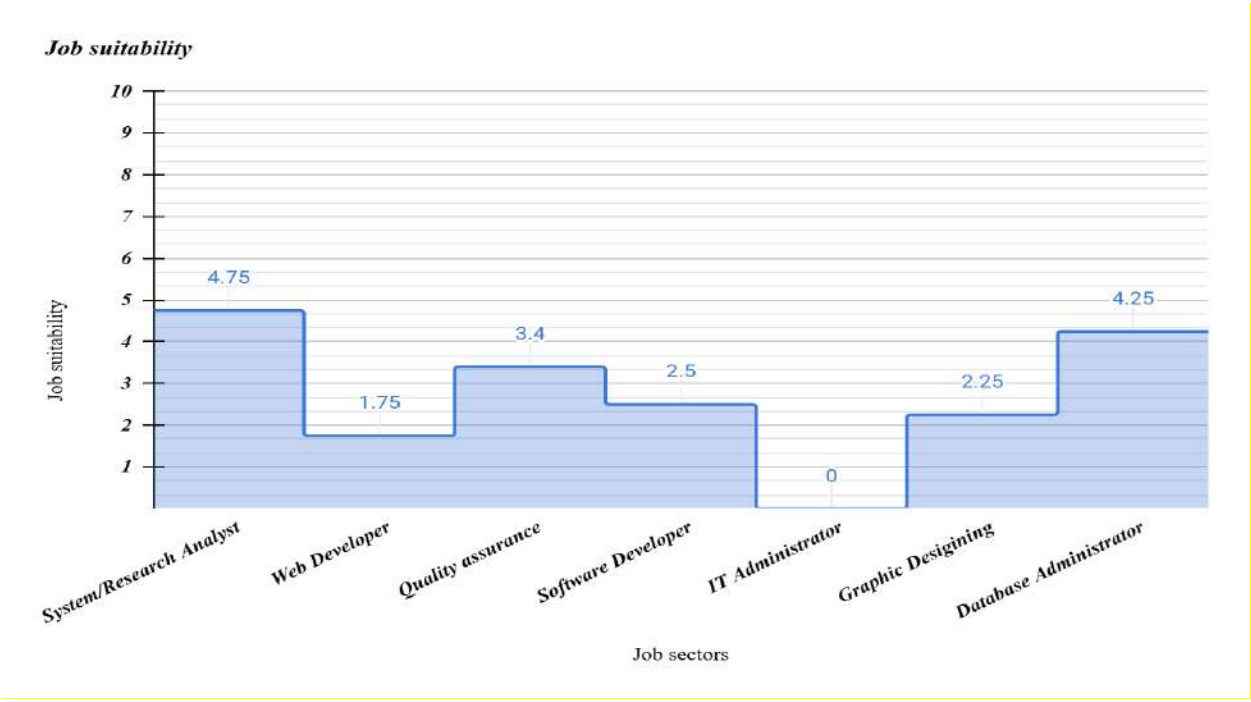
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student shows promising abilities in Group Discussion (GD) and Personal Interview (PI), suggesting average communication and interpersonal skills. Performance in Logical, Verbal, and Quantitative Ability is currently strong and has the potential to improve with strategic effort. Incorporating structured mock tests, guided mentoring sessions, and practice-focused class activities will help bridge the gap. With dedication and continuous learning, the student is well-positioned to elevate performance across all areas.

	Corporate Readiness Chart

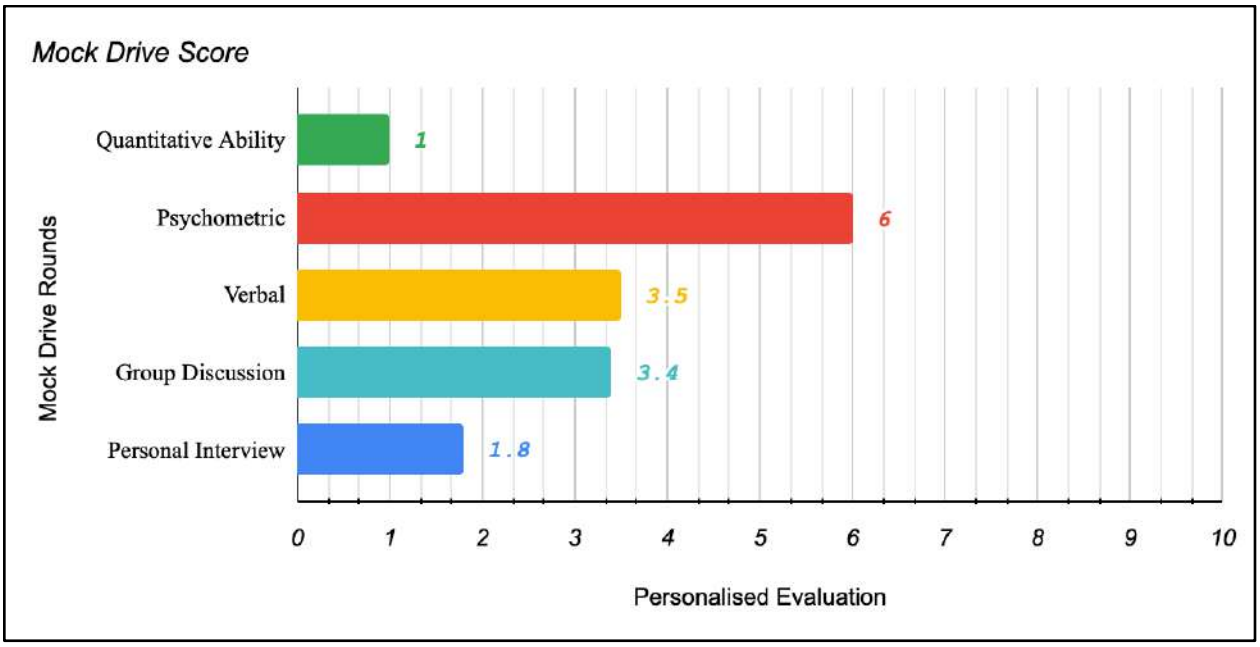
3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

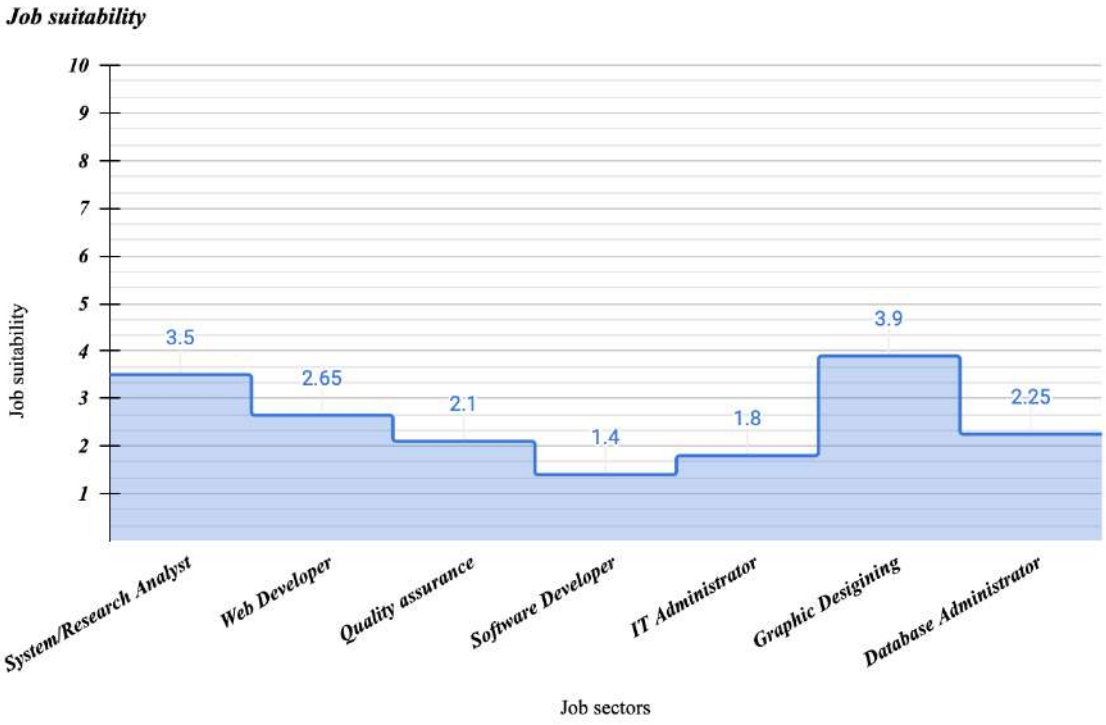
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.

Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.

Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.

Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

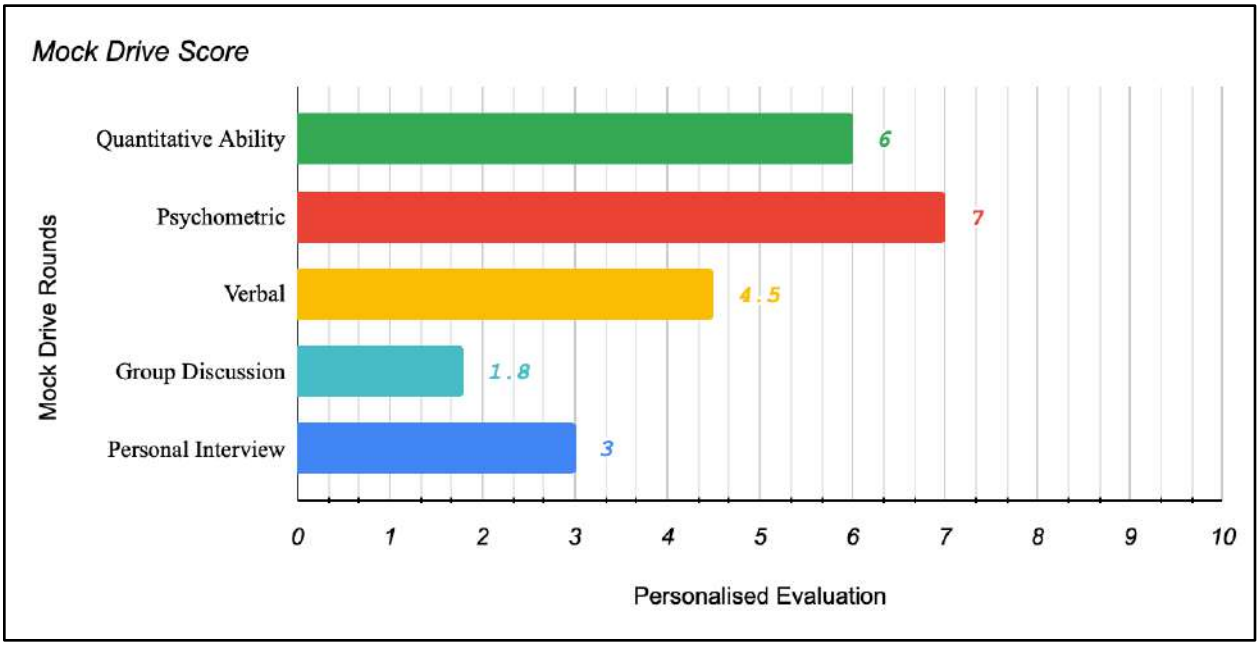
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

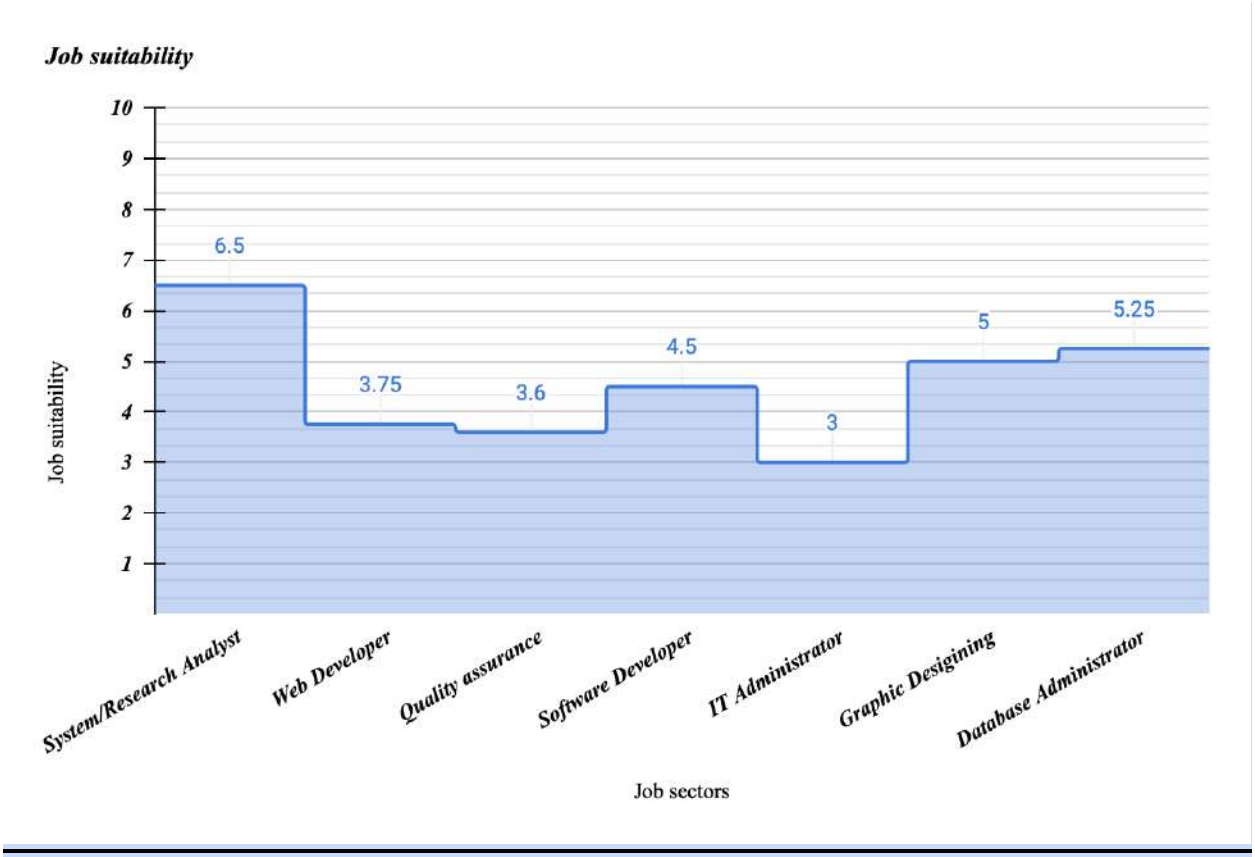
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**MEDIUM**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems

		like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.
Quality assurance	**MEDIUM**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**MEDIUM**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with

		large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals.

		4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student shows promising abilities in Group Discussion (GD) and Personal Interview (PI), suggesting strong communication and interpersonal skills. Performance in Logical, Verbal, and Quantitative Ability is currently average and has the potential to improve with strategic effort. Incorporating structured mock tests, guided mentoring sessions, and practice-focused class activities will help bridge the gap. With dedication and continuous learning, the student is well-positioned to elevate performance across all areas.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Psychometric (20)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %
	Quantitative (20)						
	Verbal (20)	Pseudo coding (30)			B (Dream Company)	6- 10 lakh	70- 79 %
	GD (20)	Programming (30)			C (Ideal Company)	3-6 Lakh	60 - 69 %
	PI (20)	Technical Interview (20)			D (Average Company)	Below 3 lakh	50 - 59 %
	44.6	-			E (Not Fit for Corporate)	NFC	Less than 50 %

Enrollment Number:	2314405023
Course:	*BCA*
Date:	*18th March 2024*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

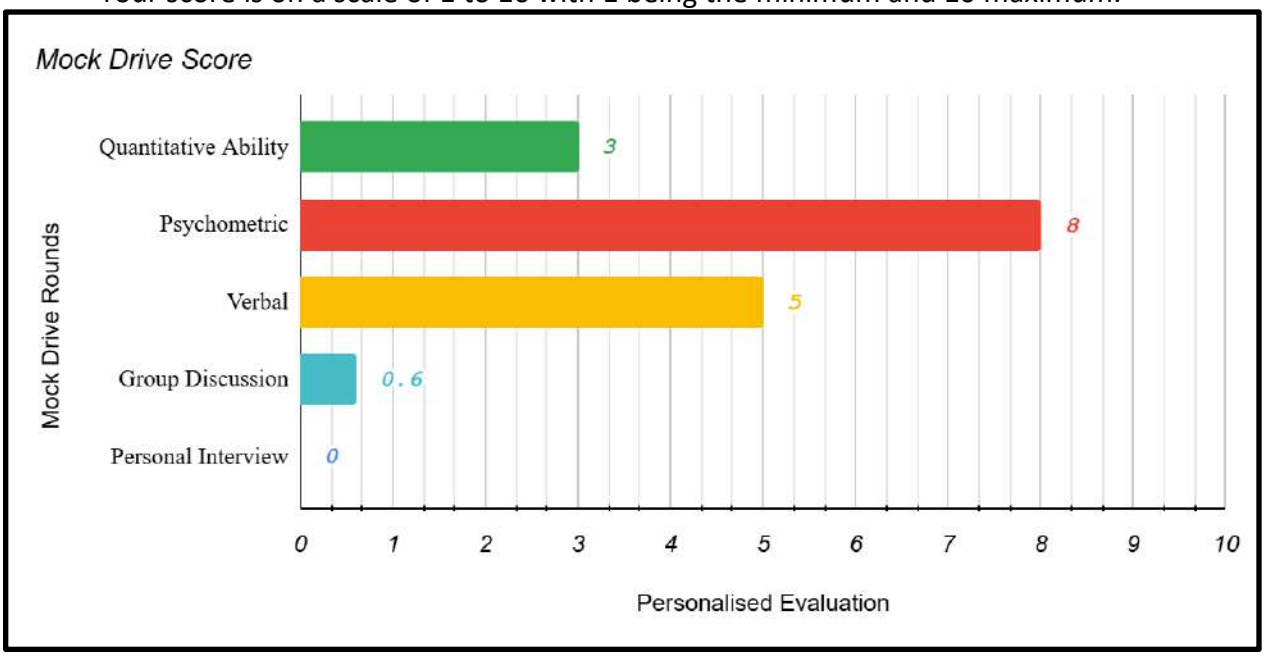
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the

fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

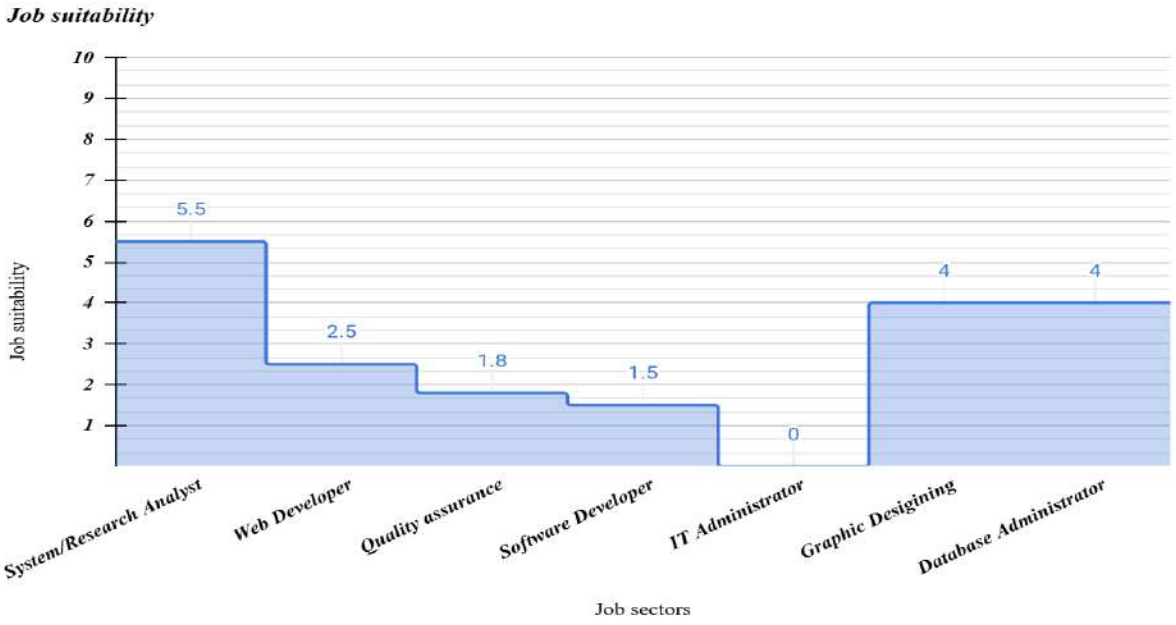
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. Group Discussion (GD) and Personal Interview (PI) skills need to be developed and there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

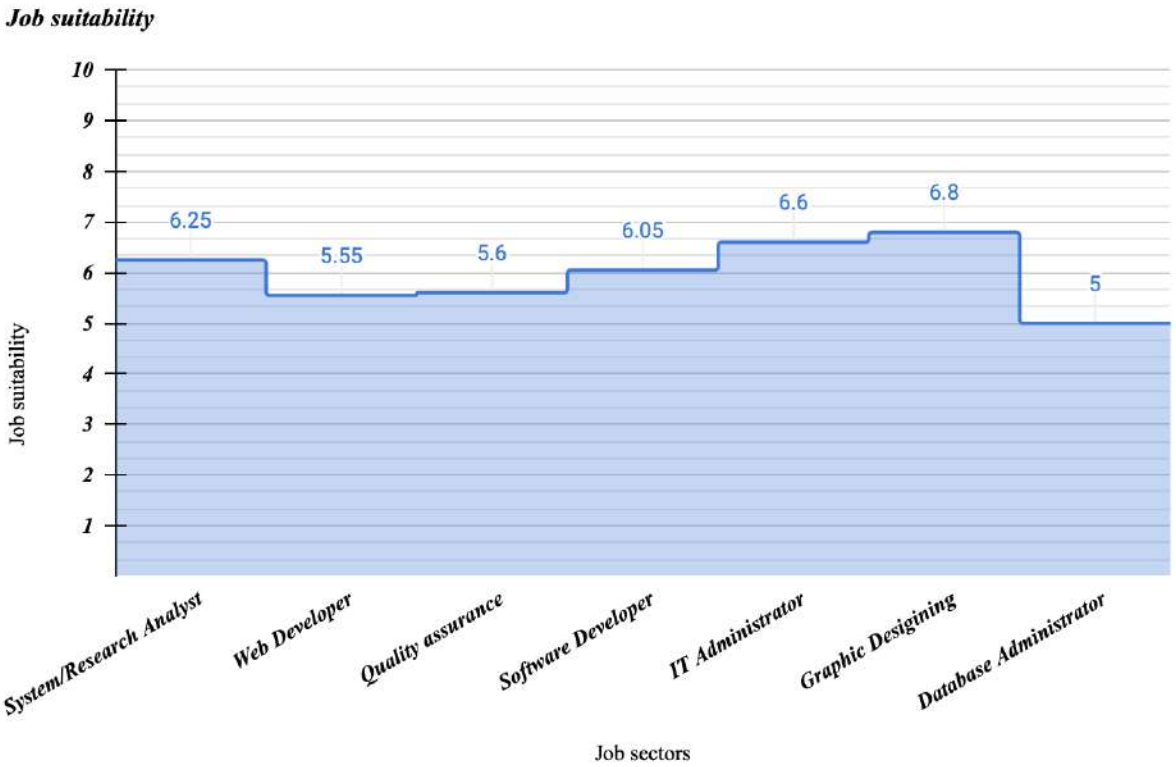
Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

You approached the PI round with professionalism and a clear sense of preparation. Your confidence and maturity came through well, which created a strong first impression. Your responses were generally clear and well-structured. To further enhance your performance, focus on backing your answers with specific, relevant examples from your experiences—whether academic, extracurricular, or personal. This will help you demonstrate depth of thought and a stronger connection between your experiences and the role you're aspiring for. In situations where a question feels vague or unclear, feel free to ask for clarification. Doing so not only reflects presence of mind but also ensures your response aligns with the interviewer's expectations. Continue building on the good foundation you've established. With more practice and reflection, you'll be well-prepared to handle even more challenging interviews. Keep up the effort, and best wishes for your next steps!

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**MEDIUM**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech

		concepts clearly. With consistent effort, your chances of landing this role will improve.
Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**GOOD**	You're well-suited for IT Administration. Your technical problem-solving skills and understanding of networks, systems, and protocols are commendable. Keep upgrading your knowledge on current trends in cloud services and cybersecurity. Practical exposure and staying up to date with IT innovations will ensure long-term success.
Graphic Designing	**GOOD**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense. Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Moderate	1. Prepare an impressive “tell me about yourself” 2. Maintain positive body language 3. Put efforts to talk more about your strengths and accomplishments 4. Answer every question confidently and with a relevant example 5. Work on your CV 6. Practice relaxation techniques such as deep breathing or visualization to calm your nerves.

6.0 Performance Summary:

The student exhibits commendable strength in Group Discussion (GD) and Personal Interview (PI), standing out as a confident and articulate individual. While some improvement areas remain in Logical, Verbal, and Quantitative Ability, these can be effectively addressed through structured training and consistent effort. With the right blend of mock tests, focused mentoring, and skill-specific guidance, the student can further sharpen their analytical capabilities and evolve into a well-rounded performer. The progress so far is encouraging and sets a solid foundation for continued success.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

Course:	*BCA*
Date:	*18th March 2024*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

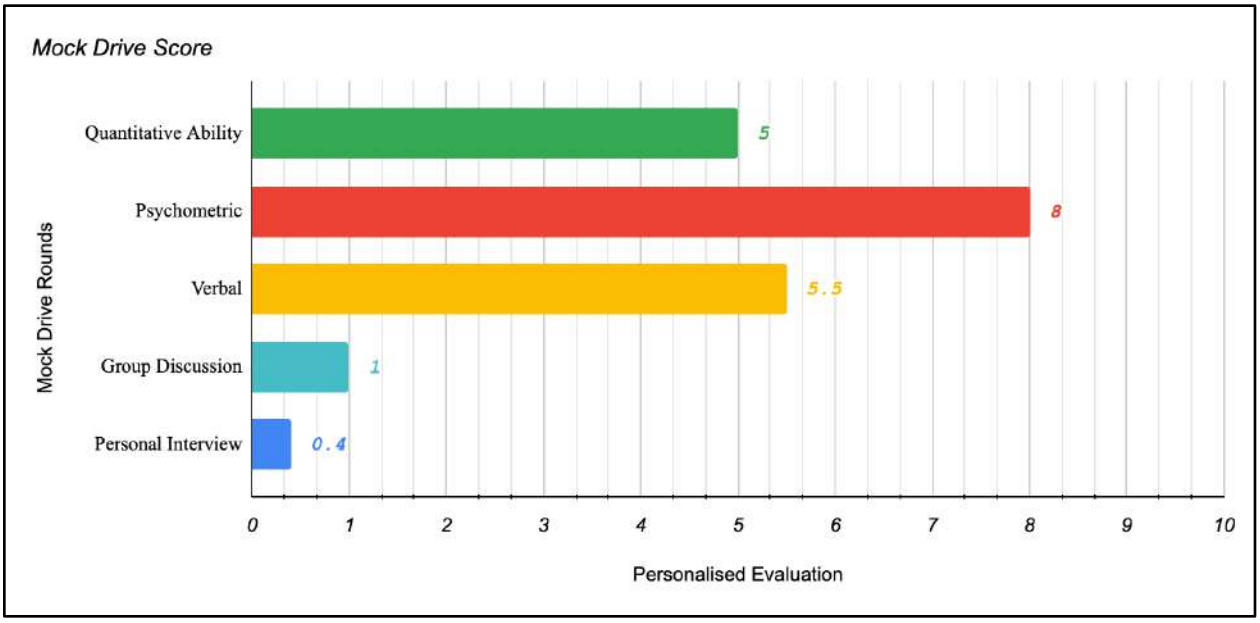
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

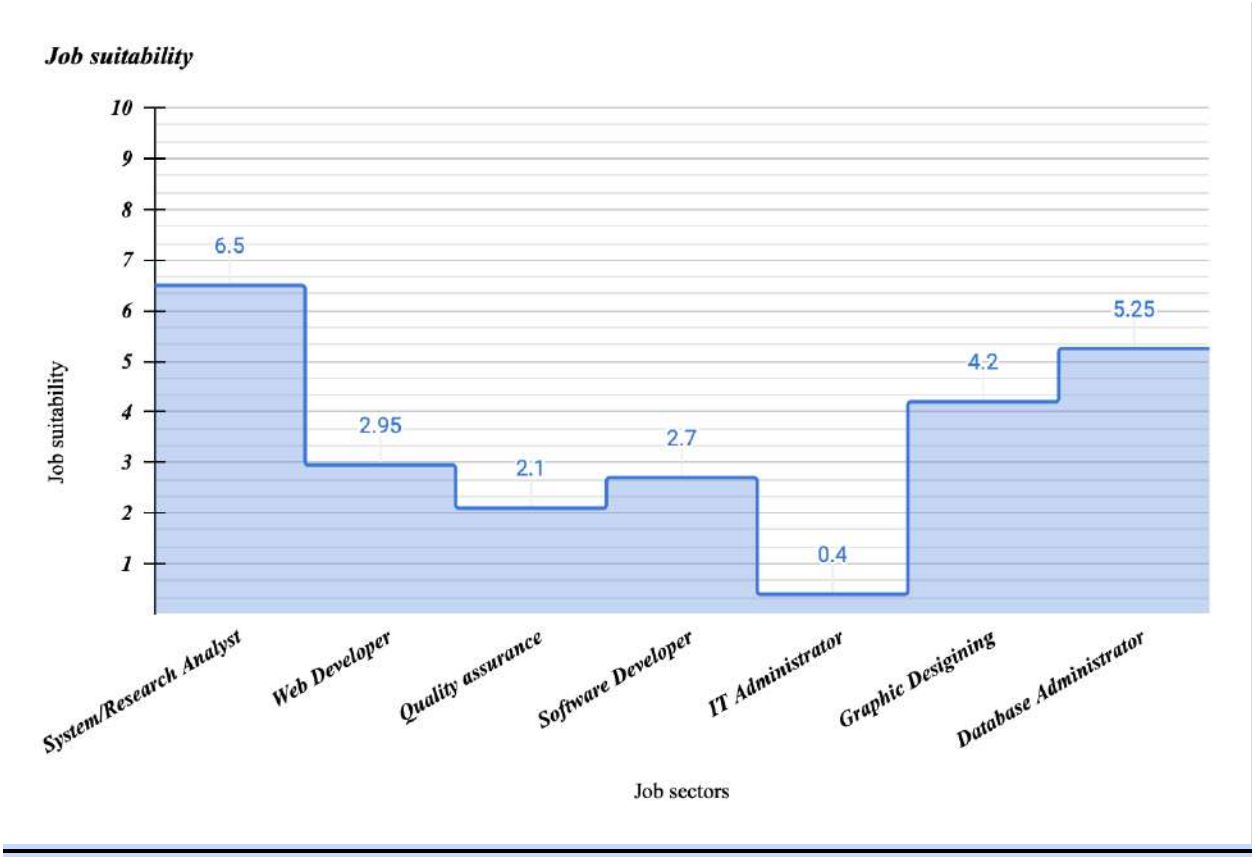
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems

		like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with

		large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Moderate	1. Blindly re-answer all questions after reviewing initial answers. 2. Write expository paragraphs and design multiple-choice questions. 3. Debate passage interpretations with a partner weekly. 4. Log idioms and practice using them correctly weekly. 5. Insert distracting questions and pause before answering
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals.

		4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student shows promising abilities in Group Discussion (GD) and Personal Interview (PI), suggesting strong communication and interpersonal skills. Performance in Logical, Verbal, and Quantitative Ability is currently average and has the potential to improve with strategic effort. Incorporating structured mock tests, guided mentoring sessions, and practice-focused class activities will help bridge the gap. With dedication and continuous learning, the student is well-positioned to elevate performance across all areas.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Psychometric (20)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %

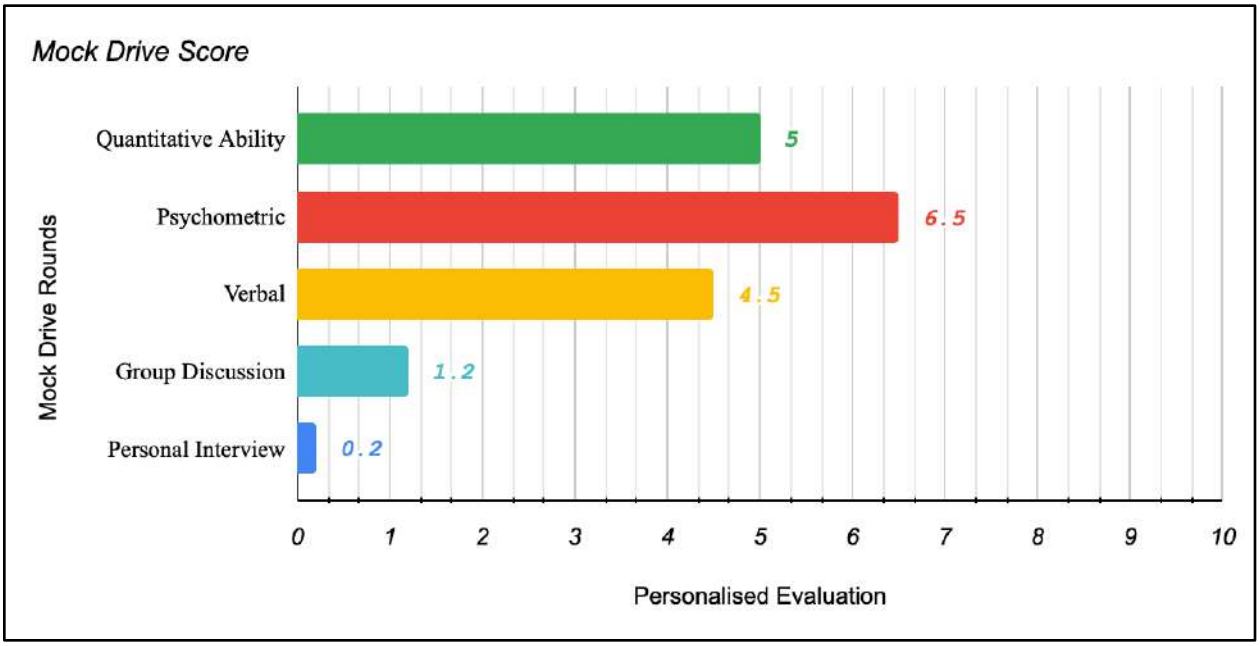
3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

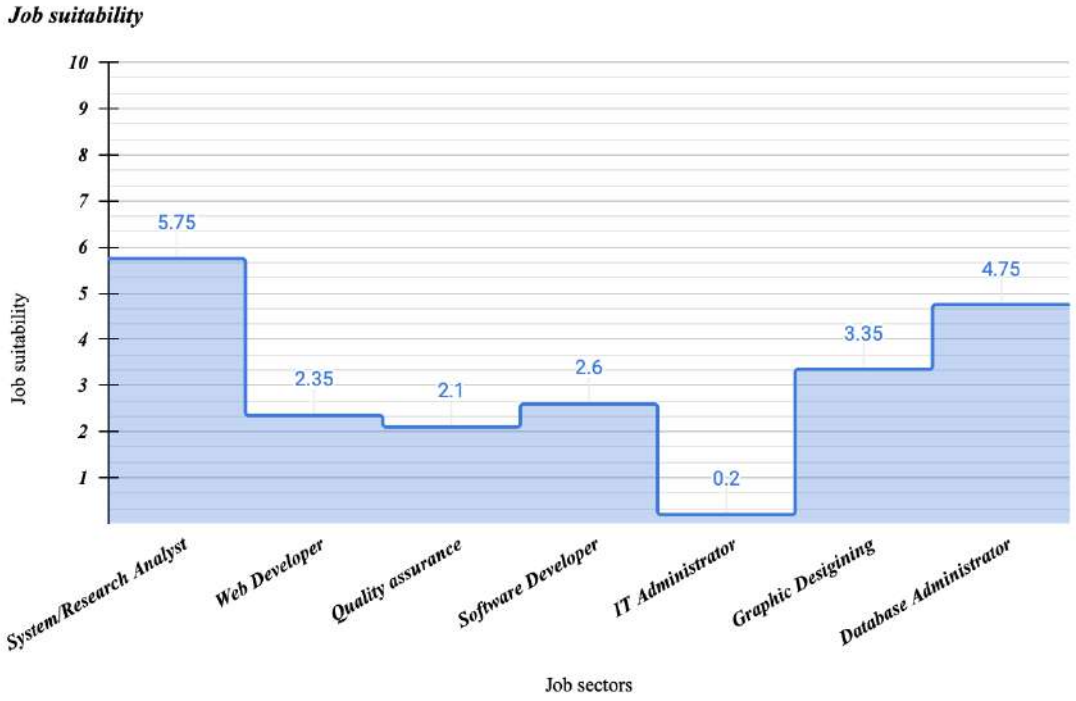
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and

		communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	Your current portfolio or skill set needs more work to align with graphic design expectations. Begin with mastering tools like Adobe Photoshop, Illustrator, and Canva. Understand design principles like balance, contrast, and typography. Try replicating existing designs to learn techniques, then move on to creating original work.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with

		large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions.

		2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

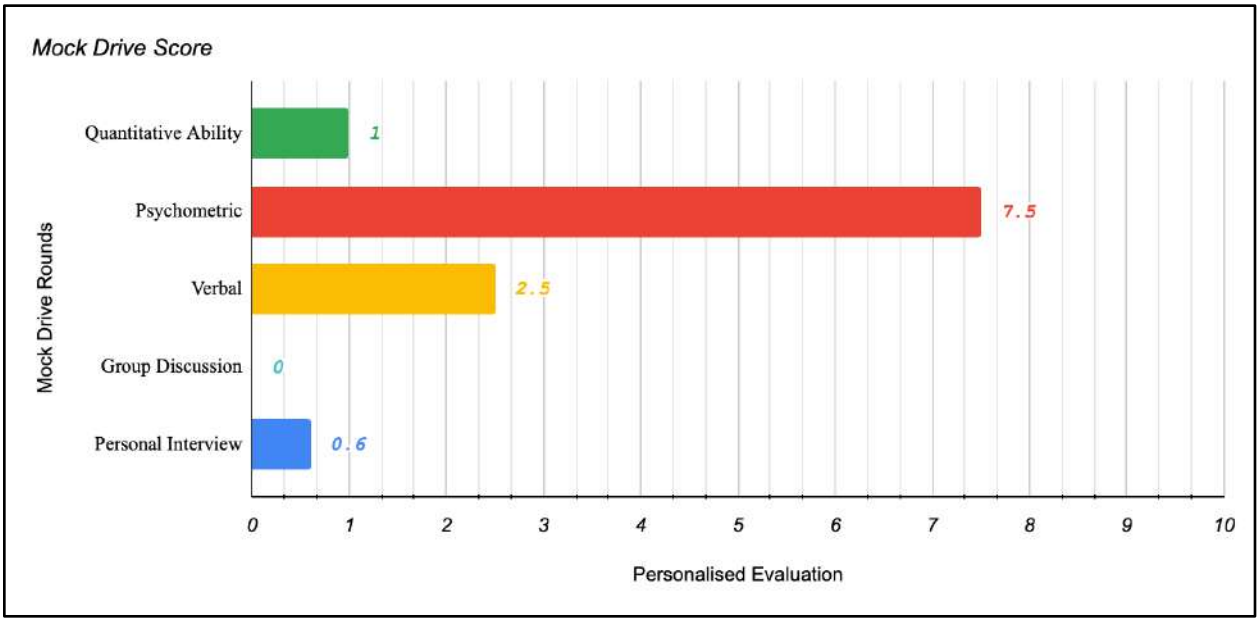
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

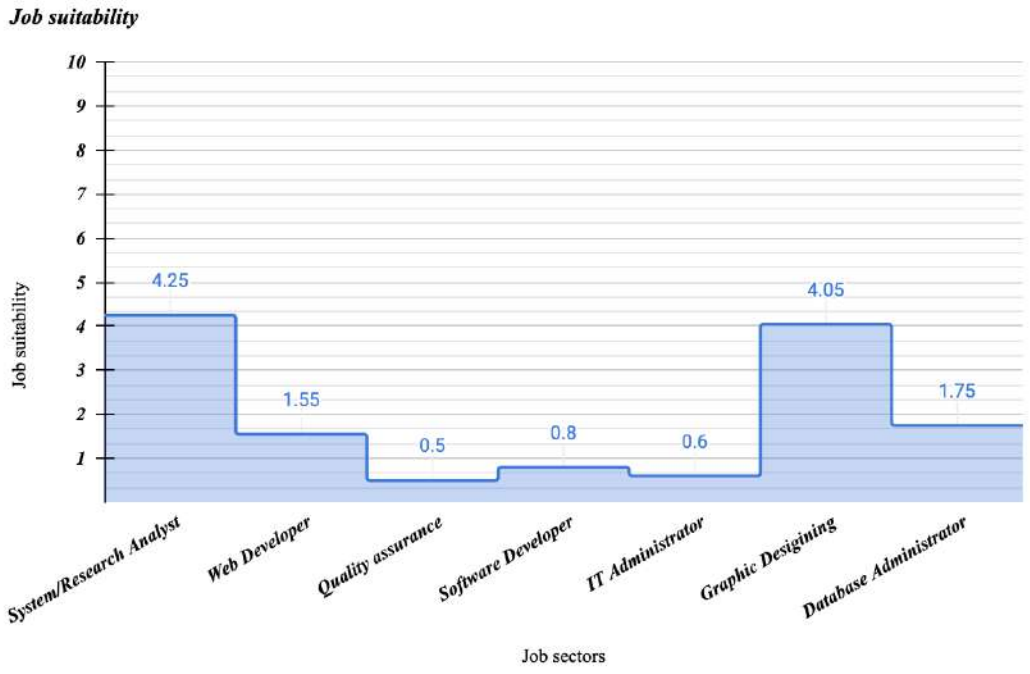
It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and

		communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with

		database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions.

		2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Corporate Readiness Chart						
PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

Date:	*18th March 2024*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

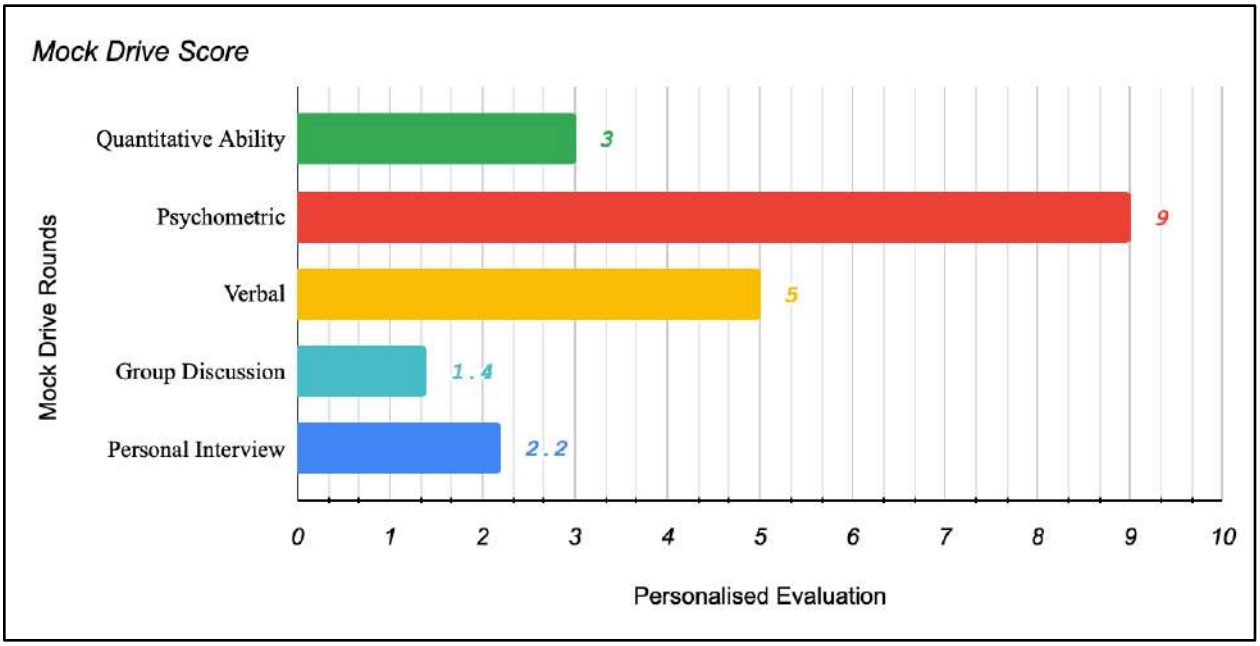
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

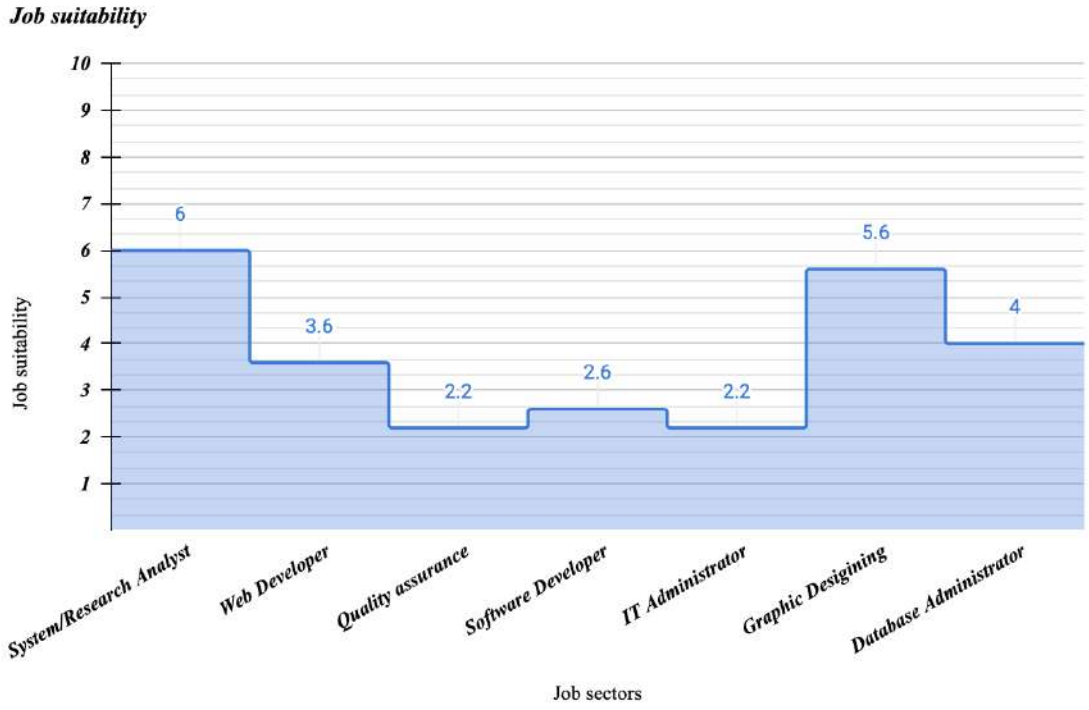
It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems

		like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.

Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

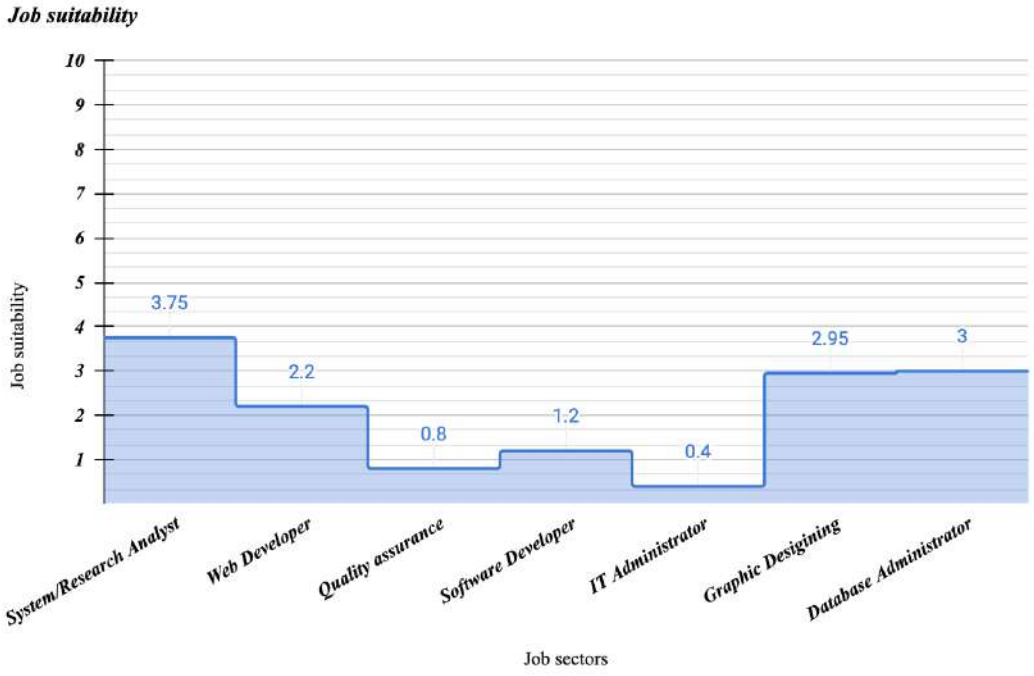
It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and

		communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	Your current portfolio or skill set needs more work to align with graphic design expectations. Begin with mastering tools like Adobe Photoshop, Illustrator, and Canva. Understand design principles like balance, contrast, and typography. Try replicating existing designs to learn techniques, then move on to creating original work.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with

		database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions.

		2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Corporate Readiness Chart						
PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

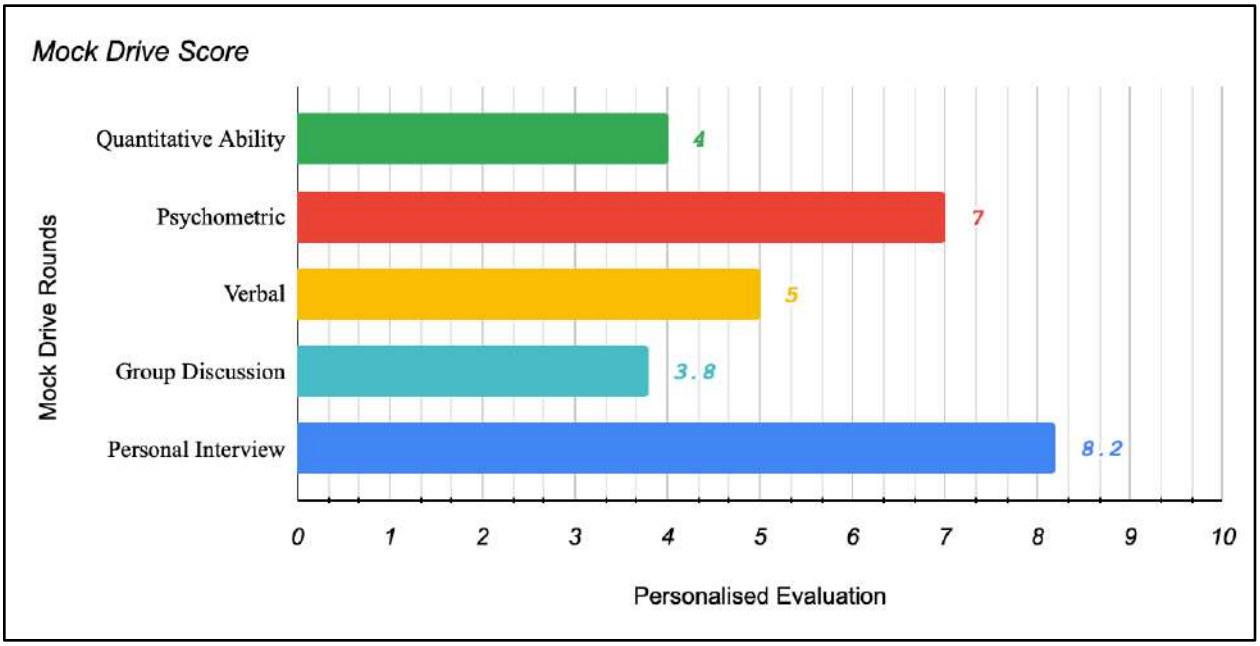
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

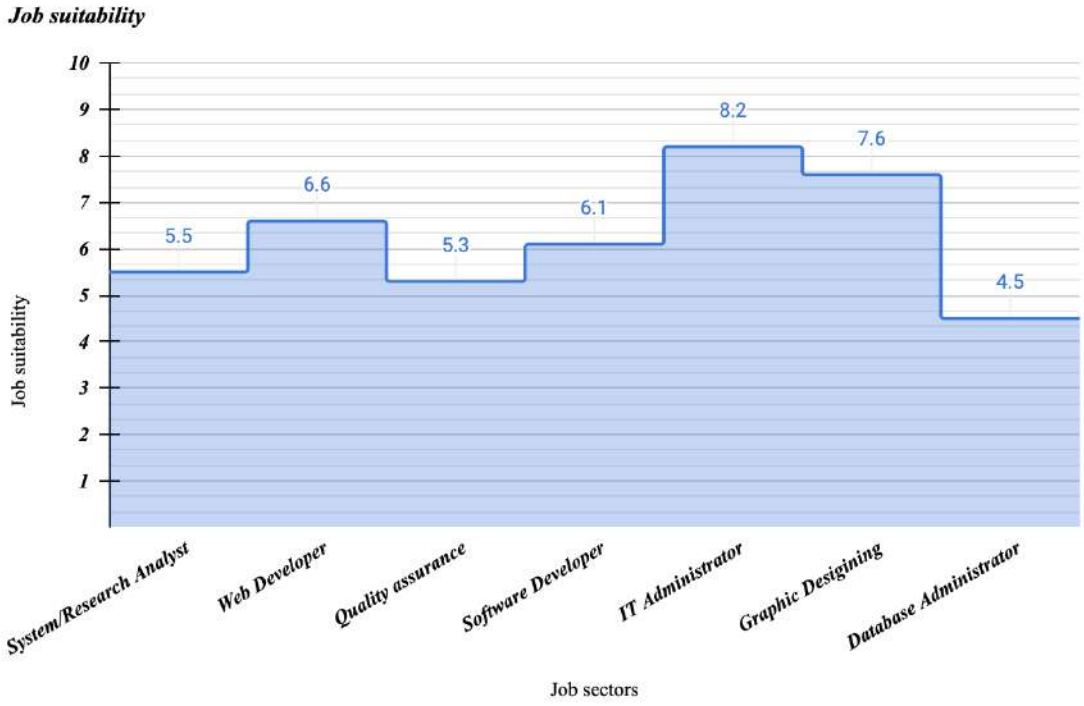
You approached the PI round with professionalism and a clear sense of preparation. Your confidence and maturity came through well, which created a strong first impression. Your responses were generally clear and well-structured. To further enhance your performance, focus on backing your answers with specific, relevant examples from your experiences—whether academic, extracurricular, or personal. This will help you demonstrate depth of thought and a stronger connection between your experiences and the role you're aspiring for. In situations where a question feels vague or unclear, feel free to ask for clarification. Doing so not only reflects presence of mind but also ensures your response aligns with the interviewer's expectations. Continue building on the good foundation you've established. With more practice and reflection, you'll be well-prepared to handle even more challenging interviews. Keep up the effort, and best wishes for your next steps!

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**MEDIUM**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech

		concepts clearly. With consistent effort, your chances of landing this role will improve.
Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**GOOD**	You're well-suited for IT Administration. Your technical problem-solving skills and understanding of networks, systems, and protocols are commendable. Keep upgrading your knowledge on current trends in cloud services and cybersecurity. Practical exposure and staying up to date with IT innovations will ensure long-term success.
Graphic Designing	**GOOD**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense. Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Moderate	1. Prepare an impressive “tell me about yourself” 2. Maintain positive body language 3. Put efforts to talk more about your strengths and accomplishments 4. Answer every question confidently and with a relevant example 5. Enhance on your CV 6. Practice relaxation techniques such as deep breathing or visualization to calm your nerves.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

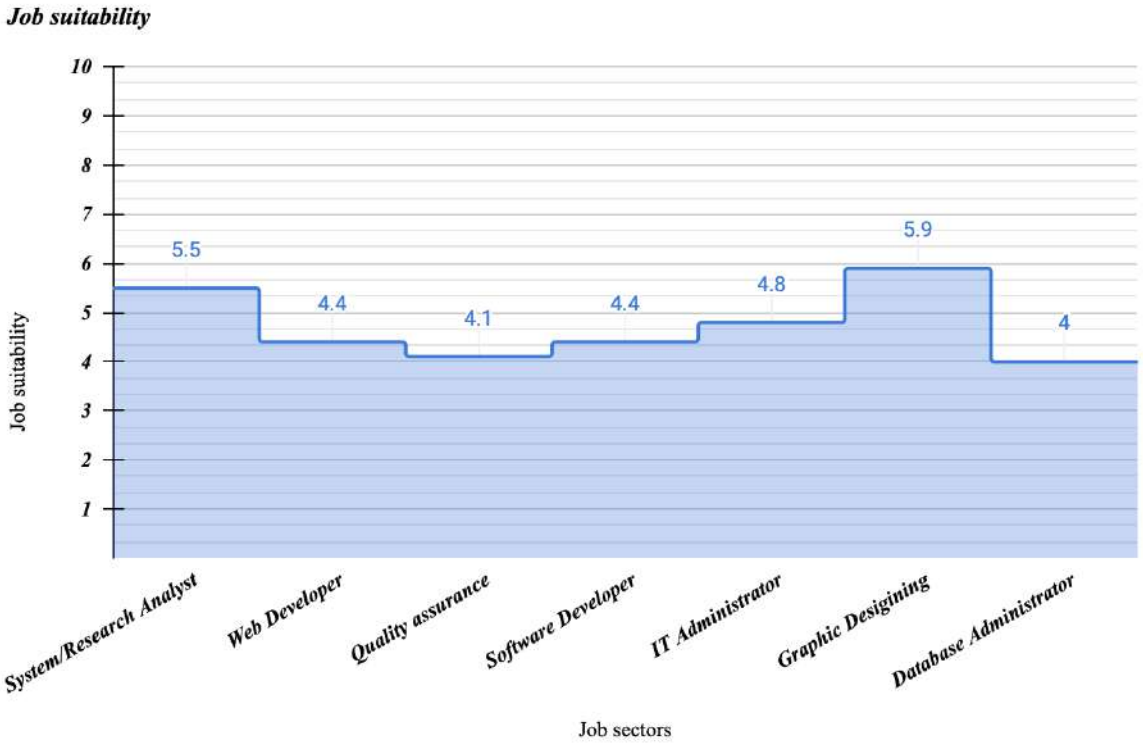
Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.

Web Developer	**MEDIUM**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.
Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**MEDIUM**	You're developing a good foundation for an IT Admin role. Focus on hands-on practice—set up local networks, explore admin panels, and simulate problem-solving scenarios. Learn how to manage servers, handle security protocols, and adapt to new IT tools. A proactive learning approach will significantly boost your chances.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with

		large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. - **Business Process Outsourcing (BPO) Companies**

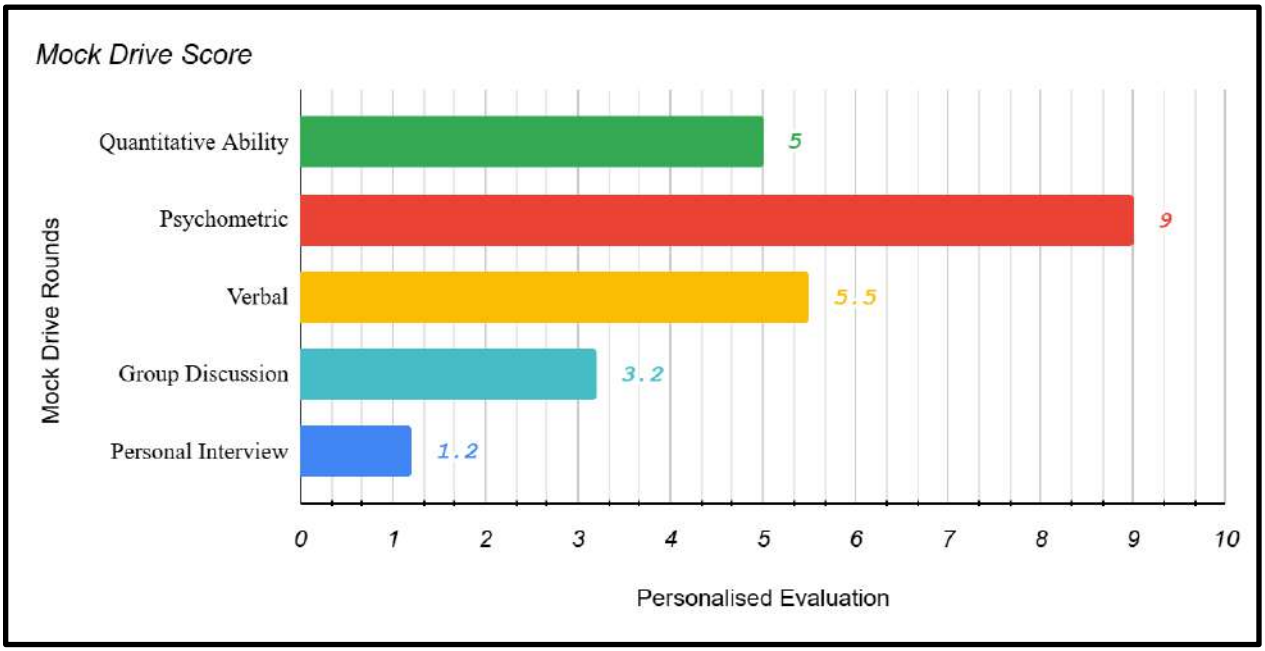
Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to

understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

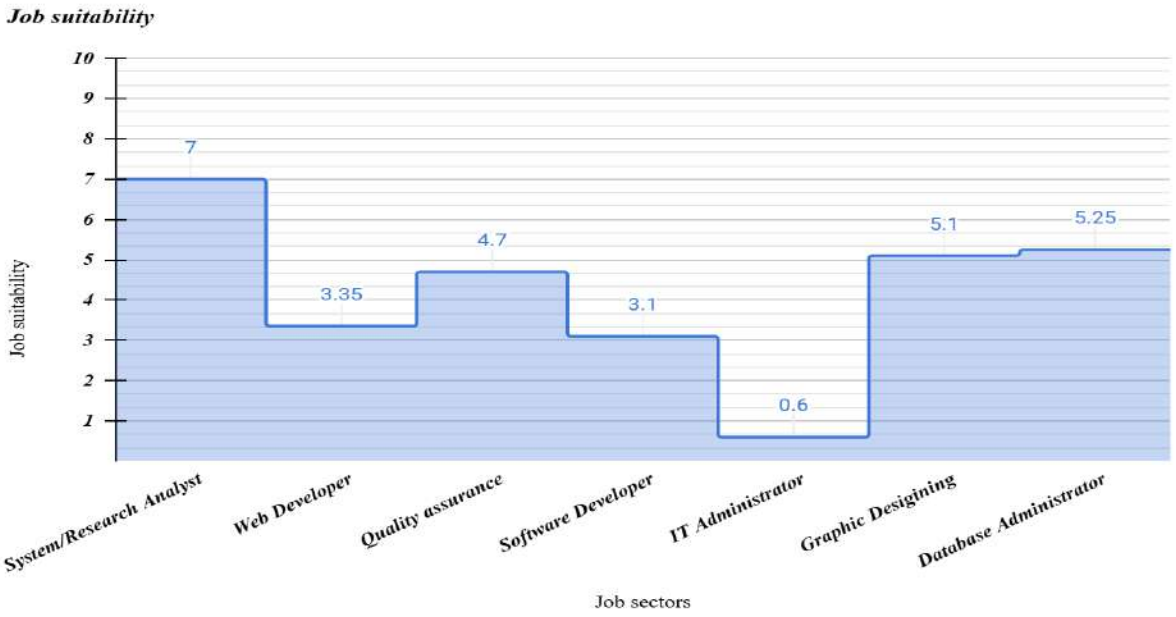
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Moderate	1. Blindly re- answer all questions after reviewing initial answers. 2. Write expository paragraphs and design multiple- choice questions. 3. Debate passage interpretations with a partner weekly. 4. Log idioms and practice using them correctly weekly. 5. Insert distracting questions and pause before answering
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student shows promising abilities in Group Discussion (GD) and Personal Interview (PI), suggesting average communication and interpersonal skills. Performance in Logical, Verbal, and Quantitative Ability is currently strong and has the potential to improve with strategic effort. Incorporating structured mock tests, guided mentoring sessions, and practice-focused class activities will help bridge the gap. With dedication and continuous learning, the student is well-positioned to elevate performance across all areas.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

Mock Drive Analysis

Name:	CHAUDHARI KUNJ DINESHBHAI
Enrollment Number:	2314406016
Course:	*BSC IT*
Date:	*18th March 2024*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

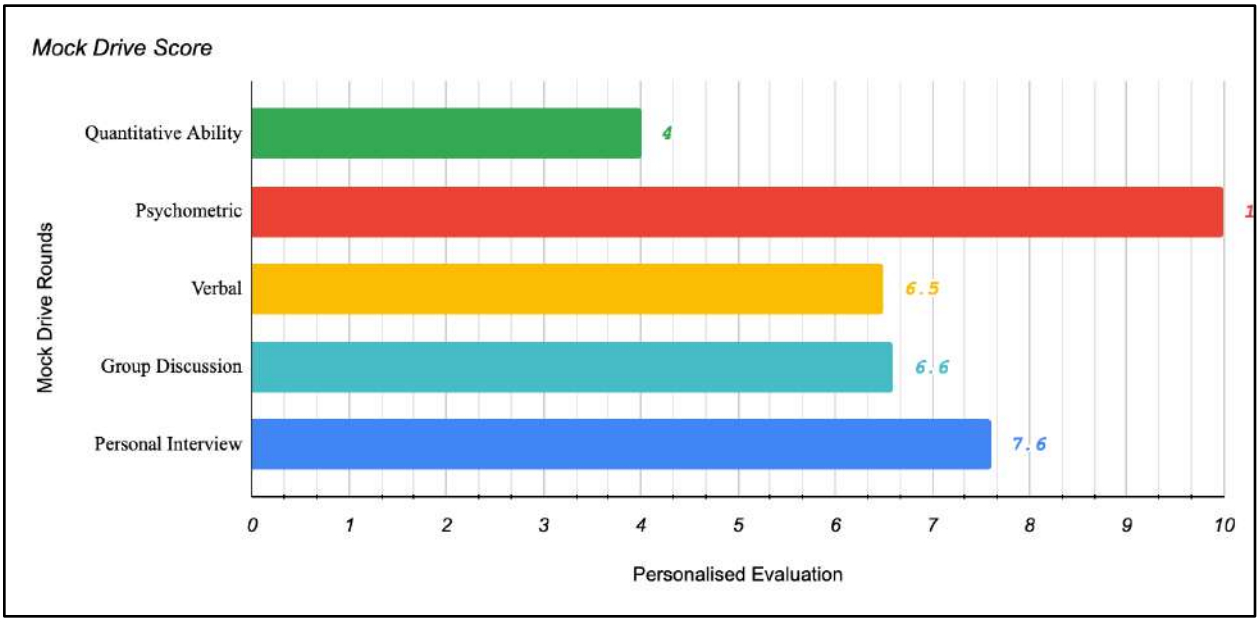
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Congratulations on achieving a GOOD score in the verbal section! Your performance reflects a solid understanding of verbal concepts and a commendable effort in your preparation. Your ability to comprehend and analyze written passages is commendable. Your use of vocabulary is effective and demonstrates a diverse range of words. This skill is crucial in conveying precise meanings and enhancing the overall quality of your responses. Pay attention to time constraints during the test. Practice managing your time effectively to ensure that you can complete all sections within the allocated time frame. Work on refining sentence structure and grammar to enhance the overall clarity of your responses. A well-structured response not only conveys your ideas effectively but also showcases your language proficiency. Remember that improvement is a continuous process, and your commitment to refining your skills will undoubtedly yield positive results. Keep up the good work!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are outstanding and reflect a high level of cognitive sharpness, emotional intelligence, and self-awareness. You demonstrate not just the ability to solve problems accurately, but also to approach them with strategic thinking and composure. Your consistency across reasoning, personality profiling, and attention-based tasks suggests a mature, well-rounded mindset ready for real-world challenges. To maintain and further polish this excellence, continue exposing yourself to diverse psychometric exercises, especially those that require adaptability and advanced decision-making. Focus on analyzing subtle patterns in data and human behavior, as these will enhance your already strong intuitive grasp. You are operating at a highly competitive level - stay curious, stay reflective, and you'll keep setting new benchmarks for yourself. Outstanding performance: truly impressive!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

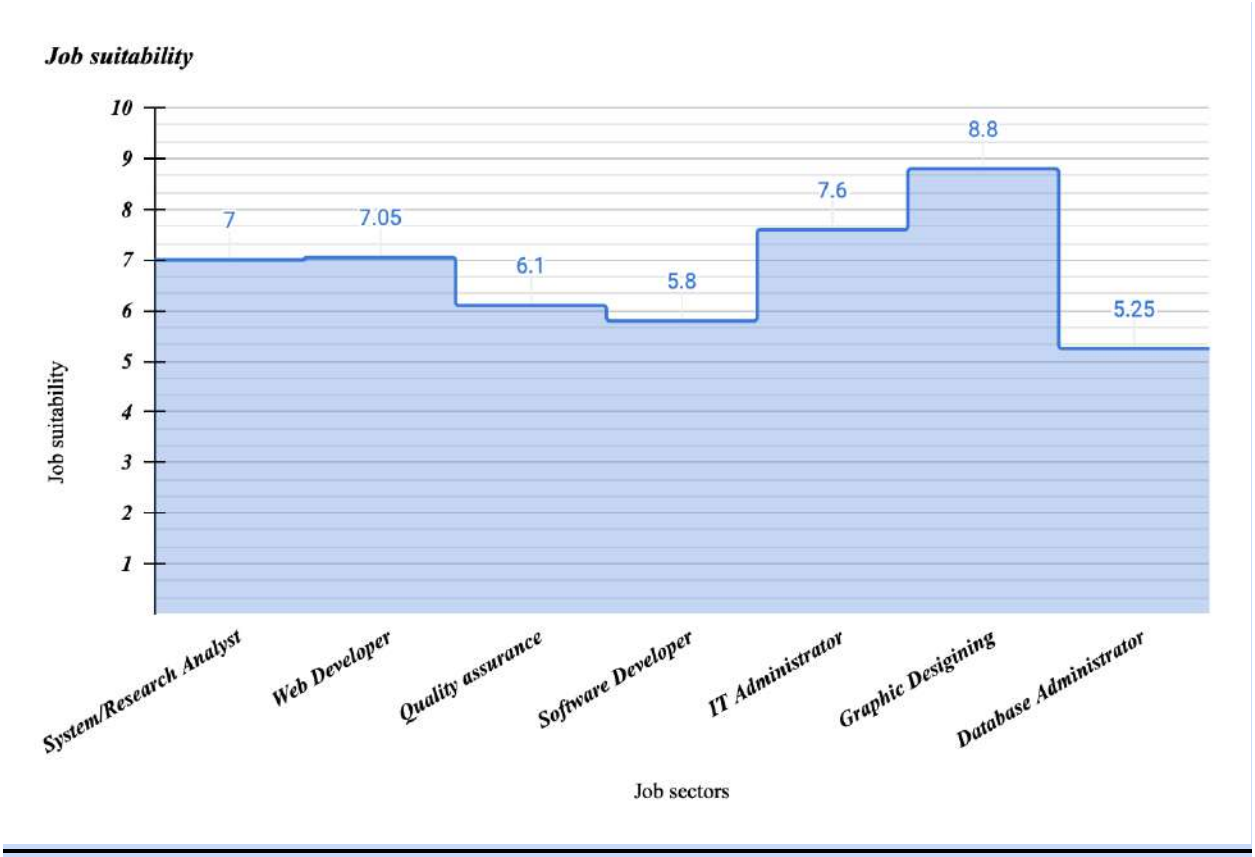
Your contributions during the group discussion were notable. You demonstrated good communication skills, expressing your thoughts clearly and effectively. Your ability to actively listen to others and engage in the conversation was evident, contributing positively to the overall dynamics of the group. While you did well in expressing your own ideas, consider actively seeking out and acknowledging diverse perspectives within the group. This can enrich the discussion and demonstrate a well-rounded understanding of the topic. Challenge yourself to delve deeper into counterarguments. While you presented your points effectively, exploring opposing viewpoints and addressing potential counterarguments can add depth to your contributions. Remember, these are just areas for potential growth, and your current performance is already commendable. Keep up the good work, and we look forward to seeing how you continue to excel in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

You approached the PI round with professionalism and a clear sense of preparation. Your confidence and maturity came through well, which created a strong first impression. Your responses were generally clear and well-structured. To further enhance your performance, focus on backing your answers with specific, relevant examples from your experiences—whether academic, extracurricular, or personal. This will help you demonstrate depth of thought and a stronger connection between your experiences and the role you're aspiring for. In situations where a question feels vague or unclear, feel free to ask for clarification. Doing so not only reflects presence of mind but also ensures your response aligns with the interviewer's expectations. Continue building on the good foundation you've established. With more practice and reflection, you'll be well-prepared to handle even more challenging interviews. Keep up the effort, and best wishes for your next steps!

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	To thrive as a System/Research Analyst, candidates should excel in soft skills like clear communication and problem-solving skills. These companies value adaptability, proficiency in data analysis tools, and effective presentation skills.
Web Developer	**GOOD**	To excel as a Web Developer, candidates should possess a strong foundation in coding languages coupled with problem-solving abilities. Companies value adaptability to new technologies, and proficiency in frameworks. Effective communication skills, both verbal and written, are crucial for collaborating with team members and understanding client requirements.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there, your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**GOOD**	You're well-suited for IT Administration. Your technical problem-solving skills and understanding of networks, systems, and protocols are commendable. Keep upgrading your knowledge on current trends in cloud services and cybersecurity. Practical exposure and staying up to date with IT innovations will ensure long-term success.
Graphic Designing	**GOOD**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense. Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Moderate	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Moderate	1. Structure your arguments in a logical flow: point, reason, example. 2. Practice initiating and summarizing GDs. 3. Use simple, impactful language to express complex ideas. 4. Learn to respectfully disagree and build on others points. 5. Work on controlling voice modulation and pitch for better engagement.
Personal Interview	Moderate	1. Prepare an impressive “tell me about yourself” 2. Maintain positive body language and reduce restrictiveness 3. Put efforts to talk more about your strengths and accomplishments 4. Answer every question in brief and with a relevant example 5. Work on your CV

6.0 Performance Summary:

The student exhibits commendable strength in Group Discussion (GD) and Personal Interview (PI), standing out as a confident and articulate individual. While some improvement areas remain in Logical, Verbal, and Quantitative Ability, these can be effectively addressed through structured training and consistent effort. With the right blend of mock tests, focused mentoring, and skill-specific guidance, the student can further sharpen their analytical capabilities and evolve into a well-rounded performer. The progress so far is encouraging and sets a solid foundation for continued success.

10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental

concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

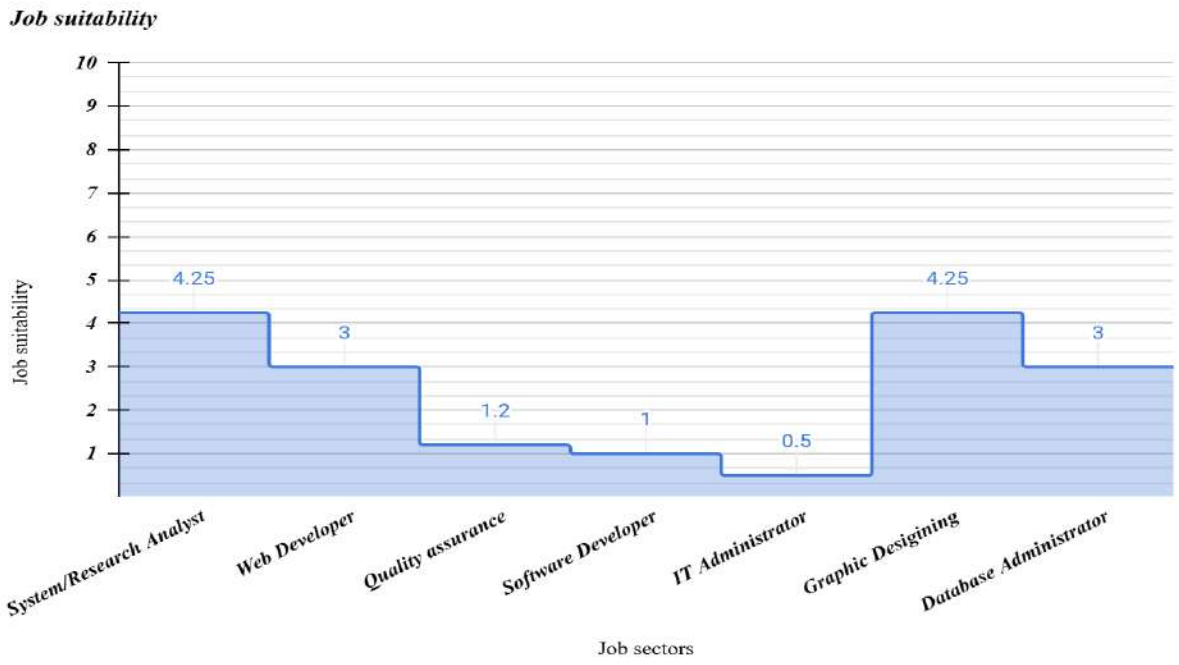
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Blindly re- answer all questions after reviewing initial answers. 2. Write expository paragraphs and design multiple- choice questions. 3. Debate passage interpretations with a partner weekly. 4. Log idioms and practice using them correctly weekly. 5. Insert distracting questions and pause before answering
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher

		questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. Group Discussion (GD) and Personal Interview (PI) skills need to be developed and there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

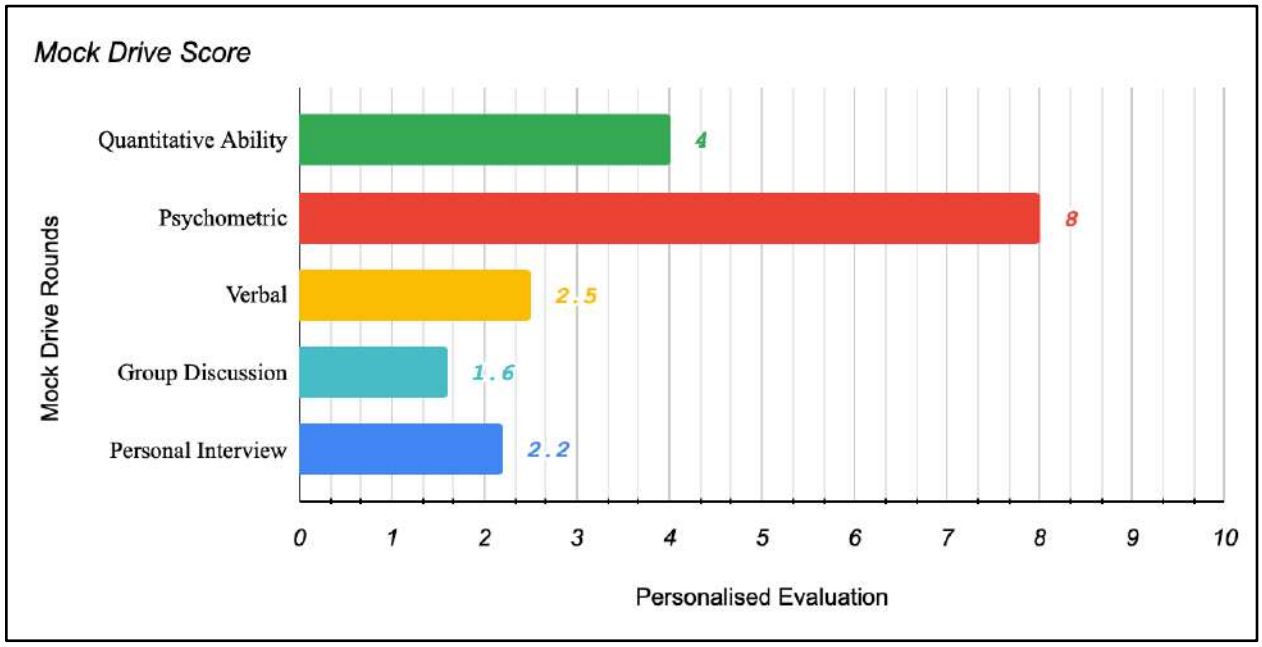
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

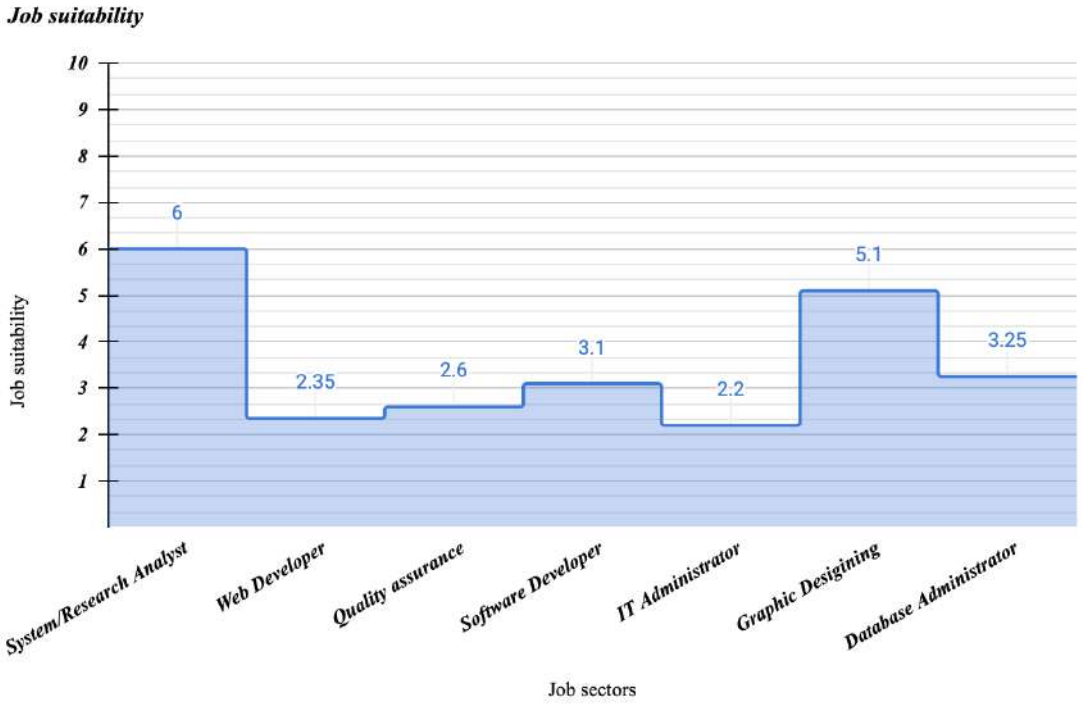
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems

		like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with

		database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions.

		2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Corporate Readiness Chart						
PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

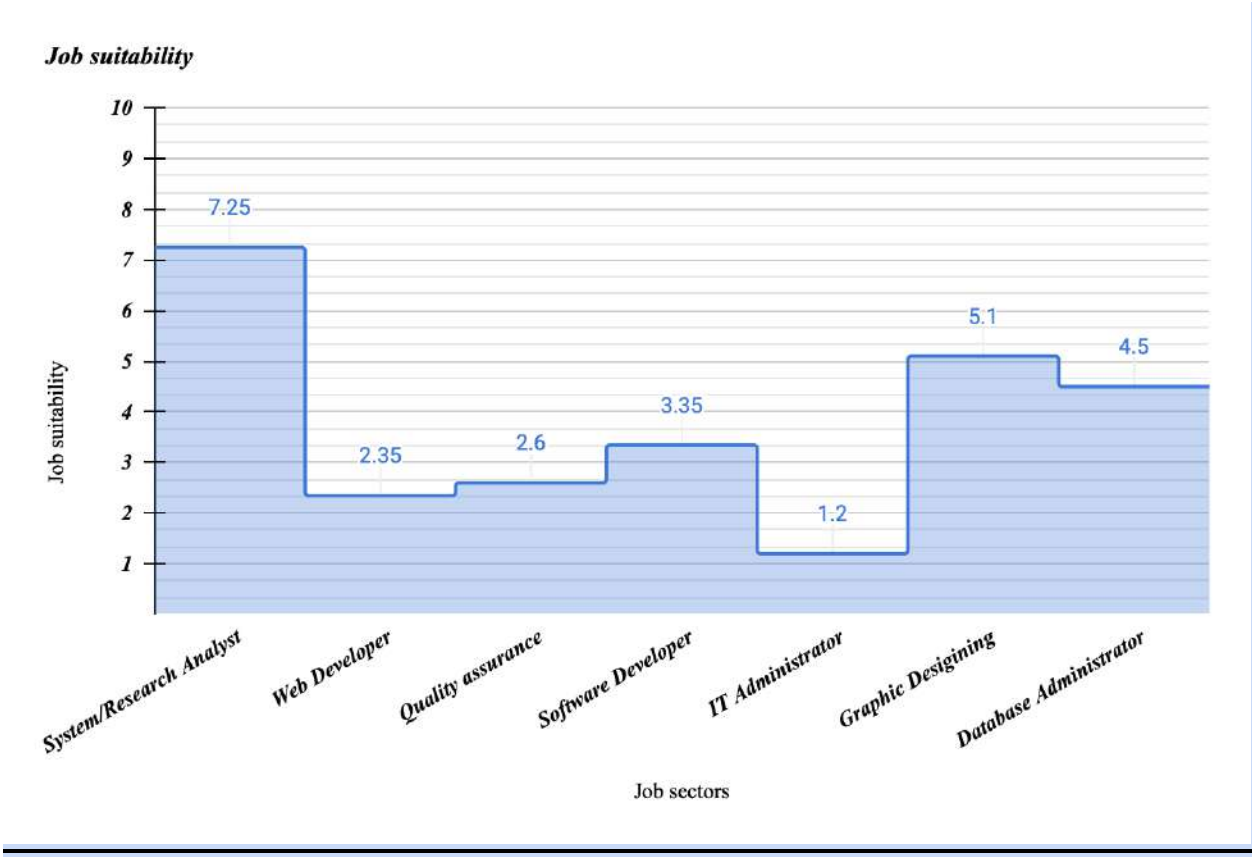
Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems

		like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with

		large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals.

		4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student shows promising abilities in Group Discussion (GD) and Personal Interview (PI), suggesting strong communication and interpersonal skills. Performance in Logical, Verbal, and Quantitative Ability is currently average and has the potential to improve with strategic effort. Incorporating structured mock tests, guided mentoring sessions, and practice-focused class activities will help bridge the gap. With dedication and continuous learning, the student is well-positioned to elevate performance across all areas.

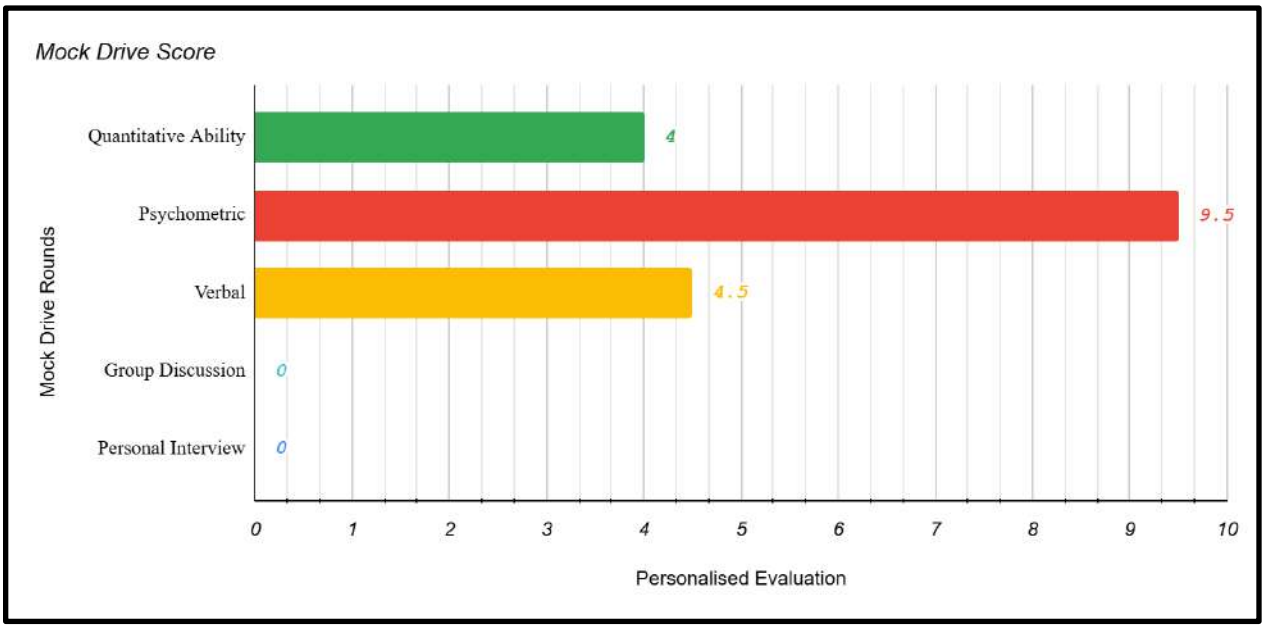
The other parameters they use for short listing are acceptable

Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively

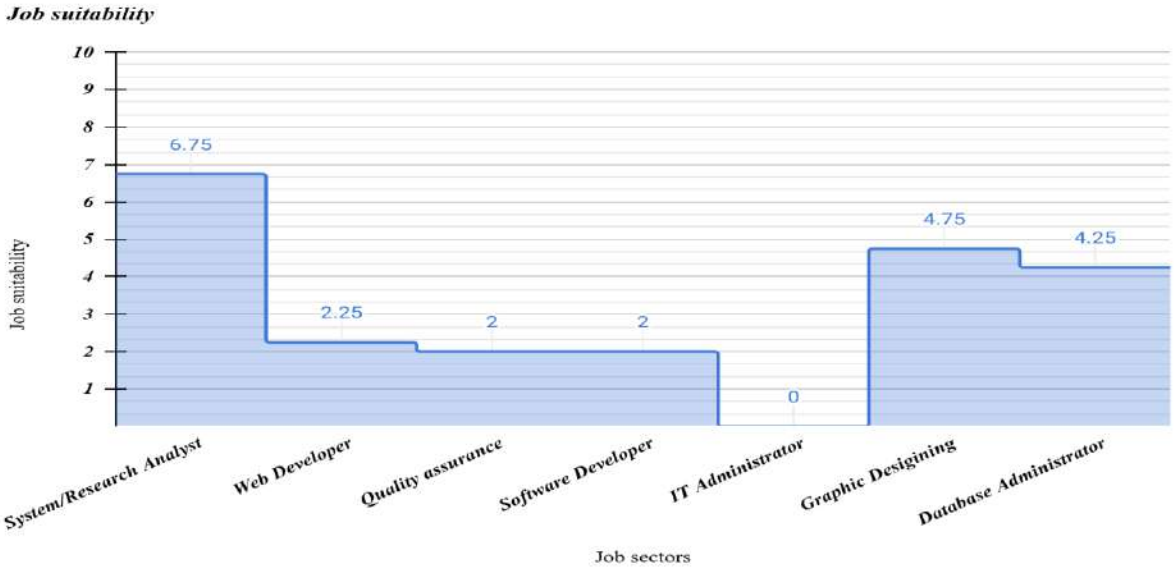
participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1.Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3.Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking.

		5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Psychometric (20)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %
	Quantitative (20)						
	Verbal (20)	Pseudo coding (30)			B (Dream Company)	6- 10 lakh	70- 79 %
	GD (20)	Programming (30)			C (Ideal Company)	3-6 Lakh	60 - 69 %
	PI (20)	Technical Interview (20)			D (Average Company)	Below 3 lakh	50 - 59 %

Course:	*BSC IT*
Date:	*18th March 2024*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

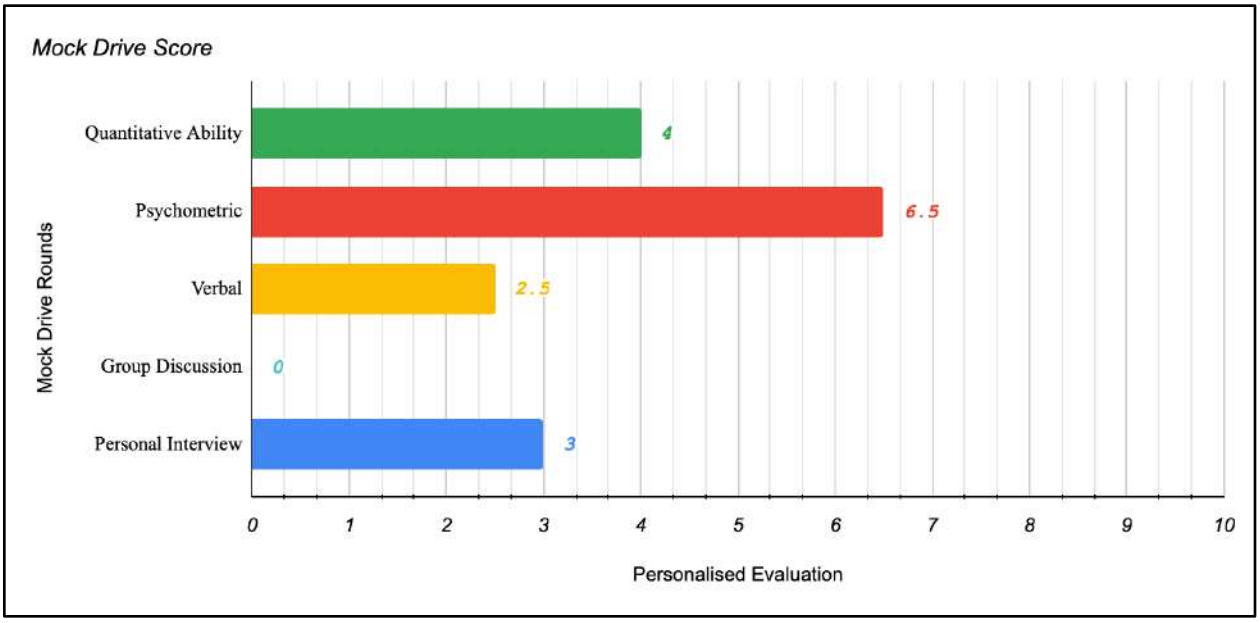
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

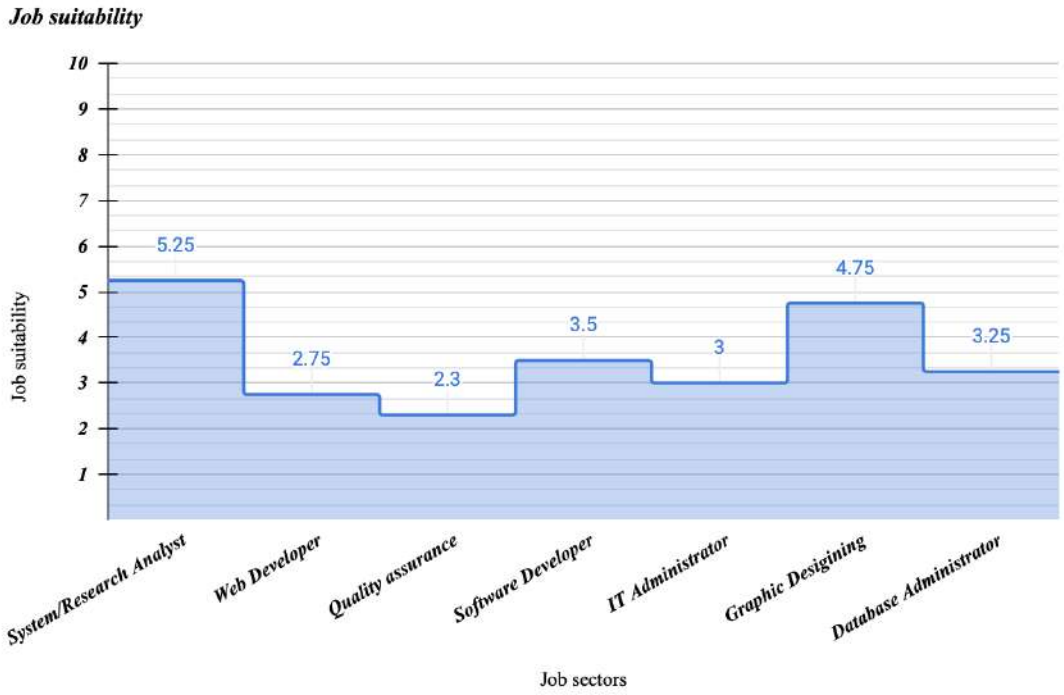
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and

		communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with

		database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions.

		2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart

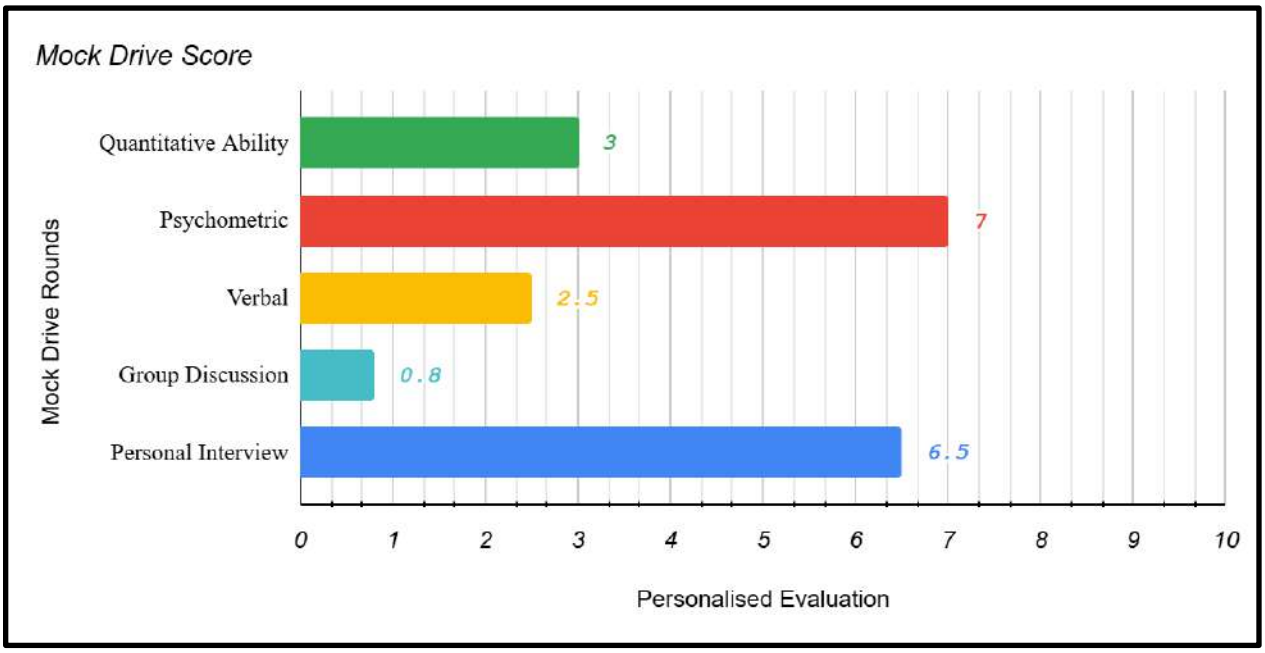
Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an

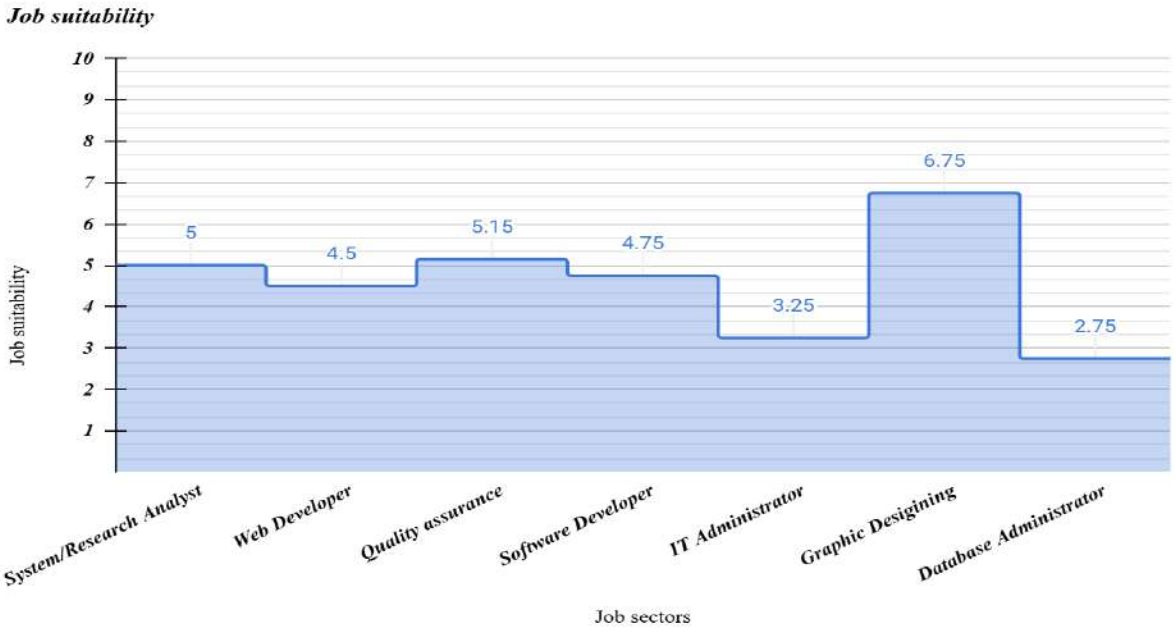
opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

You approached the PI round with professionalism and a clear sense of preparation. Your confidence and maturity came through well, which created a strong first impression. Your responses were generally clear and well-structured. To further enhance your performance, focus on backing your answers with specific, relevant examples from your experiences—whether academic, extracurricular, or personal. This will help you demonstrate depth of thought and a stronger connection between your experiences and the role you're aspiring for. In situations where a question feels vague or unclear, feel free to ask for clarification. Doing so not only reflects presence of mind but also ensures your response aligns with the interviewer's expectations. Continue building on the good foundation you've established. With more practice and reflection, you'll be well-prepared to handle even more challenging interviews. Keep up the effort, and best wishes for your next steps!.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**MEDIUM**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**GOOD**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense. Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.
Database Administrator	**LOW**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher

		questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. Strengths need to be built up in Group Discussion (GD) and Personal Interview (PI) and there is considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

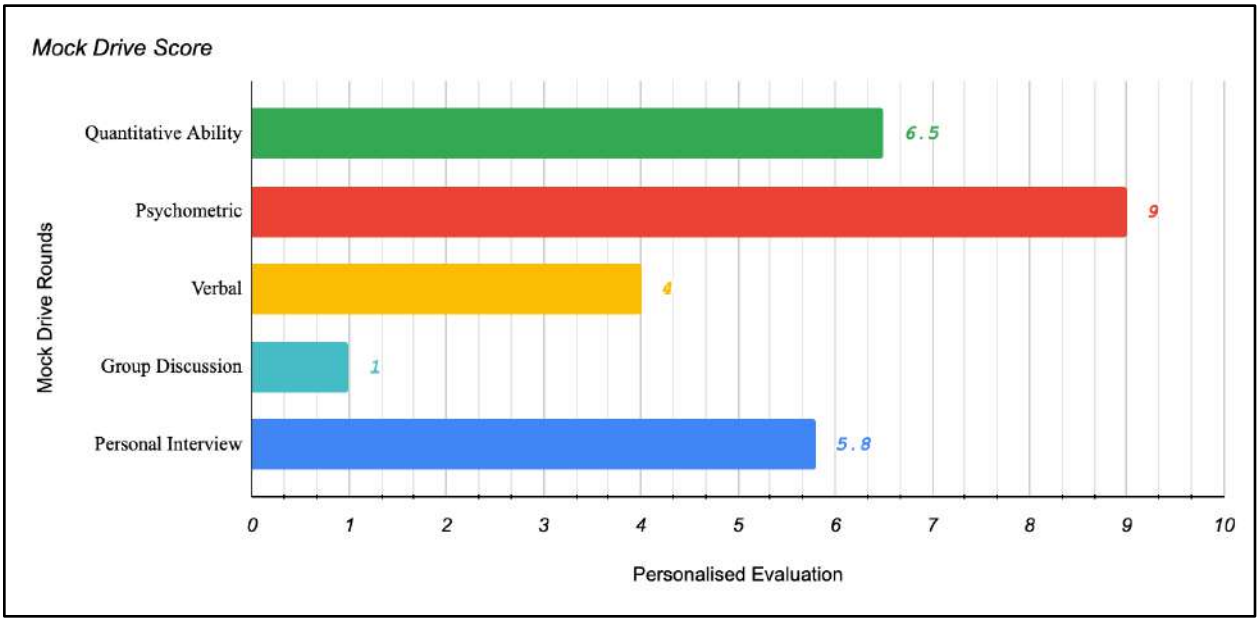
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance with Quantitative Ability has been commendable, and we appreciate the effort you've put into mastering quantitative concepts. Your grasp of fundamental quantitative concepts is evident in your performance. Your ability to comprehend and apply mathematical principles is commendable. Your responses demonstrate a high level of accuracy. You are consistently able to solve problems with precision, showcasing a strong foundation in quantitative reasoning. Challenge yourself with more complex quantitative problems. While you excel in solving standard questions, pushing yourself to tackle more intricate scenarios will enhance your problem-solving skills even further. Remember, improvement is a continuous process, and we are confident that with your dedication and focus, you will see even greater success!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

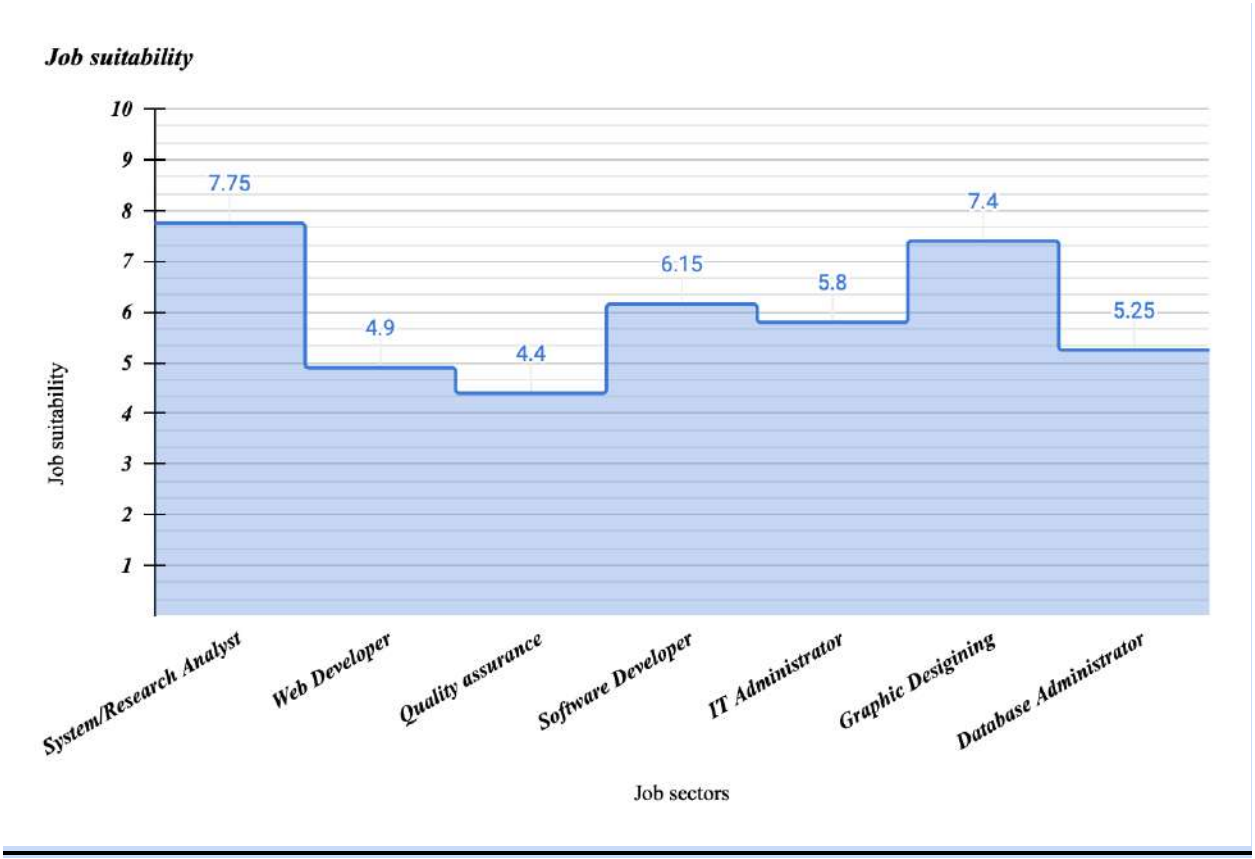
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	To thrive as a System/Research Analyst, candidates should excel in soft skills like clear communication and problem-solving skills. These companies value adaptability, proficiency in data analysis tools, and effective presentation skills.
Web Developer	**MEDIUM**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech

		concepts clearly. With consistent effort, your chances of landing this role will improve.
Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there, your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**MEDIUM**	You're developing a good foundation for an IT Admin role. Focus on hands-on practice—set up local networks, explore admin panels, and simulate problem-solving scenarios. Learn how to manage servers, handle security protocols, and adapt to new IT tools. A proactive learning approach will significantly boost your chances.
Graphic Designing	**GOOD**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense. Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Moderate	1. Prepare an impressive “tell me about yourself” 2. Maintain positive body language and reduce restrictiveness 3. Put efforts to talk more about your strengths and accomplishments 4. Answer every question in brief and with a relevant example

		5. Work on your CV

6.0 Performance Summary:

The student exhibits commendable strength in Group Discussion (GD) and Personal Interview (PI), standing out as a confident and articulate individual. While some improvement areas remain in Logical, Verbal, and Quantitative Ability, these can be effectively addressed through structured training and consistent effort. With the right blend of mock tests, focused mentoring, and skill-specific guidance, the student can further sharpen their analytical capabilities and evolve into a well-rounded performer. The progress so far is encouraging and sets a solid foundation for continued success.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

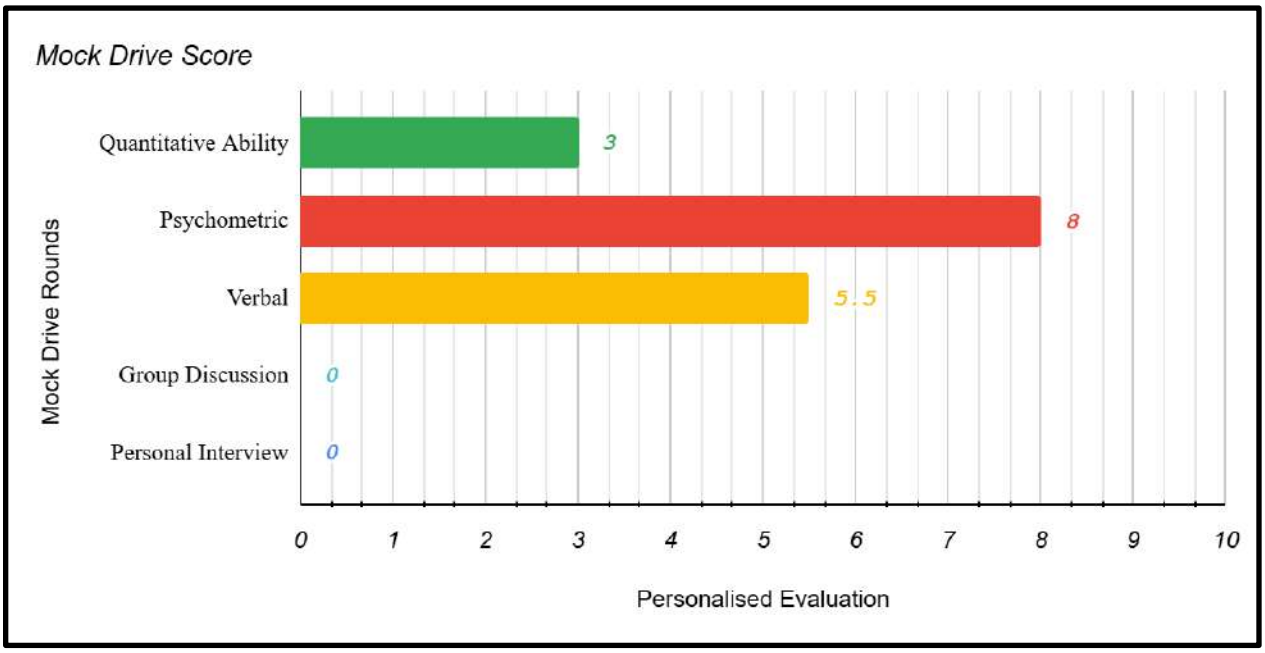
• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable

Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an

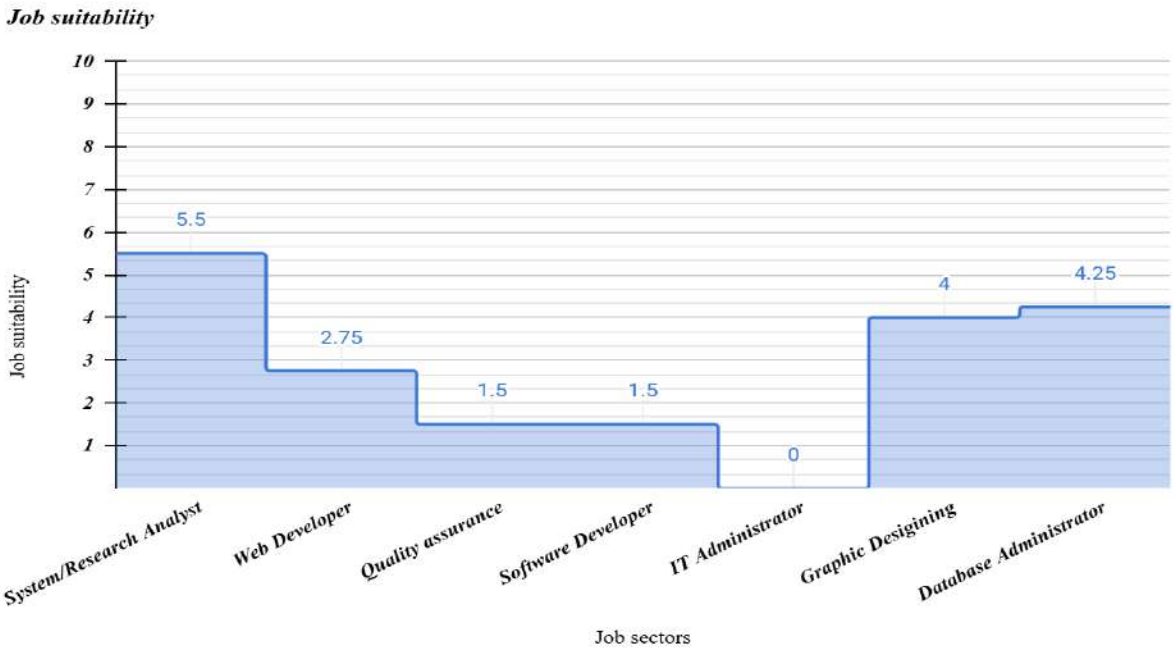
opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Moderate	1. Blindly re- answer all questions after reviewing initial answers. 2. Write expository paragraphs and design multiple- choice questions. 3. Debate passage interpretations with a partner weekly. 4. Log idioms and practice using them correctly weekly. 5. Insert distracting questions and pause before answering
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. Group Discussion (GD) and Personal Interview (PI) skills need to be developed and there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

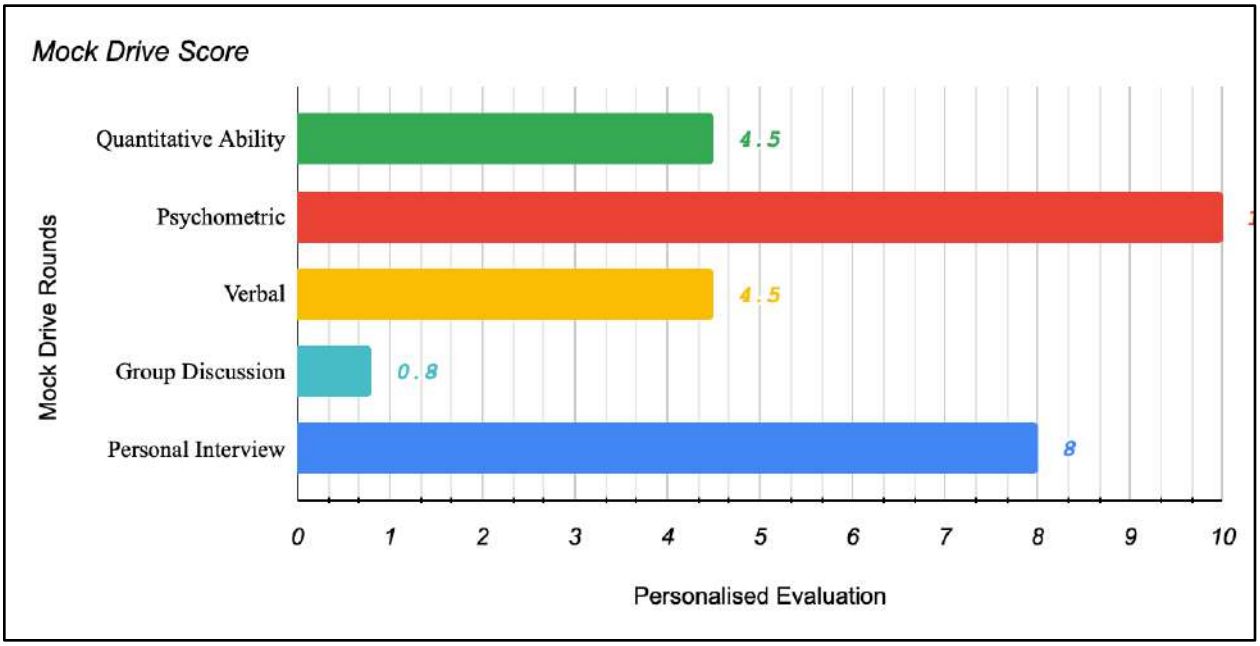
- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are outstanding and reflect a high level of cognitive sharpness, emotional intelligence, and self-awareness. You demonstrate not just the ability to solve problems accurately, but also to approach them with strategic thinking and composure. Your consistency across reasoning, personality profiling, and attention-based tasks suggests a mature, well-rounded mindset ready for real-world challenges. To maintain and further polish this excellence, continue exposing yourself to diverse psychometric exercises, especially those that require adaptability and advanced decision-making. Focus on analyzing subtle patterns in data and human behavior, as these will enhance your already strong intuitive grasp. You are operating at a highly competitive level - stay curious, stay reflective, and you'll keep setting new benchmarks for yourself. Outstanding performance: truly impressive!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

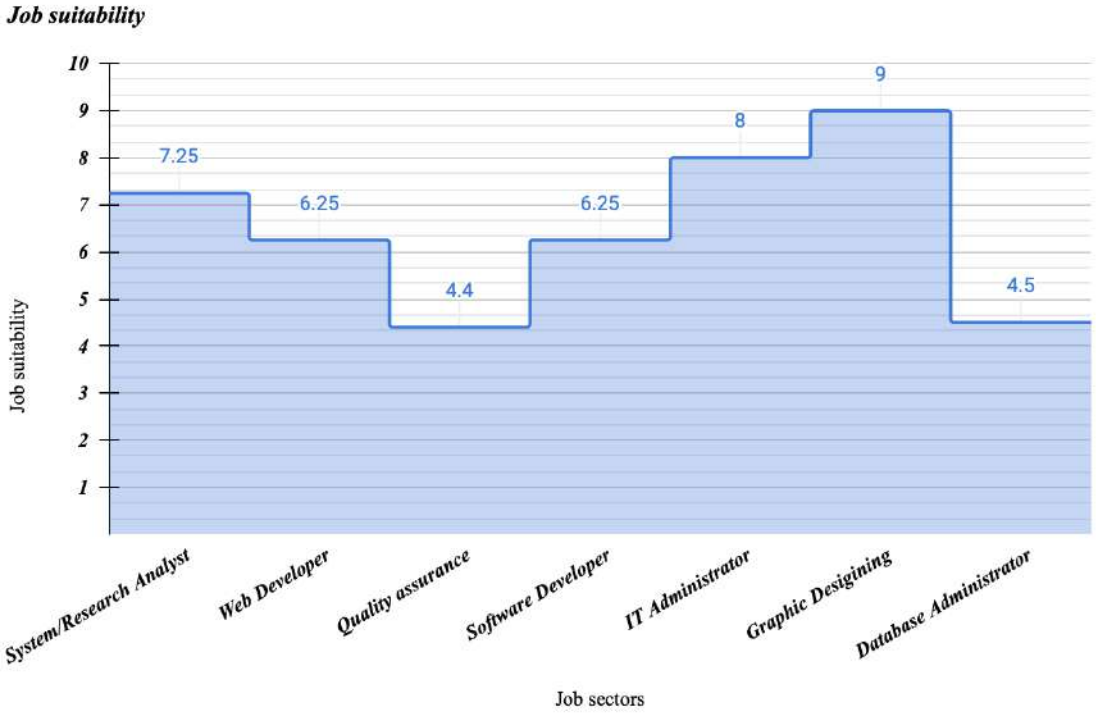
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

You approached the PI round with professionalism and a clear sense of preparation. Your confidence and maturity came through well, which created a strong first impression. Your responses were generally clear and well-structured. To further enhance your performance, focus on backing your answers with specific, relevant examples from your experiences—whether academic, extracurricular, or personal. This will help you demonstrate depth of thought and a stronger connection between your experiences and the role you're aspiring for. In situations where a question feels vague or unclear, feel free to ask for clarification. Doing so not only reflects presence of mind but also ensures your response aligns with the interviewer's expectations. Continue building on the good foundation you've established. With more practice and reflection, you'll be well-prepared to handle even more challenging interviews. Keep up the effort, and best wishes for your next steps!

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**GOOD**	You demonstrate strong potential as a Web Developer. Your knowledge of coding languages, frameworks, and team collaboration is evident. To stand out further, keep experimenting with new tech stacks and contribute to open-source projects.

		Keep up the momentum—you're on track for great opportunities in this field.
Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**GOOD**	You have a solid base for a successful Software Developer role. Your problem-solving, logical reasoning, and adaptability to technologies are commendable. Keep building projects, exploring advanced concepts like APIs or microservices, and refining your collaboration skills. With consistent effort, you're well on your way to excellence in this field.
IT Administrator	**GOOD**	You're well-suited for IT Administration. Your technical problem-solving skills and understanding of networks, systems, and protocols are commendable. Keep upgrading your knowledge on current trends in cloud services and cybersecurity. Practical exposure and staying up to date with IT innovations will ensure long-term success.
Graphic Designing	**GOOD**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense. Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with

		large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Moderate	1. Prepare an impressive “tell me about yourself” 2. Maintain positive body language

		3. Put efforts to talk more about your strengths and accomplishments 4. Answer every question confidently and with a relevant example 5. Work on your CV 6. Practice relaxation techniques such as deep breathing or visualization to calm your nerves.

6.0 Performance Summary:

The student exhibits commendable strength in Group Discussion (GD) and Personal Interview (PI), standing out as a confident and articulate individual. While some improvement areas remain in Logical, Verbal, and Quantitative Ability, these can be effectively addressed through structured training and consistent effort. With the right blend of mock tests, focused mentoring, and skill-specific guidance, the student can further sharpen their analytical capabilities and evolve into a well-rounded performer. The progress so far is encouraging and sets a solid foundation for continued success.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Psychometric (20)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %
	Quantitative (20)						
	Verbal (20)	Pseudo coding (30)			B (Dream Company)	6- 10 lakh	70- 79 %
	GD (20)	Programming (30)			C (Ideal Company)	3-6 Lakh	60 - 69 %
	PI (20)	Technical Interview (20)			D (Average Company)	Below 3 lakh	50 - 59 %
	55.6	-			E (Not Fit for Corporate)	NFC	Less than 50 %

Mock Drive Analysis

Name:	MUNJPARA DHRUV ASHOKBHAI
Enrollment Number:	2314406005
Course:	*BSC IT*
Date:	*18th March 2024*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

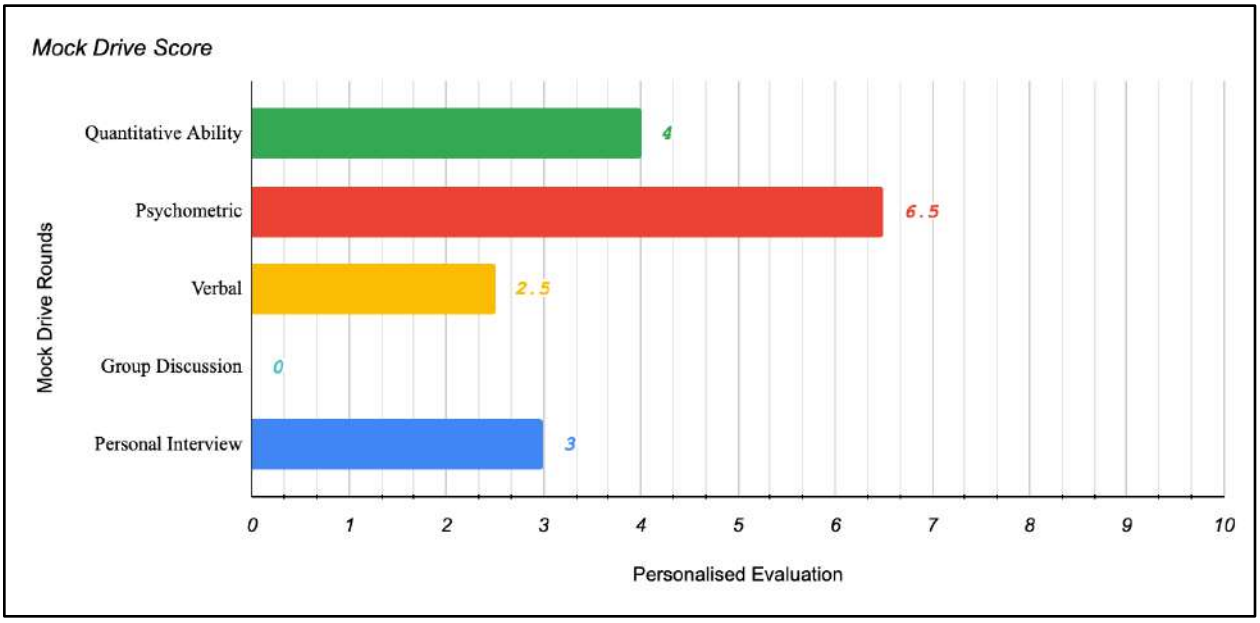
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

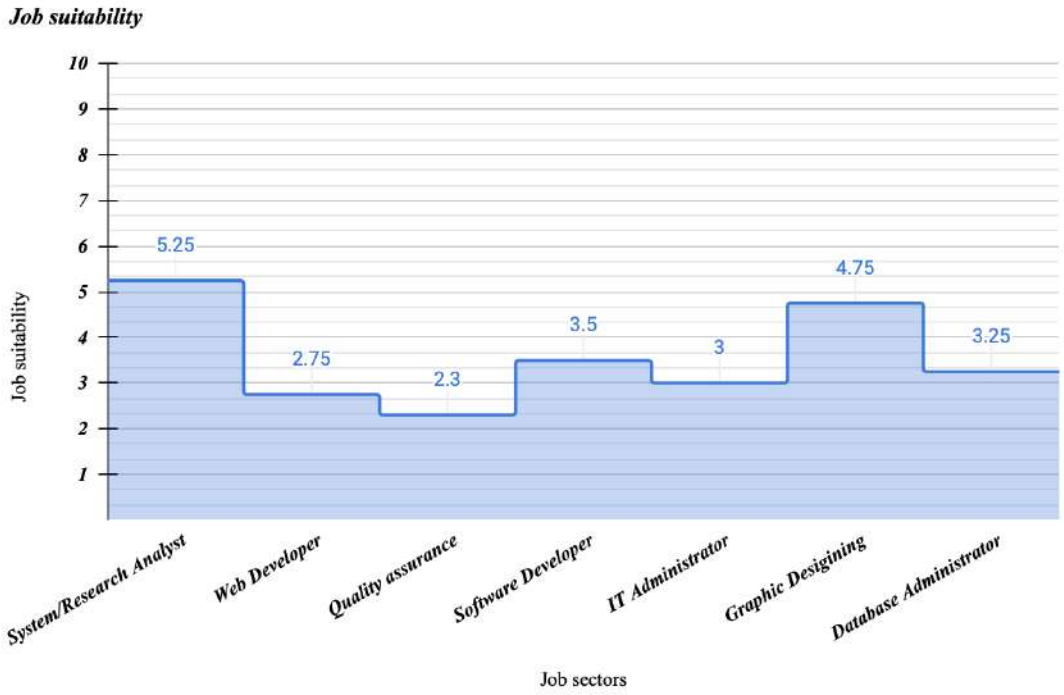
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and

		communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with

		database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions.

		2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart

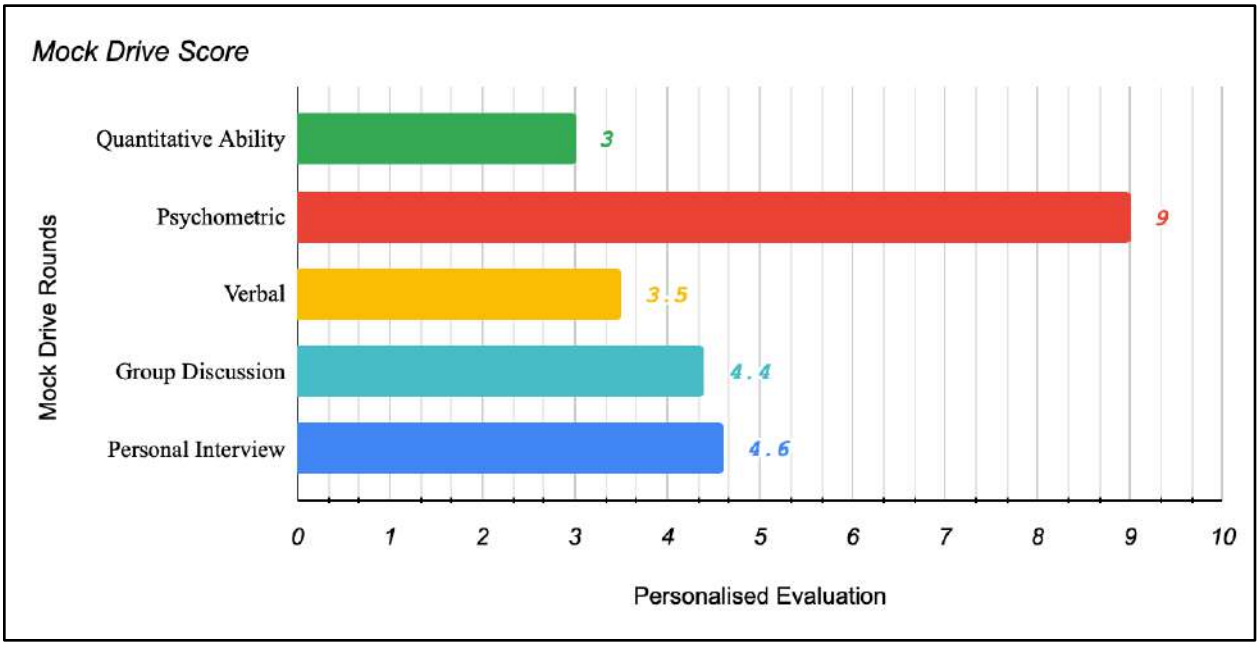
The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

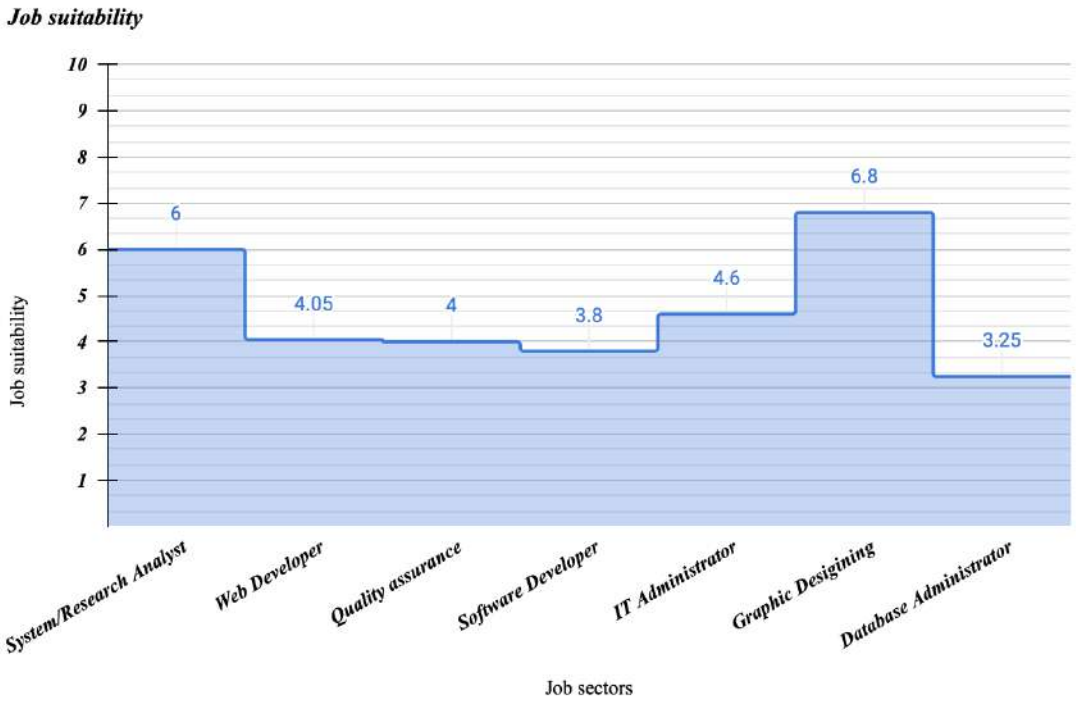
Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.

Web Developer	**MEDIUM**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.
Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**MEDIUM**	You're developing a good foundation for an IT Admin role. Focus on hands-on practice—set up local networks, explore admin panels, and simulate problem-solving scenarios. Learn how to manage servers, handle security protocols, and adapt to new IT tools. A proactive learning approach will significantly boost your chances.
Graphic Designing	**GOOD**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense. Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with

		database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions.

		2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student shows promising abilities in Group Discussion (GD) and Personal Interview (PI), suggesting strong communication and interpersonal skills. Performance in Logical, Verbal, and Quantitative Ability is currently average and has the potential to improve with strategic effort. Incorporating structured mock tests, guided mentoring sessions, and practice-focused class activities will help bridge the gap. With dedication and continuous learning, the student is well-positioned to elevate performance across all areas.

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

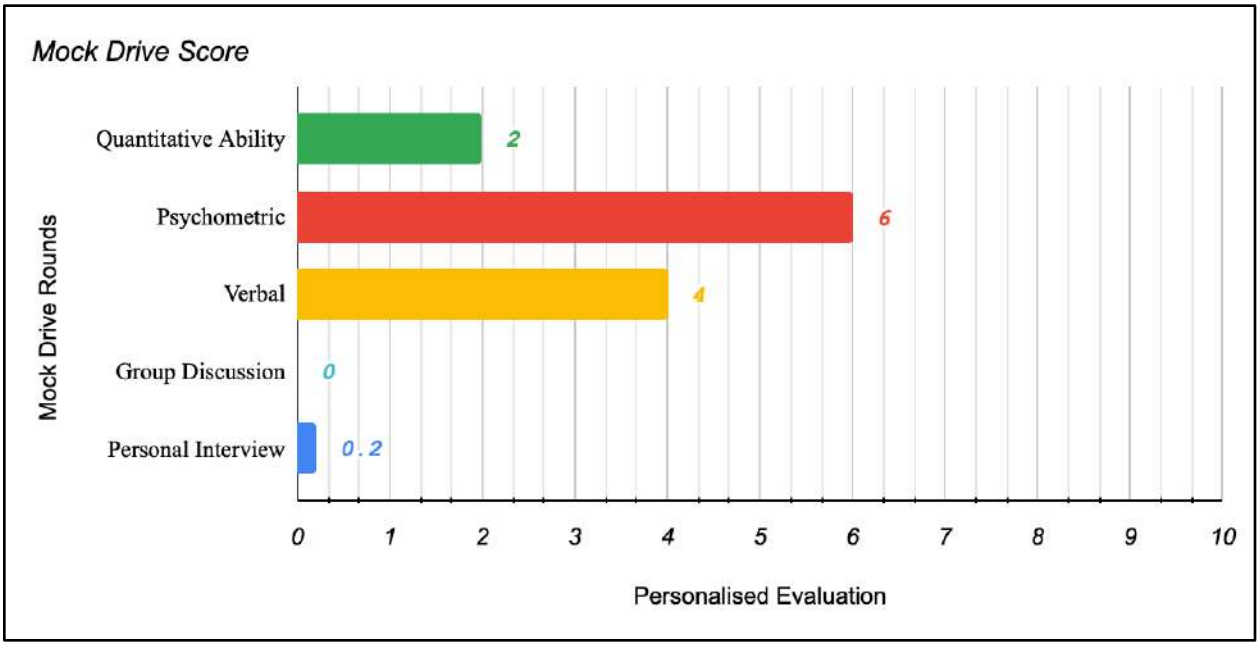
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

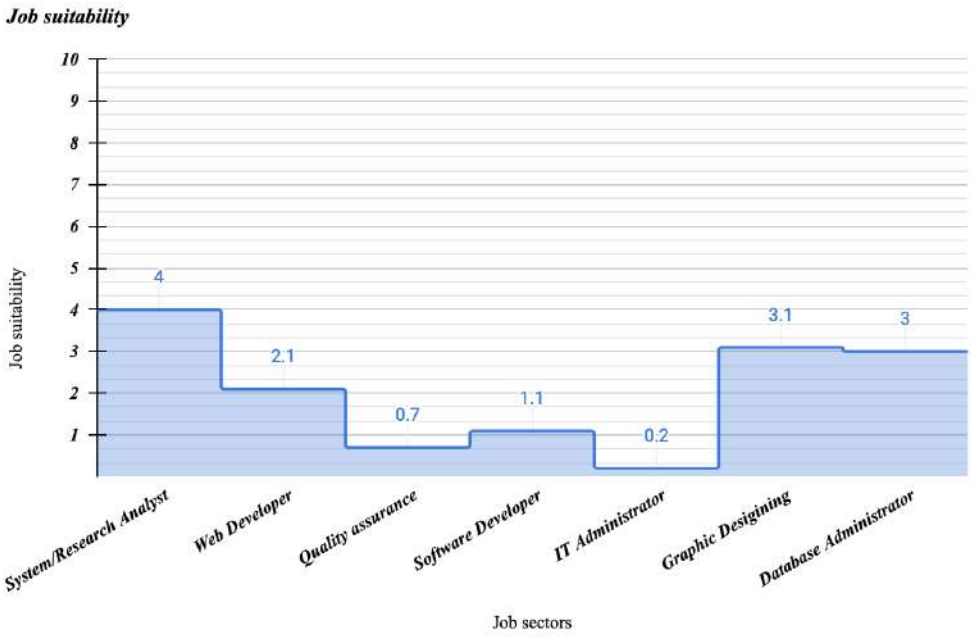
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and

		communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	Your current portfolio or skill set needs more work to align with graphic design expectations. Begin with mastering tools like Adobe Photoshop, Illustrator, and Canva. Understand design principles like balance, contrast, and typography. Try replicating existing designs to learn techniques, then move on to creating original work.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with

		database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions.

		2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

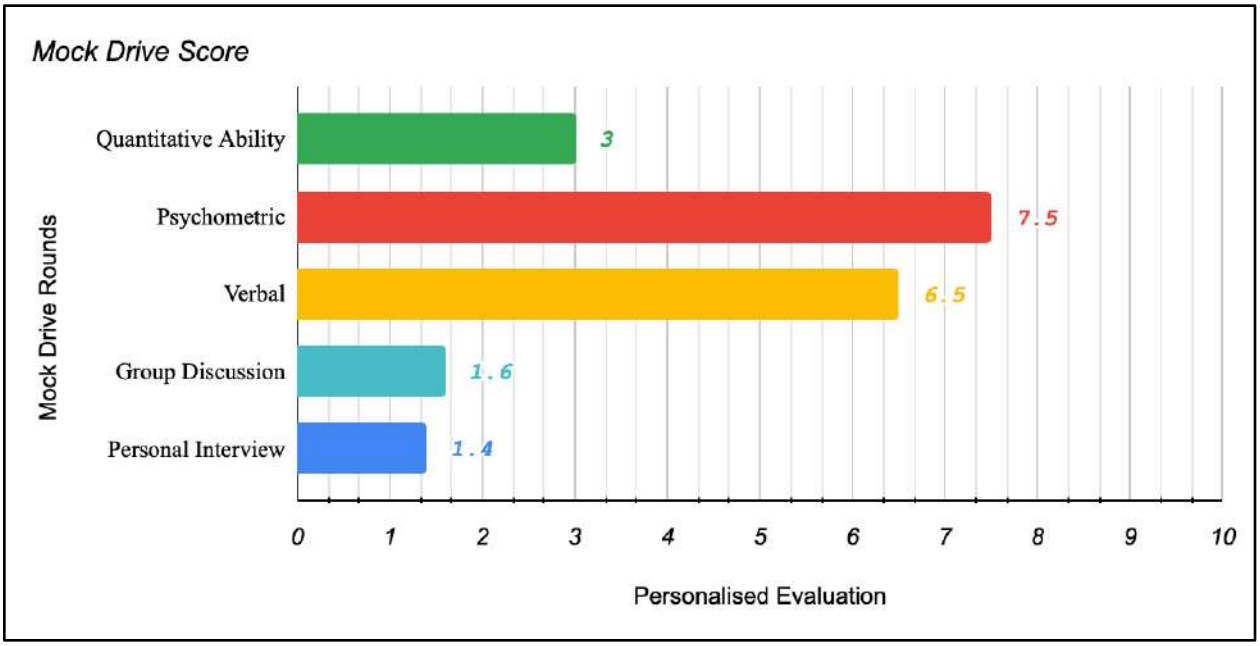
3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

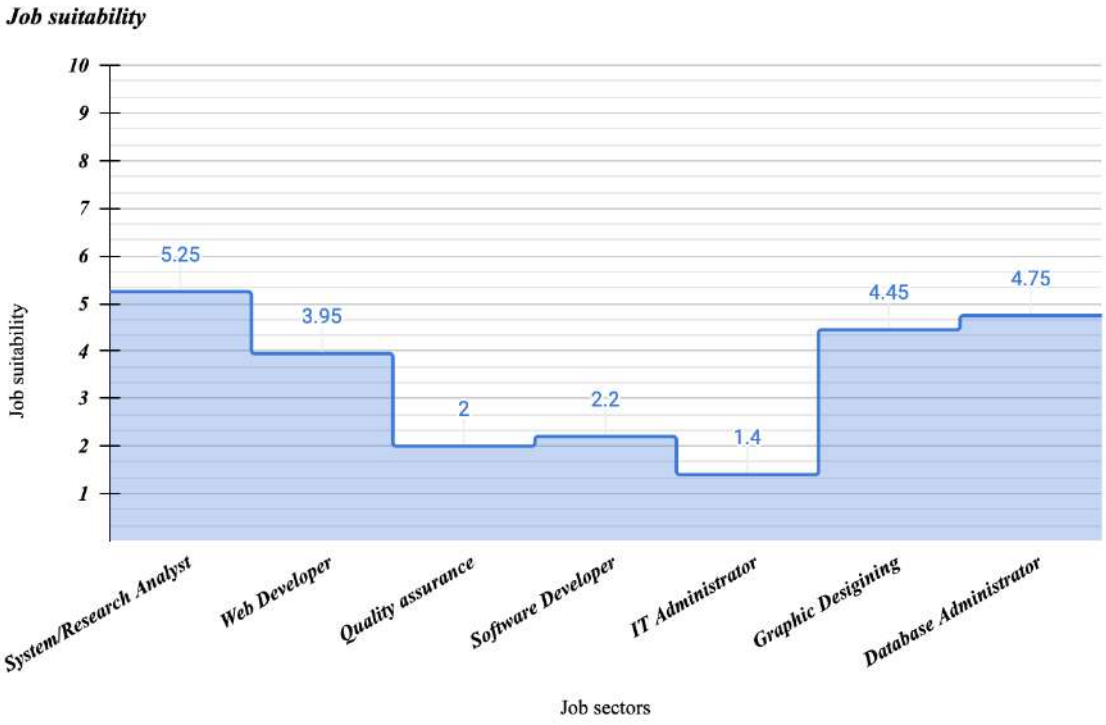
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.

Web Developer	**MEDIUM**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.

Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Moderate	1. Blindly re-answer all questions after reviewing initial answers. 2. Write expository paragraphs and design multiple-choice questions. 3. Debate passage interpretations with a partner weekly. 4. Log idioms and practice using them correctly weekly. 5. Insert distracting questions and pause before answering
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.

Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an

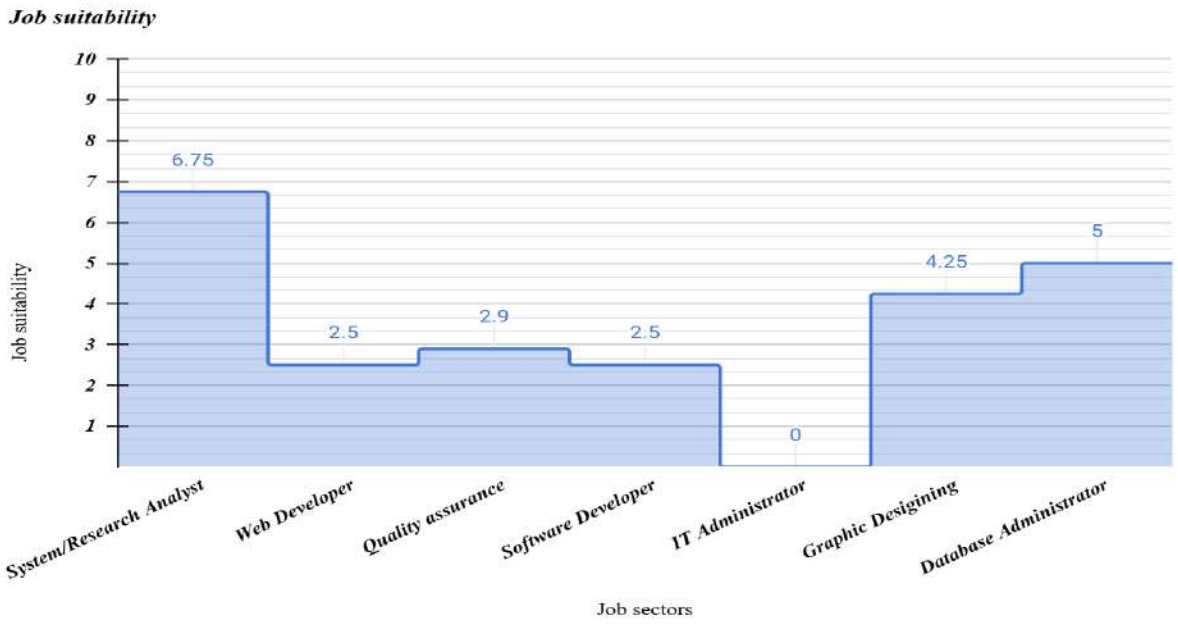
opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Moderate	1. Blindly re- answer all questions after reviewing initial answers. 2. Write expository paragraphs and design multiple- choice questions. 3. Debate passage interpretations with a partner weekly. 4. Log idioms and practice using them correctly weekly. 5. Insert distracting questions and pause before answering.
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. Strengths need to be built up in Group Discussion (GD) and Personal Interview (PI) and there is considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Psychometric (20)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %

Enrollment Number:	2314406002
Course:	*BSC IT*
Date:	*18th March 2024*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

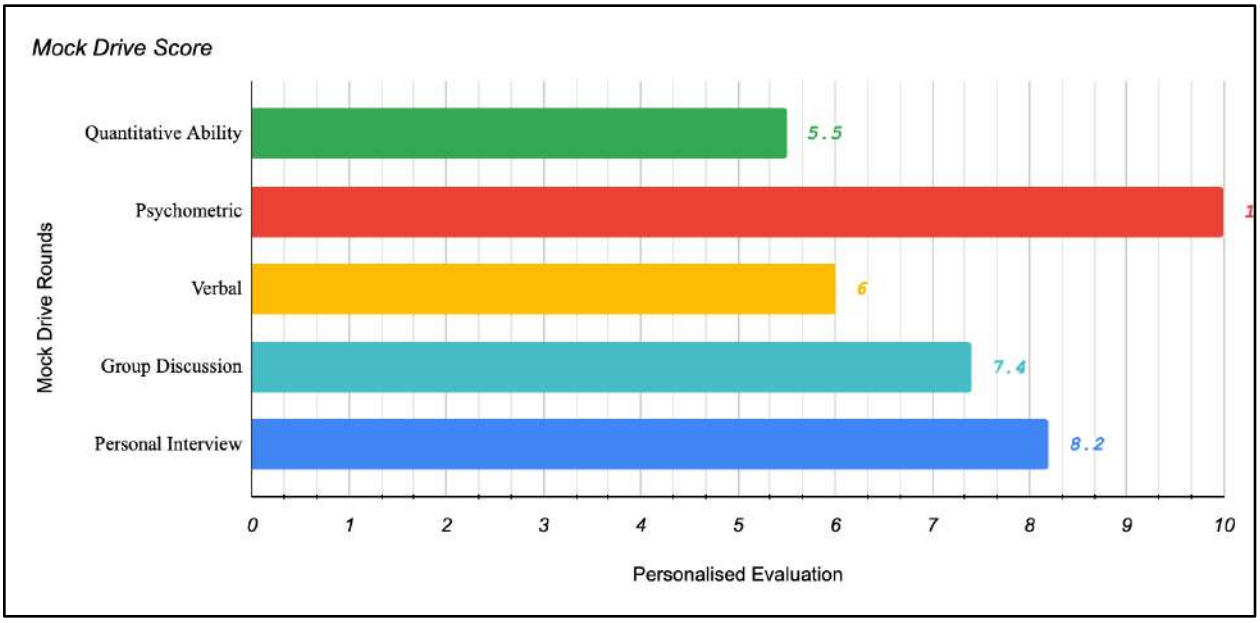
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are outstanding and reflect a high level of cognitive sharpness, emotional intelligence, and self-awareness. You demonstrate not just the ability to solve problems accurately, but also to approach them with strategic thinking and composure. Your consistency across reasoning, personality profiling, and attention-based tasks suggests a mature, well-rounded mindset ready for real-world challenges. To maintain and further polish this excellence, continue exposing yourself to diverse psychometric exercises, especially those that require adaptability and advanced decision-making. Focus on analyzing subtle patterns in data and human behavior, as these will enhance your already strong intuitive grasp. You are operating at a highly competitive level - stay curious, stay reflective, and you'll keep setting new benchmarks for yourself. Outstanding performance: truly impressive!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

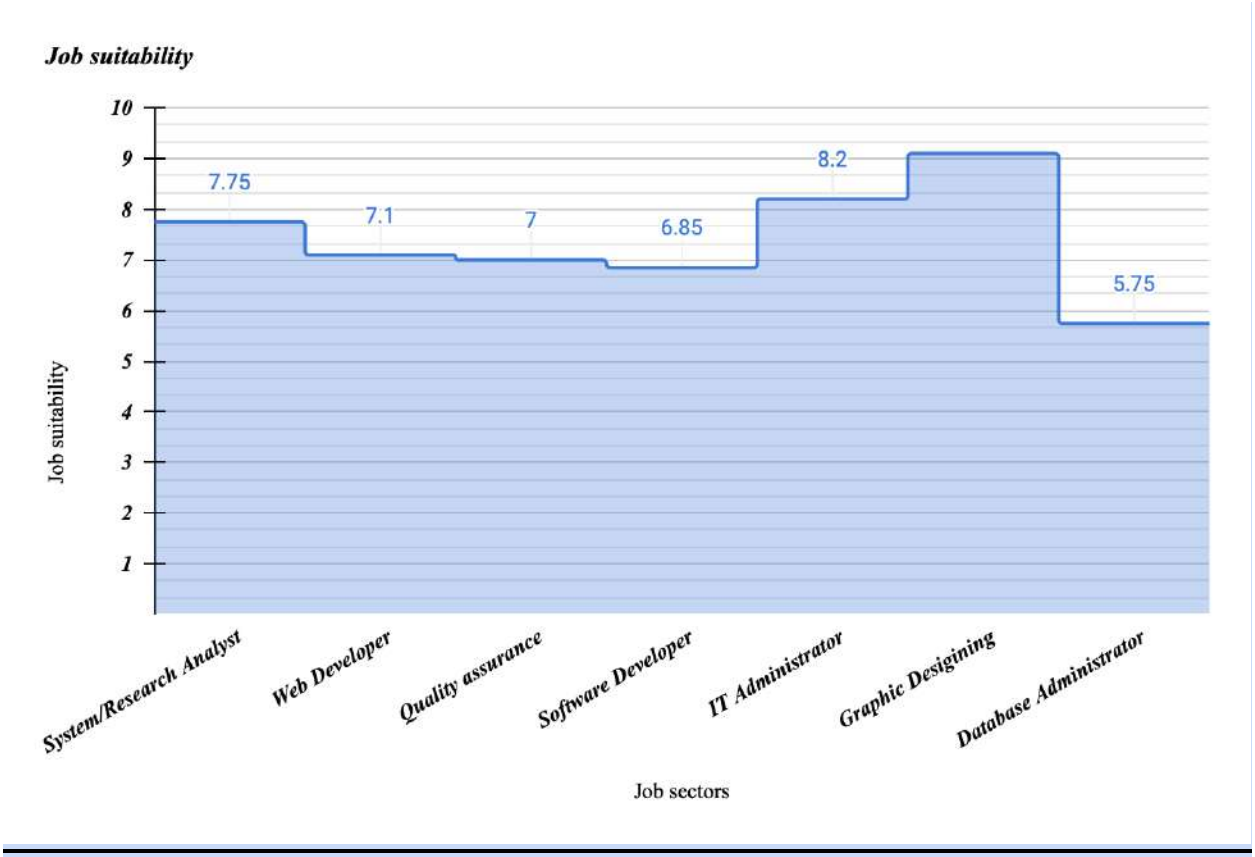
Your contributions during the group discussion were notable. You demonstrated good communication skills, expressing your thoughts clearly and effectively. Your ability to actively listen to others and engage in the conversation was evident, contributing positively to the overall dynamics of the group. While you did well in expressing your own ideas, consider actively seeking out and acknowledging diverse perspectives within the group. This can enrich the discussion and demonstrate a well-rounded understanding of the topic. Challenge yourself to delve deeper into counterarguments. While you presented your points effectively, exploring opposing viewpoints and addressing potential counterarguments can add depth to your contributions. Remember, these are just areas for potential growth, and your current performance is already commendable. Keep up the good work, and we look forward to seeing how you continue to excel in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

You approached the PI round with professionalism and a clear sense of preparation. Your confidence and maturity came through well, which created a strong first impression. Your responses were generally clear and well-structured. To further enhance your performance, focus on backing your answers with specific, relevant examples from your experiences—whether academic, extracurricular, or personal. This will help you demonstrate depth of thought and a stronger connection between your experiences and the role you're aspiring for. In situations where a question feels vague or unclear, feel free to ask for clarification. Doing so not only reflects presence of mind but also ensures your response aligns with the interviewer's expectations. Continue building on the good foundation you've established. With more practice and reflection, you'll be well-prepared to handle even more challenging interviews. Keep up the effort, and best wishes for your next steps!

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	To thrive as a System/Research Analyst, candidates should excel in soft skills like clear communication and problem-solving skills. These companies value adaptability, proficiency in data analysis tools, and effective presentation skills.
Web Developer	**GOOD**	To excel as a Web Developer, candidates should possess a strong foundation in coding languages coupled with problem-solving abilities. Companies value adaptability to new technologies, and proficiency in frameworks. Effective communication skills, both verbal and written, are crucial for collaborating with team members and understanding client requirements.

Quality assurance	**GOOD**	For success in a QA role, companies prioritize adaptability, proficiency in QA methodologies and tools, and effective documentation skills. Attention to detail is crucial. Overall, a well-rounded skill set, relevant experience, and a proactive approach to professional growth are highly valued in candidates for QA positions.
Software Developer	**GOOD**	You have a solid base for a successful Software Developer role. Your problem-solving, logical reasoning, and adaptability to technologies are commendable. Keep building projects, exploring advanced concepts like APIs or microservices, and refining your collaboration skills. With consistent effort, you're well on your way to excellence in this field.
IT Administrator	**GOOD**	You're developing a good foundation for an IT Admin role. Focus on hands-on practice - set up local networks, explore admin panels, and simulate problem-solving scenarios. Learn how to manage servers, handle security protocols, and adapt to new IT tools. A proactive learning approach will significantly boost your chances.
Graphic Designing	**GOOD**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense. Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Moderate	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Moderate	1. Structure your arguments in a logical flow: point, reason, example. 2. Practice initiating and summarizing GDs. 3. Use simple, impactful language to express complex ideas. 4. Learn to respectfully disagree and build on others points. 5. Work on controlling voice modulation and pitch for better engagement.
Personal Interview	Moderate	1. Prepare an impressive “tell me about yourself” 2. Maintain positive body language and reduce restrictiveness 3. Put efforts to talk more about your strengths and accomplishments 4. Answer every question in brief and with a relevant example (if necessary) 5. Add picture in your CV

6.0 Performance Summary:

The student exhibits commendable strength in Group Discussion (GD) and Personal Interview (PI), standing out as a confident and articulate individual. While some improvement areas remain in Logical, Verbal, and Quantitative Ability, these can be effectively addressed through structured training and consistent effort. With the right blend of mock tests, focused mentoring, and skill-specific guidance, the student can further sharpen their analytical capabilities and evolve into a well-rounded performer. The progress so far is encouraging and sets a solid foundation for continued success.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

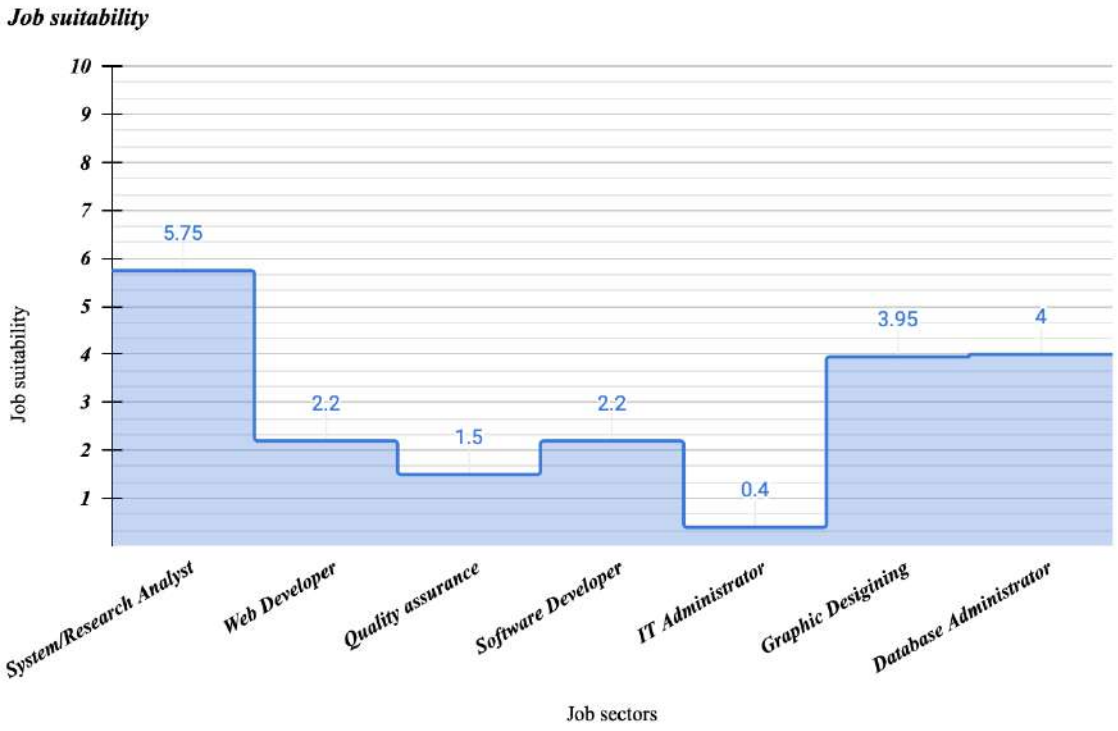
It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.

Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.

Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.

Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

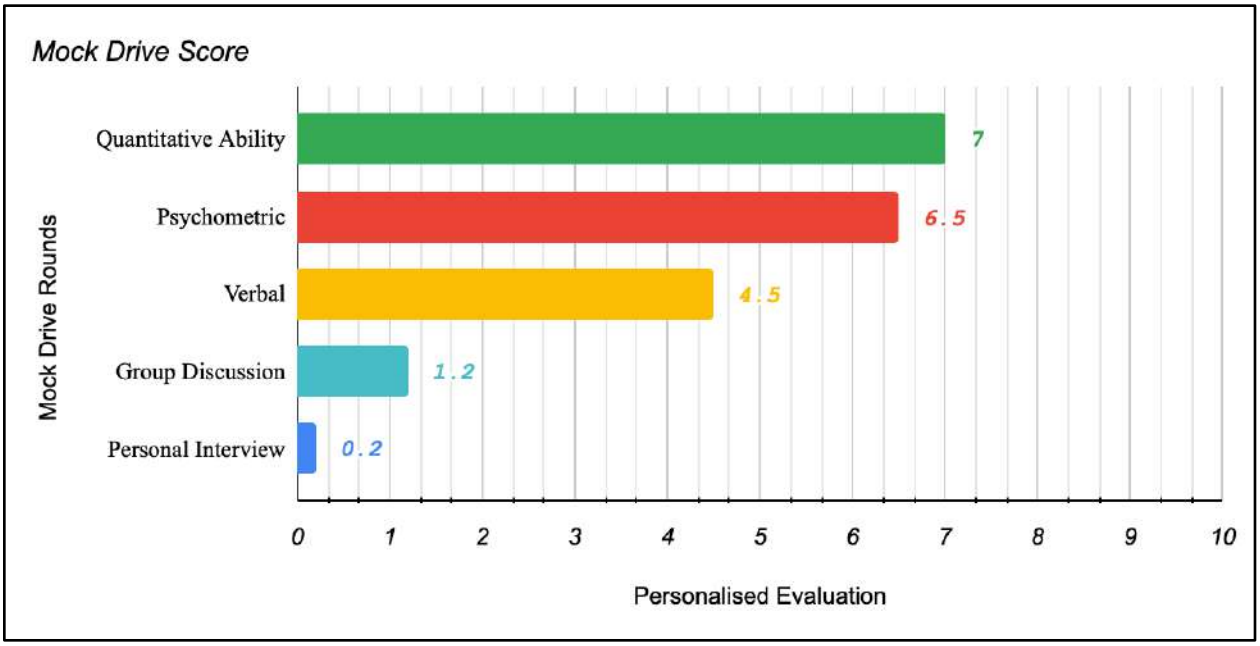
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance with Quantitative Ability has been commendable, and we appreciate the effort you've put into mastering quantitative concepts. Your grasp of fundamental quantitative concepts is evident in your performance. Your ability to comprehend and apply mathematical principles is commendable. Your responses demonstrate a high level of accuracy. You are consistently able to solve problems with precision, showcasing a strong foundation in quantitative reasoning. Challenge yourself with more complex quantitative problems. While you excel in solving standard questions, pushing yourself to tackle more intricate scenarios will enhance your problem-solving skills even further. Remember, improvement is a continuous process, and we are confident that with your dedication and focus, you will see even greater success!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

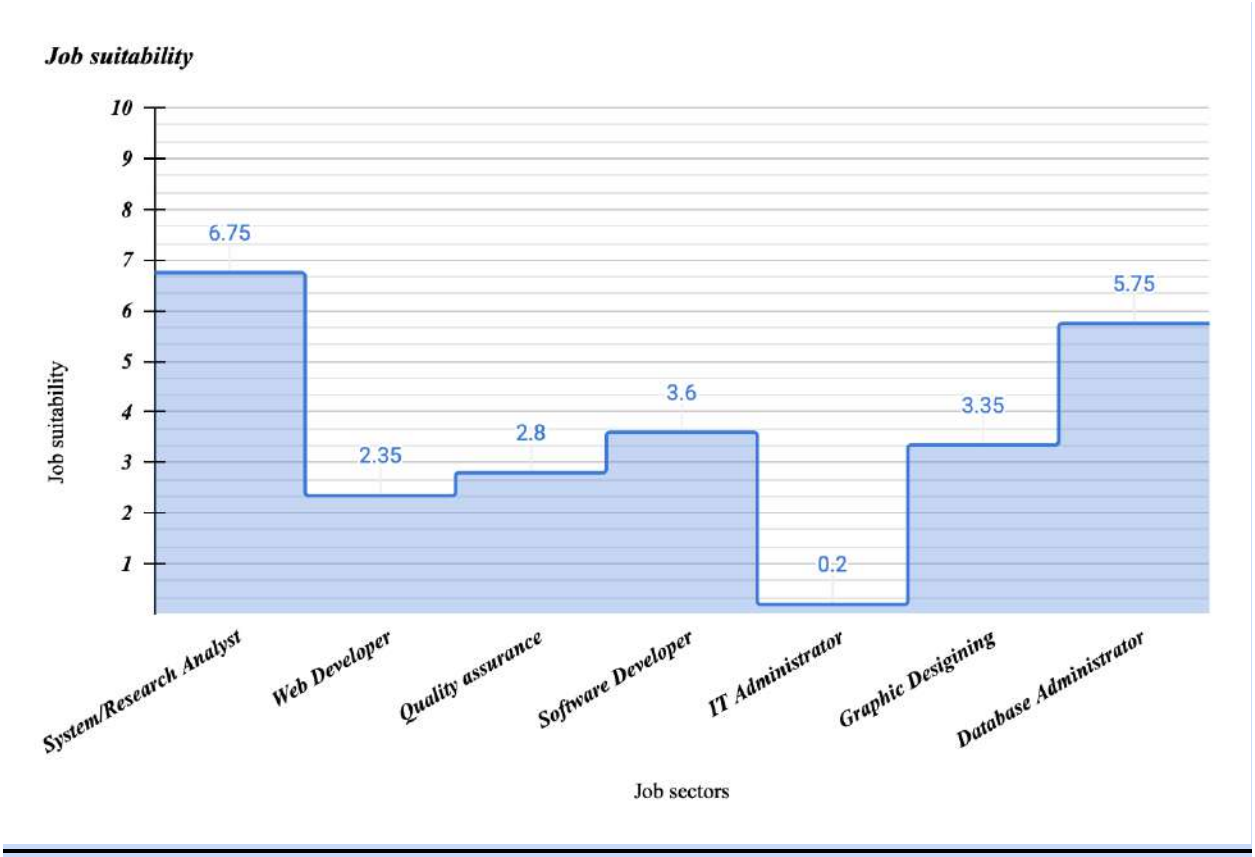
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems

		like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	Your current portfolio or skill set needs more work to align with graphic design expectations. Begin with mastering tools like Adobe Photoshop, Illustrator, and Canva. Understand design principles like balance, contrast, and typography. Try replicating existing designs to learn techniques, then move on to creating original work.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with

		large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals.

		4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

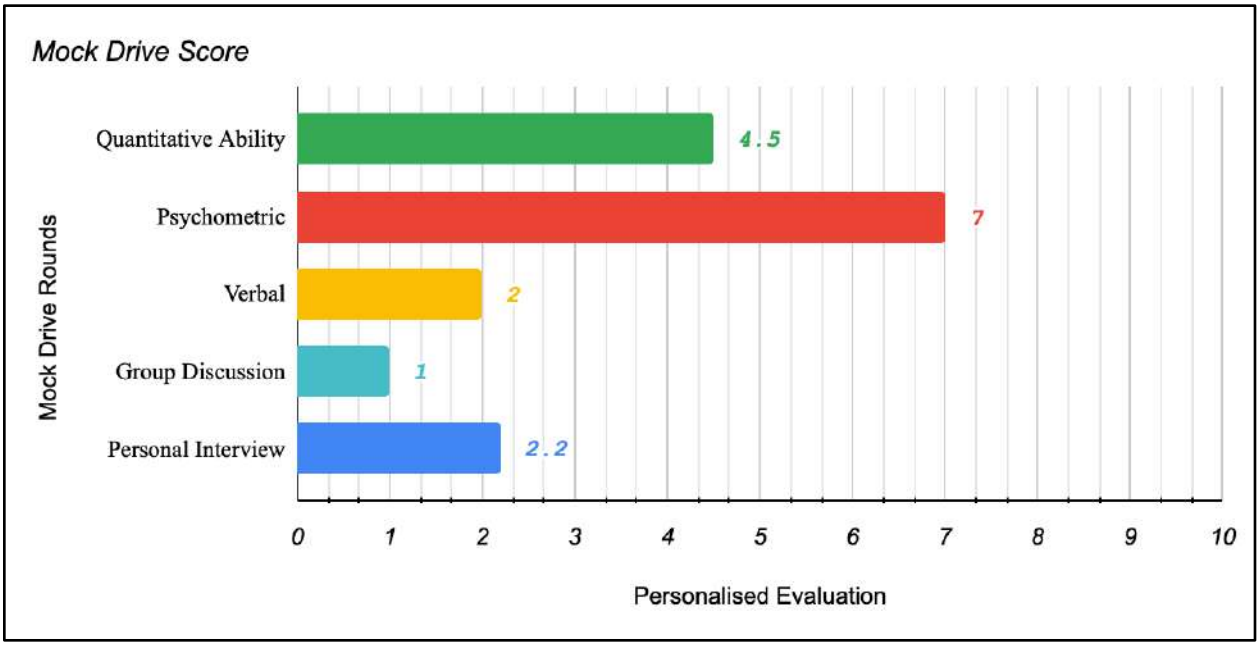
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

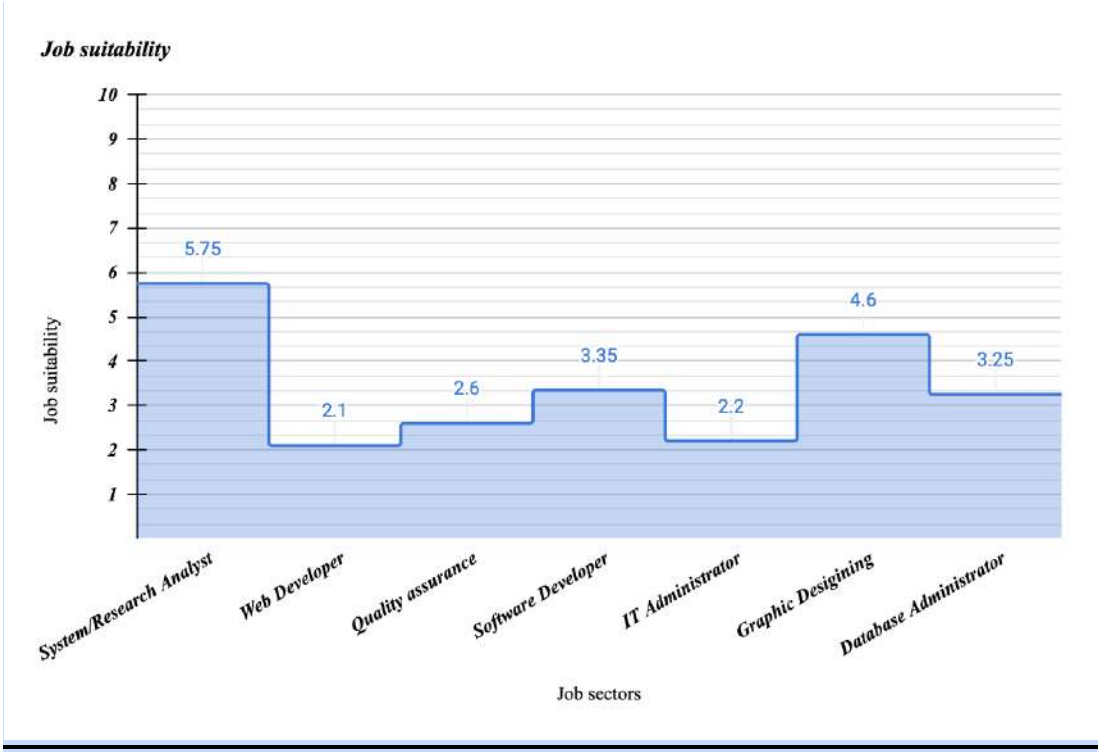
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech

		concepts clearly. With consistent effort, your chances of landing this role will improve.
Quality assurance	**LOW**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**LOW**	You're developing a good foundation for an IT Admin role. Focus on hands-on practice—set up local networks, explore admin panels, and simulate problem-solving scenarios. Learn how to manage servers, handle security protocols, and adapt to new IT tools. A proactive learning approach will significantly boost your chances.
Graphic Designing	**MEDIUM**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense. Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student shows promising abilities in Group Discussion (GD) and Personal Interview (PI), suggesting strong communication and interpersonal skills. Performance in Logical, Verbal, and Quantitative Ability is currently average and has the potential to improve with strategic effort. Incorporating structured mock tests, guided mentoring sessions, and practice-focused class activities will help bridge the gap. With dedication and continuous learning, the student is well-positioned to elevate performance across all areas.

	Corporate Readiness Chart

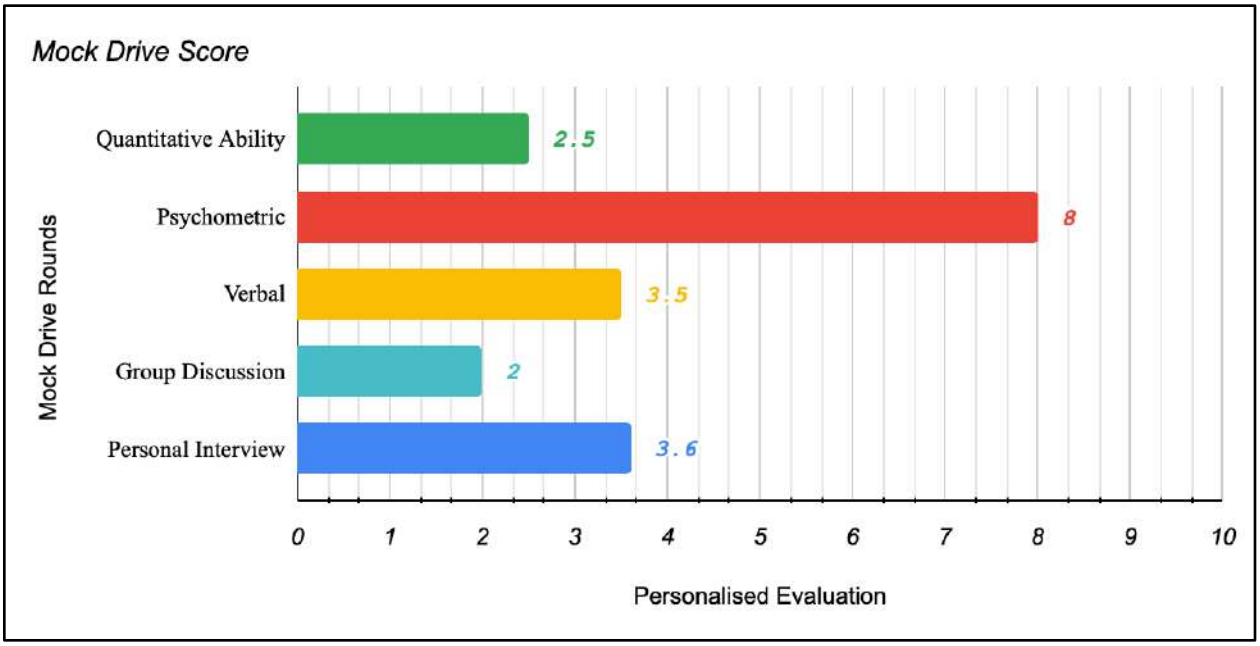
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

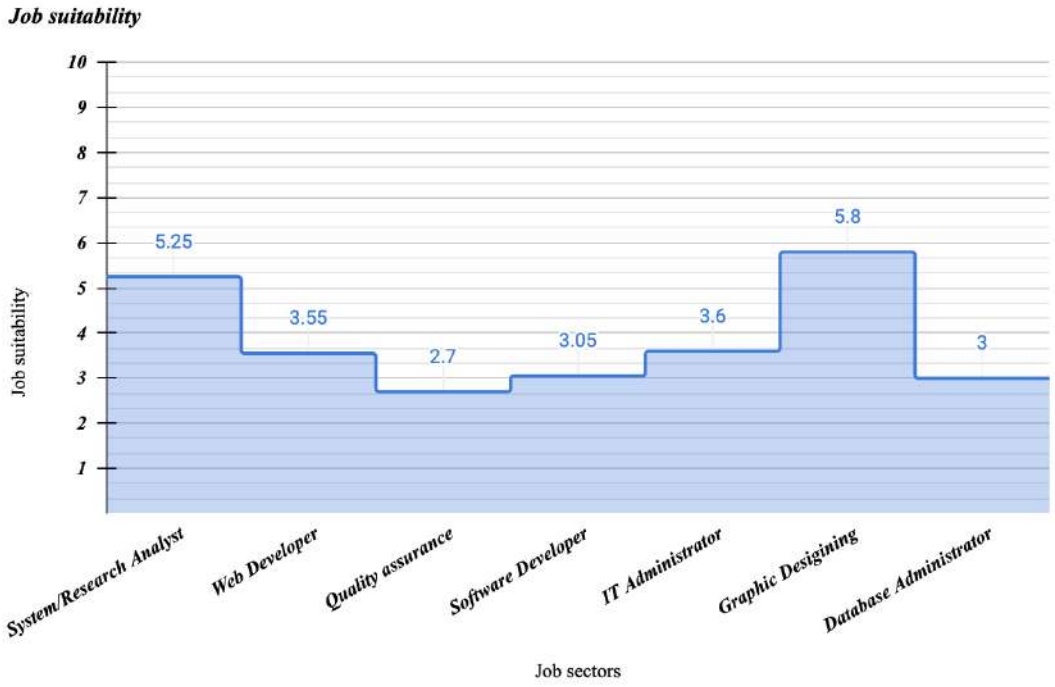
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.

Web Developer	**MEDIUM**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**MEDIUM**	You're developing a good foundation for an IT Admin role. Focus on hands-on practice—set up local networks, explore admin panels, and simulate problem-solving scenarios. Learn how to manage servers, handle security protocols, and adapt to new IT tools. A proactive learning approach will significantly boost your chances.
Graphic Designing	**GOOD**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense. Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.

Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.

Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student shows promising abilities in Group Discussion (GD) and Personal Interview (PI), suggesting strong communication and interpersonal skills. Performance in Logical, Verbal, and Quantitative Ability is currently average and has the potential to improve with strategic effort. Incorporating structured mock tests, guided mentoring sessions, and practice-focused class activities will help bridge the gap. With dedication and continuous learning, the student is well-positioned to elevate performance across all areas.

Corporate Readiness Chart

PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**	***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
Psychometric (20)	Subjective Knowledge (20)		A (Super Dream Company)	10 - 20 Lakh	80 - 89 %
Quantitative (20)					
Verbal (20)	Pseudo coding (30)		B (Dream Company)	6- 10 lakh	70- 79 %
GD (20)	Programming (30)		C (Ideal Company)	3-6 Lakh	60 - 69 %
PI (20)	Technical Interview (20)		D (Average Company)	Below 3 lakh	50 - 59 %

Mock Drive Analysis

Name:	PATEL MANAV PARESHBHAI
Enrollment Number:	2314406009
Course:	*BSC IT*
Date:	*18th March 2024*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

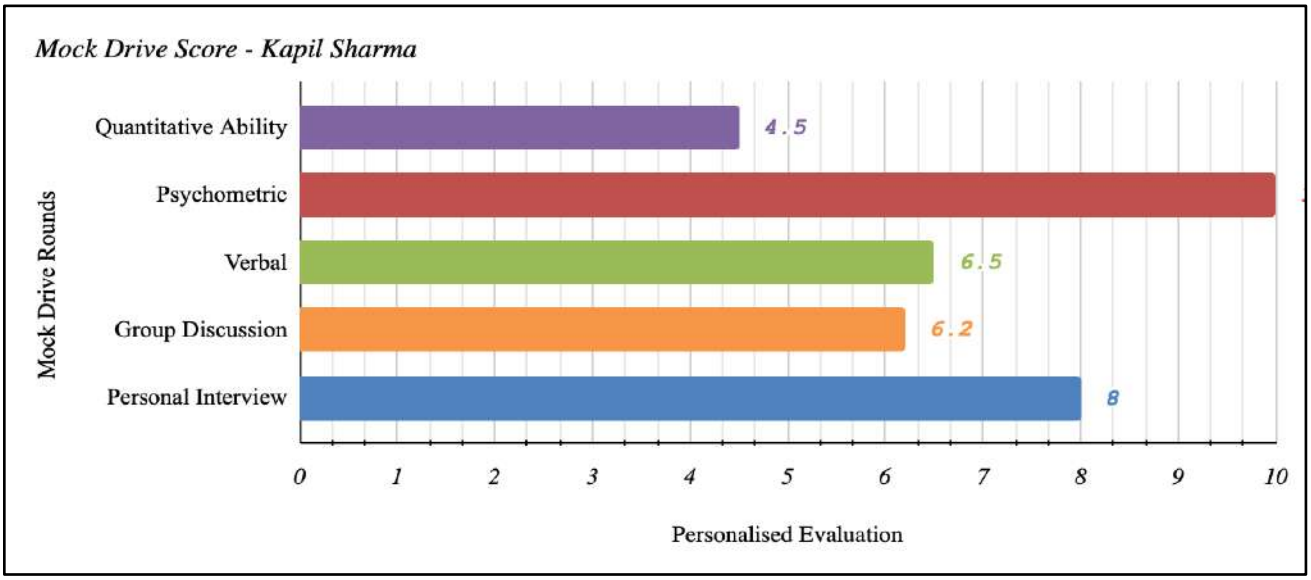
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Congratulations on achieving a GOOD score in the verbal section! Your performance reflects a solid understanding of verbal concepts and a commendable effort in your preparation. Your ability to comprehend and analyze written passages is commendable. Your use of vocabulary is effective and demonstrates a diverse range of words. This skill is crucial in conveying precise meanings and enhancing the overall quality of your responses. Pay attention to time constraints during the test. Practice managing your time effectively to ensure that you can complete all sections within the allocated time frame. Work on refining sentence structure and grammar to enhance the overall clarity of your responses. A well-structured response not only conveys your ideas effectively but also showcases your language proficiency. Remember that improvement is a continuous process, and your commitment to refining your skills will undoubtedly yield positive results. Keep up the good work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

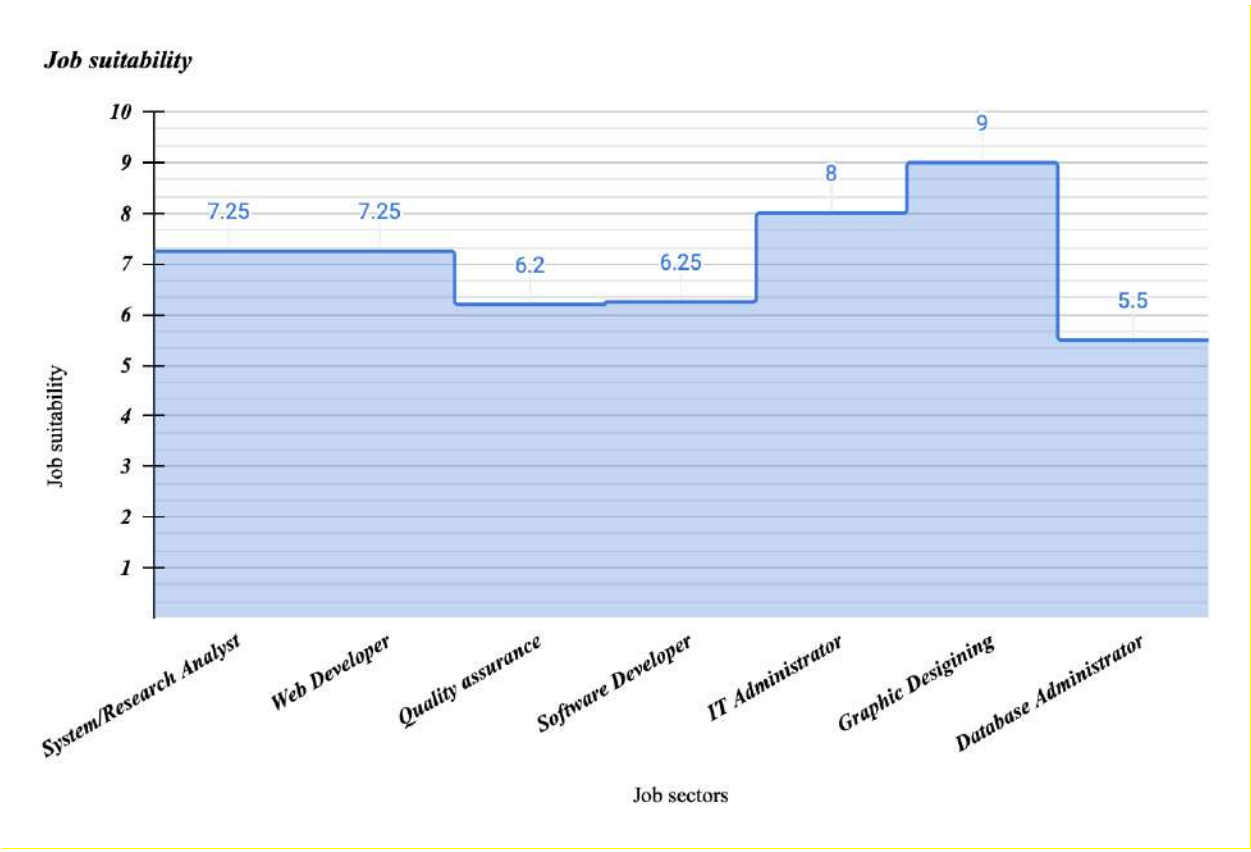
Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

You approached the PI round with professionalism and a clear sense of preparation. Your confidence and maturity came through well, which created a strong first impression. Your responses were generally clear and well-structured. To further enhance your performance, focus on backing your answers with specific, relevant examples from your experiences—whether academic, extracurricular, or personal. This will help you demonstrate depth of thought and a stronger connection between your experiences and the role you're aspiring for. In situations where a question feels vague or unclear, feel free to ask for clarification. Doing so not only reflects presence of mind but also ensures your response aligns with the interviewer's expectations. Continue building on the good foundation you've established. With more practice and reflection, you'll be well-prepared to handle even more challenging interviews. Keep up the effort, and best wishes for your next steps!

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**GOOD**	You demonstrate strong potential as a Web Developer. Your knowledge of coding languages, frameworks, and team collaboration is evident. To stand out further, keep experimenting with new tech stacks and contribute to open-source projects. Keep up the momentum—you're on track for great opportunities in this field.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**GOOD**	You're well-suited for IT Administration. Your technical problem-solving skills and understanding of networks, systems, and protocols are commendable. Keep upgrading your knowledge on current trends in cloud services and cybersecurity. Practical exposure and staying up to date with IT innovations will ensure long-term success.
Graphic Designing	**GOOD**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense. Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Moderate	1. Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. 2. Read and write one page at least on a daily basis. 3. Pay special attention to grammar. 4. Practice more writing and speaking english.
Quantitative Ability	Strong	1.Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. 2. Shortcut and short tricks to be taken care of. 3. Practice mental calculations. 4. Accuracy plays a key role. 5. Work on conceptual details.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Moderate	1. Prepare an impressive “tell me about yourself” 2. Maintain positive body language 3. Put efforts to talk more about your strengths and accomplishments 4. Answer every question confidently and with a relevant example 5. Work on your CV 6. Practice relaxation techniques such as deep breathing or visualization to calm your nerves.

6.0 Performance Summary:

The student exhibits commendable strength in Group Discussion (GD) and Personal Interview (PI), standing out as a confident and articulate individual. While some improvement areas remain

in Logical, Verbal, and Quantitative Ability, these can be effectively addressed through structured training and consistent effort. With the right blend of mock tests, focused mentoring, and skill-specific guidance, the student can further sharpen their analytical capabilities and evolve into a well-rounded performer. The progress so far is encouraging and sets a solid foundation for continued success.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

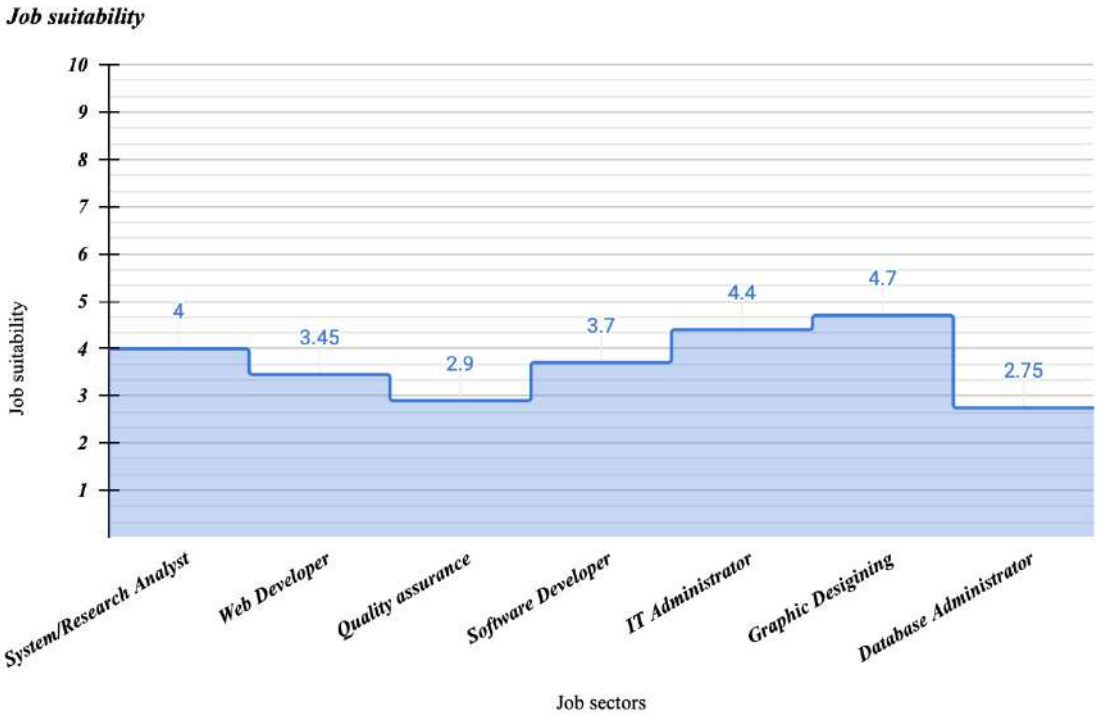
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems

		like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**MEDIUM**	You're developing a good foundation for an IT Admin role. Focus on hands-on practice—set up local networks, explore admin panels, and simulate problem-solving scenarios. Learn how to manage servers, handle security protocols, and adapt to new IT tools. A proactive learning approach will significantly boost your chances.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with

		database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions.

		2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

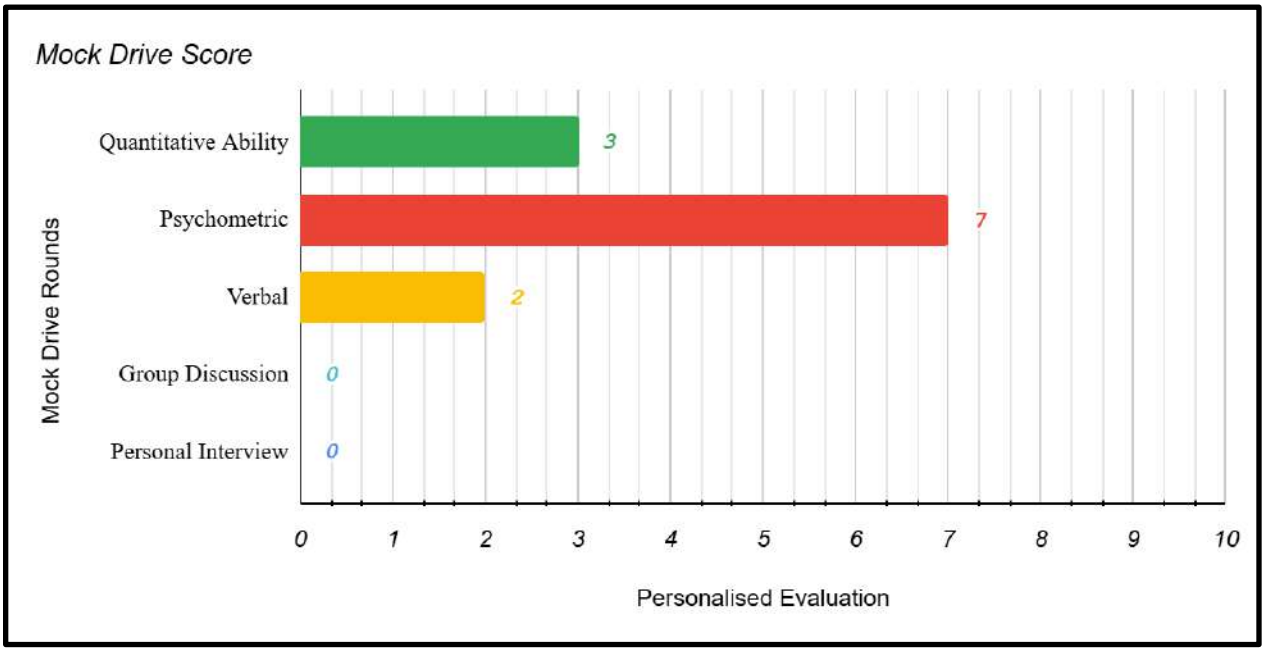
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental

concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

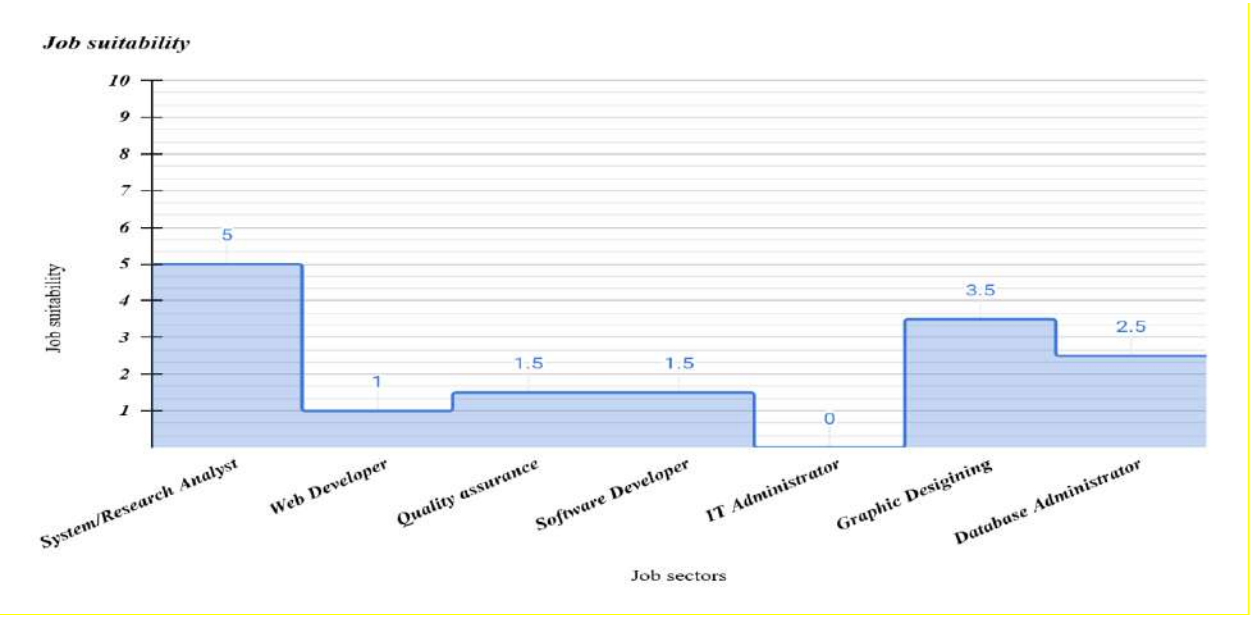
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**LOW**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher

		questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. Strengths need to be built up in Group Discussion (GD) and Personal Interview (PI) and there is considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

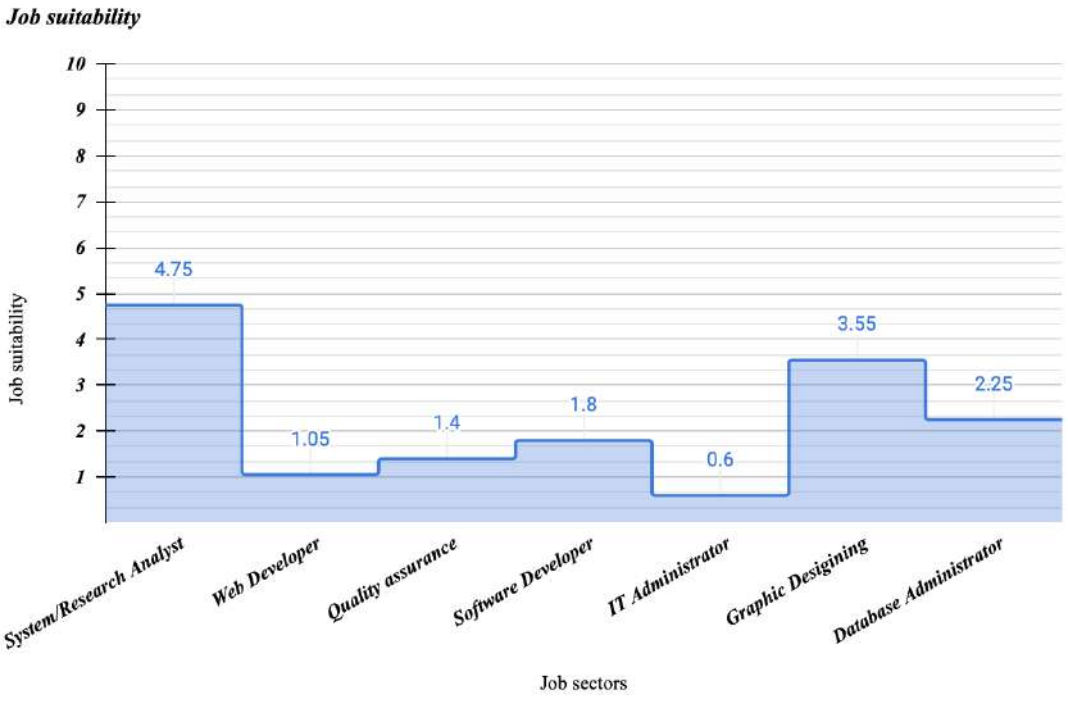
4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems

		like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	Your current portfolio or skill set needs more work to align with graphic design expectations. Begin with mastering tools like Adobe Photoshop, Illustrator, and Canva. Understand design principles like balance, contrast, and typography. Try replicating existing designs to learn techniques, then move on to creating original work.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with

		database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are outstanding and reflect a high level of cognitive sharpness, emotional intelligence, and self-awareness. You demonstrate not just the ability to solve problems accurately, but also to approach them with strategic thinking and composure. Your consistency across reasoning, personality profiling, and attention-based tasks suggests a mature, well-rounded mindset ready for real-world challenges. To maintain and further polish this excellence, continue exposing yourself to diverse psychometric exercises, especially those that require adaptability and advanced decision-making. Focus on analyzing subtle patterns in data and human behavior, as these will enhance your already strong intuitive grasp. You are operating at a highly competitive level - stay curious, stay reflective, and you'll keep setting new benchmarks for yourself. Outstanding performance: truly impressive!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

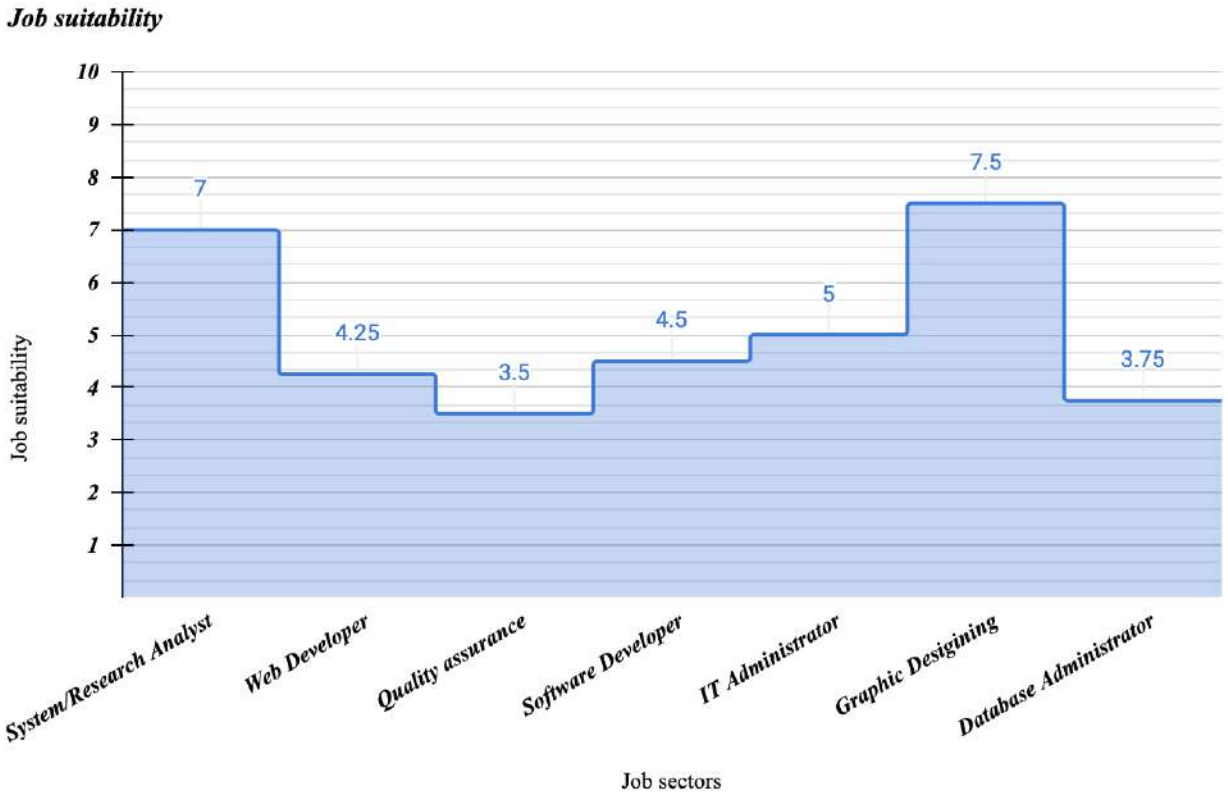
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	YYou have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.

Web Developer	**MEDIUM**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.
Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**MEDIUM**	You're developing a good foundation for an IT Admin role. Focus on hands-on practice—set up local networks, explore admin panels, and simulate problem-solving scenarios. Learn how to manage servers, handle security protocols, and adapt to new IT tools. A proactive learning approach will significantly boost your chances.
Graphic Designing	**GOOD**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense. Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with

		database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions.

		2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Psychometric (20)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %
	Quantitative (20)						
	Verbal (20)	Pseudo coding (30)			B (Dream Company)	6- 10 lakh	70- 79 %

Course:	*BSC IT*
Date:	*18th March 2024*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

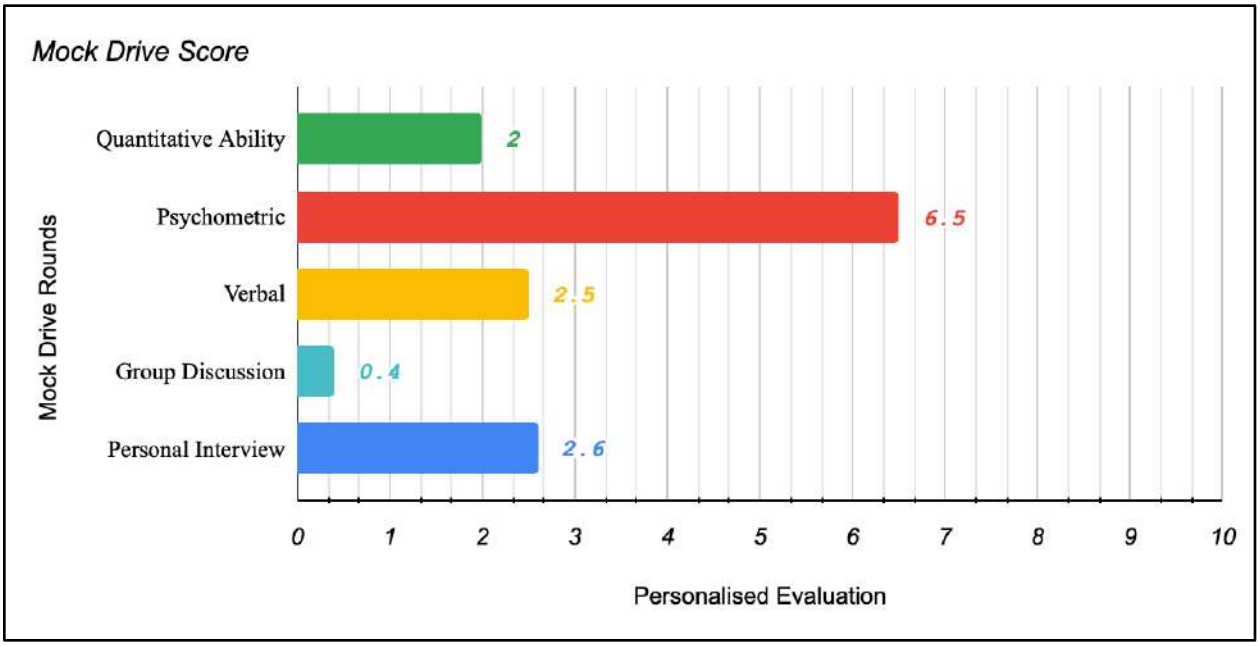
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

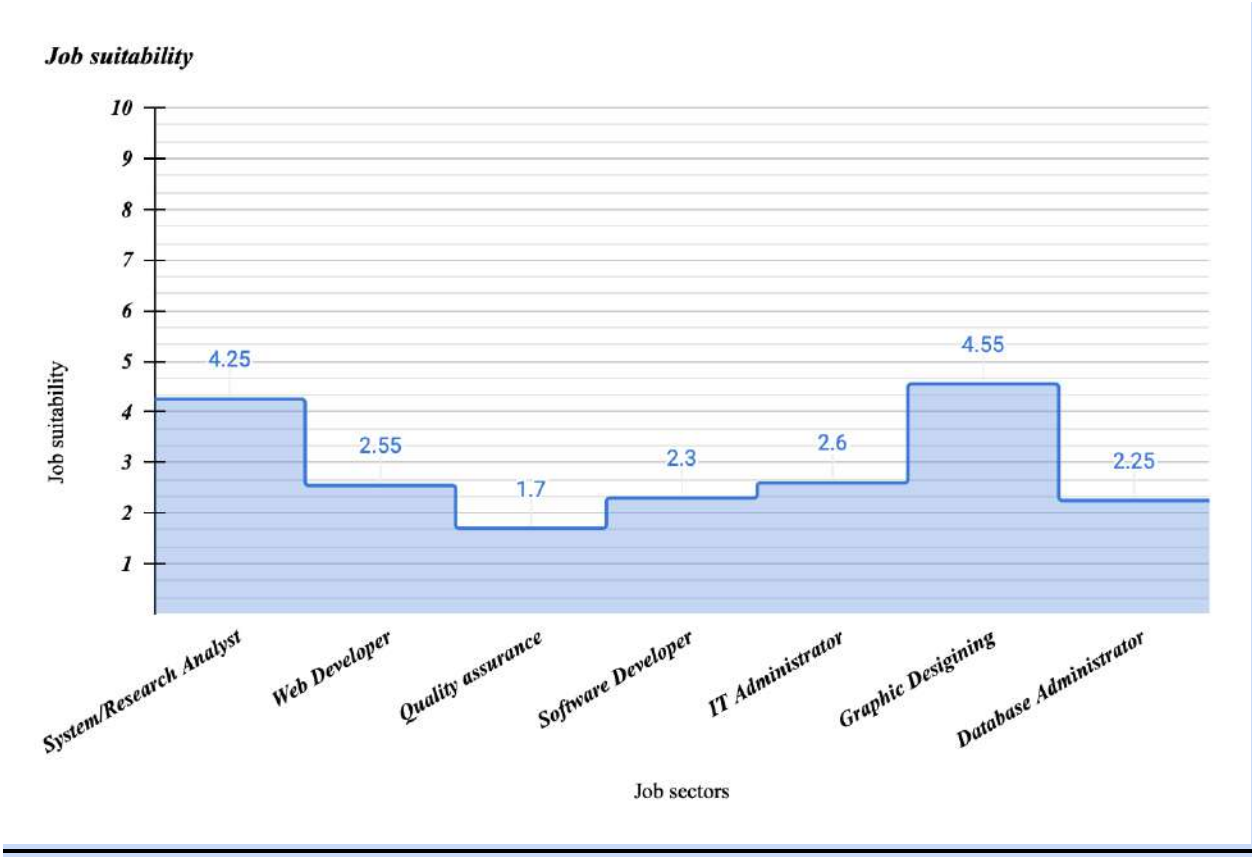
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech

		concepts clearly. With consistent effort, your chances of landing this role will improve.
Quality assurance	**LOW**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**LOW**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. 4.0. Corporate Readiness:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems

		like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with

		large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions.

		2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

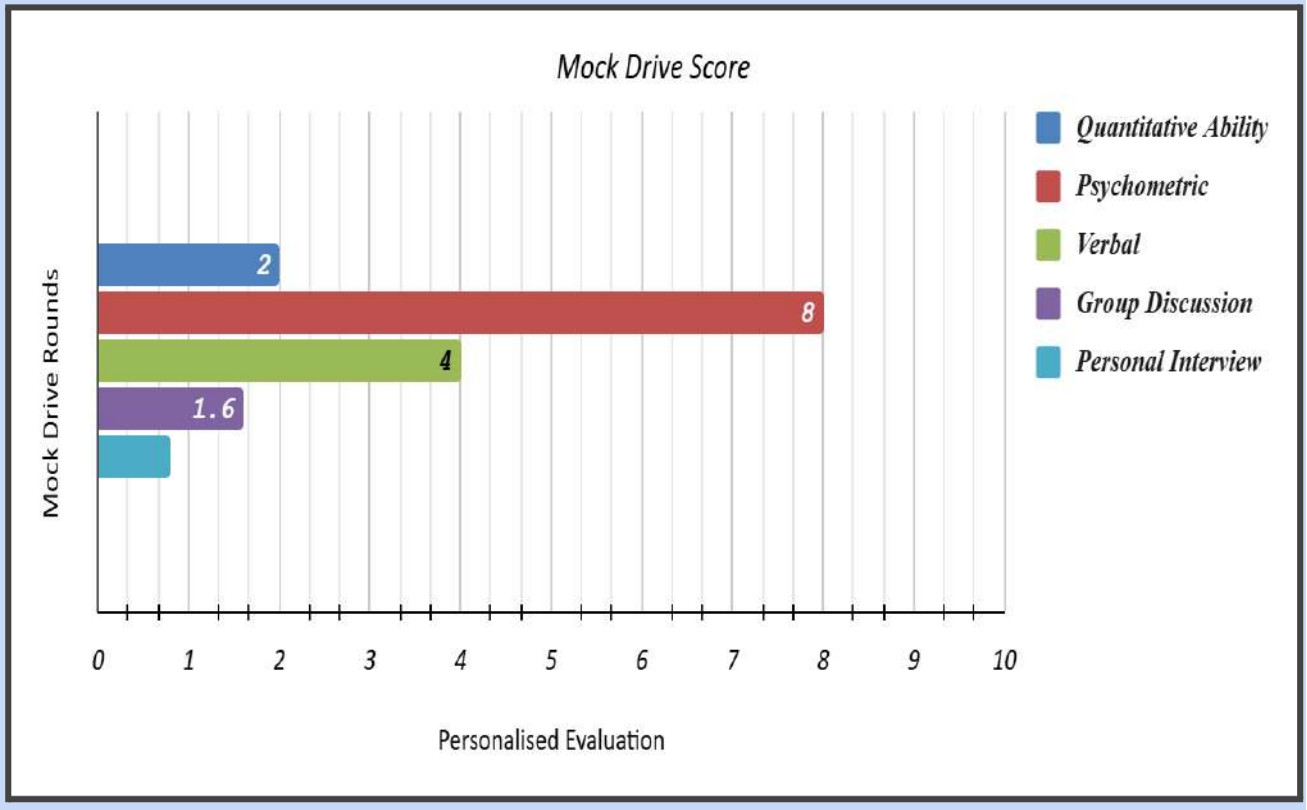
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

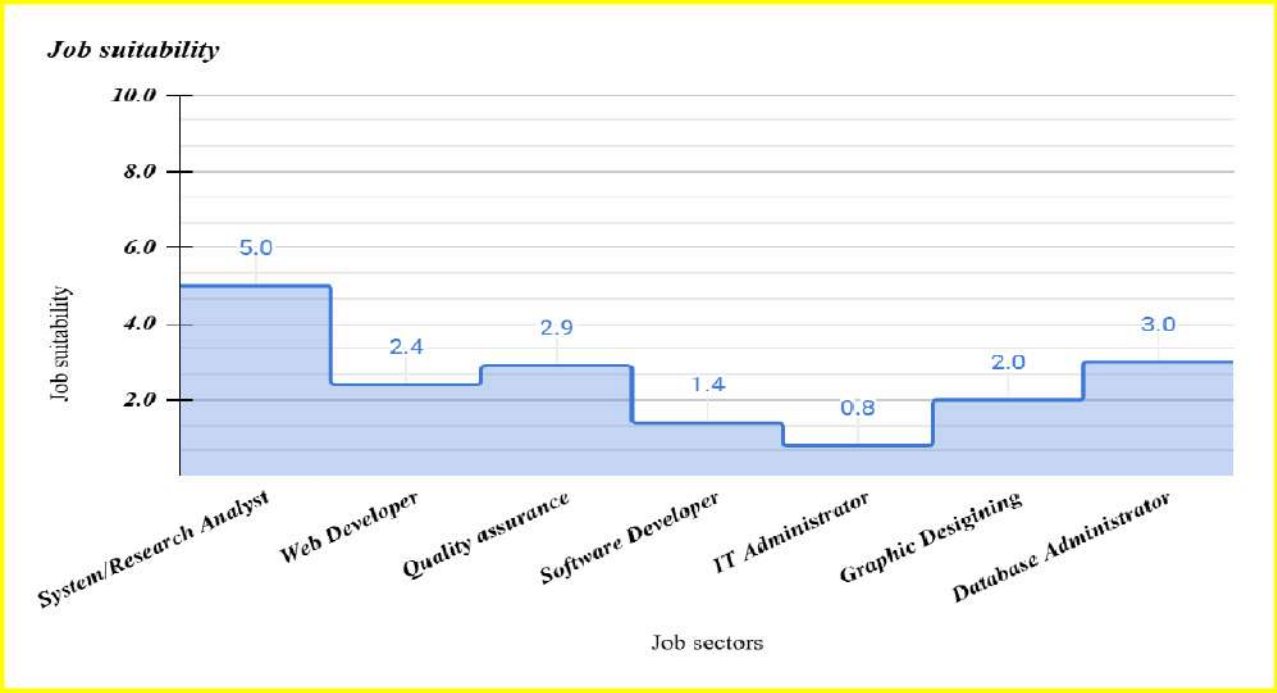
Your performace with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.

Quality assurance	**LOW**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	Your current portfolio or skill set needs more work to align with graphic design expectations. Begin with mastering tools like Adobe Photoshop, Illustrator, and Canva. Understand design principles like balance, contrast, and typography. Try replicating existing designs to learn techniques, then move on to creating original work.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is low. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

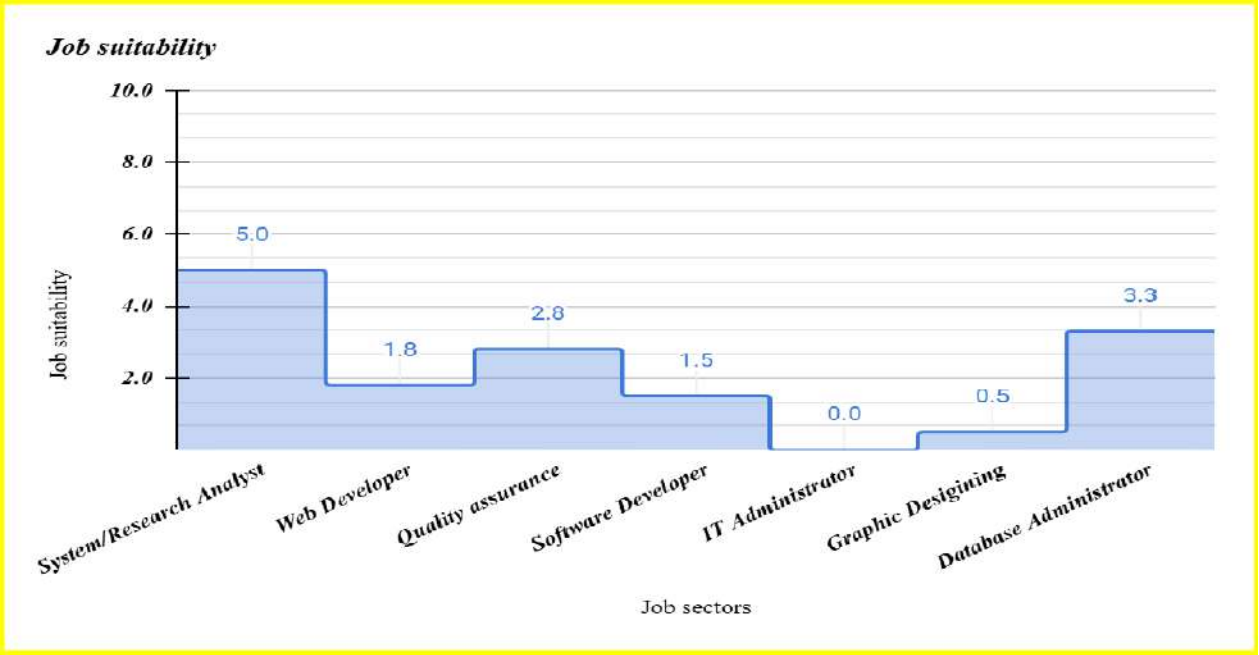
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to

understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

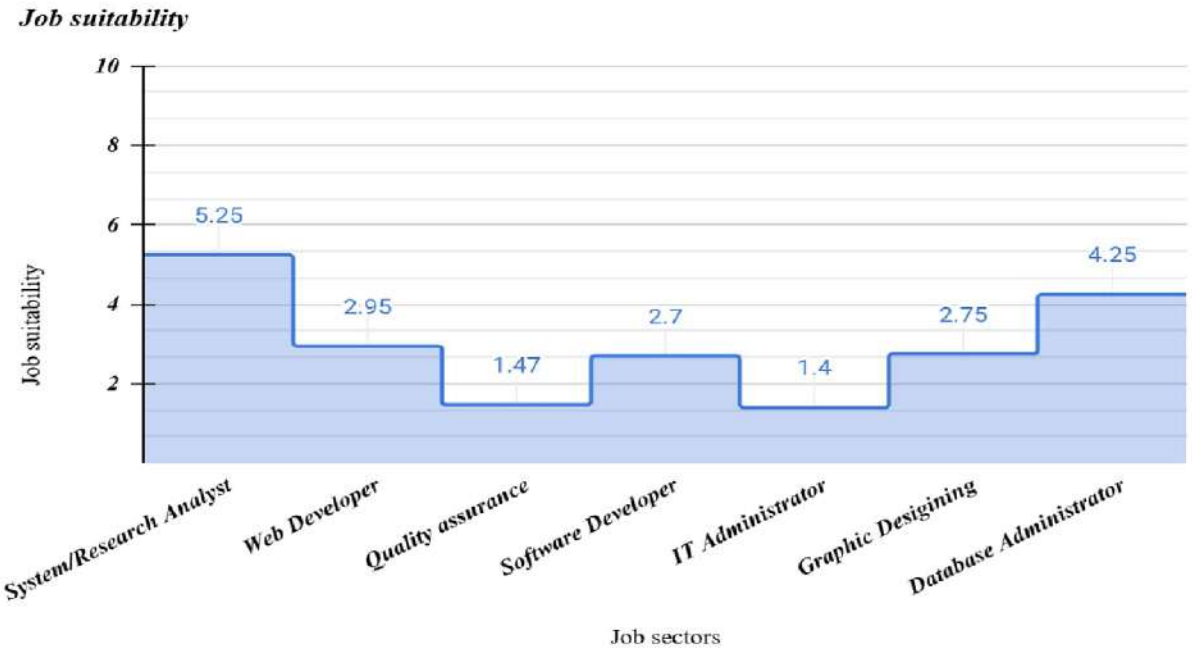
It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	Your current portfolio or skill set needs more work to align with graphic design expectations. Begin with mastering tools like Adobe Photoshop, Illustrator, and Canva. Understand design principles like balance, contrast, and typography. Try replicating existing designs to learn techniques, then move on to creating original work.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables, squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Psychometric (20)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %
	Quantitative (20)						
	Verbal (20)	Pseudo coding (30)			B (Dream Company)	6- 10 lakh	70- 79 %

Enrollment Number:	**2324004041**
Course:	*SIT*
Date:	*6th March 2024*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

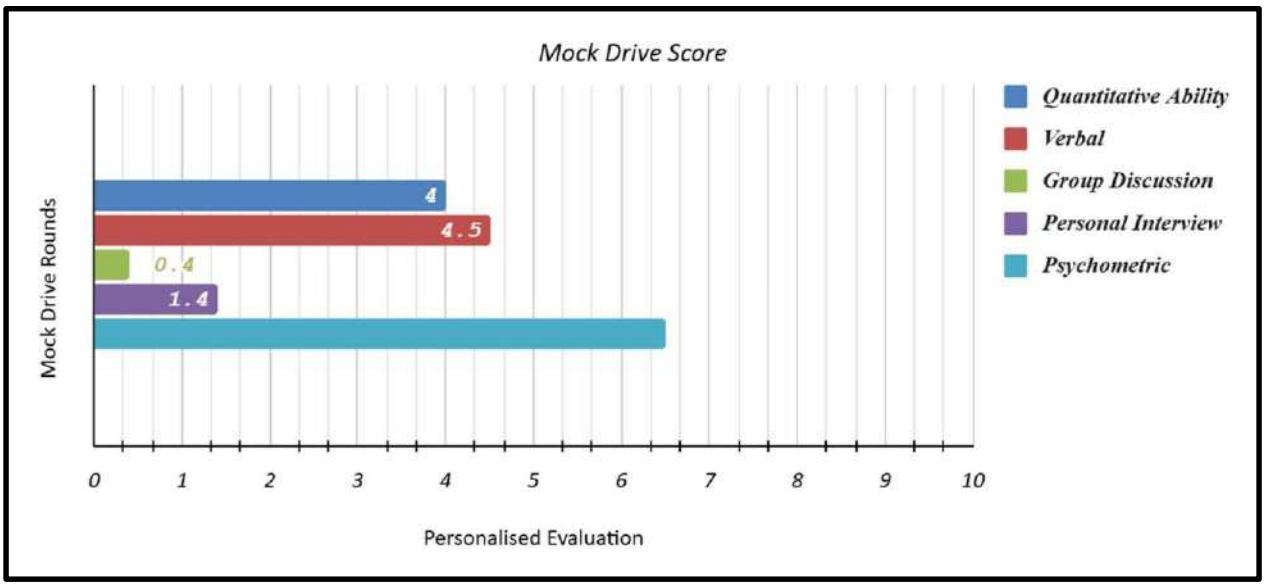
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to

understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

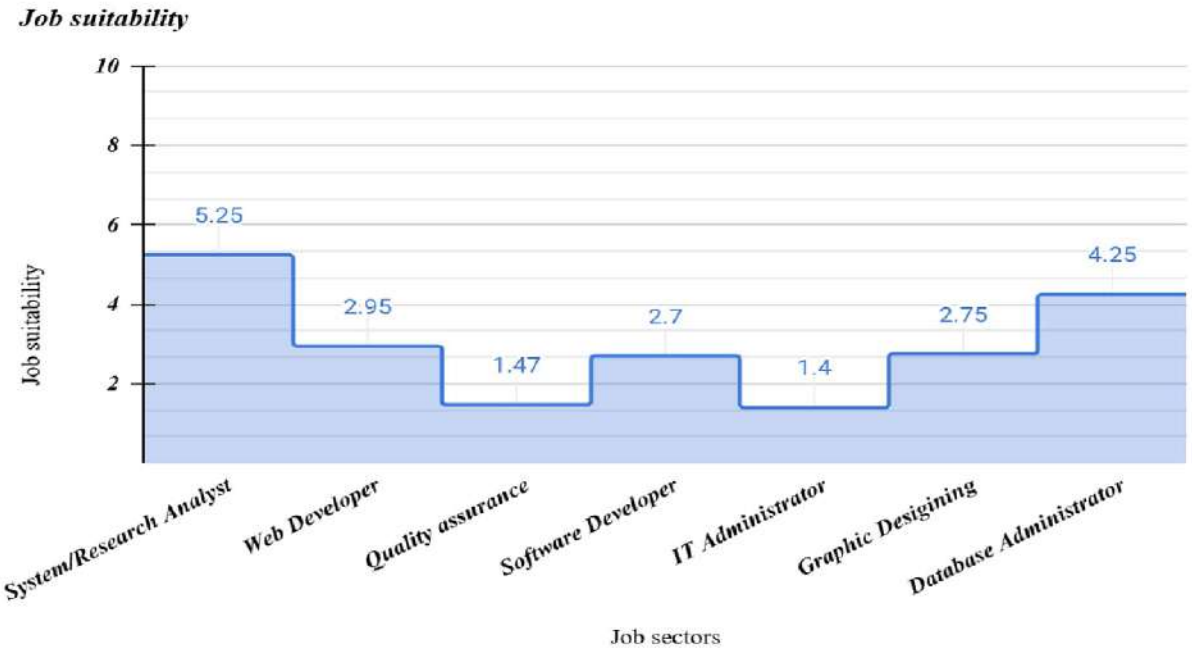
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. 3.0 Your Mock Drive Score:

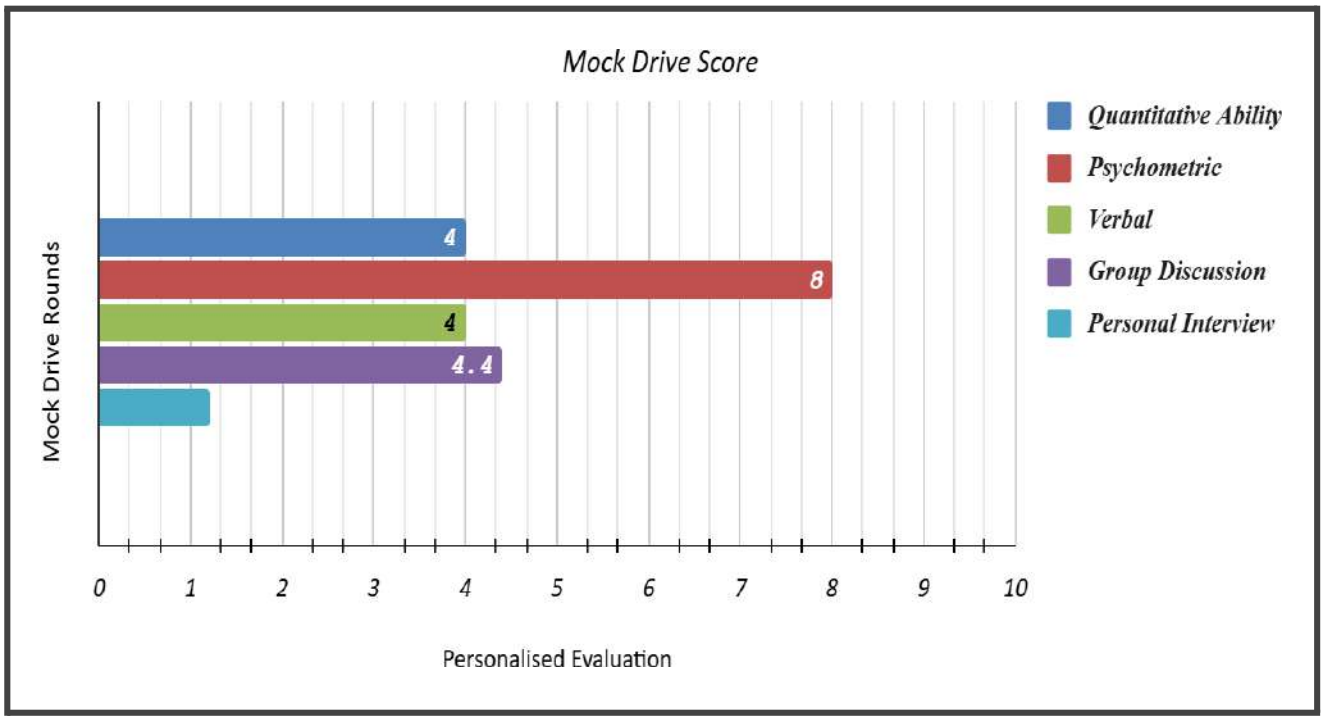
- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

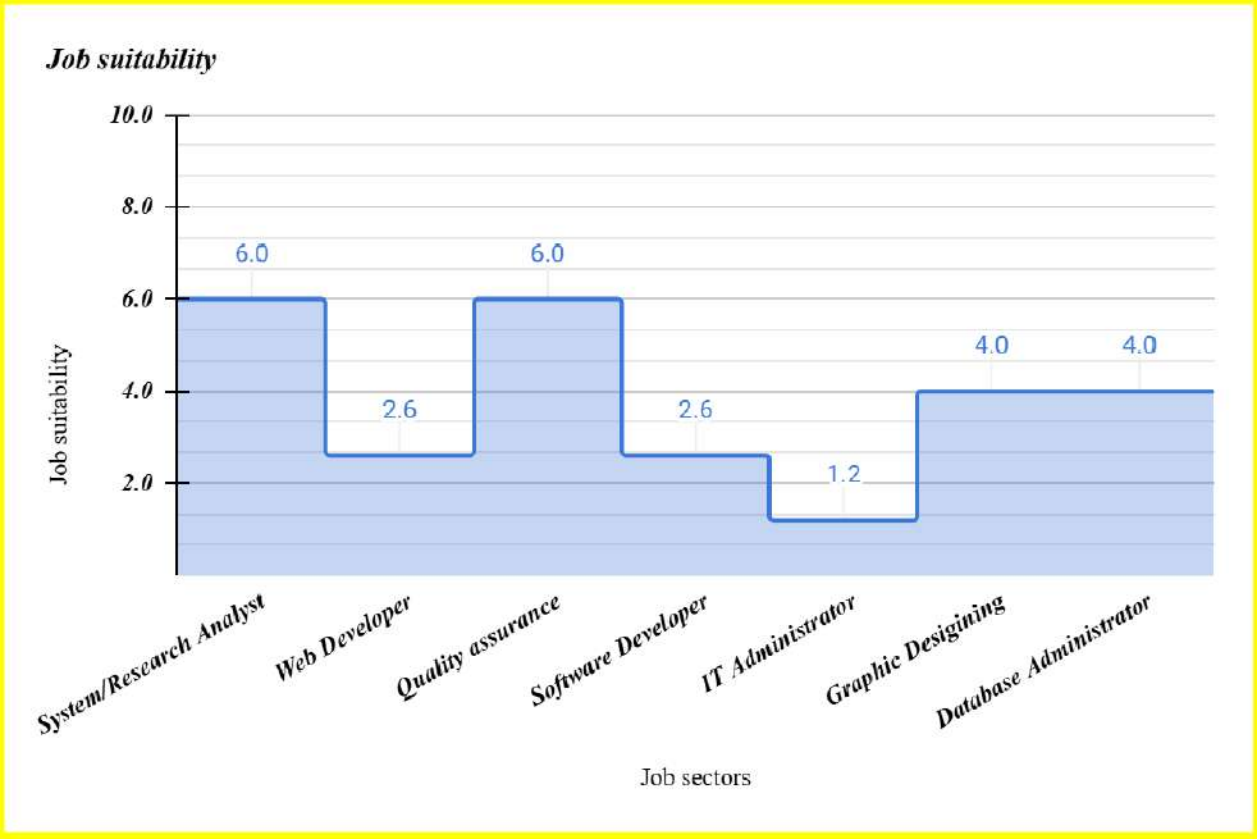
Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech

		concepts clearly. With consistent effort, your chances of landing this role will improve.
Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interview questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

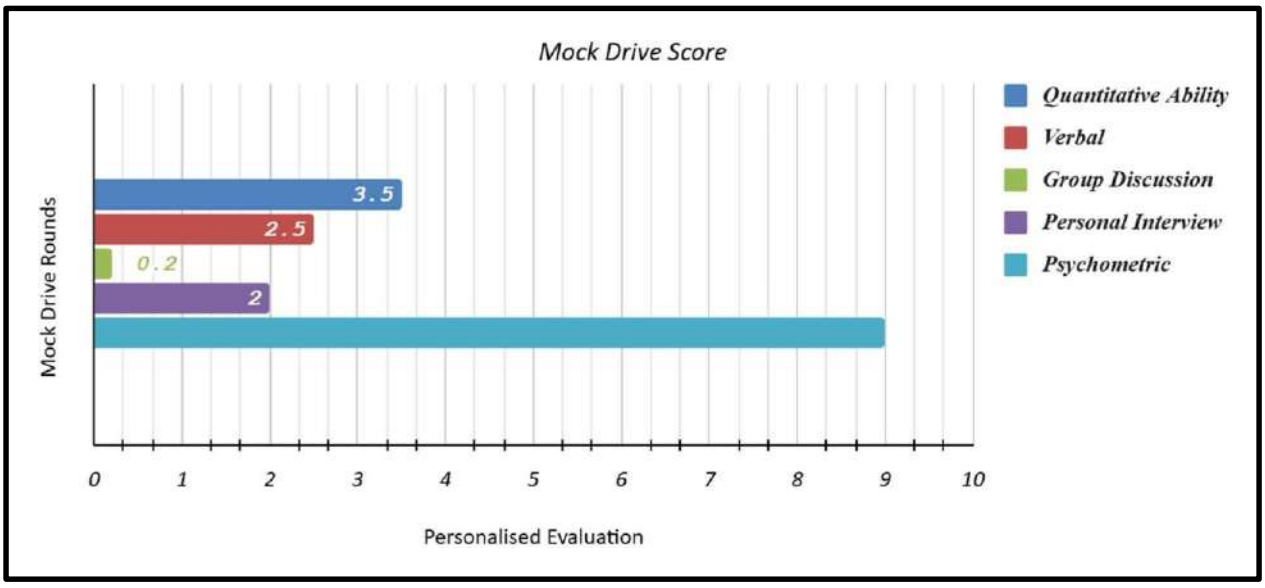
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

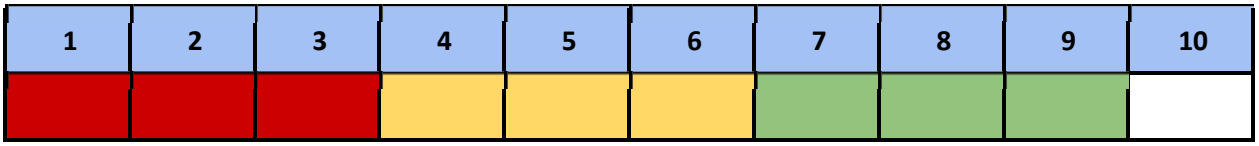
QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant

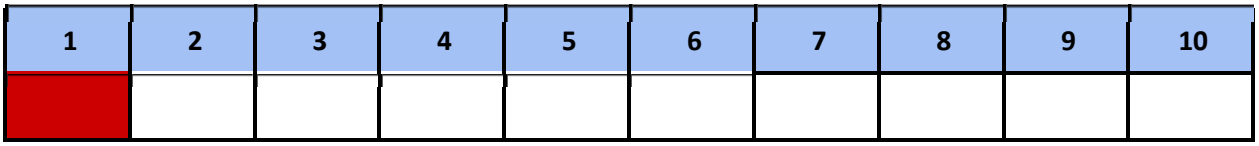
examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS



Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION



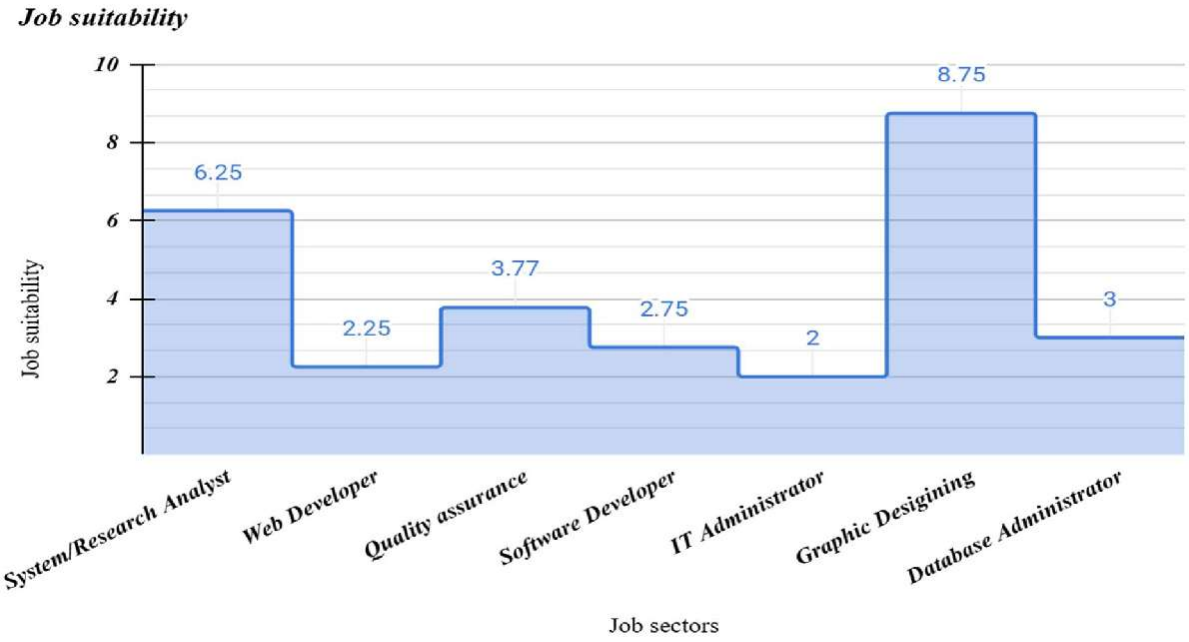
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0 Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**GOOD**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense. Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

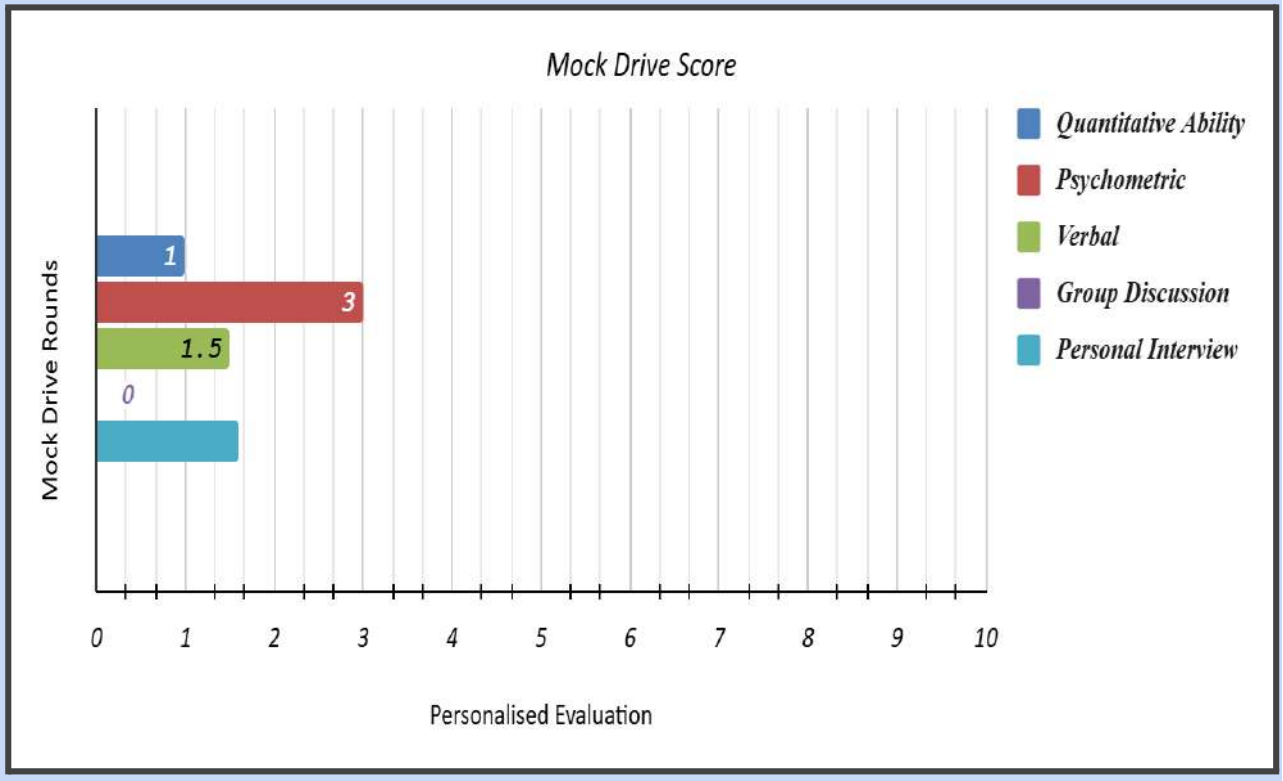
3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

While it's clear that you've put in some effort, your current psychometric performance suggests room for growth. Psychometric skills reflect your cognitive abilities, personality traits, and problem-solving style. To strengthen this area, consider engaging with exercises that challenge your logical reasoning, attention to detail, and emotional intelligence. Practice puzzles, pattern recognition problems, and personality profiling exercises. Reflect on your strengths and areas for development, especially in terms of self-awareness and adaptability. These skills aren't just test-based—they mirror your workplace behavior. Regular practice and mindful observation of your own reactions and decisions will help improve both your test performance and your real-world effectiveness. Keep going—you've got this!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

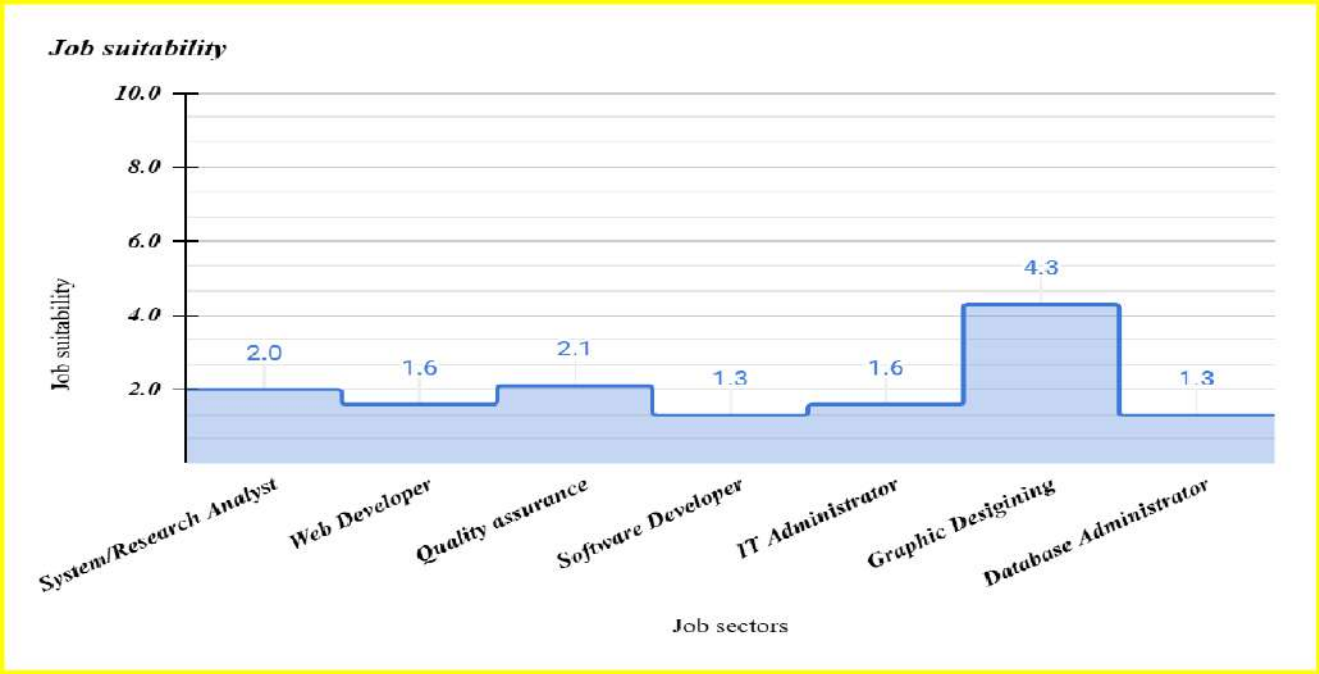
Your performace with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**LOW**	Your current profile shows limited alignment with the requirements of a System/Research Analyst. Focus on strengthening your analytical and problem-solving skills. Work on becoming proficient in tools like Excel, Python, or Power BI for data analysis. Improve your communication and presentation skills to effectively share insights. Regular practice with case studies or business analysis scenarios can also help.
Web Developer	**LOW**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.

Quality assurance	**LOW**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	Your current portfolio or skill set needs more work to align with graphic design expectations. Begin with mastering tools like Adobe Photoshop, Illustrator, and Canva. Understand design principles like balance, contrast, and typography. Try replicating existing designs to learn techniques, then move on to creating original work.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**MEDIUM**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Psychometric (20)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %
	Quantitative (20)						
	Verbal (20)	Pseudo coding (30)			B (Dream Company)	6- 10 lakh	70- 79 %
	GD (20)	Programming (30)			C (Ideal Company)	3-6 Lakh	60 - 69 %
	PI (20)	Technical Interview (20)			D (Average Company)	Below 3 lakh	50 - 59 %

Mock Drive Analysis

Name:	DIKSHAY RAVIBHUSHAN SINGH
Enrollment Number:	2324004034
Course:	*SIT*
Date:	*6th March 2024*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

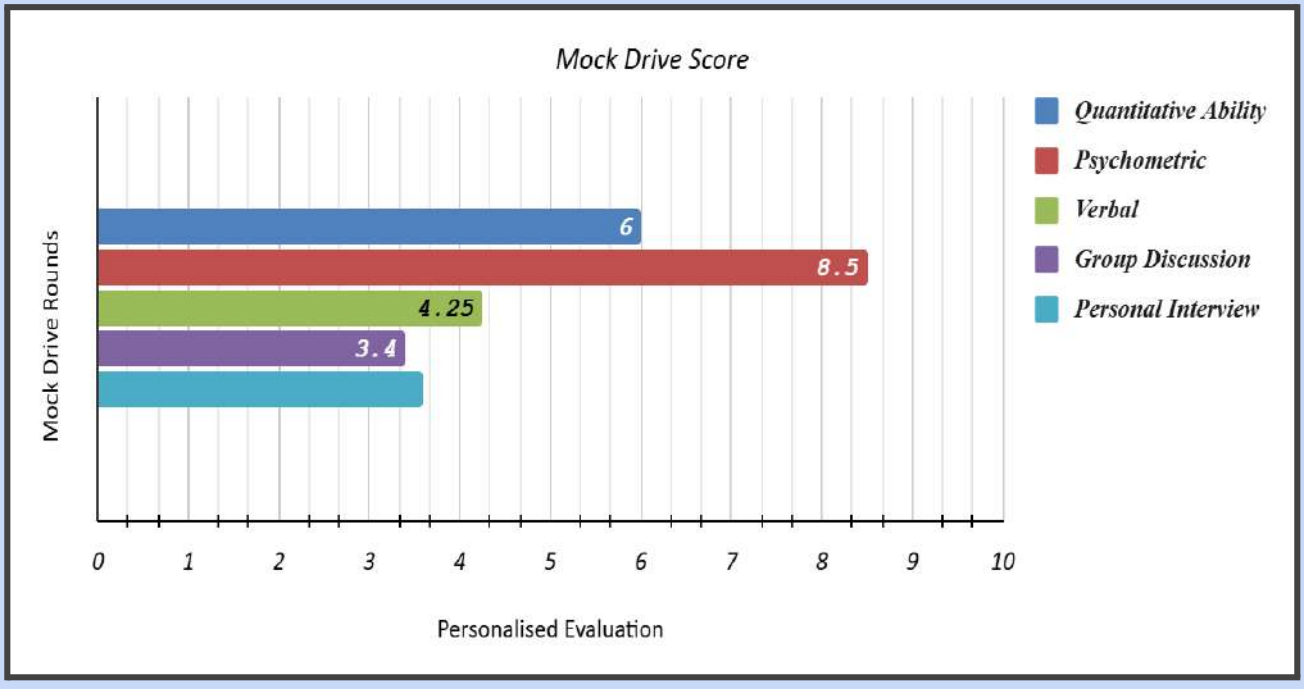
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.

Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

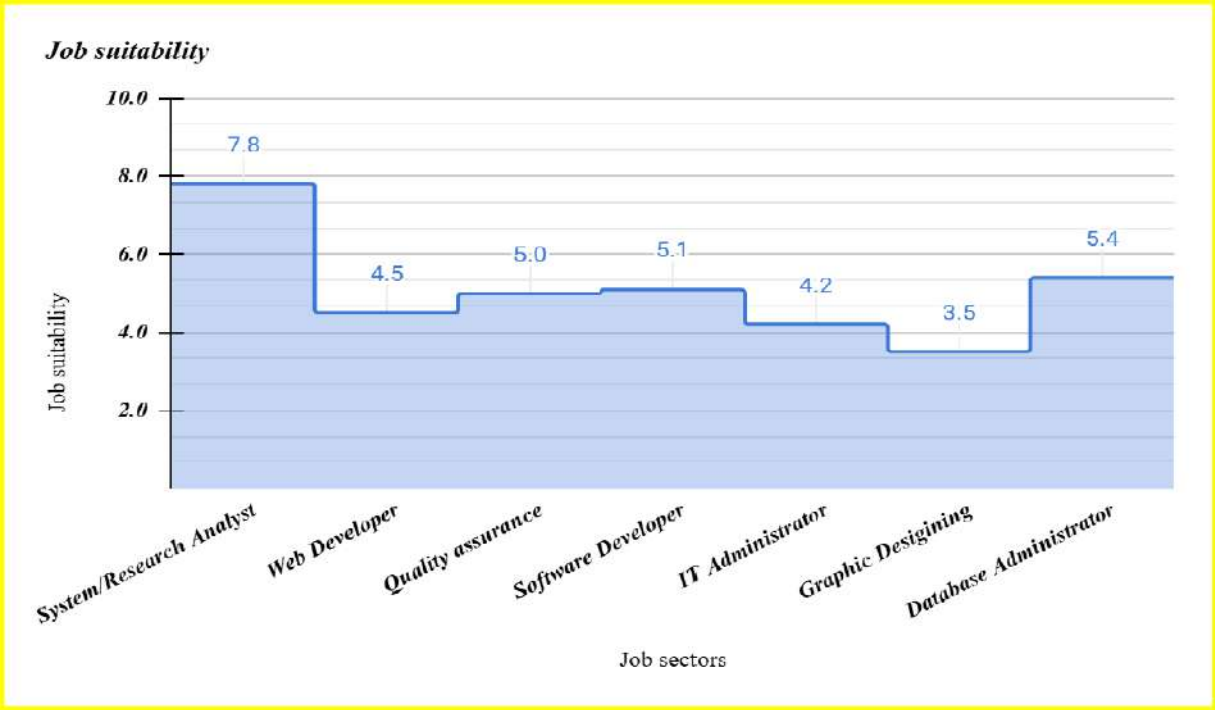
Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**MEDIUM**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**MEDIUM**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	Your current portfolio or skill set needs more work to align with graphic design expectations. Begin with mastering tools like Adobe Photoshop, Illustrator, and Canva. Understand design principles like balance, contrast, and typography. Try replicating existing designs to learn techniques, then move on to creating original work.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is low. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

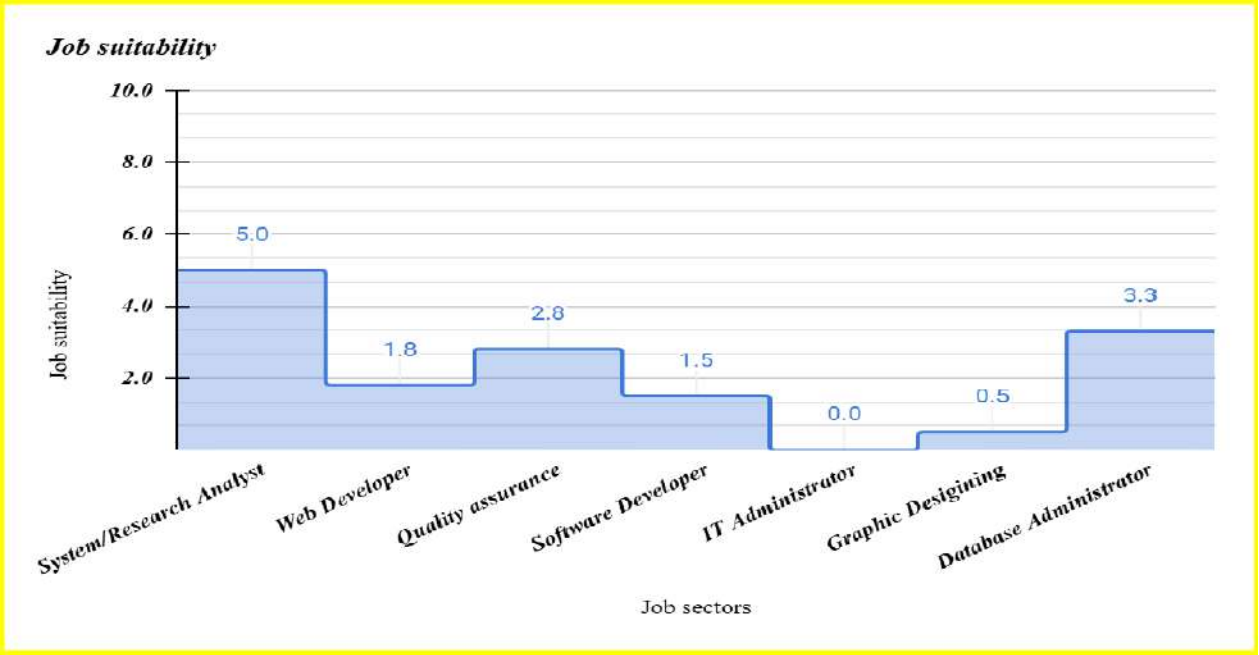
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

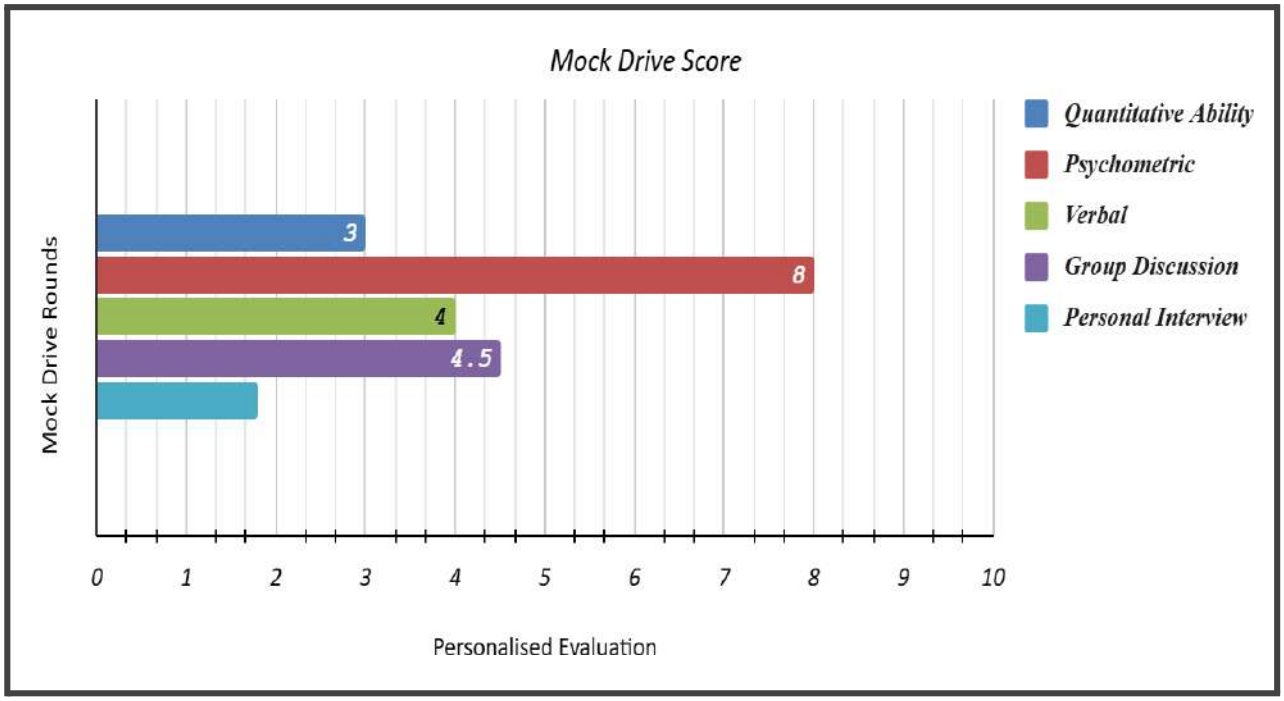
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is not satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

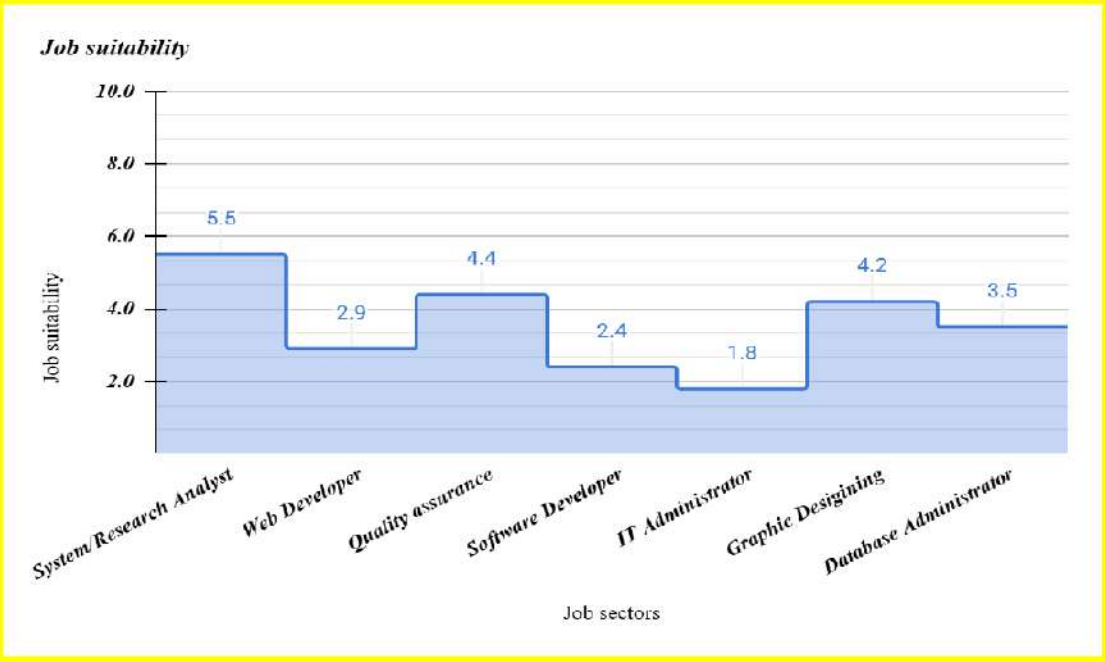
Your performace with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance with Quantitative Ability has been commendable, and we appreciate the effort you've put into mastering quantitative concepts. Your grasp of fundamental quantitative concepts is evident in your performance. Your ability to comprehend and apply mathematical principles is commendable. Your responses demonstrate a high level of accuracy. You are consistently able to solve problems with precision, showcasing a strong foundation in quantitative reasoning. Challenge yourself with more complex quantitative problems. While you excel in solving standard questions, pushing yourself to tackle more intricate scenarios will enhance your problem-solving skills even further. Remember, improvement is a continuous process, and we are confident that with your dedication and focus, you will see even greater success!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

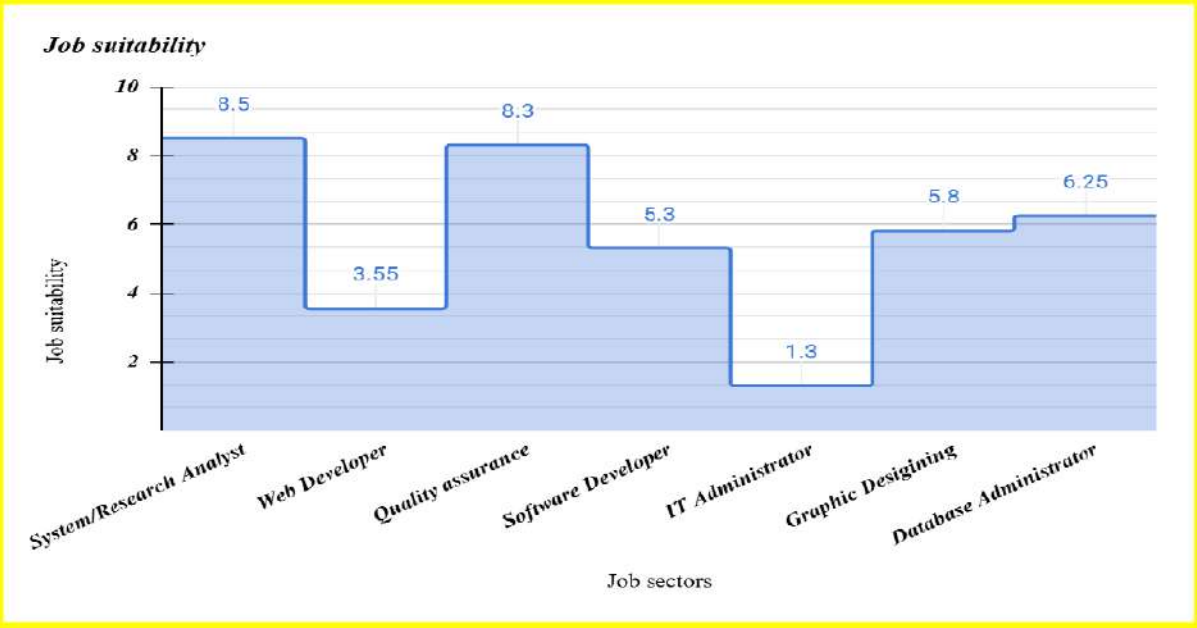
Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**MEDIUM**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.
Quality assurance	**GOOD**	Your skills are well-aligned with QA roles. You exhibit a structured and detail-oriented mindset, and likely have some hands-on exposure to QA processes. To

		build on this strength, explore automation tools and keep refining your test documentation. With this proactive approach, you are in a good position to succeed in QA.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interview questions.

6.0 Performance Summary:

The student shows promising abilities in Group Discussion (GD) and Personal Interview (PI), suggesting strong communication and interpersonal skills. Performance in Logical, Verbal, and Quantitative Ability is currently average and has the potential to improve with strategic effort. Incorporating structured mock tests, guided mentoring sessions, and practice-focused class activities will help bridge the gap. With dedication and continuous learning, the student is well-positioned to elevate performance across all areas.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Psychometric (20)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %

Enrollment Number:	2324004016
Course:	*SIT*
Date:	*6th March 2024*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

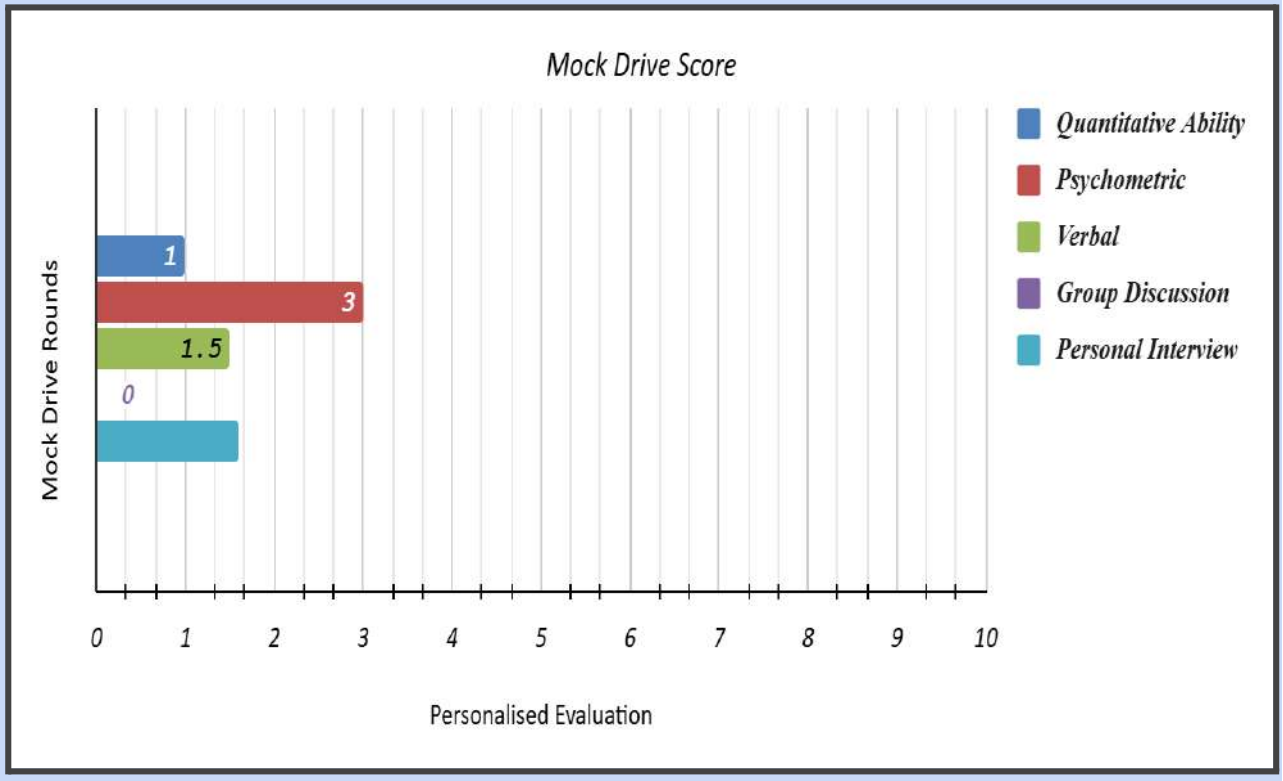
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

While it's clear that you've put in some effort, your current psychometric performance suggests room for growth. Psychometric skills reflect your cognitive abilities, personality traits, and problem-solving style. To strengthen this area, consider engaging with exercises that challenge your logical reasoning, attention to detail, and emotional intelligence. Practice puzzles, pattern recognition problems, and personality profiling exercises. Reflect on your strengths and areas for development, especially in terms of self-awareness and adaptability. These skills aren't just test-based—they mirror your workplace behavior. Regular practice and mindful observation of your own reactions and decisions will help improve both your test performance and your real-world effectiveness. Keep going—you've got this!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

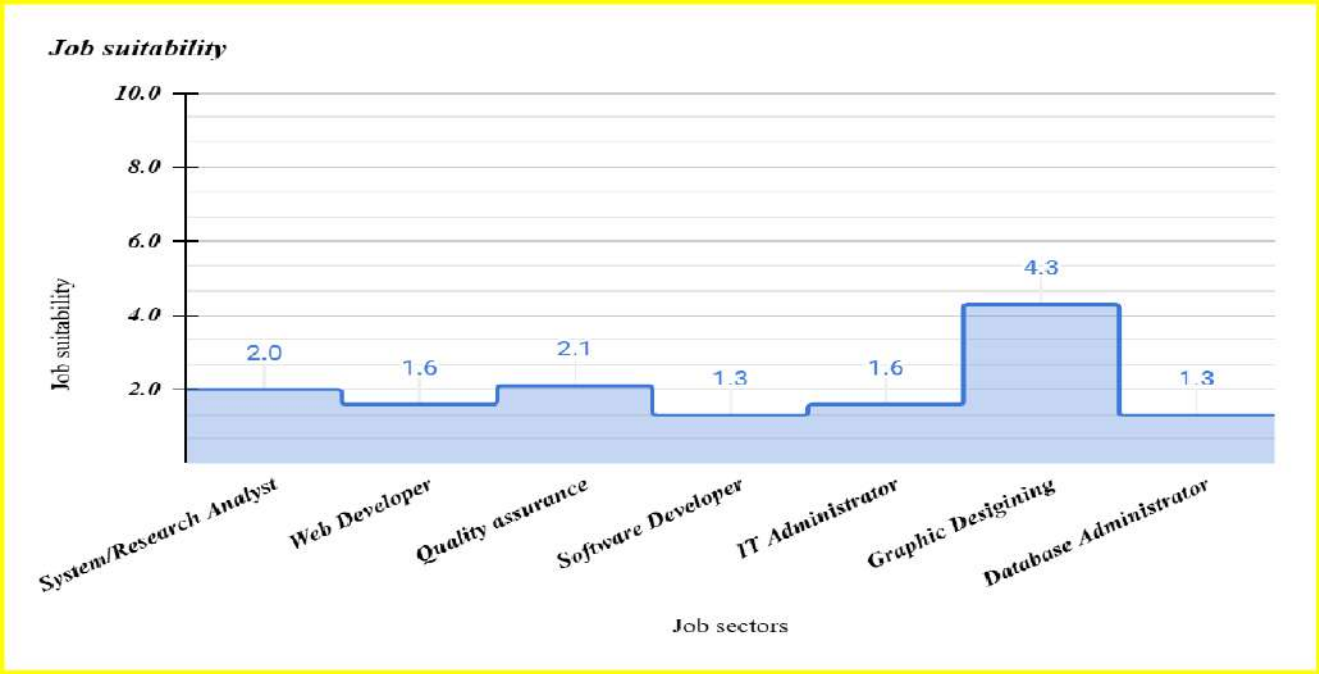
Your performace with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**LOW**	Your current profile shows limited alignment with the requirements of a System/Research Analyst. Focus on strengthening your analytical and problem-solving skills. Work on becoming proficient in tools like Excel, Python, or Power BI for data analysis. Improve your communication and presentation skills to effectively share insights. Regular practice with case studies or business analysis scenarios can also help.
Web Developer	**LOW**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.

Quality assurance	**LOW**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	Your current portfolio or skill set needs more work to align with graphic design expectations. Begin with mastering tools like Adobe Photoshop, Illustrator, and Canva. Understand design principles like balance, contrast, and typography. Try replicating existing designs to learn techniques, then move on to creating original work.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

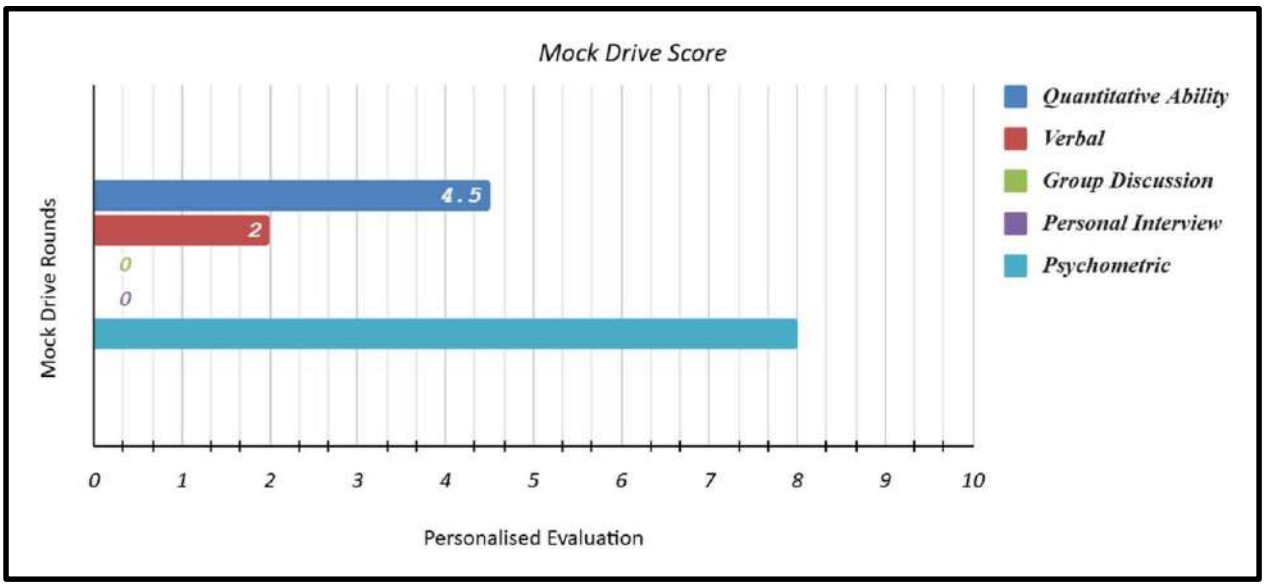
3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-

solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

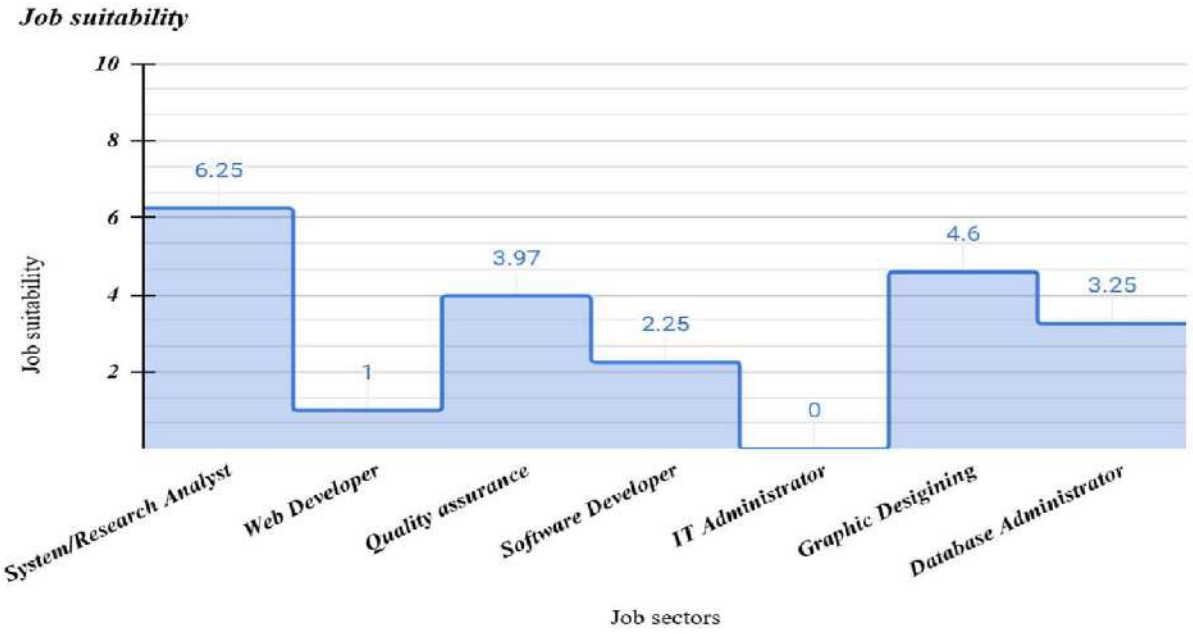
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0 Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Date:	*6th March 2024*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

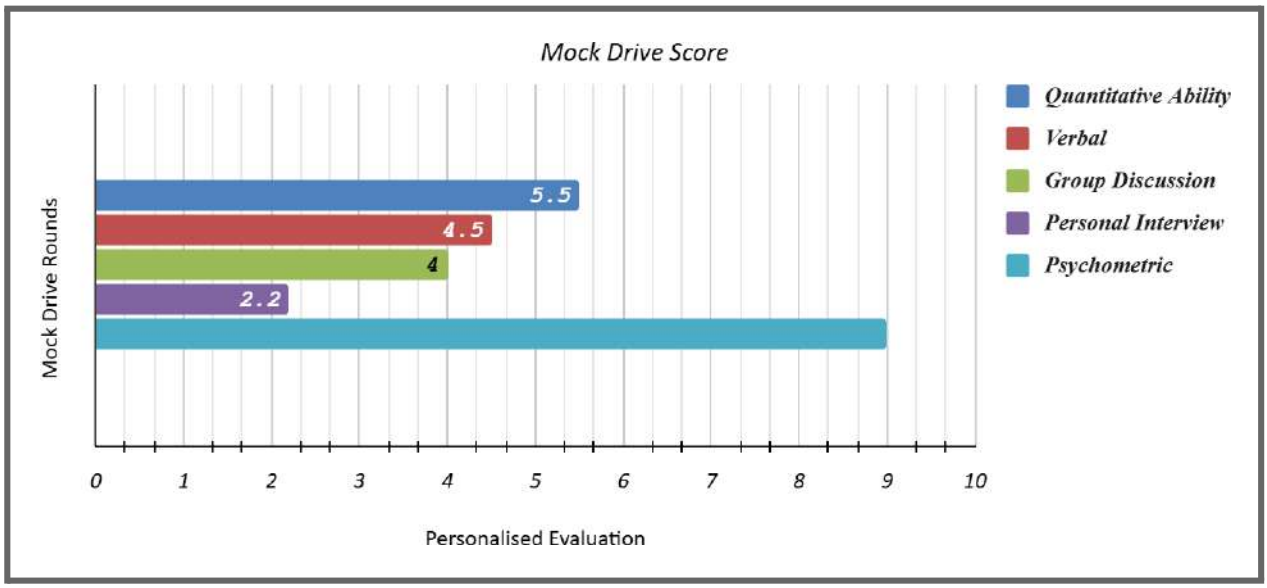
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

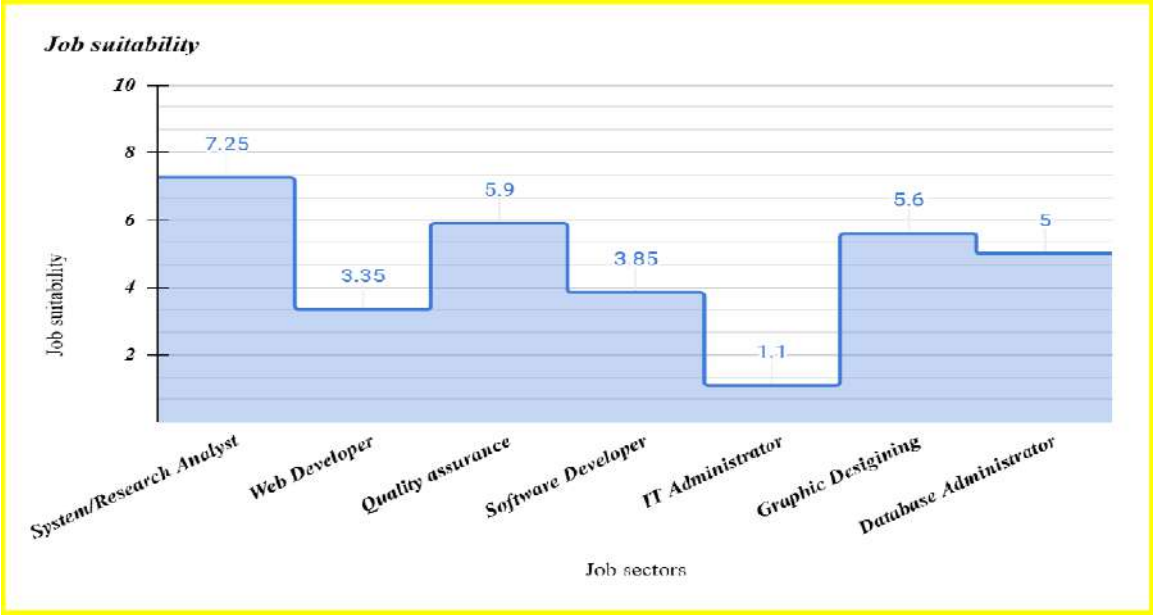
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.
Quality assurance	**MEDIUM**	YYou have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing

		precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interview questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

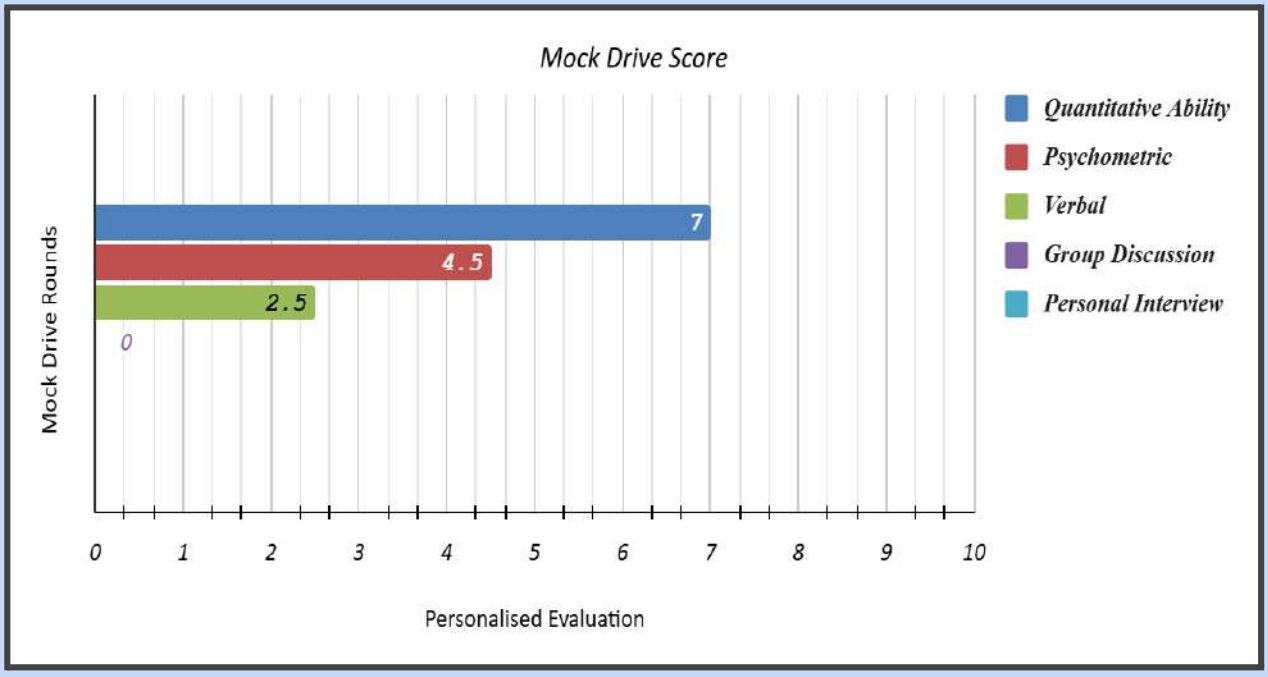
3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is low. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

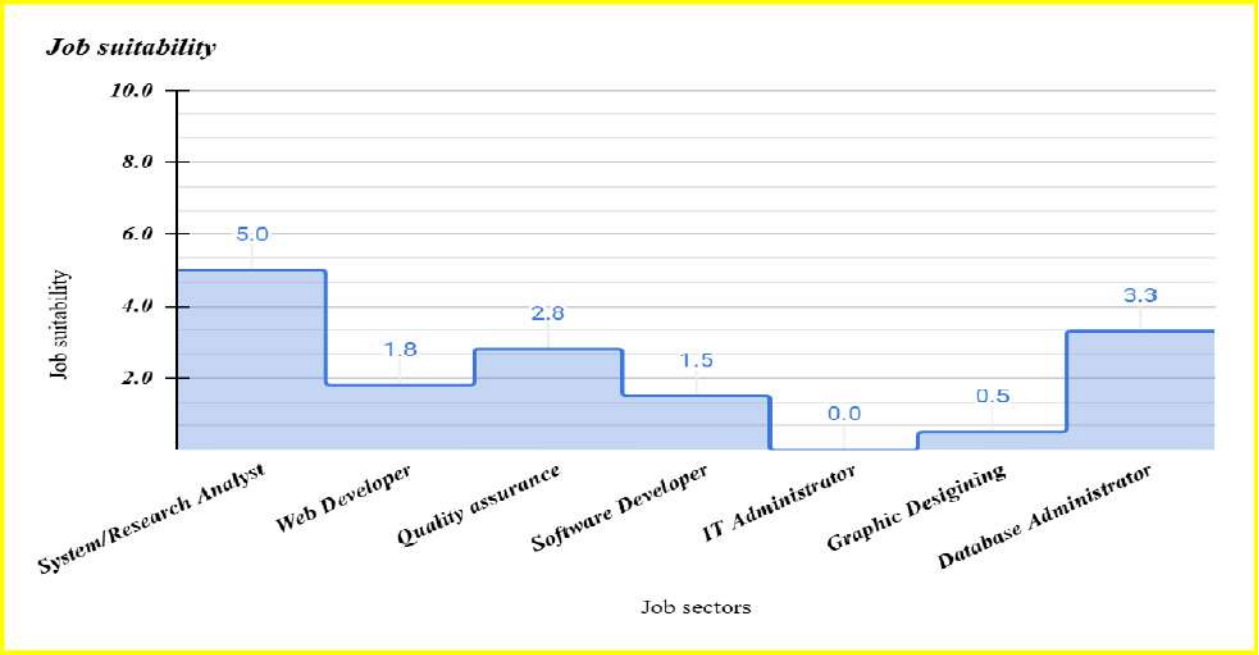
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

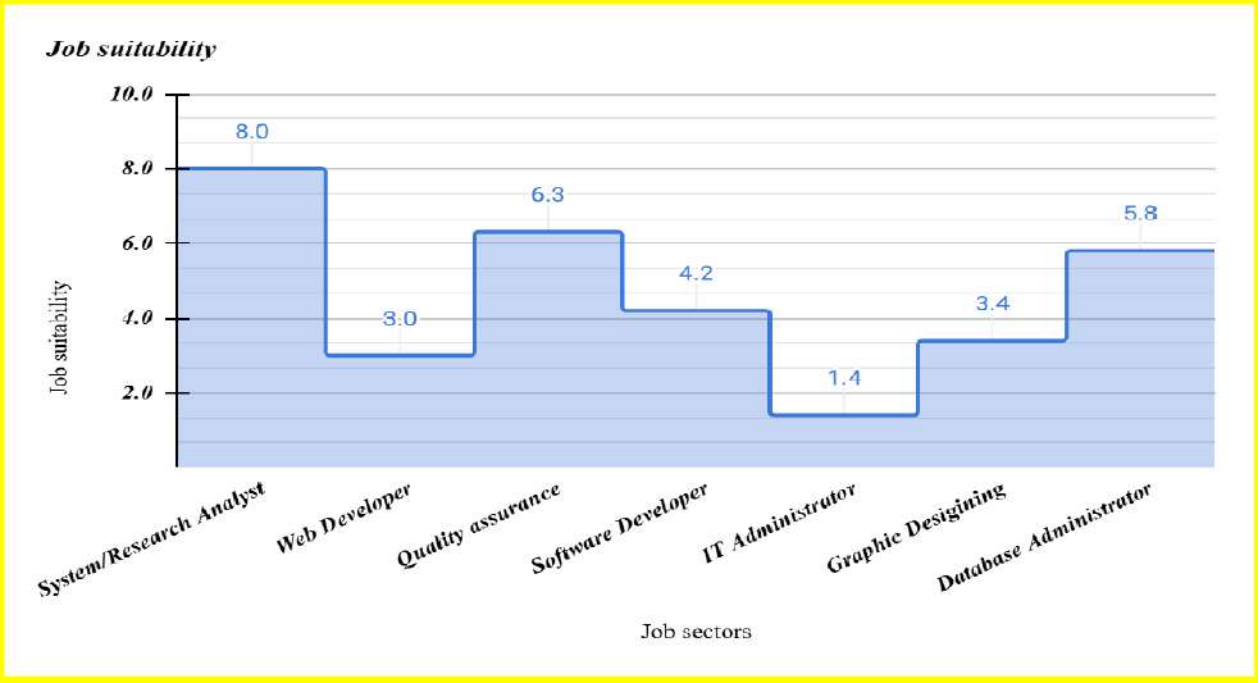
Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**MEDIUM**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**MEDIUM**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Psychometric (20)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %
	Quantitative (20)						
	Verbal (20)	Pseudo coding (30)			B (Dream Company)	6- 10 lakh	70- 79 %
	GD (20)	Programming (30)			C (Ideal Company)	3-6 Lakh	60 - 69 %

Mock Drive Analysis

Name:	PATEL TRUSHAN
Enrollment Number:	2324004014
Course:	*B.Tech*
Date:	*6th March 2025*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

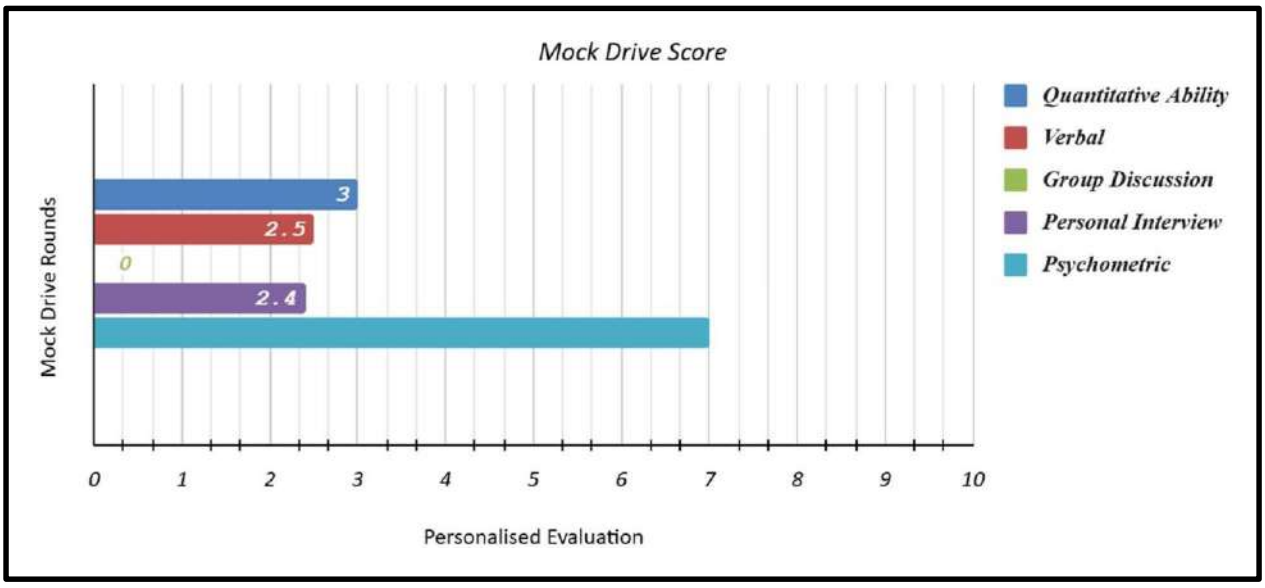
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

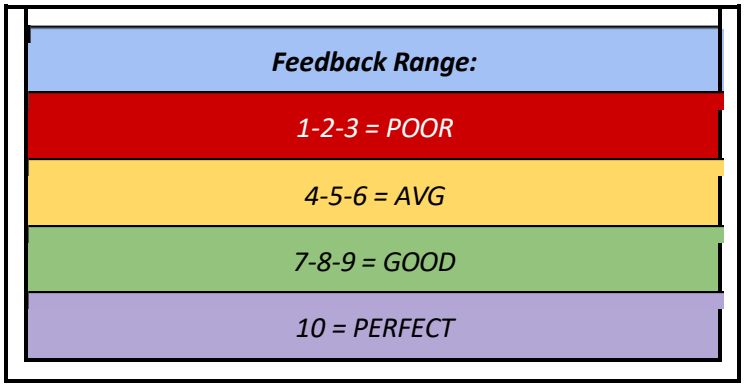
Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:



This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an

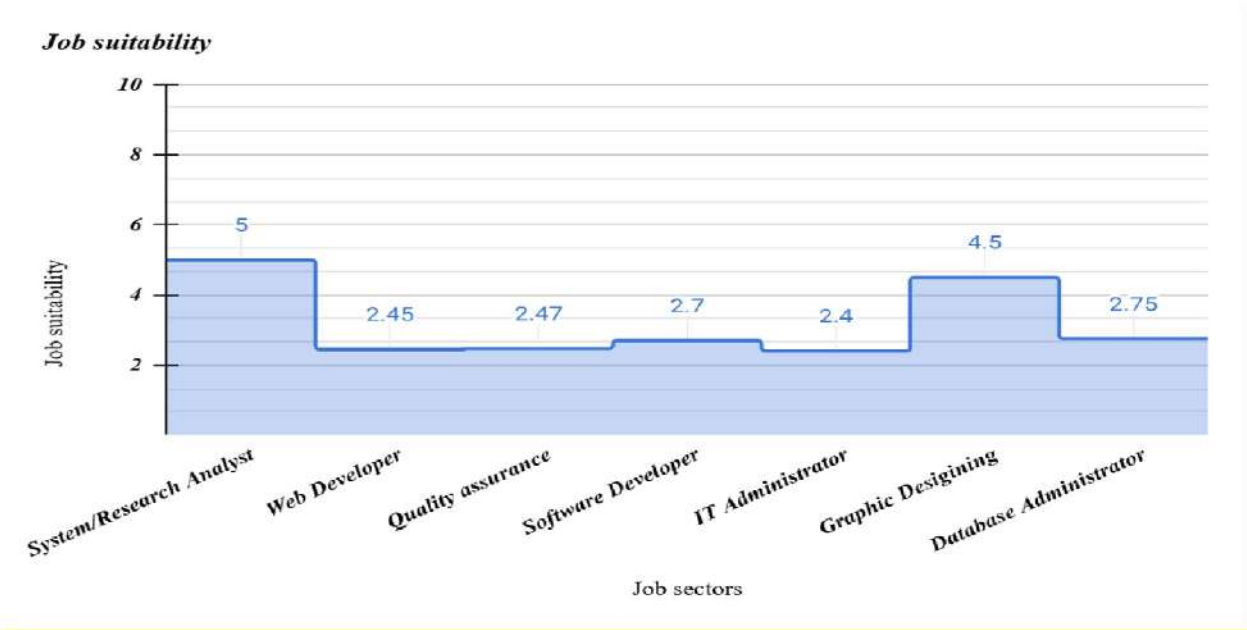
opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

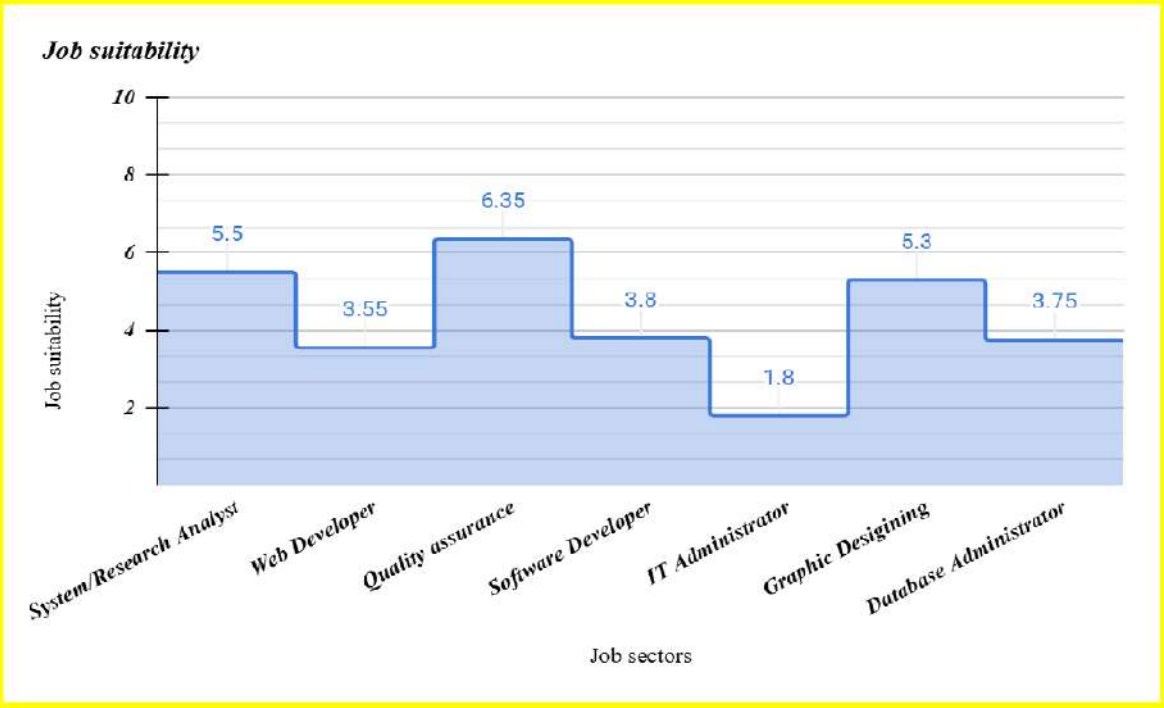
4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	To thrive as a System/Research Analyst, candidates should excel in soft skills like clear communication and problem-solving skills. These companies value adaptability, proficiency in data analysis tools, and effective presentation skills.
Web Developer	**LOW**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**1	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Moderate	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interview questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart

Mock Drive Analysis

Name:	PRASHANT CHHETRY
Enrollment Number:	2324004029
Course:	*SIT*
Date:	*6th March 2024*

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants

Training and Placement Cell

over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• **Knowledge Process Outsourcing (KPO) Companies**

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

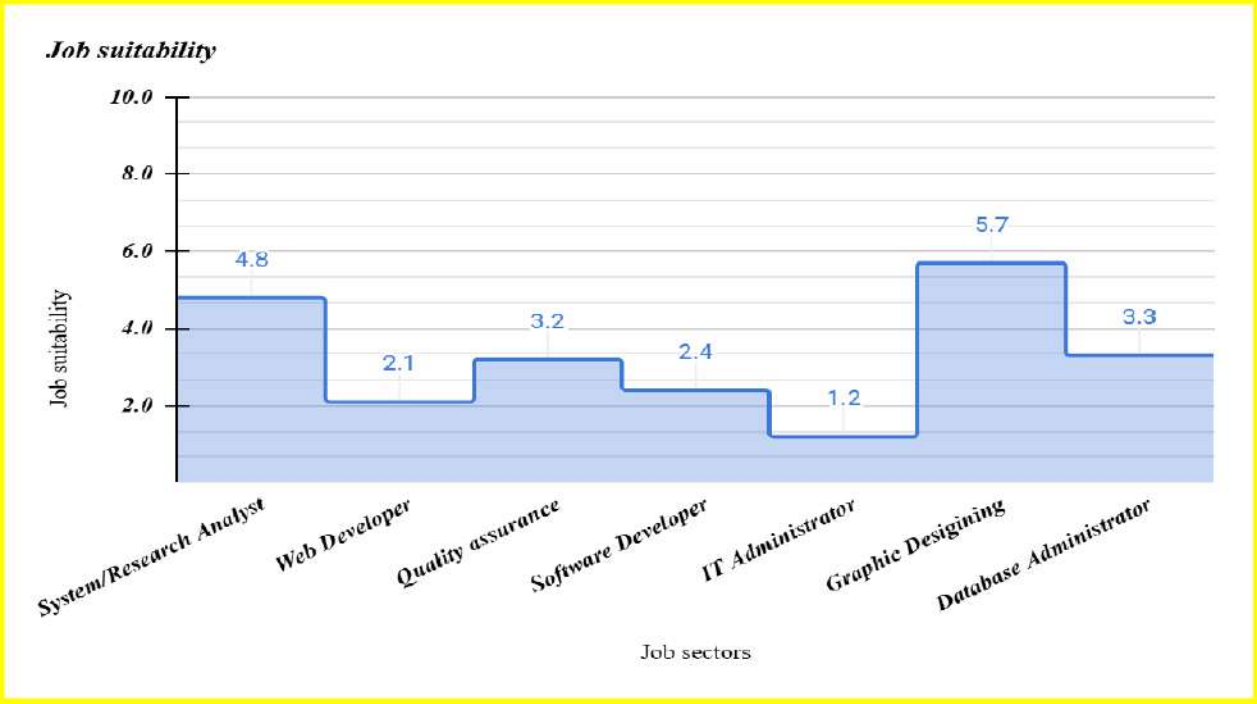
Your performace with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	Your current portfolio or skill set needs more work to align with graphic design expectations. Begin with mastering tools like Adobe Photoshop, Illustrator, and Canva. Understand design principles like balance, contrast, and typography. Try replicating existing designs to learn techniques, then move on to creating original work.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

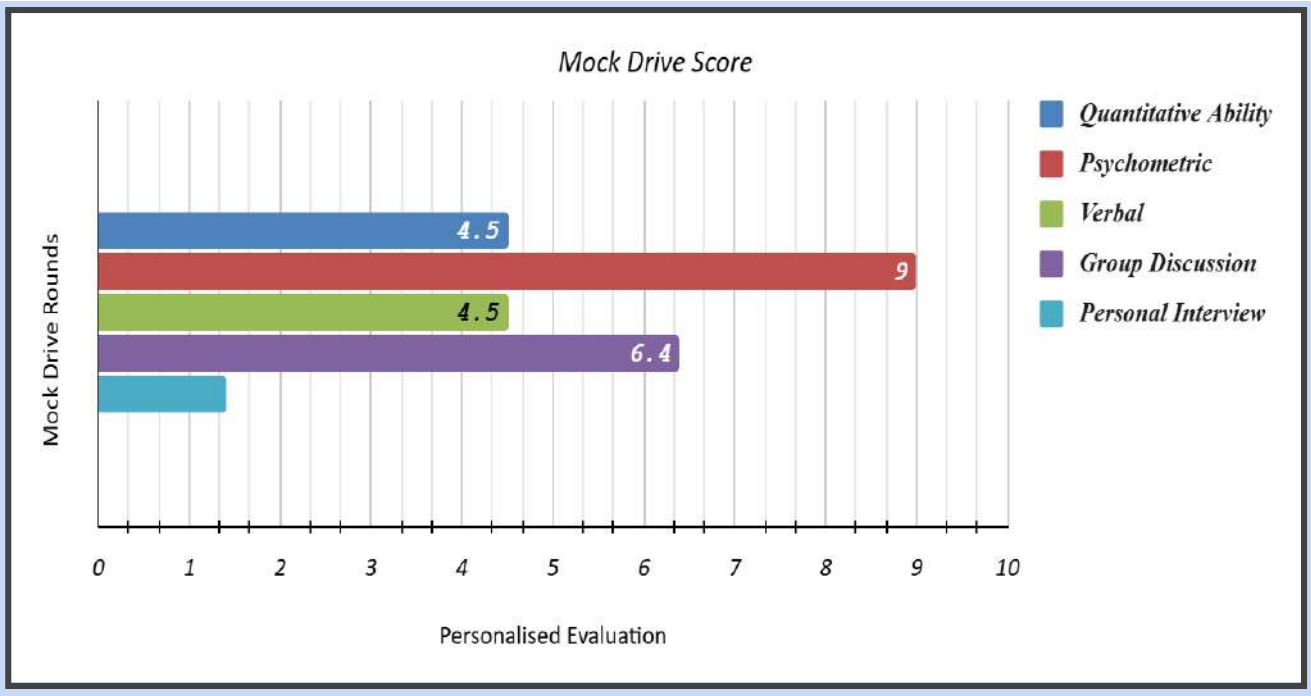
• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable

Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

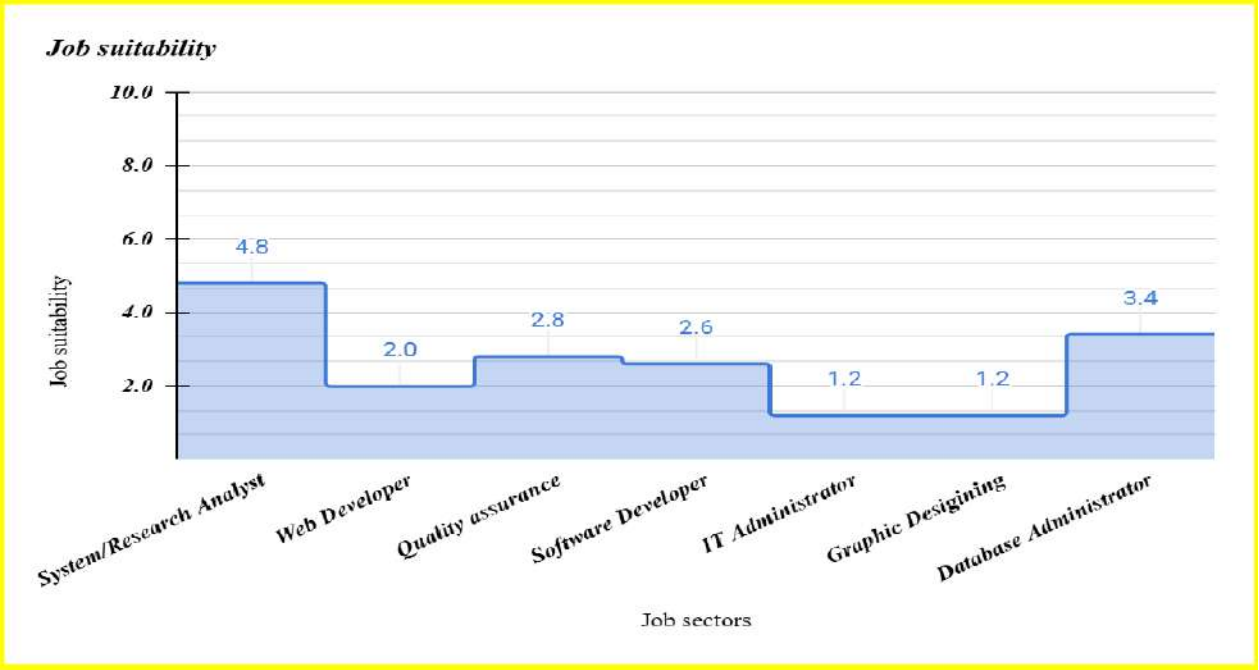
Your contributions during the group discussion were notable. You demonstrated good communication skills, expressing your thoughts clearly and effectively. Your ability to actively listen to others and engage in the conversation was evident, contributing positively to the overall dynamics of the group. While you did well in expressing your own ideas, consider actively seeking out and acknowledging diverse perspectives within the group. This can enrich the discussion and demonstrate a well-rounded understanding of the topic. Challenge yourself to delve deeper into counterarguments. While you presented your points effectively, exploring opposing viewpoints and addressing potential counterarguments can add depth to your contributions. Remember, these are just areas for potential growth, and your current performance is already commendable. Keep up the good work, and we look forward to seeing how you continue to excel in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-

solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

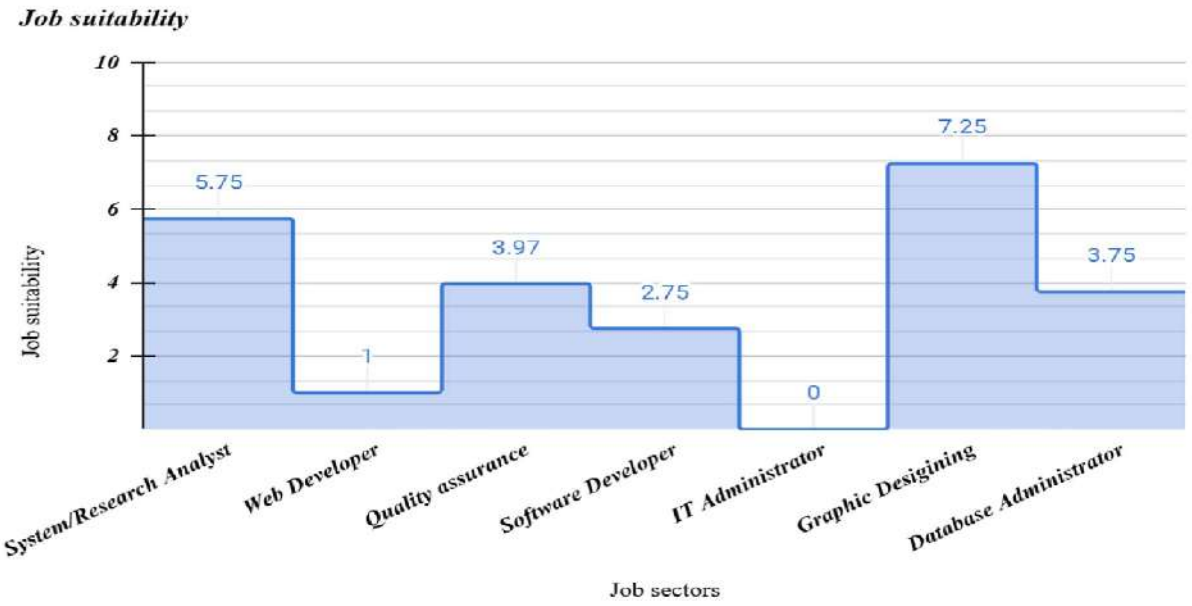
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	Your chance of selection for these job profiles	Job profile criteria and areas to work on for improving your chances
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**GOOD**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense. Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Psychometric (20)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %
	Quantitative (20)						
	Verbal (20)	Pseudo coding (30)			B (Dream Company)	6- 10 lakh	70- 79 %
	GD (20)	Programming (30)			C (Ideal Company)	3-6 Lakh	60 - 69 %

Mock Drive Analysis

Name:	*RAVAL DEEPAK AMARATBHAI*
Enrollment Number:	2324004017
Course:	*SIT*
Date:	*6th March 2024*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	Your current portfolio or skill set needs more work to align with graphic design expectations. Begin with mastering tools like Adobe Photoshop, Illustrator, and Canva. Understand design principles like balance, contrast, and typography. Try replicating existing designs to learn techniques, then move on to creating original work.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

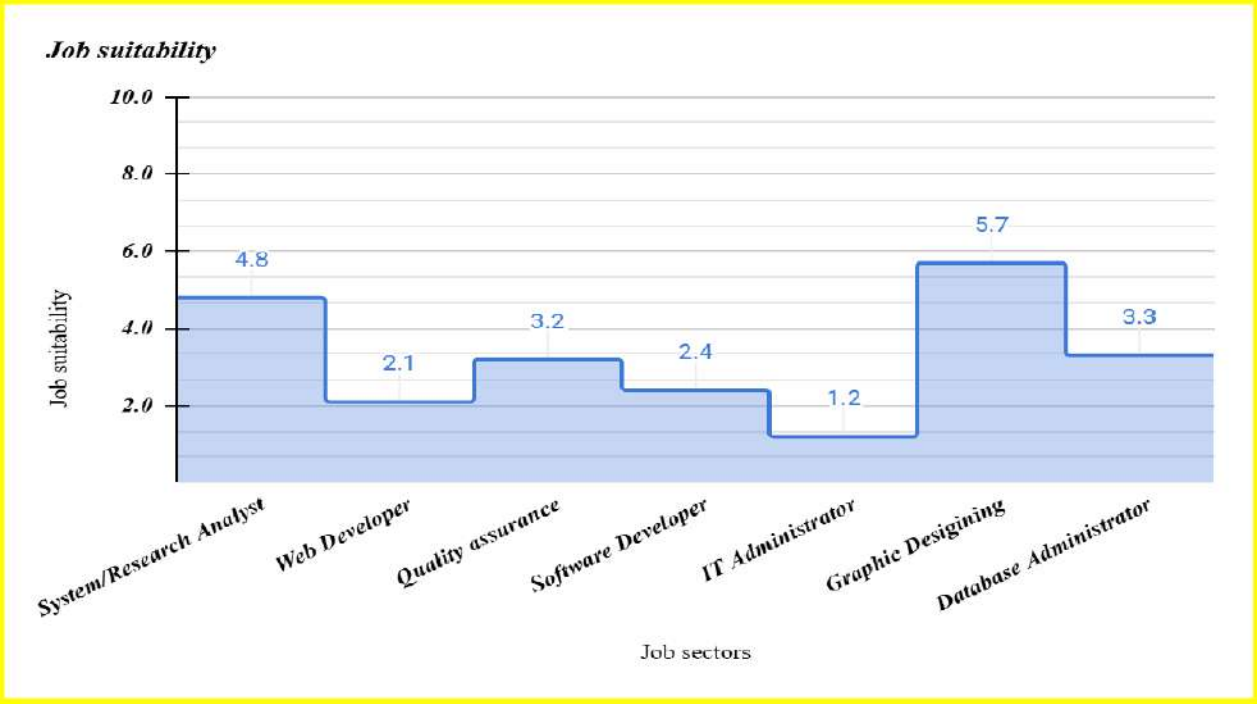
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. 5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Enrollment Number:	2324004036
Course:	*B.Tech*
Date:	*6th March 2024*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

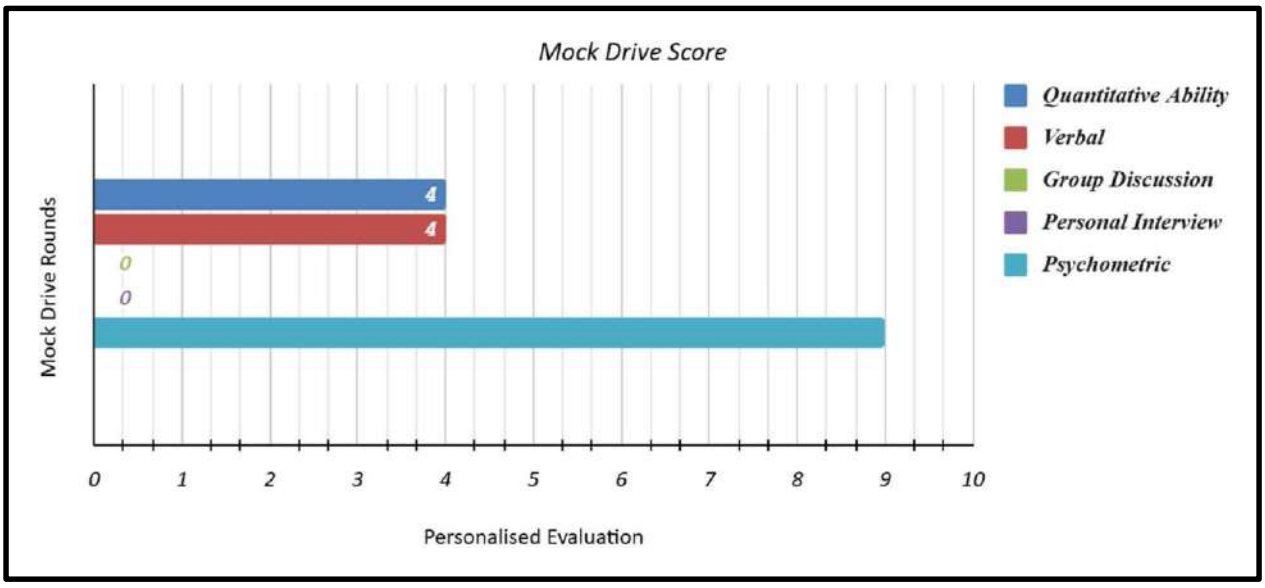
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

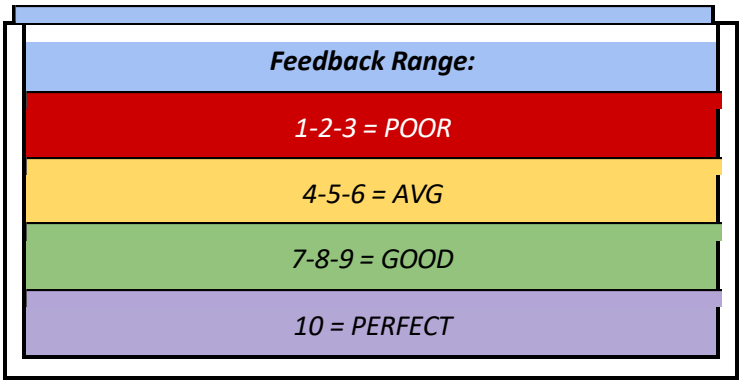
Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:



This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

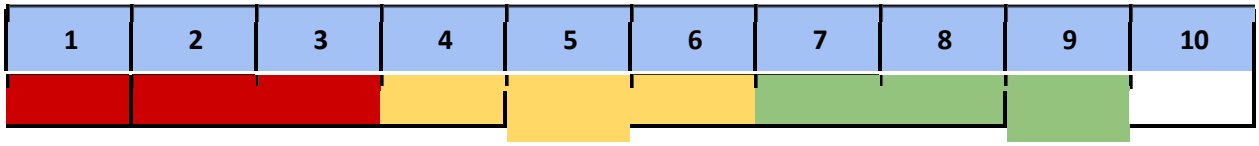
Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS



Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an

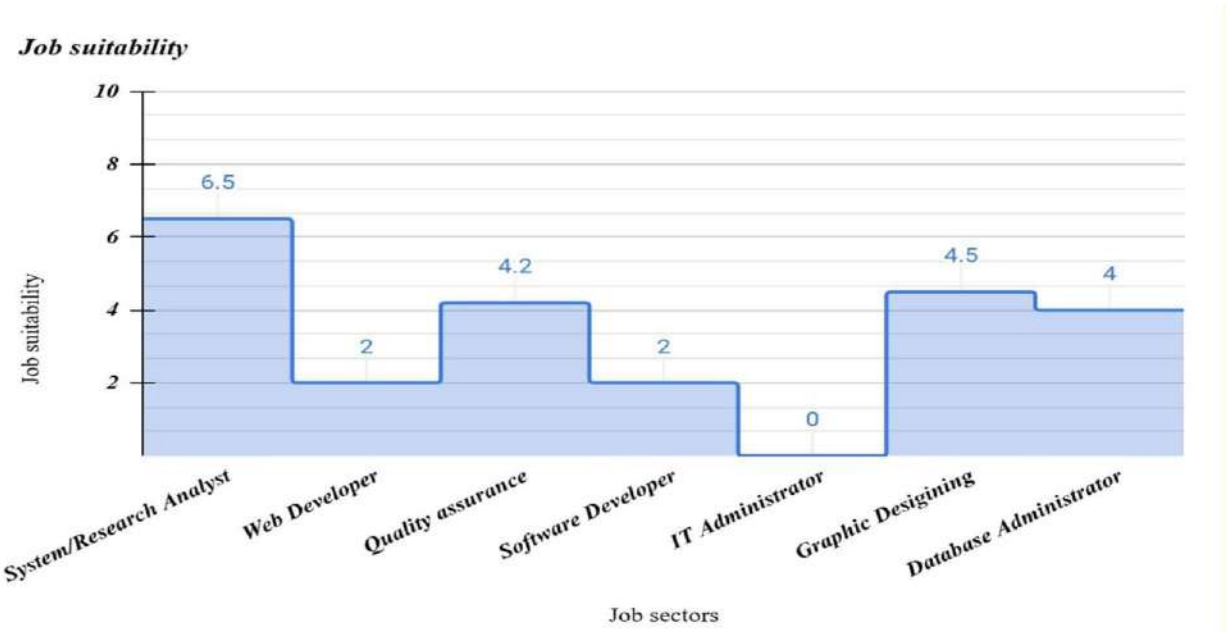
opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0 Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

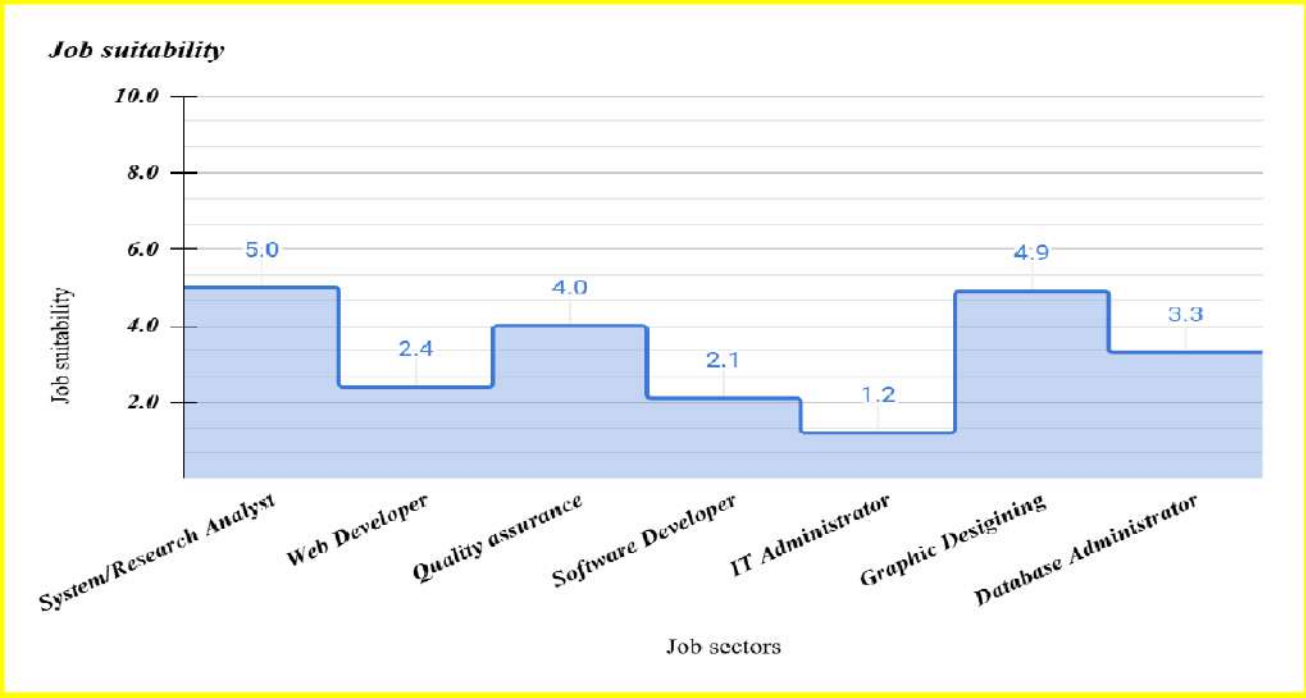
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	Your current portfolio or skill set needs more work to align with graphic design expectations. Begin with mastering tools like Adobe Photoshop, Illustrator, and Canva. Understand design principles like balance, contrast, and typography. Try replicating existing designs to learn techniques, then move on to creating original work.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

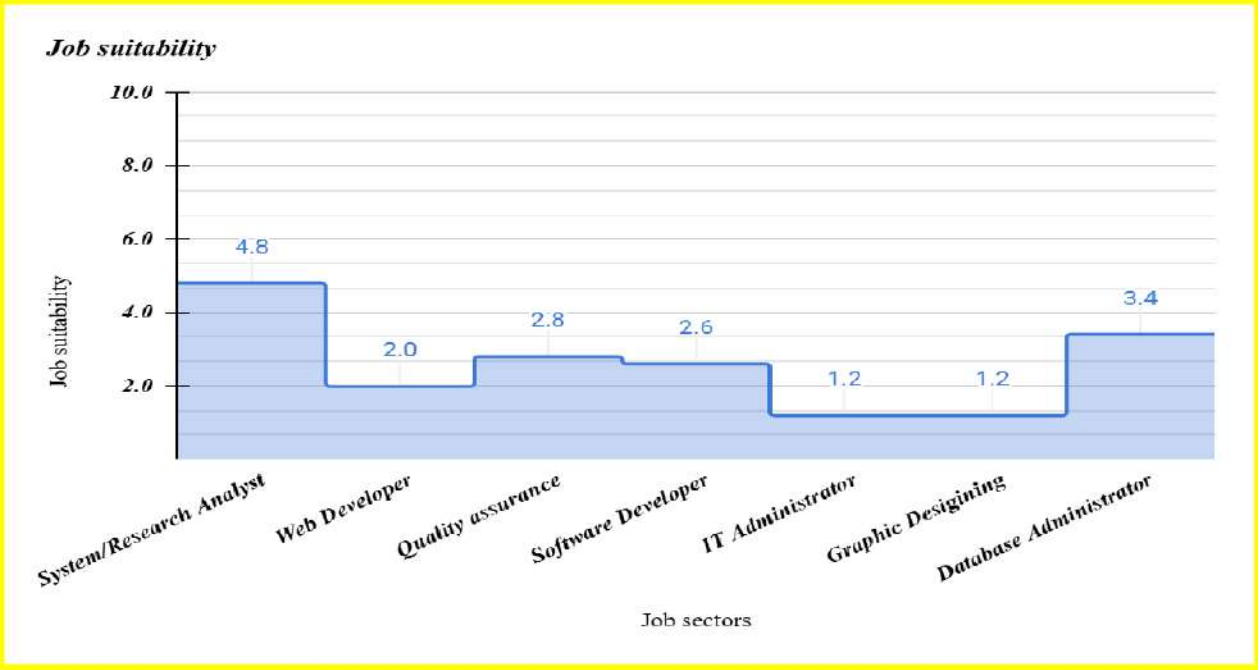
Your contributions during the group discussion were notable. You demonstrated good communication skills, expressing your thoughts clearly and effectively. Your ability to actively listen to others and engage in the conversation was evident, contributing positively to the overall dynamics of the group. While you did well in expressing your own ideas, consider actively seeking out and acknowledging diverse perspectives within the group. This can enrich the discussion and demonstrate a well-rounded understanding of the topic. Challenge yourself to delve deeper into counterarguments. While you presented your points effectively, exploring opposing viewpoints and addressing potential counterarguments can add depth to your contributions. Remember, these are just areas for potential growth, and your current performance is already commendable. Keep up the good work, and we look forward to seeing how you continue to excel in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Moderate	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Psychometric (20)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %
	Quantitative (20)						
	Verbal (20)	Pseudo coding (30)			B (Dream Company)	6- 10 lakh	70- 79 %
	GD (20)	Programming (30)			C (Ideal Company)	3-6 Lakh	60 - 69 %
	PI (20)	Technical Interview (20)			D (Average Company)	Below 3 lakh	50 - 59 %
	51.4	-			E (Not Fit for Corporate)	NFC	Less than 50 %

Mock Drive Analysis

Name:	SANJAY KUMAR YADAV
Enrollment Number:	2324004045
Course:	*SIT*
Date:	*6th March 2024*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

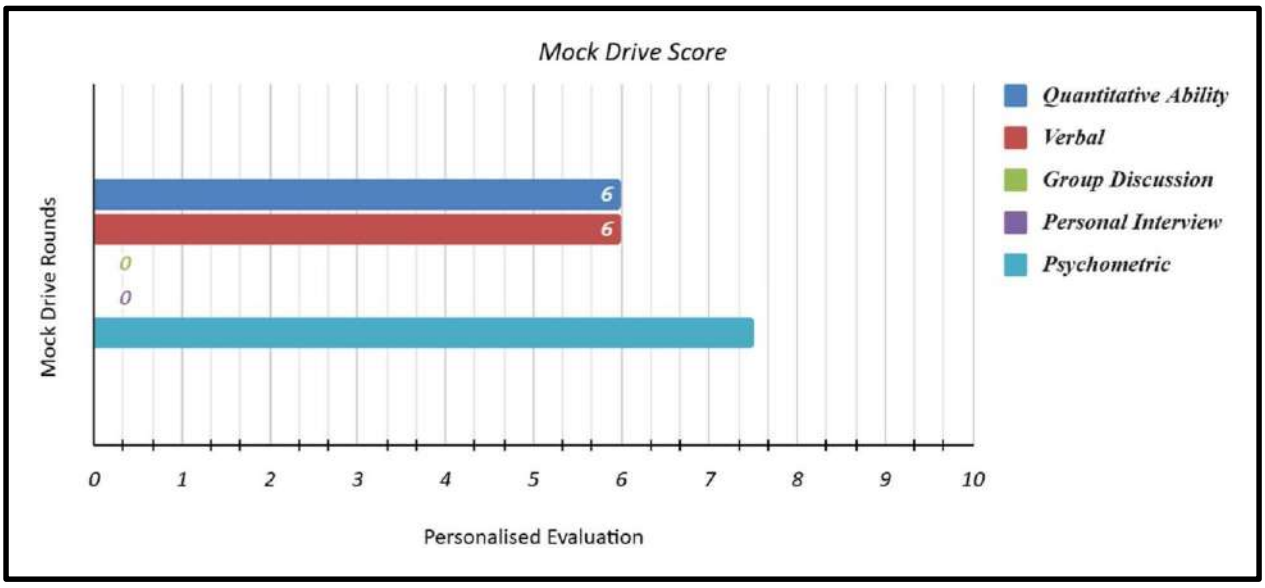
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

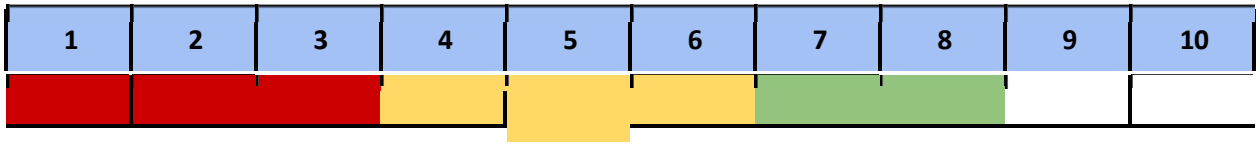
Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS



Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an

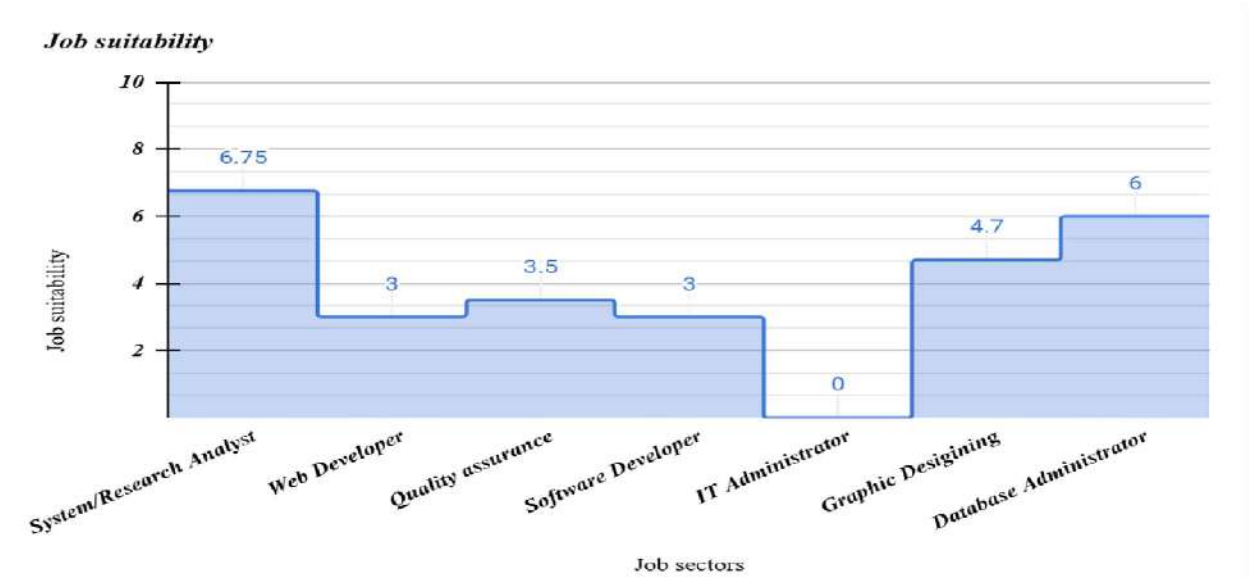
opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0 Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Moderate	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**MEDIUM**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

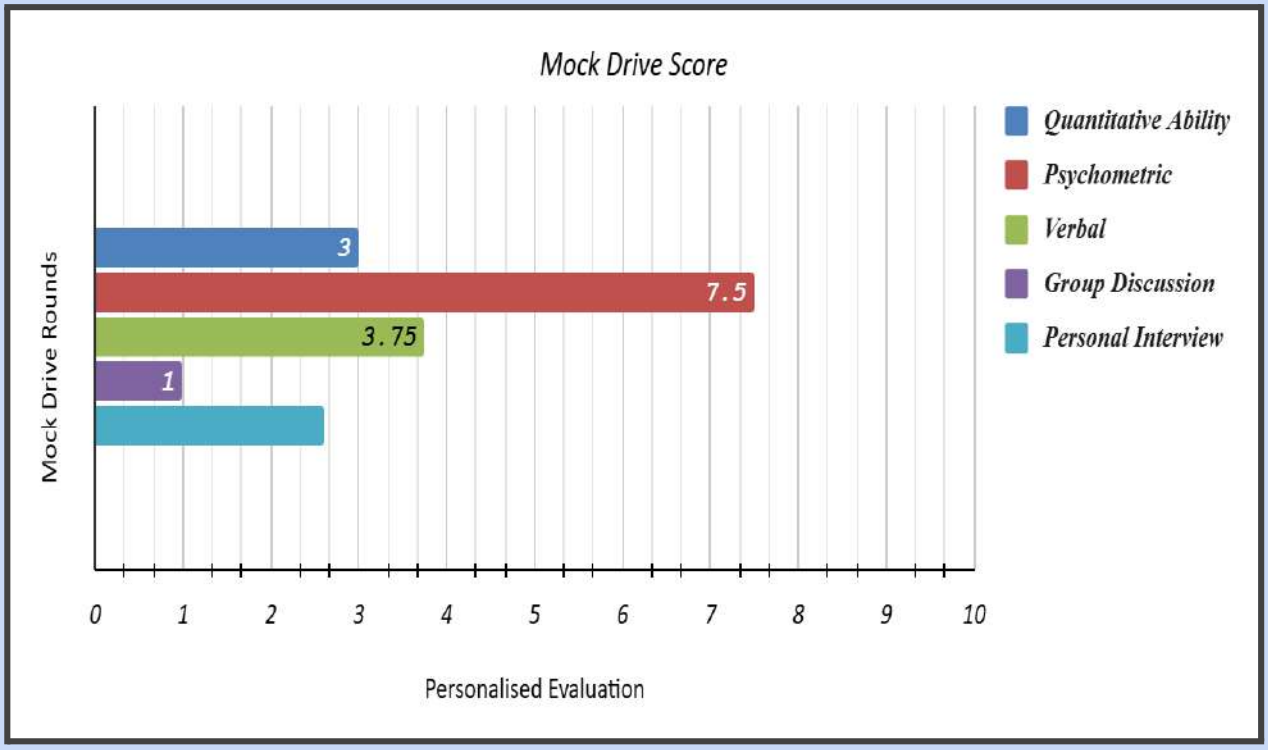
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performace with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	Your current portfolio or skill set needs more work to align with graphic design expectations. Begin with mastering tools like Adobe Photoshop, Illustrator, and Canva. Understand design principles like balance, contrast, and typography. Try replicating existing designs to learn techniques, then move on to creating original work.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

VERBAL

1	2	3	4	5	6	7	8	9	10

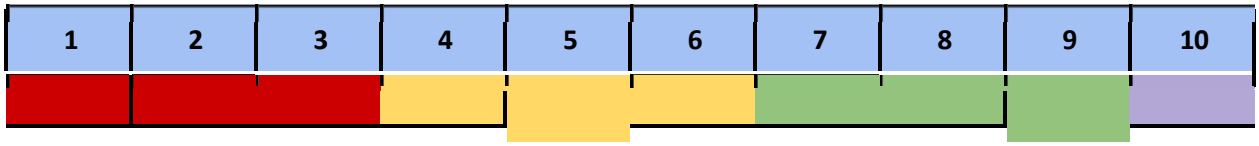
Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

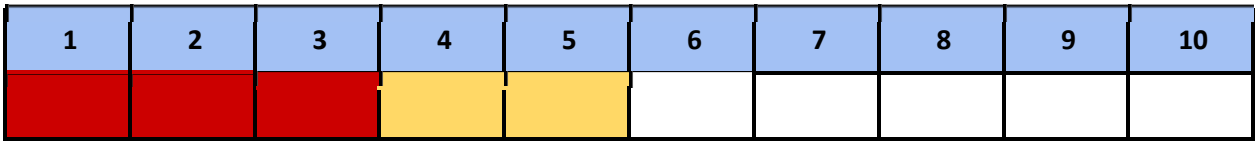
Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS



Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION



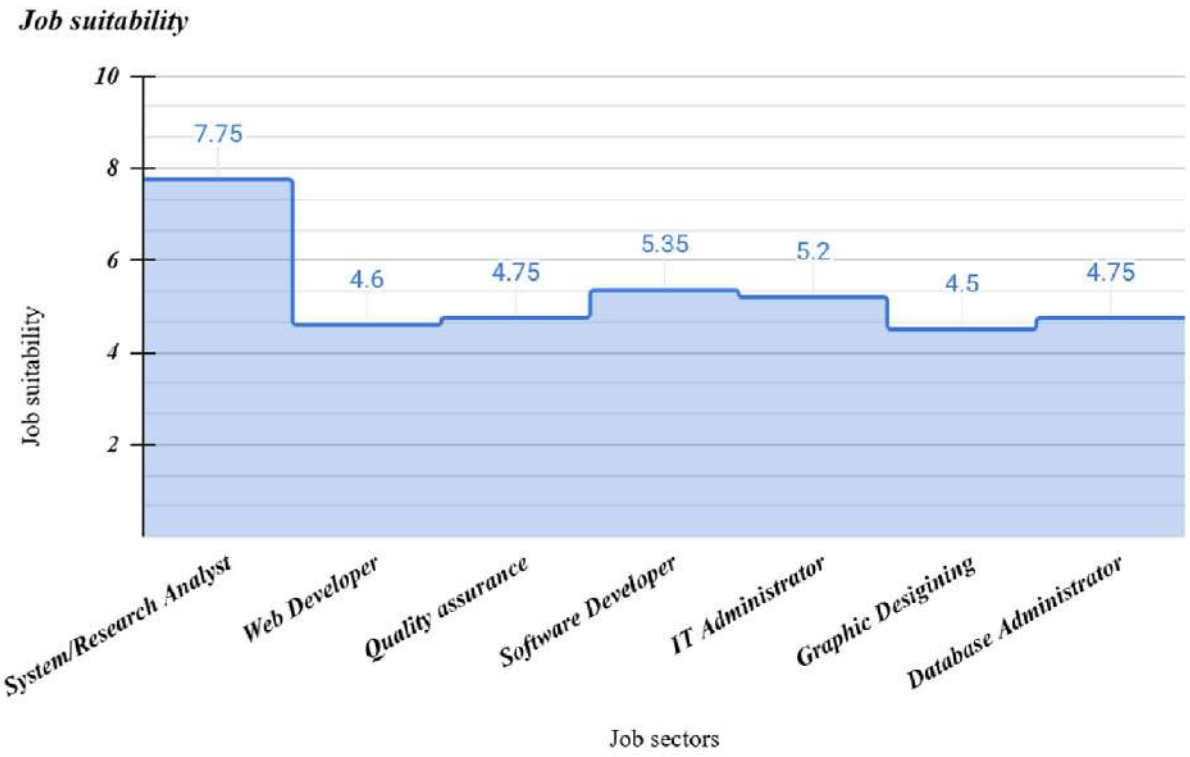
Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**MEDIUM**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech

		concepts clearly. With consistent effort, your chances of landing this role will improve.
Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships..
IT Administrator	**MEDIUM**	You're developing a good foundation for an IT Admin role. Focus on hands-on practice—set up local networks, explore admin panels, and simulate problem-solving scenarios. Learn how to manage servers, handle security protocols, and adapt to new IT tools. A proactive learning approach will significantly boost your chances.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Moderate	1. Structure your arguments in a logical flow: point, reason, example. 2. Practice initiating and summarizing GDs. 3. Use simple, impactful language to express complex ideas. 4. Learn to respectfully disagree and build on others' points. 5. Work on controlling voice modulation and pitch for better engagement.
Personal Interview	Moderate	1. Prepare an impressive "tell me about yourself" 2. Maintain positive body language 3. Put efforts to talk more about your strengths and accomplishments 4. Answer every question confidently and with a relevant example 5. Work on your CV 6. Practice relaxation techniques such as deep breathing or visualization to calm your nerves.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Psychometric (20)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %
	Quantitative (20)

Mock Drive Analysis

Name:	*THAKKAR TIRTH SANJAYBHAI*
Enrollment Number:	2324014059
Course:	*SIT*
Date:	*6th March 2024*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

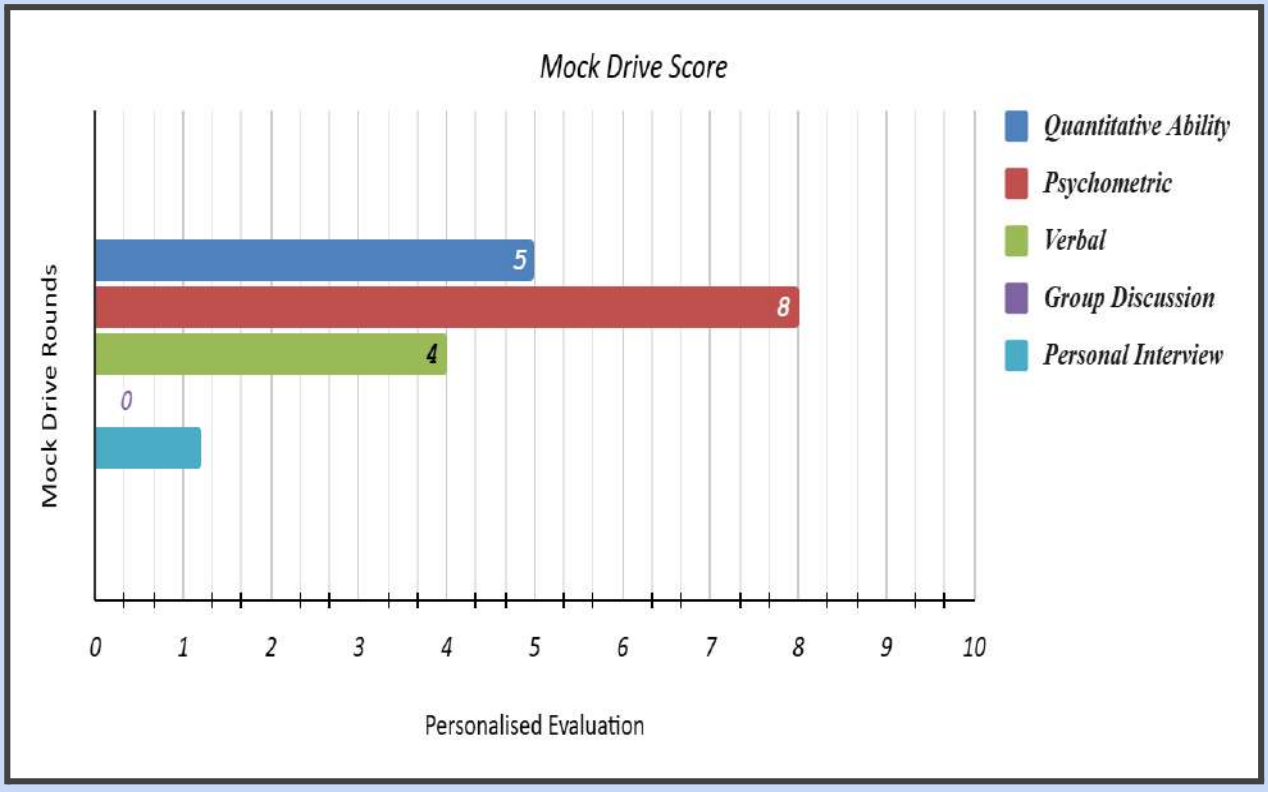
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

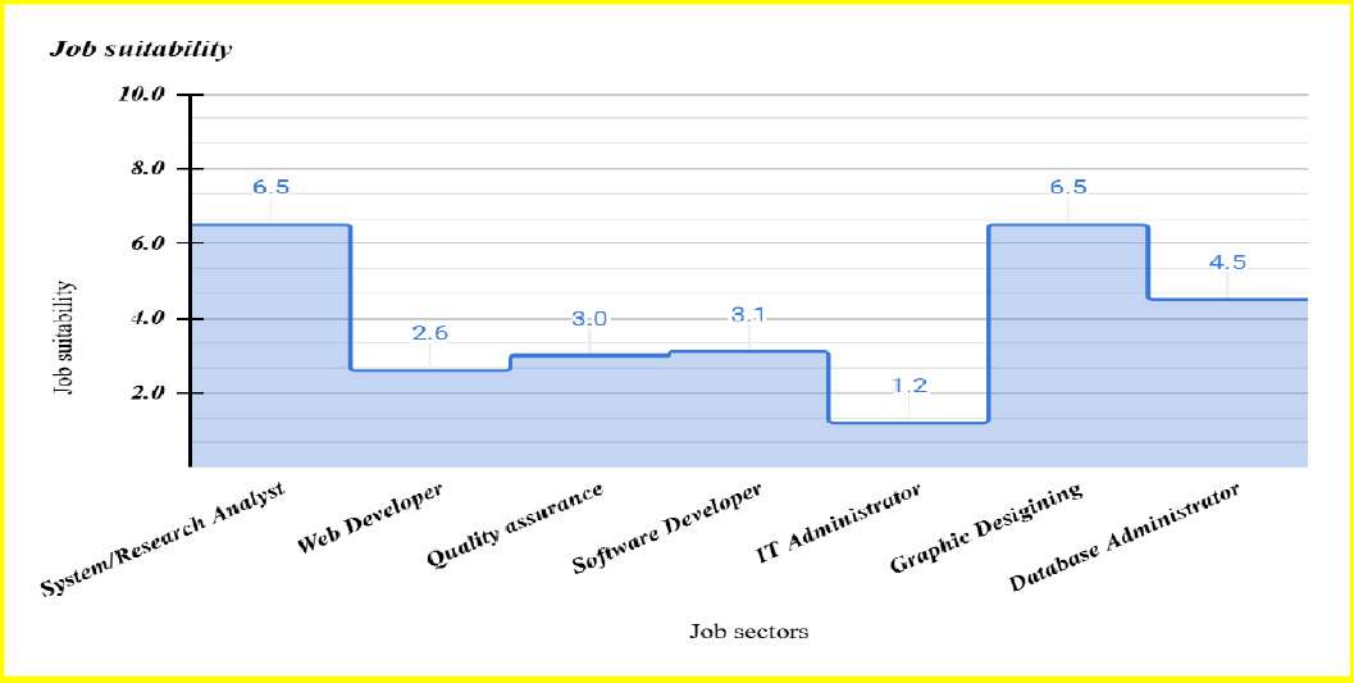
Your performace with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.

Quality assurance	**LOW**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	Your current portfolio or skill set needs more work to align with graphic design expectations. Begin with mastering tools like Adobe Photoshop, Illustrator, and Canva. Understand design principles like balance, contrast, and typography. Try replicating existing designs to learn techniques, then move on to creating original work.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**MEDIUM**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

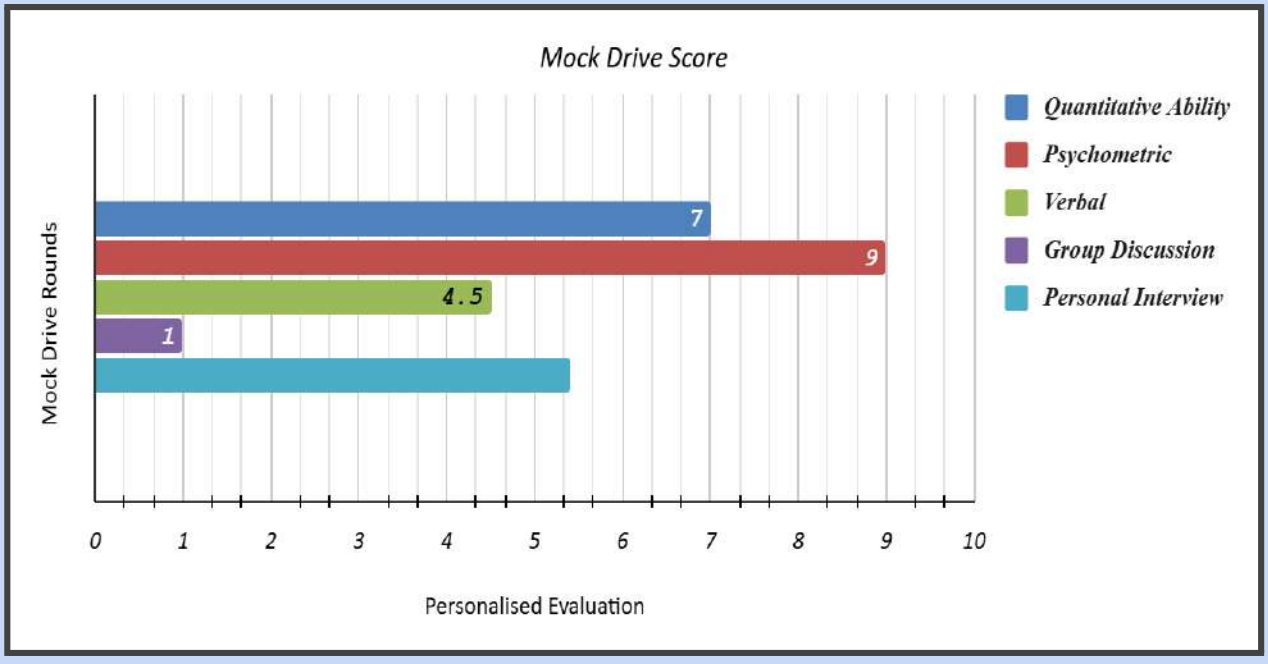
- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable

Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**MEDIUM**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

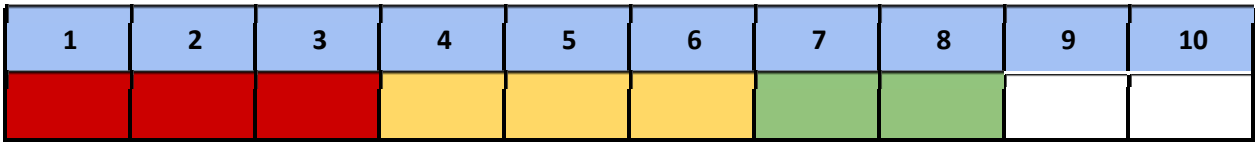
Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

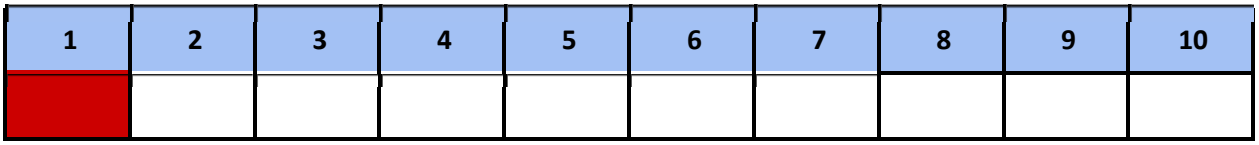
While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS



Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION



Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an

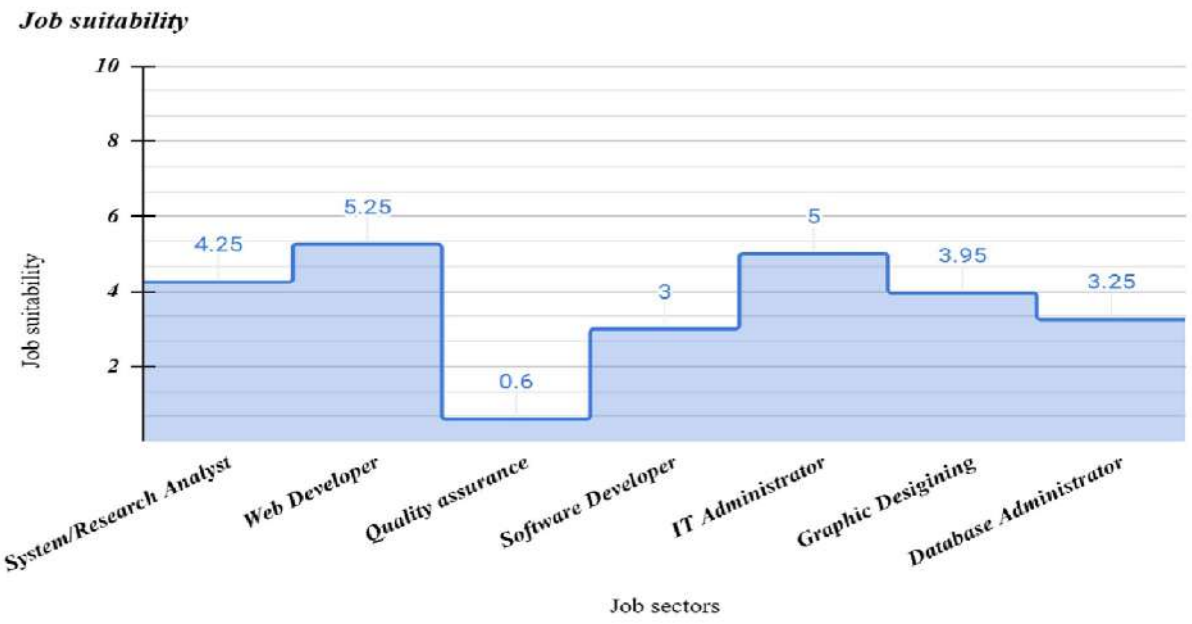
opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0 Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**MEDIUM**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**MEDIUM**	You're developing a good foundation for an IT Admin role. Focus on hands-on practice—set up local networks, explore admin panels, and simulate problem-solving scenarios. Learn how to manage servers, handle security protocols, and adapt to new IT tools. A proactive learning approach will significantly boost your chances.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Moderate	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables, squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Moderate	1. Prepare an impressive “tell me about yourself” 2. Maintain positive body language 3. Put efforts to talk more about your strengths and accomplishments 4. Answer every question confidently and with a relevant example 5. Work on your CV 6. Practice relaxation techniques such as deep breathing or visualization to calm your nerves.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

1	2	3	4	5	6	7	8	9	10

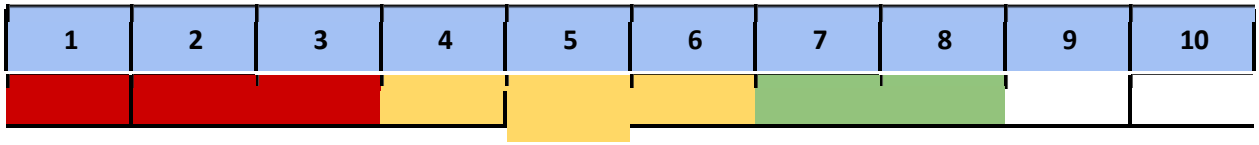
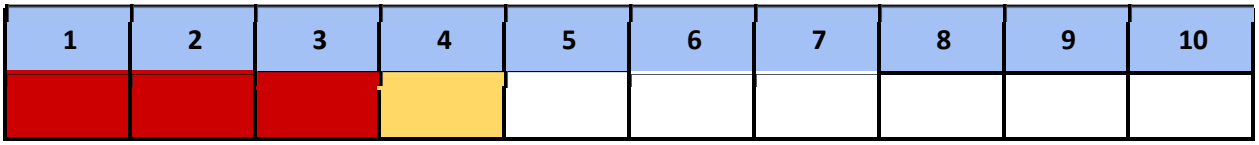
Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS



Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION



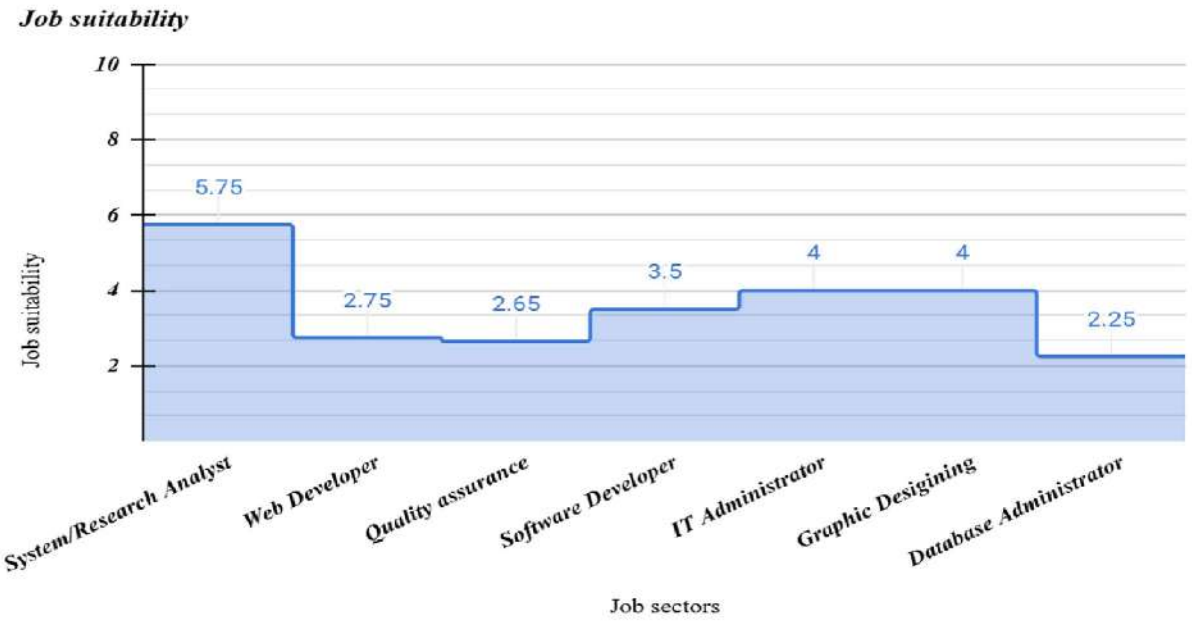
Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**MEDIUM**	You're developing a good foundation for an IT Admin role. Focus on hands-on practice—set up local networks, explore admin panels, and simulate problem-solving scenarios. Learn how to manage servers, handle security protocols, and adapt to new IT tools. A proactive learning approach will significantly boost your chances.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Moderate	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables, squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Psychometric (20)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %
	Quantitative (20)						
	Verbal (20)	Pseudo coding (30)			B (Dream Company)	6- 10 lakh	70- 79 %
	GD (20)	Programming (30)			C (Ideal Company)	3-6 Lakh	60 - 69 %

Mock Drive Analysis

Name:	DUDHAT PREET RAMESHBHAI
Enrollment Number:	2324004042
Course:	SIT
Date:	6th March 2024

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

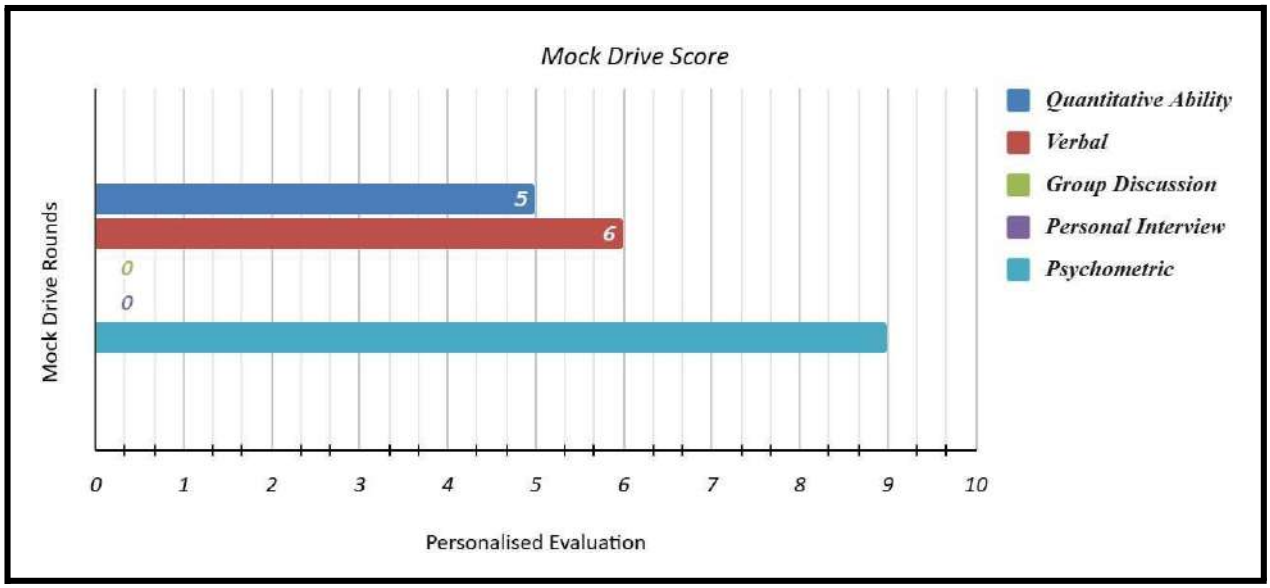
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant

examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems

		like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments
Quality assurance	LOW	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	LOW	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience
IT Administrator	LOW	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	MEDIUM	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	MEDIUM	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Moderate	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

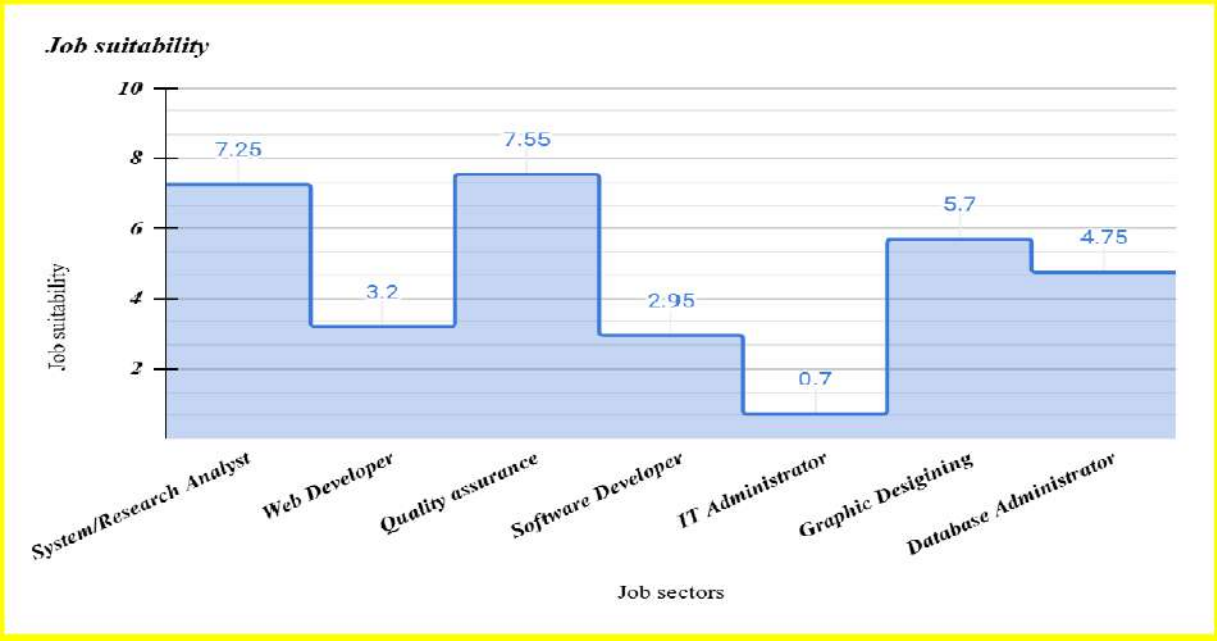
4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.

Quality assurance	**GOOD**	Your skills are well-aligned with QA roles. You exhibit a structured and detail-oriented mindset, and likely have some hands-on exposure to QA processes. To build on this strength, explore automation tools and keep refining your test documentation. With this proactive approach, you are in a good position to succeed in QA.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Moderate	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interview questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

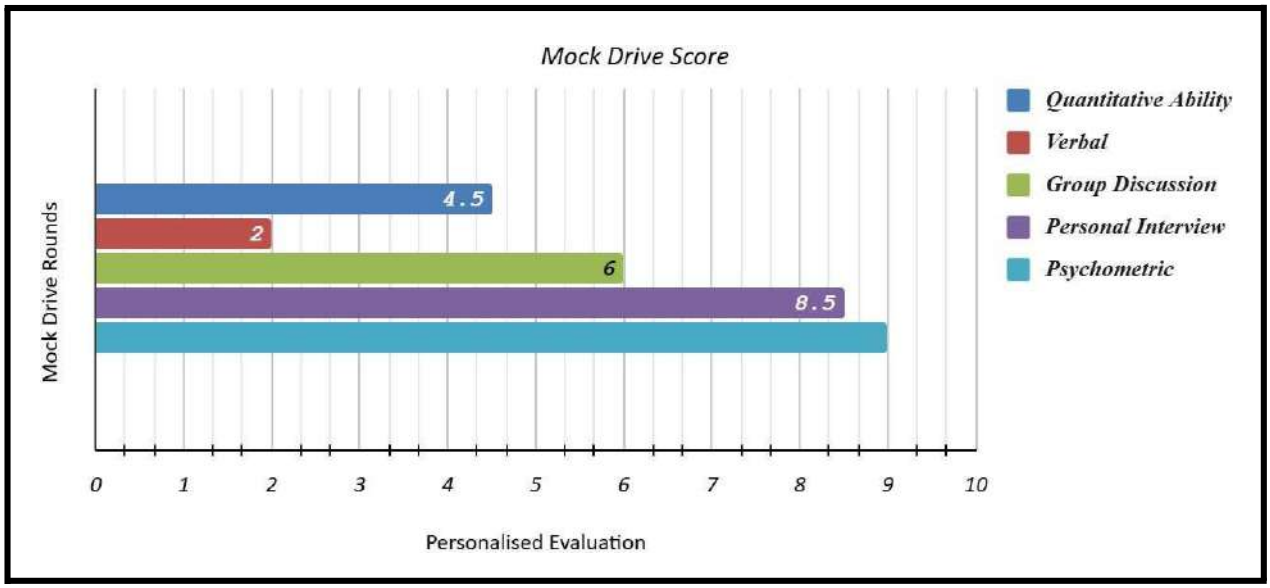
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

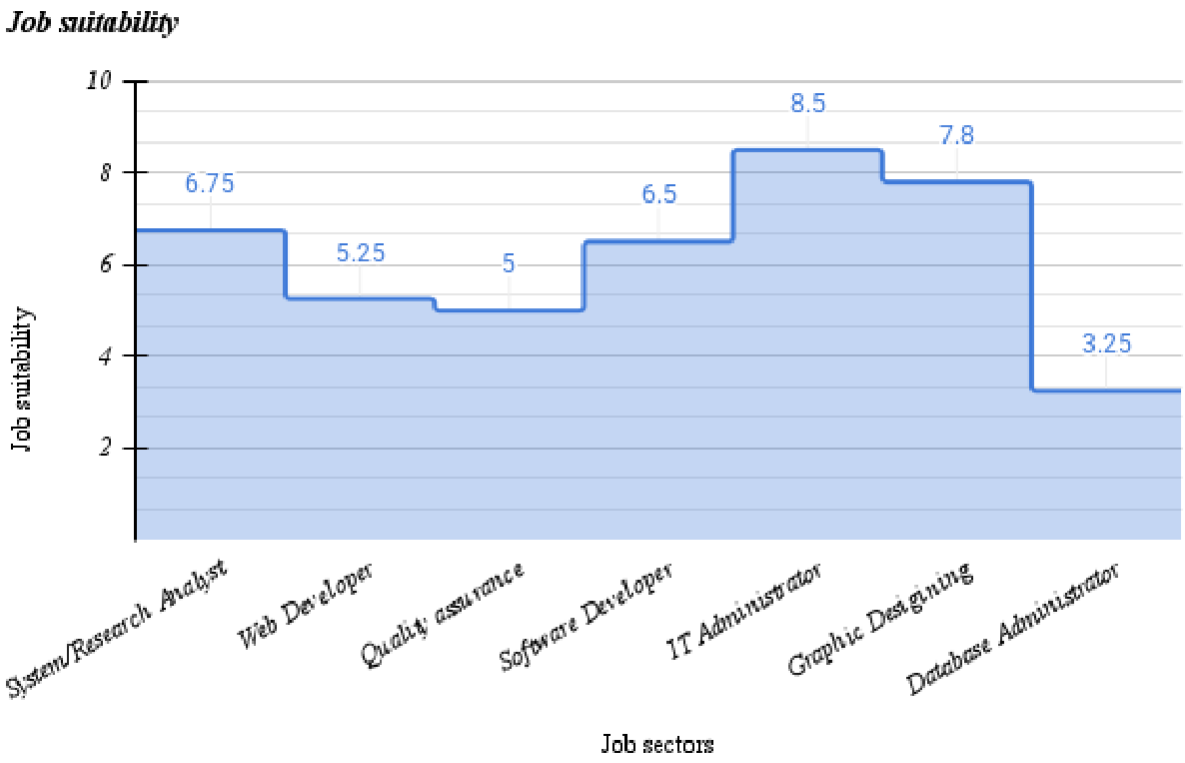
Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

You approached the PI round with professionalism and a clear sense of preparation. Your confidence and maturity came through well, which created a strong first impression. Your responses were generally clear and well-structured. To further enhance your performance, focus on backing your answers with specific, relevant examples from your experiences—whether academic, extracurricular, or personal. This will help you demonstrate depth of thought and a stronger connection between your experiences and the role you're aspiring for. In situations where a question feels vague or unclear, feel free to ask for clarification. Doing so not only reflects presence of mind but also ensures your response aligns with the interviewer's expectations. Continue building on the good foundation you've established. With more practice and reflection, you'll be well-prepared to handle even more challenging interviews. Keep up the effort, and best wishes for your next steps!

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**MEDIUM**	You have a basic foundation in web development but need to build fluency in frameworks and tools Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech

		concepts clearly. With consistent effort, your chances of landing this role will improve.
Quality assurance	**MEDIUM**	Your skills are well-aligned with QA roles You exhibit a structured and detail-oriented mindset, and likely have some hands-on exposure to QA processes. To build on this strength, explore automation tools and keep refining your test documentation. With this proactive approach, you are in a good position to succeed in QA.
Software Developer	**GOOD**	You have a solid base for a successful Software Developer role. Your problem-solving, logical reasoning, and adaptability to technologies are commendable. Keep building projects, exploring advanced concepts like APIs or microservices, and refining your collaboration skills. With consistent effort, you're well on your way to excellence in this field..
IT Administrator	**GOOD**	You're developing a good foundation for an IT Admin role. Focus on hands-on practice—set up local networks, explore admin panels, and simulate problem-solving scenarios. Learn how to manage servers, handle security protocols, and adapt to new IT tools. A proactive learning approach will significantly boost your chances..
Graphic Designing	**GOOD**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Moderate	1. Structure your arguments in a logical flow: point, reason, example. 2. Practice initiating and summarizing GDs. 3. Use simple, impactful language to express complex ideas. 4. Learn to respectfully disagree and build on others' points. 5. Work on controlling voice modulation and pitch for better engagement.
Personal Interview	Moderate	1. Prepare an impressive "tell me about yourself" 2. Maintain positive body language 3. Put efforts to talk more about your strengths and accomplishments 4. Answer every question confidently and with a relevant example 5. Work on your CV 6. Practice relaxation techniques such as deep breathing or visualization to calm your nerves.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

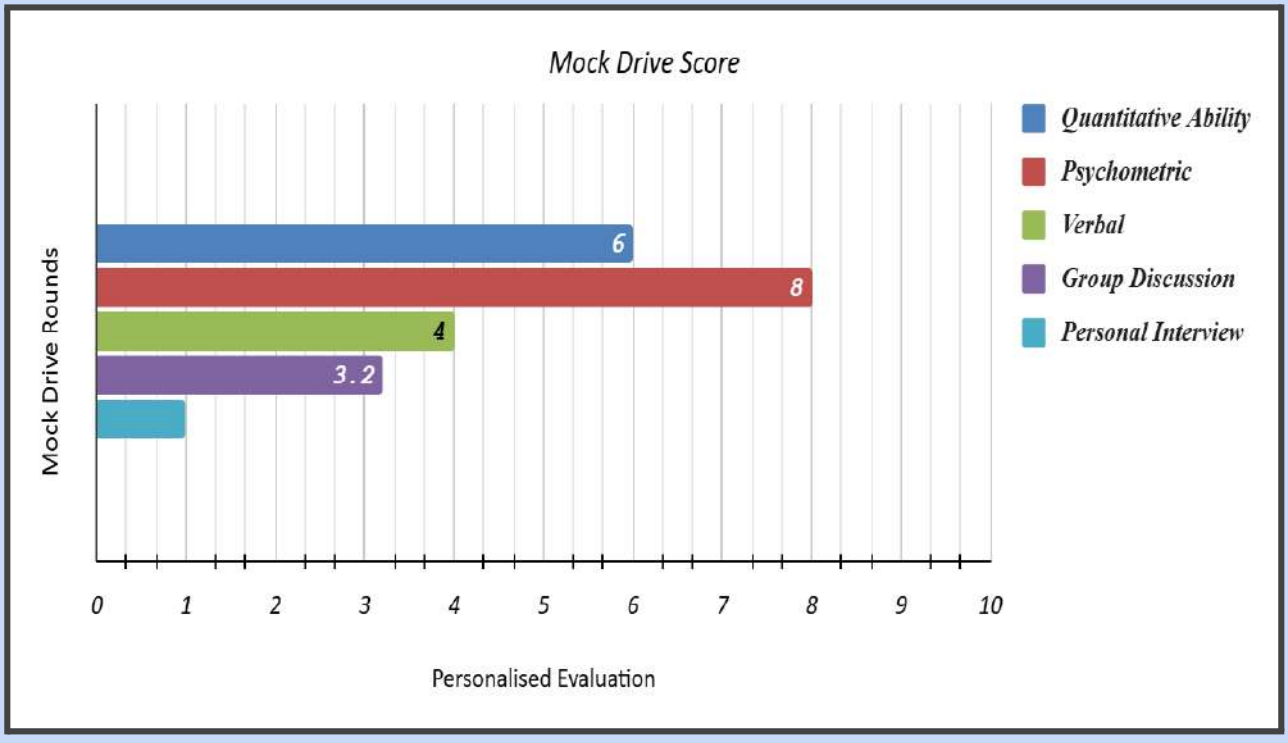
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**MEDIUM**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Moderate	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

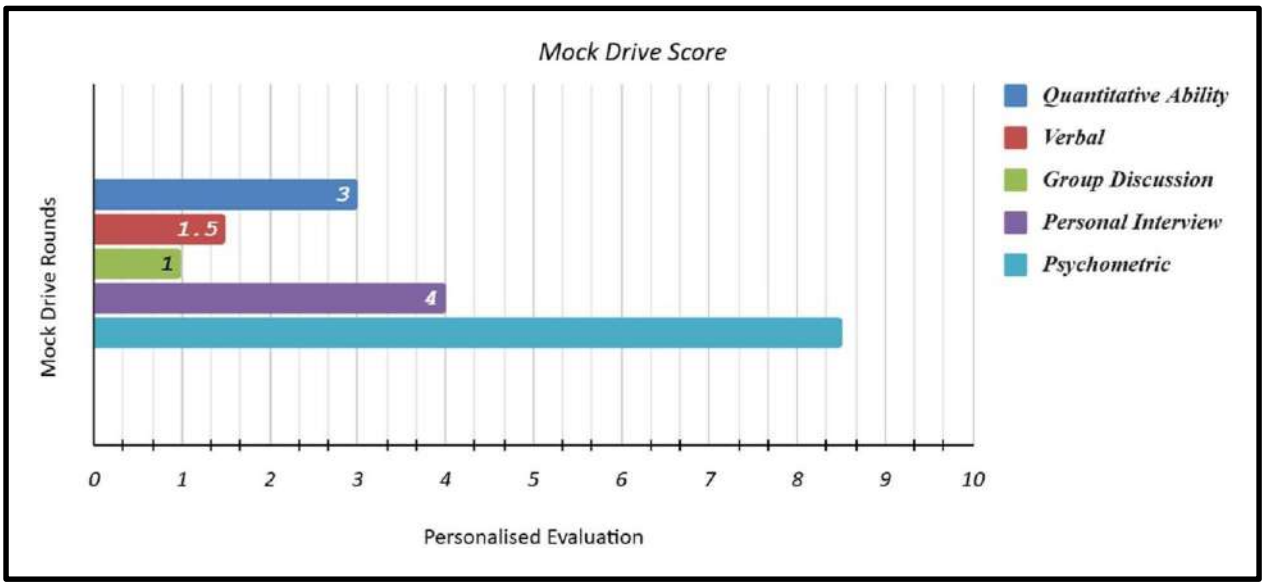
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

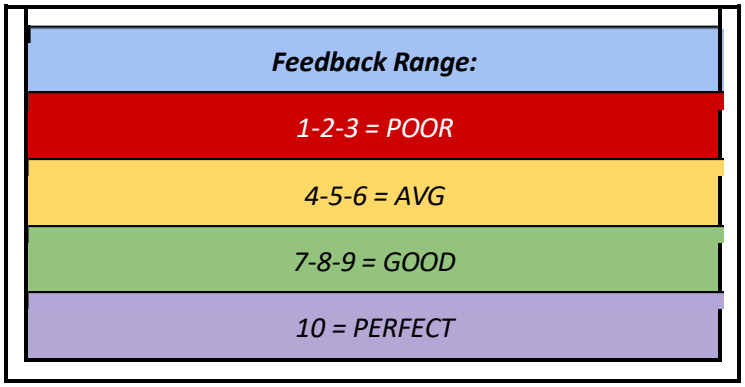
Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:



This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an

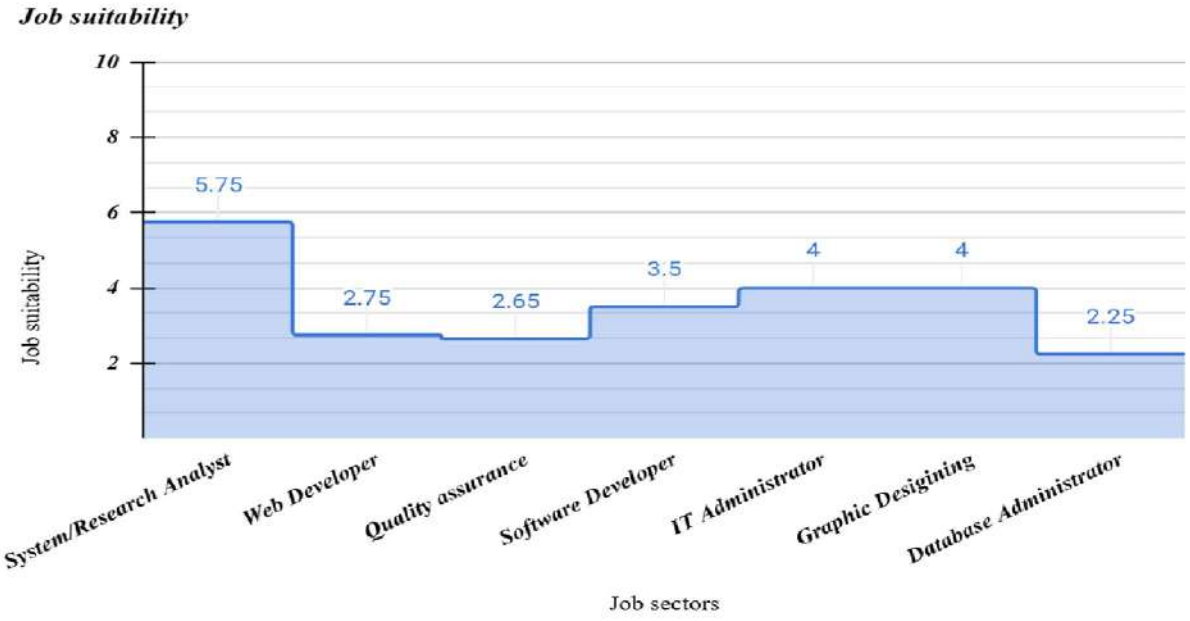
opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**MEDIUM**	You're developing a good foundation for an IT Admin role. Focus on hands-on practice—set up local networks, explore admin panels, and simulate problem-solving scenarios. Learn how to manage servers, handle security protocols, and adapt to new IT tools. A proactive learning approach will significantly boost your chances.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables, squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Psychometric (20)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %
	Quantitative (20)						
	Verbal (20)	Pseudo coding (30)			B (Dream Company)	6- 10 lakh	70- 79 %
	GD (20)	Programming (30)			C (Ideal Company)	3-6 Lakh	60 - 69 %
	PI (20)	Technical Interview (20)			D (Average Company)	Below 3 lakh	50 - 59 %

Enrollment Number:	2324004008
Course:	*SIT*
Date:	*6th March 2024*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

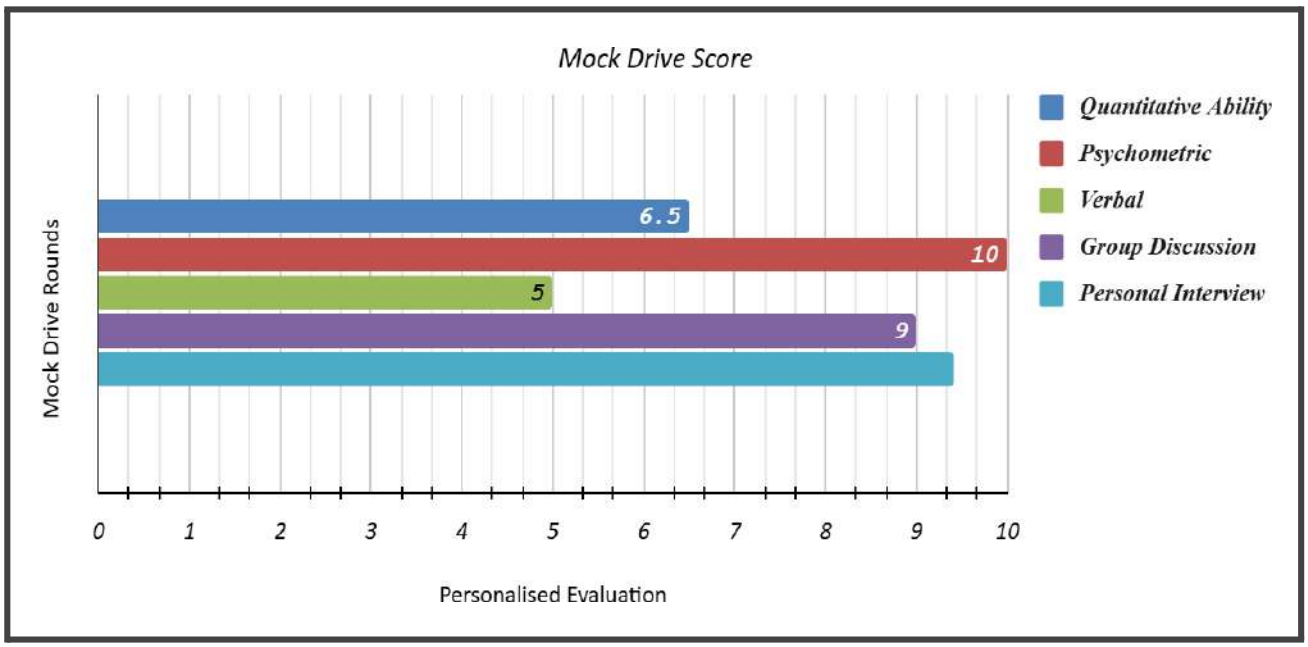
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

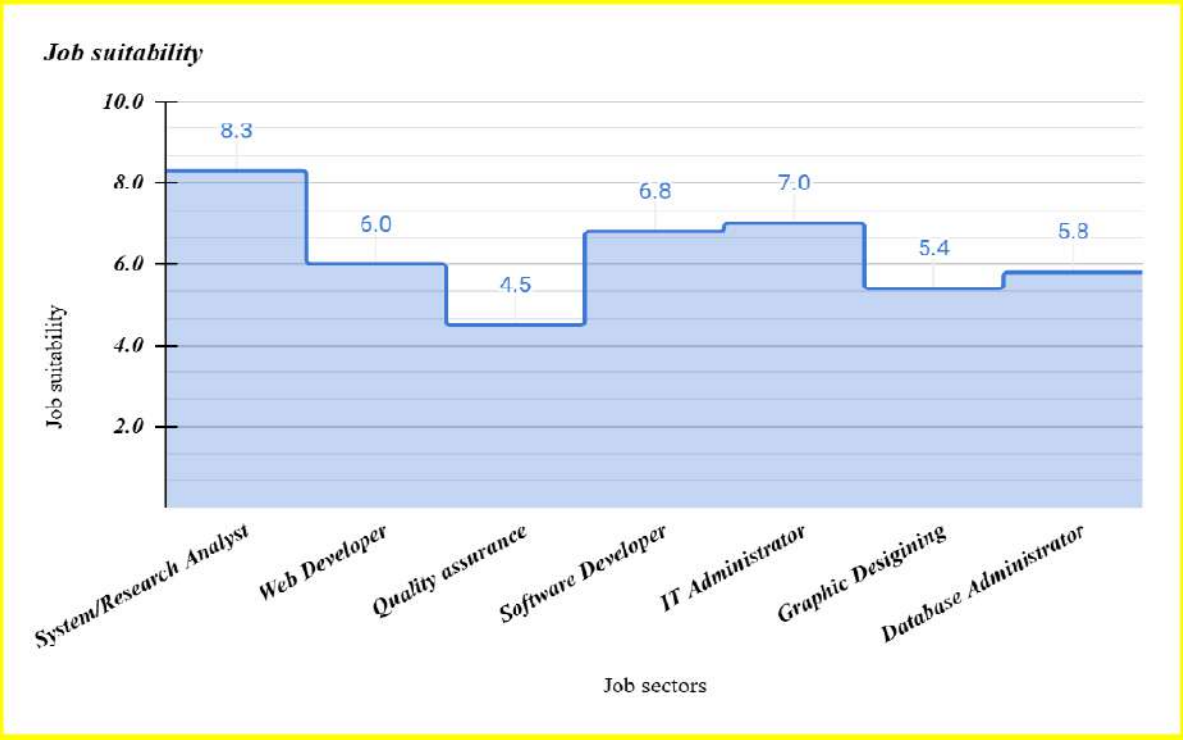
Your contributions during the group discussion were notable. You demonstrated good communication skills, expressing your thoughts clearly and effectively. Your ability to actively listen to others and engage in the conversation was evident, contributing positively to the overall dynamics of the group. While you did well in expressing your own ideas, consider actively seeking out and acknowledging diverse perspectives within the group. This can enrich the discussion and demonstrate a well-rounded understanding of the topic. Challenge yourself to delve deeper into counterarguments. While you presented your points effectively, exploring opposing viewpoints and addressing potential counterarguments can add depth to your contributions. Remember, these are just areas for potential growth, and your current performance is already commendable. Keep up the good work, and we look forward to seeing how you continue to excel in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

You approached the PI round with professionalism and a clear sense of preparation. Your confidence and maturity came through well, which created a strong first impression. Your responses were generally clear and well-structured. To further enhance your performance, focus on backing your answers with specific, relevant examples from your experiences—whether academic, extracurricular, or personal. This will help you demonstrate depth of thought and a stronger connection between your experiences and the role you're aspiring for. In situations where a question feels vague or unclear, feel free to ask for clarification. Doing so not only reflects presence of mind but also ensures your response aligns with the interviewer's expectations. Continue building on the good foundation you've established. With more practice and reflection, you'll be well-prepared to handle even more challenging interviews. Keep up the effort, and best wishes for your next steps!

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**MEDIUM**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**GOOD**	You demonstrate strong potential as a Web Developer. Your knowledge of coding languages, frameworks, and team collaboration is evident. To stand out further, keep experimenting with new tech stacks and contribute to open-source projects. Keep up the momentum—you're on track for great opportunities in this field.
IT Administrator	**GOOD**	You're well-suited for IT Administration. Your technical problem-solving skills and understanding of networks, systems, and protocols are commendable. Keep upgrading your knowledge on current trends in cloud services and cybersecurity. Practical exposure and staying up to date with IT innovations will ensure long-term success.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Moderate	1. Structure your arguments in a logical flow: point, reason, example. 2. Practice initiating and summarizing GDs. 3. Use simple, impactful language to express complex ideas. 4. Learn to respectfully disagree and build on others' points. 5. Work on controlling voice modulation and pitch for better engagement.
Personal Interview	Moderate	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student exhibits commendable strength in Group Discussion (GD) and Personal Interview (PI), standing out as a confident and articulate individual. While some improvement areas remain in Logical, Verbal, and Quantitative Ability, these can be effectively addressed through structured training and consistent effort. With the right blend of mock tests, focused mentoring, and skill-specific guidance, the student can further sharpen their analytical capabilities and evolve into a well-rounded performer. The progress so far is encouraging and sets a solid foundation for continued success.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

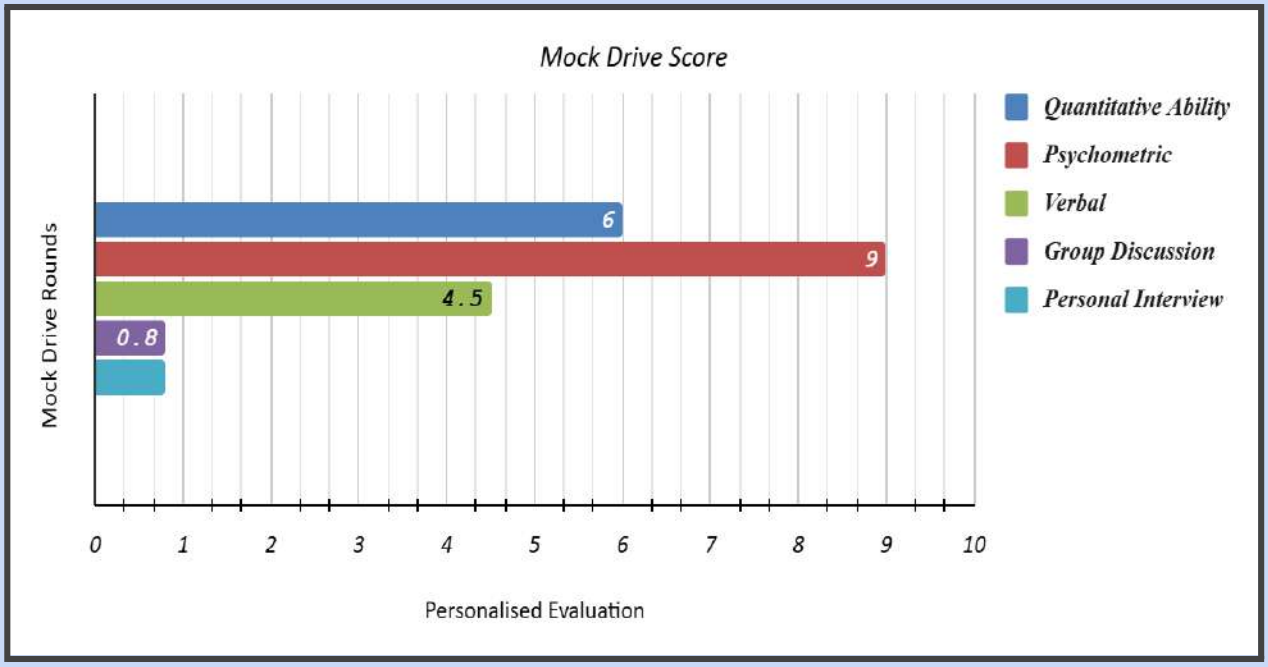
Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**MEDIUM**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Enrollment Number:	2324004039
Course:	*SIT*
Date:	*6th March 2024*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

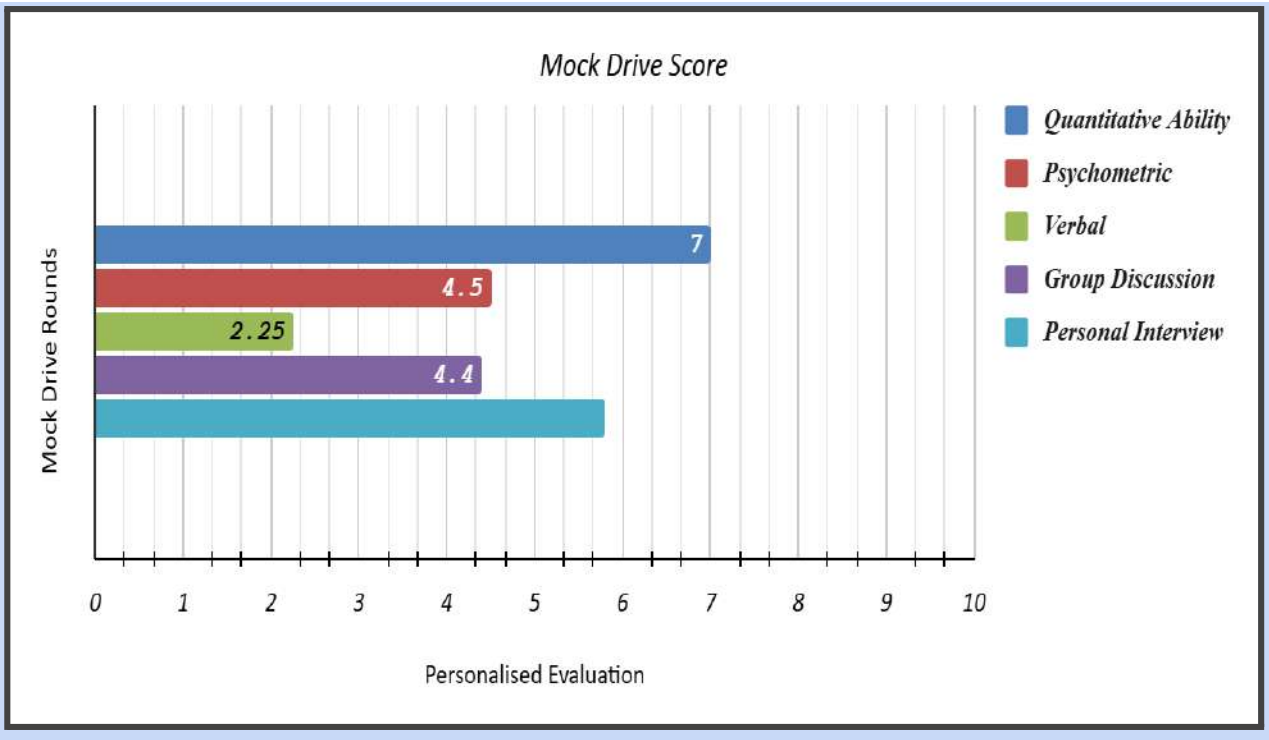
• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable

Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

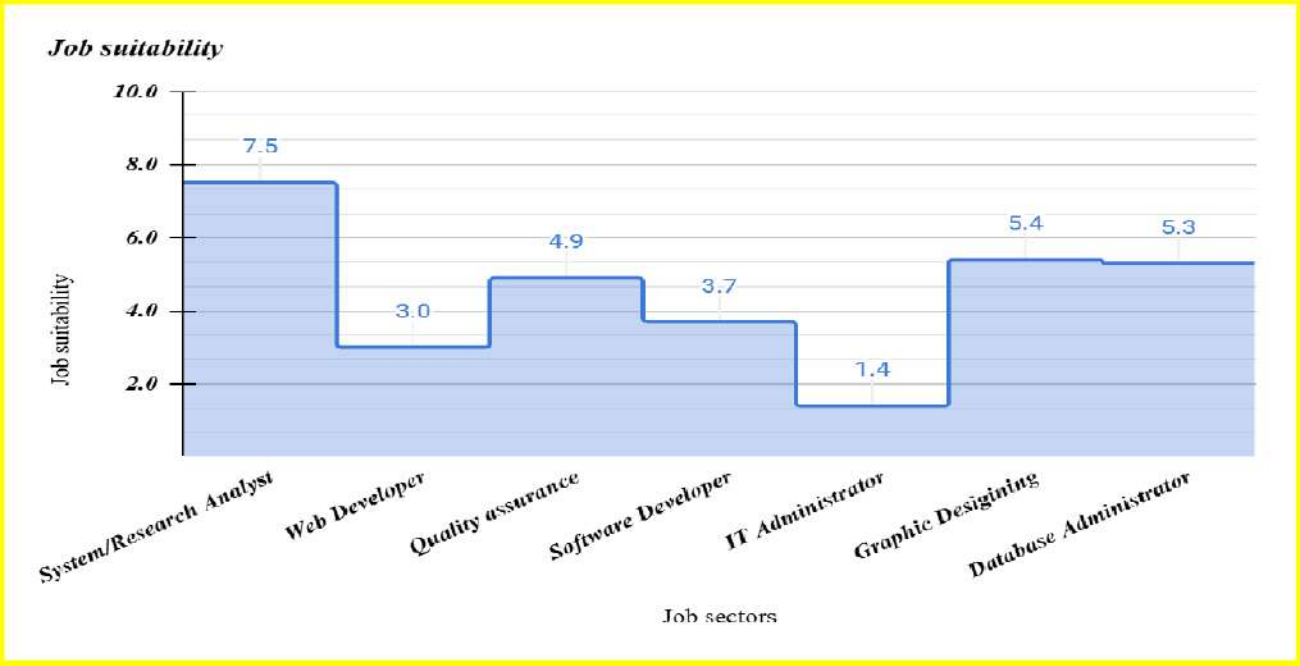
Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**MEDIUM**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Moderate	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart

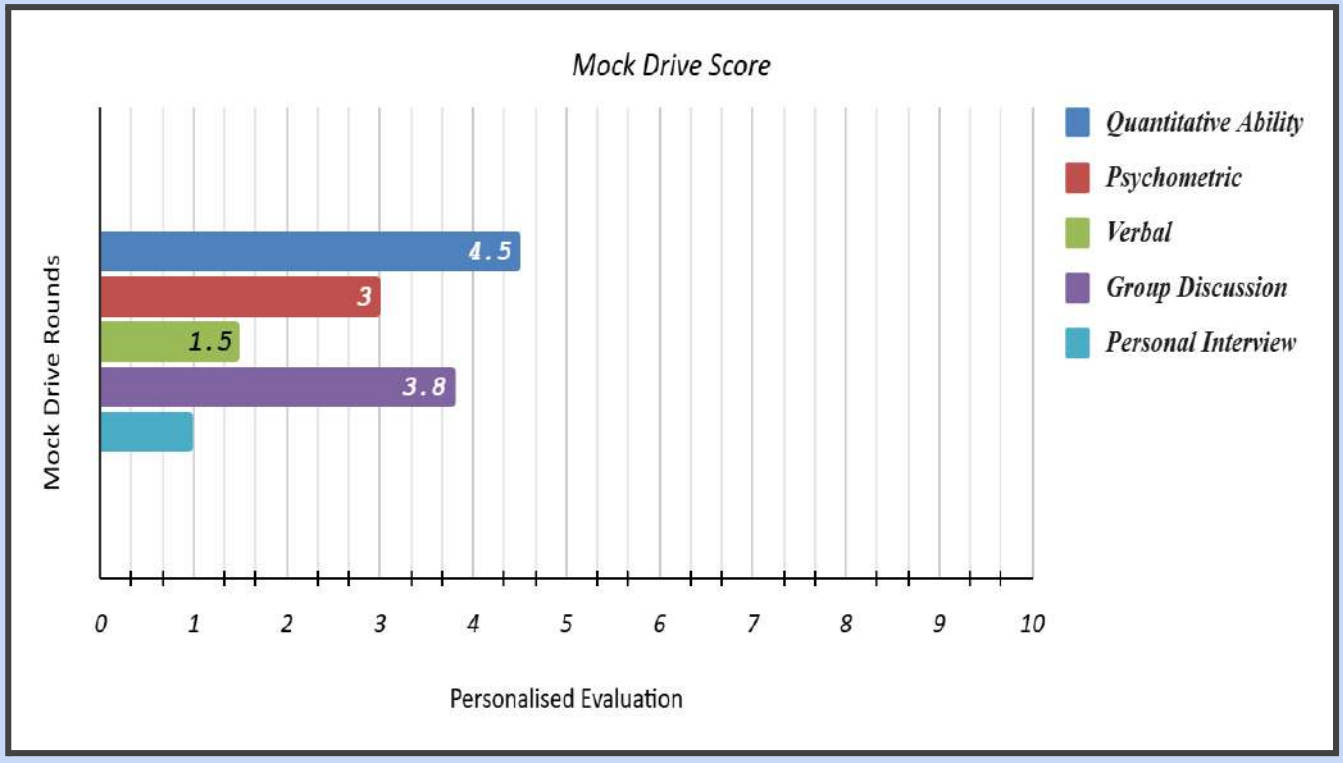
Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

While it's clear that you've put in some effort, your current psychometric performance suggests room for growth. Psychometric skills reflect your cognitive abilities, personality traits, and problem-solving style. To strengthen this area, consider engaging with exercises that challenge your logical reasoning, attention to detail, and emotional intelligence. Practice puzzles, pattern recognition problems, and personality profiling exercises. Reflect on your strengths and areas for development, especially in terms of self-awareness and adaptability. These skills aren't just test-based—they mirror your workplace behavior. Regular practice and mindful observation of your own reactions and decisions will help improve both your test performance and your real-world effectiveness. Keep going—you've got this!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

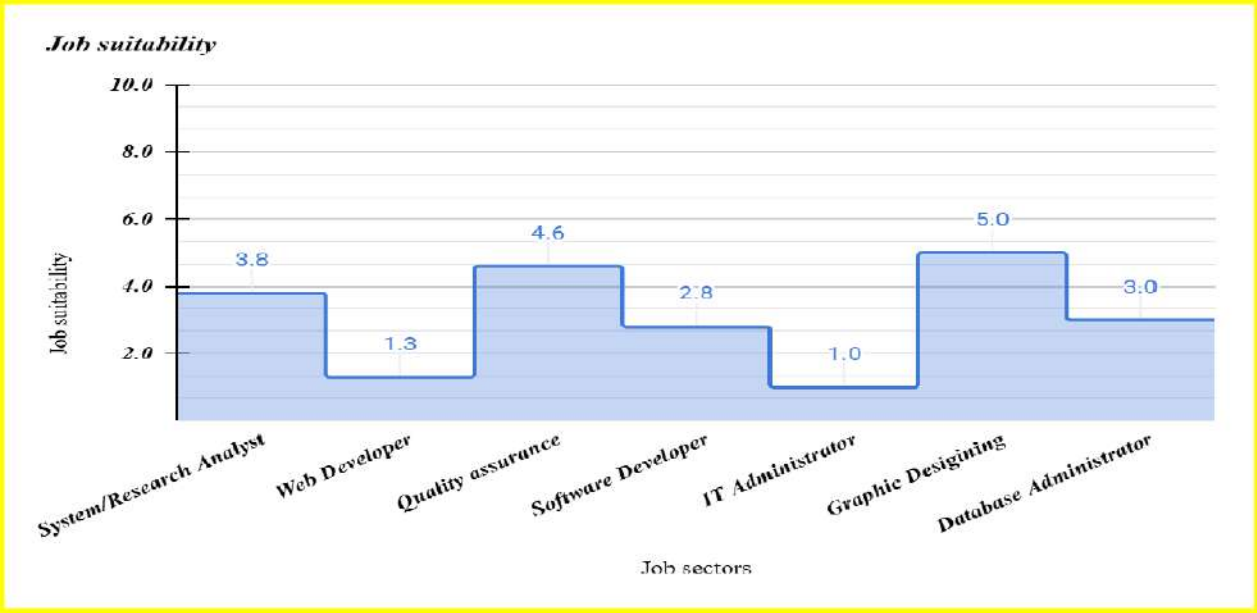
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.

Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

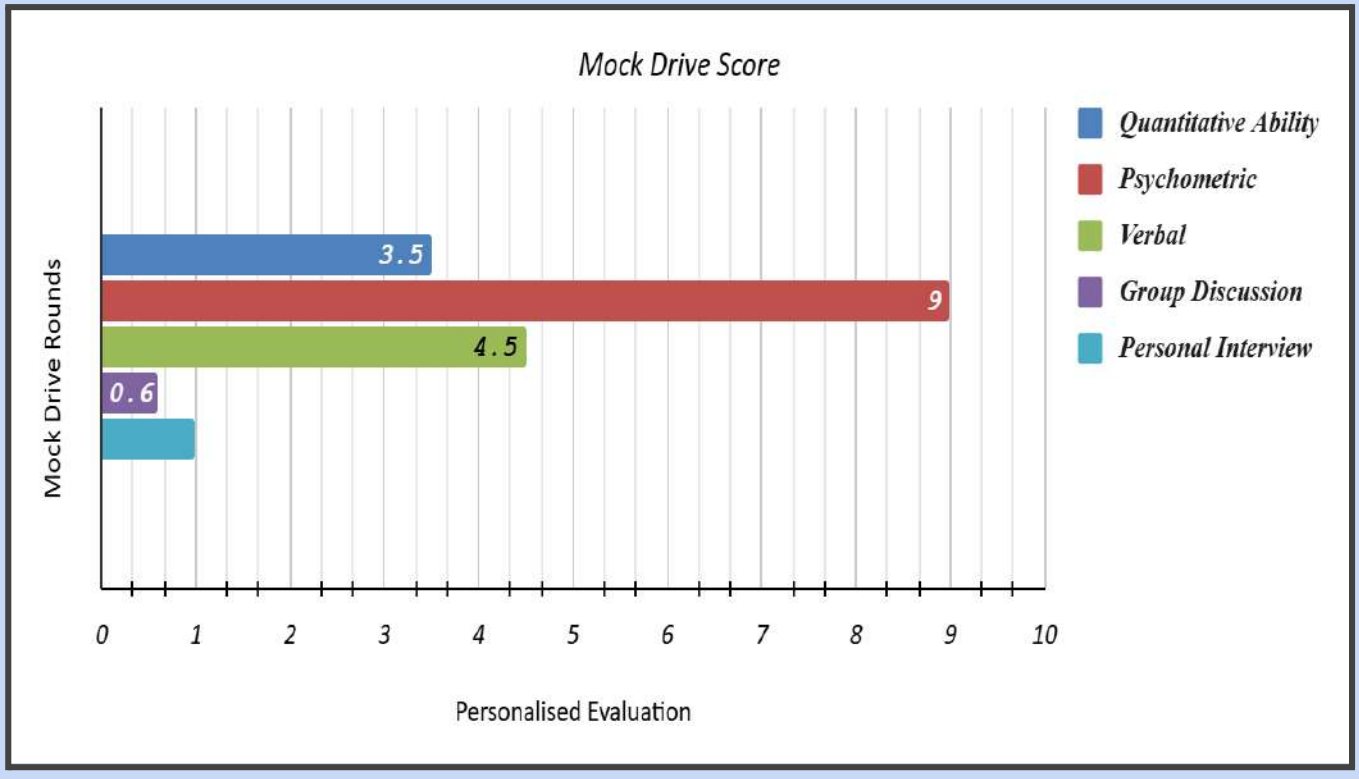
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

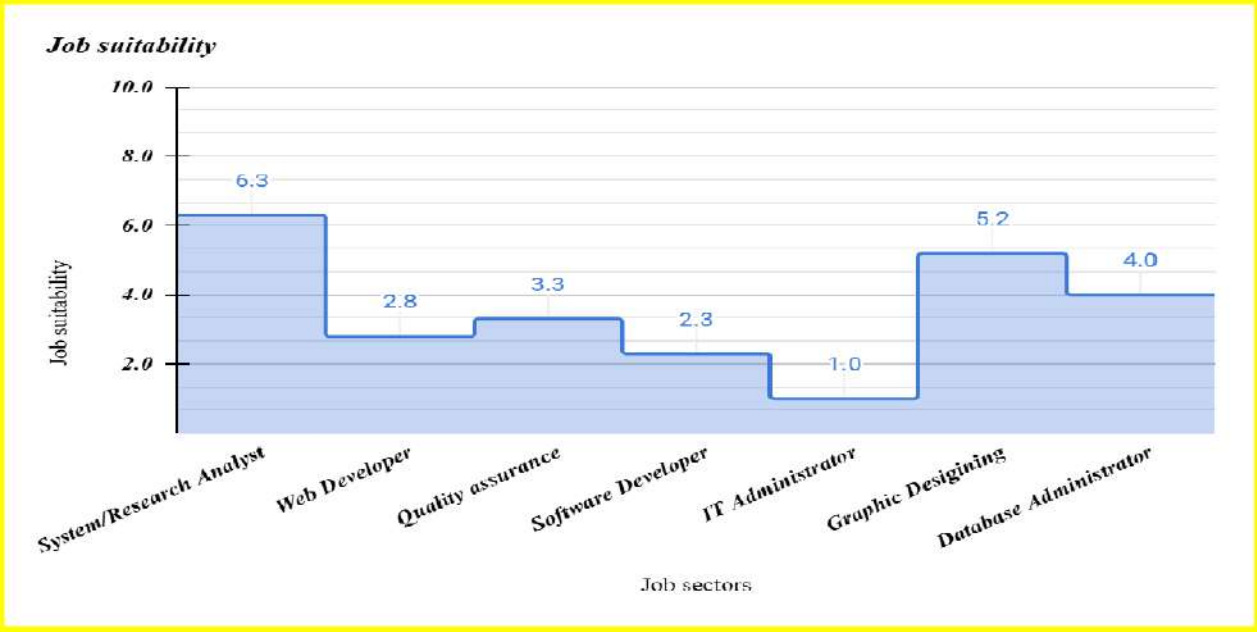
Your performace with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.

Quality assurance	**LOW**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	Your current portfolio or skill set needs more work to align with graphic design expectations. Begin with mastering tools like Adobe Photoshop, Illustrator, and Canva. Understand design principles like balance, contrast, and typography. Try replicating existing designs to learn techniques, then move on to creating original work.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Psychometric (20)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %
	Quantitative (20)						
	Verbal (20)	Pseudo coding (30)			B (Dream Company)	6- 10 lakh	70- 79 %
	GD (20)	Programming (30)			C (Ideal Company)	3-6 Lakh	60 - 69 %
	PI (20)	Technical Interview (20)			D (Average Company)	Below 3 lakh	50 - 59 %

Mock Drive Analysis

Name:	*DHRUVRAJSINH CHAUHAN*
Enrollment Number:	2324004030
Course:	*SIT*
Date:	*6th March 2024*

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants

Training and Placement Cell

over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• **Knowledge Process Outsourcing (KPO) Companies**

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

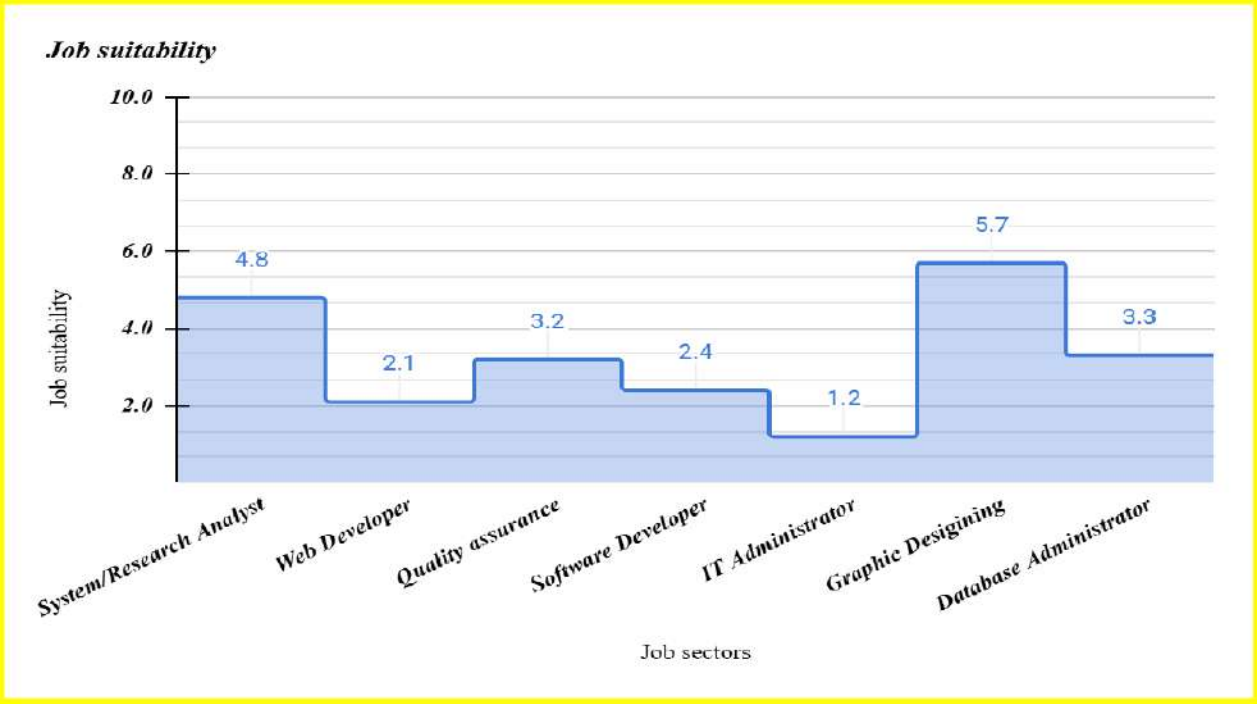
Your performace with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	Your current portfolio or skill set needs more work to align with graphic design expectations. Begin with mastering tools like Adobe Photoshop, Illustrator, and Canva. Understand design principles like balance, contrast, and typography. Try replicating existing designs to learn techniques, then move on to creating original work.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

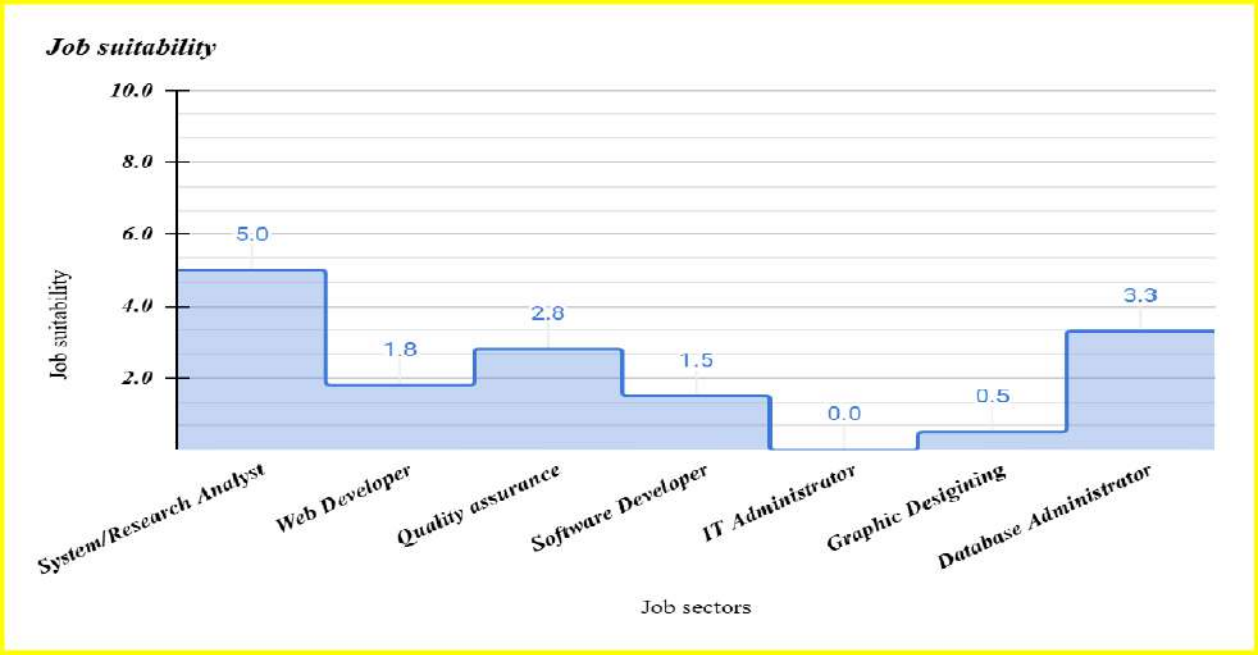
We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

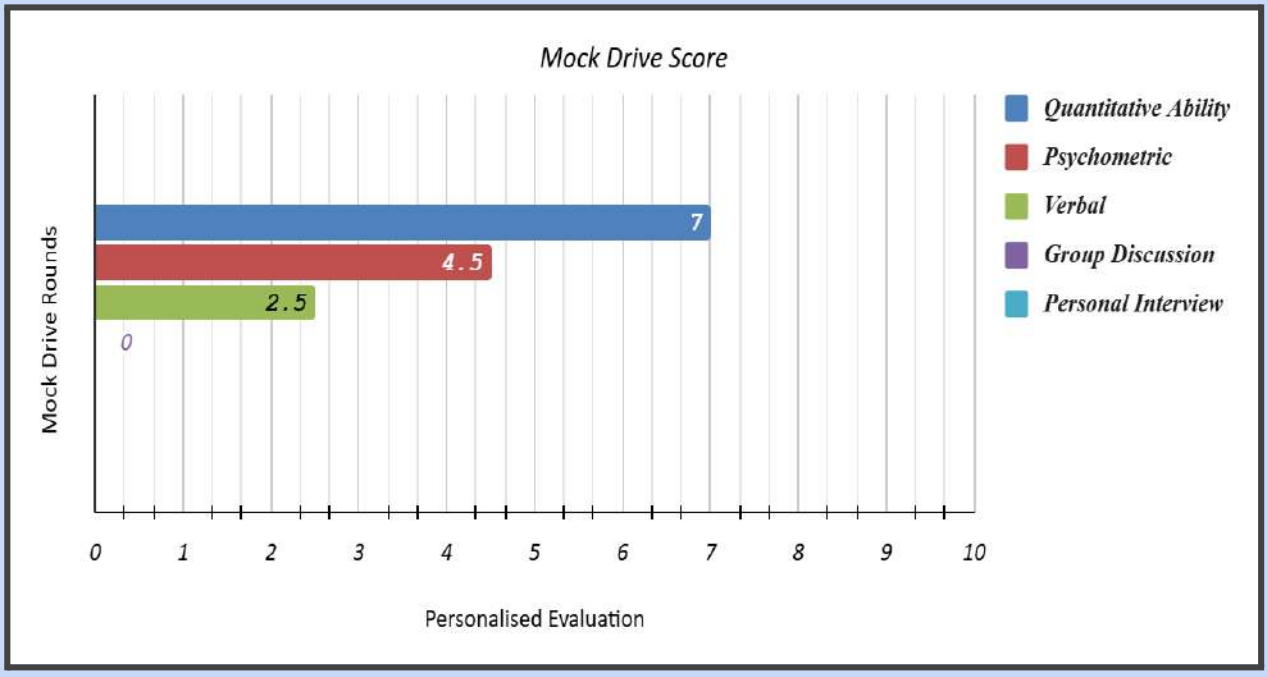
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is low. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

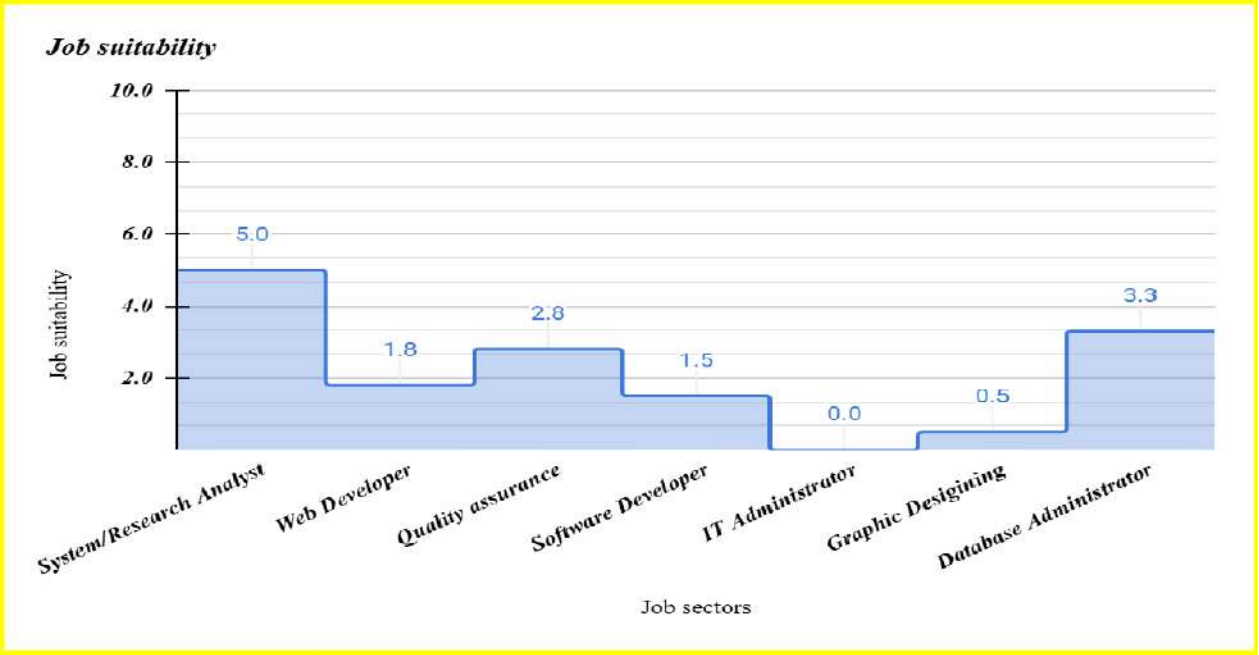
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

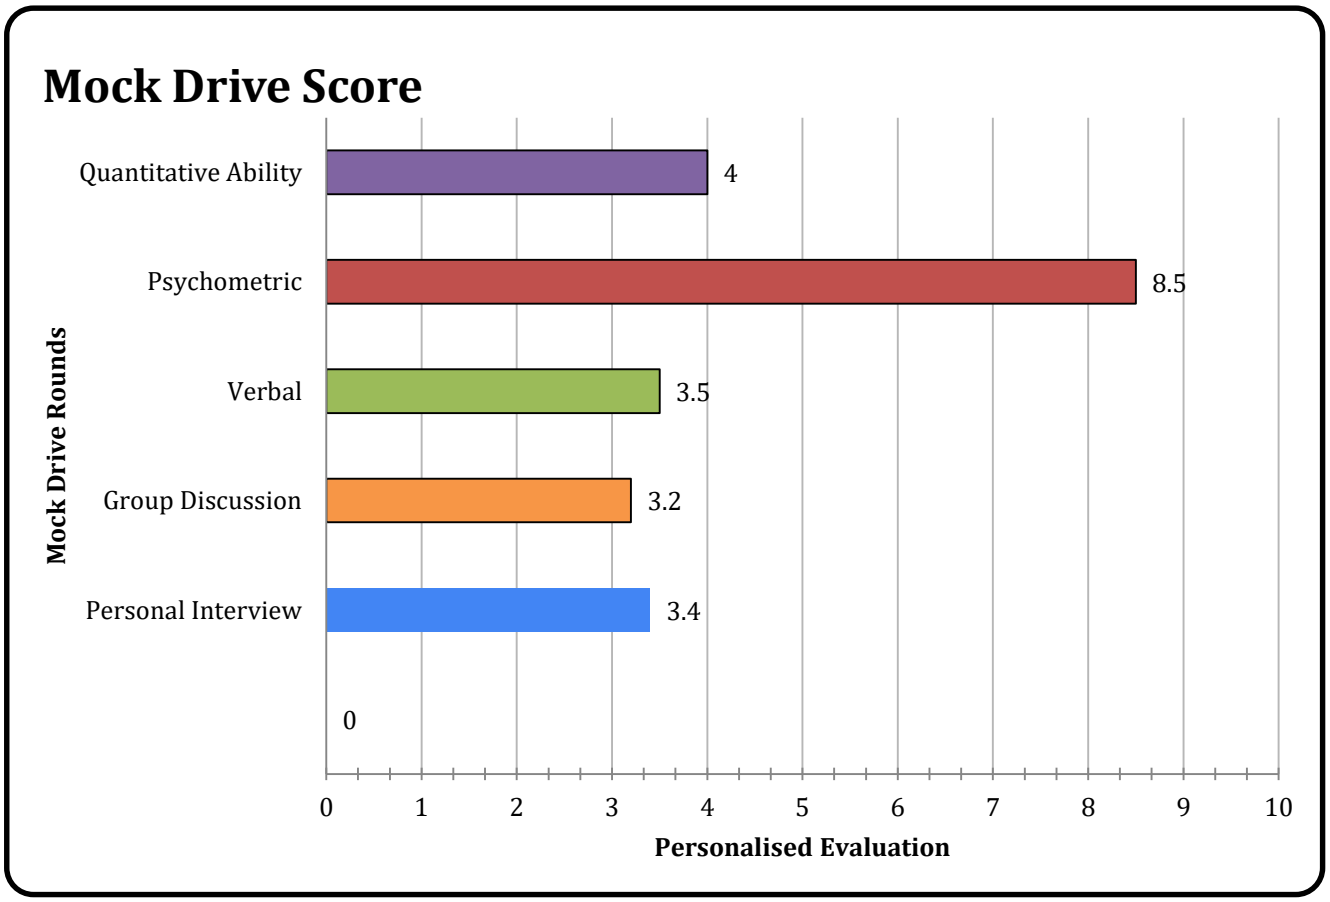
3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

PSYCHOMETRIC ABILITY

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7		8	9	10

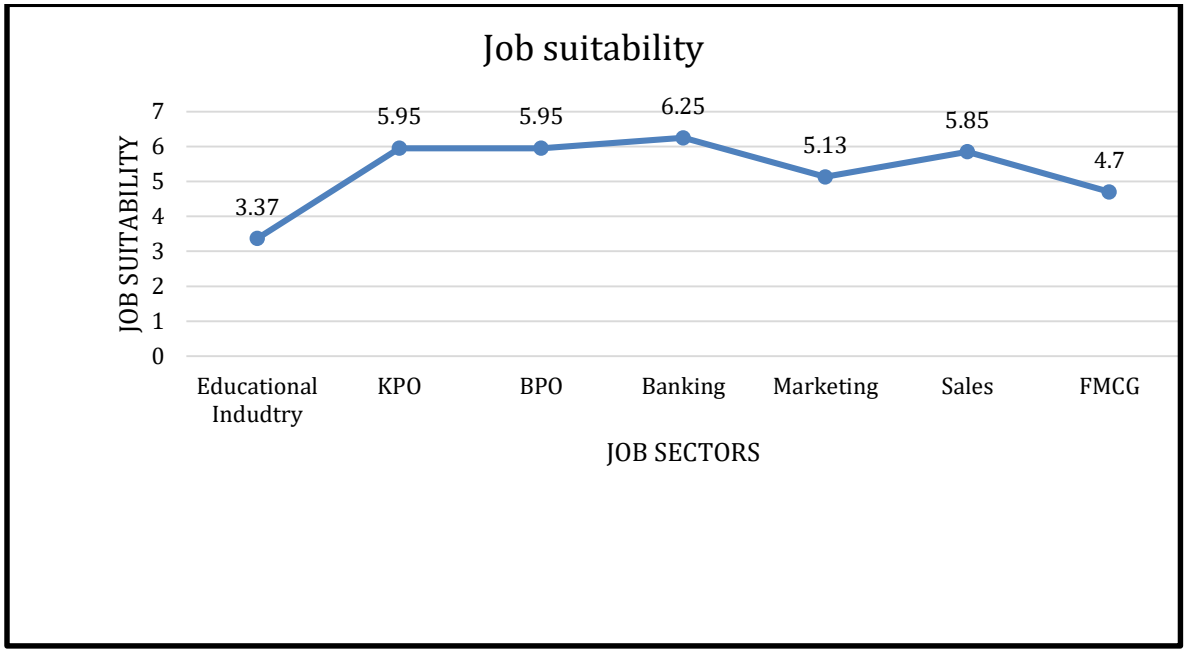
Your performace with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Educational Industry	**MEDIUM**	You're on the right path toward becoming a successful educationalist. To further enhance your prospects, focus on refining your lesson planning, student engagement, and assessment strategies. Participate in curriculum development projects or educational workshops to broaden your practical experience. Strengthen your communication and presentation skills—practice delivering complex concepts in a clear, relatable, and structured manner. Continuously update yourself with new teaching technologies and pedagogical methods to stay ahead in the evolving education landscape.
KPO	**MEDIUM**	You have a strong foundation to pursue a role in the KPO sector, but there's room for growth. Strengthen your research, analysis, and documentation skills. Focus on delivering detailed, accurate reports and improving data interpretation. Regular practice with case studies and considering a certification in data analysis or knowledge management can help boost your profile.
BPO	**MEDIUM**	You have a basic foundation for a career in the BPO sector but need to build fluency in essential communication and customer handling skills. Expand your knowledge of customer relationship management (CRM) tools, process workflows, and professional email etiquette. Engage in real-time roleplays or mock call scenarios to strengthen your practical skills, and work on refining your ability to explain solutions clearly and calmly. With consistent effort and practice, your chances of succeeding in the BPO industry will greatly improve.

Banking	**MEDIUM**	You're making progress—your understanding of banking processes and financial analysis is growing. Focus on deepening your knowledge of key banking concepts like risk management, financial modeling, and compliance regulations. Enhance your ability to analyze and interpret financial data, and familiarize yourself with banking software and tools. Keep refining your skills through real-world projects and internships to further develop your expertise in the sector.
Marketing	**MEDIUM**	You're building a solid foundation for a marketing role. Focus on hands-on experience—create and manage marketing campaigns, explore analytics tools, and simulate real-world scenarios. Learn how to manage social media accounts, develop content strategies, and adapt to new marketing technologies. A proactive learning approach will significantly enhance your expertise and boost your chances in the marketing sector.
Sales	**MEDIUM**	You're on the right path. You understand the fundamentals of sales but need more exposure to advanced topics like negotiation techniques, lead generation strategies, and customer retention. Start solving real-world sales scenarios and working with larger client portfolios. Focus on CRM strategies and building long-term customer relationships to strengthen your skills in the sales sector.
FMCG	**MEDIUM**	You understand the fundamentals of FMCG but need more exposure to advanced topics like market penetration strategies, brand management, and consumer loyalty. Start analyzing real-world case studies and working with larger product portfolios. Focus on supply chain optimization, retail strategies, and building long-term relationships with distributors and retailers to strengthen your skills in the FMCG sector.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1.Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. 2. Shortcut and short tricks to be taken care of. 3. Practice mental calculations. 4. Accuracy plays a key role. 5. Work on conceptual details.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student shows promising abilities in Group Discussion (GD) and Personal Interview (PI), suggesting strong communication and interpersonal skills. Performance in Logical, Verbal, and Quantitative Ability is currently average and has the potential to improve with strategic effort. Incorporating structured mock tests, guided mentoring sessions, and practice-focused class activities will help bridge the gap. With dedication and continuous learning, the student is well-positioned to elevate performance across all areas.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Quantitative (30)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra,

geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC ABILITY

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

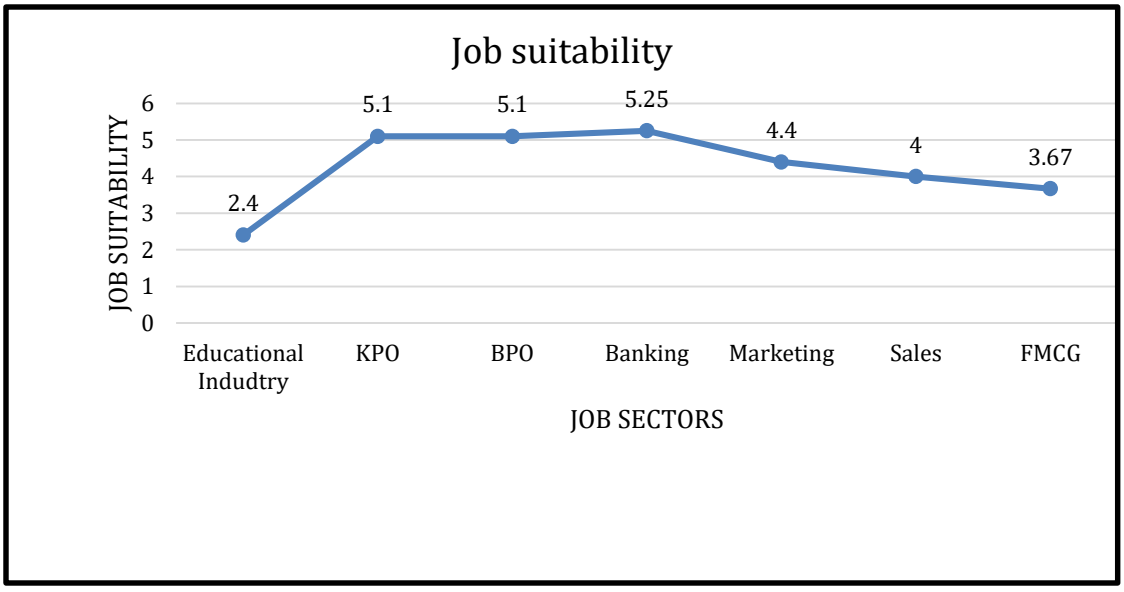
Your performace with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Educational Industry	**LOW**	Your current profile shows limited alignment with the evolving expectations in the education sector. Focus on strengthening your curriculum design, instructional skills, and learner engagement techniques. Work on becoming proficient in digital tools like Learning Management Systems (LMS), educational technology platforms, and data-driven teaching methods. Improve your communication, mentoring, and presentation abilities to effectively connect with diverse learners. Regular practice through workshops, lesson planning exercises, and participation in professional development programs can also enhance your educational impact.
KPO	**MEDIUM**	You have a strong foundation to pursue a role in the KPO sector, but there's room for growth. Strengthen your research, analysis, and documentation skills. Focus on delivering detailed, accurate reports and improving data interpretation. Regular practice with case studies and considering a certification in data analysis or knowledge management can help boost your profile.
BPO	**MEDIUM**	You have a basic foundation for a career in the BPO sector but need to build fluency in essential communication and customer handling skills. Expand your knowledge of customer relationship management (CRM) tools, process workflows, and professional email etiquette. Engage in real-time roleplays or mock call scenarios to strengthen your practical skills, and work on refining your ability to explain solutions clearly and calmly. With consistent effort and practice, your chances of succeeding in the BPO industry will greatly improve.

Banking	**MEDIUM**	You're making progress—your understanding of banking processes and financial analysis is growing. Focus on deepening your knowledge of key banking concepts like risk management, financial modeling, and compliance regulations. Enhance your ability to analyze and interpret financial data, and familiarize yourself with banking software and tools. Keep refining your skills through real-world projects and internships to further develop your expertise in the sector.
Marketing	**MEDIUM**	You're building a solid foundation for a marketing role. Focus on hands-on experience—create and manage marketing campaigns, explore analytics tools, and simulate real-world scenarios. Learn how to manage social media accounts, develop content strategies, and adapt to new marketing technologies. A proactive learning approach will significantly enhance your expertise and boost your chances in the marketing sector.
Sales	**MEDIUM**	You're on the right path. You understand the fundamentals of sales but need more exposure to advanced topics like negotiation techniques, lead generation strategies, and customer retention. Start solving real-world sales scenarios and working with larger client portfolios. Focus on CRM strategies and building long-term customer relationships to strengthen your skills in the sales sector.
FMCG	**MEDIUM**	Your current skills may not fully align with the FMCG sector. Start with the basics—understand product lifecycle, market trends, and consumer behavior in FMCG. Learn about distribution channels, retail strategies, and how to manage supply chains. Practice engaging with consumers, analyzing market data, and creating effective promotional campaigns. Familiarity with FMCG marketing strategies and tools will be beneficial in advancing your skills in this field.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

SWARRNIM STARTUP & INNOVATION UNIVERSITY

Mock Drive Analysis

Name:	CHAUDHARY VAIBHAV
Enrollment Number:	2301402005
Course:	*BBA*
Date:	*4th March 2024*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

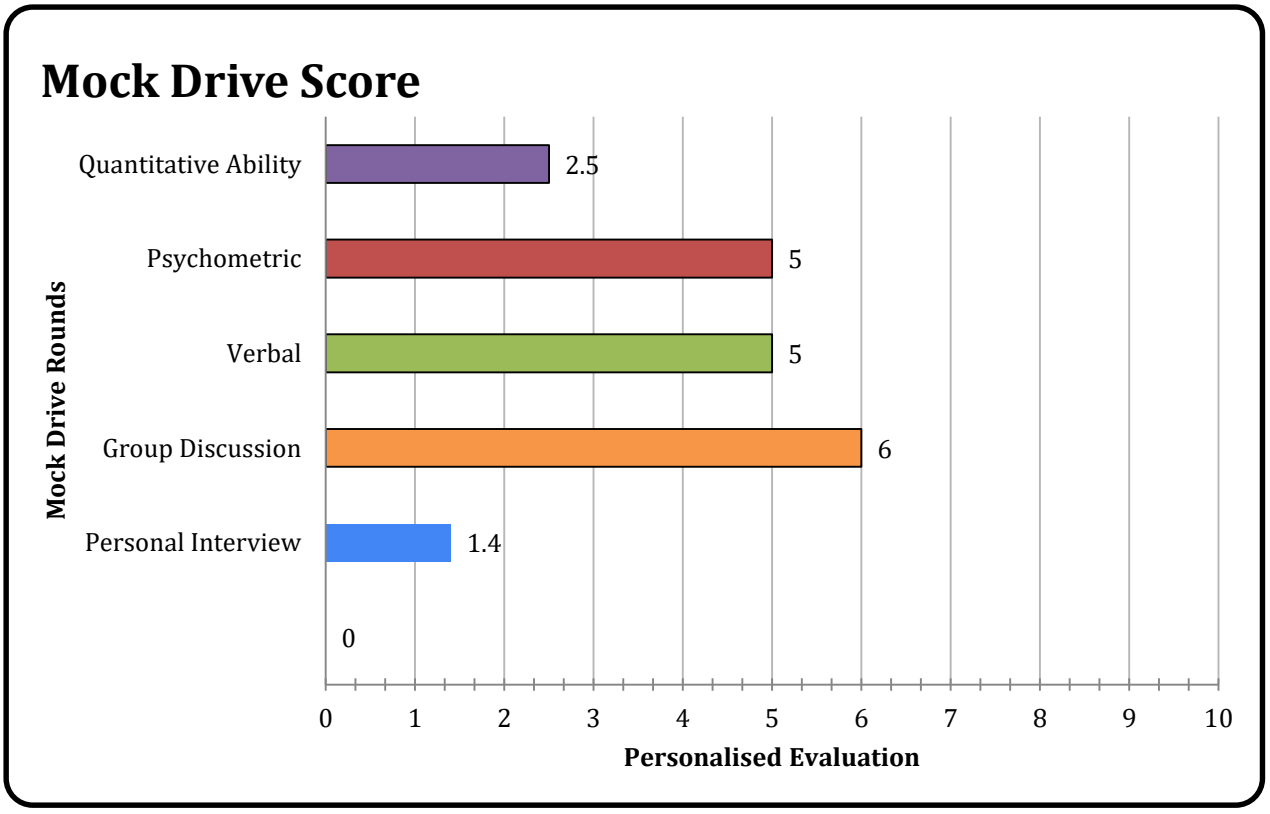
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC ABILITY

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

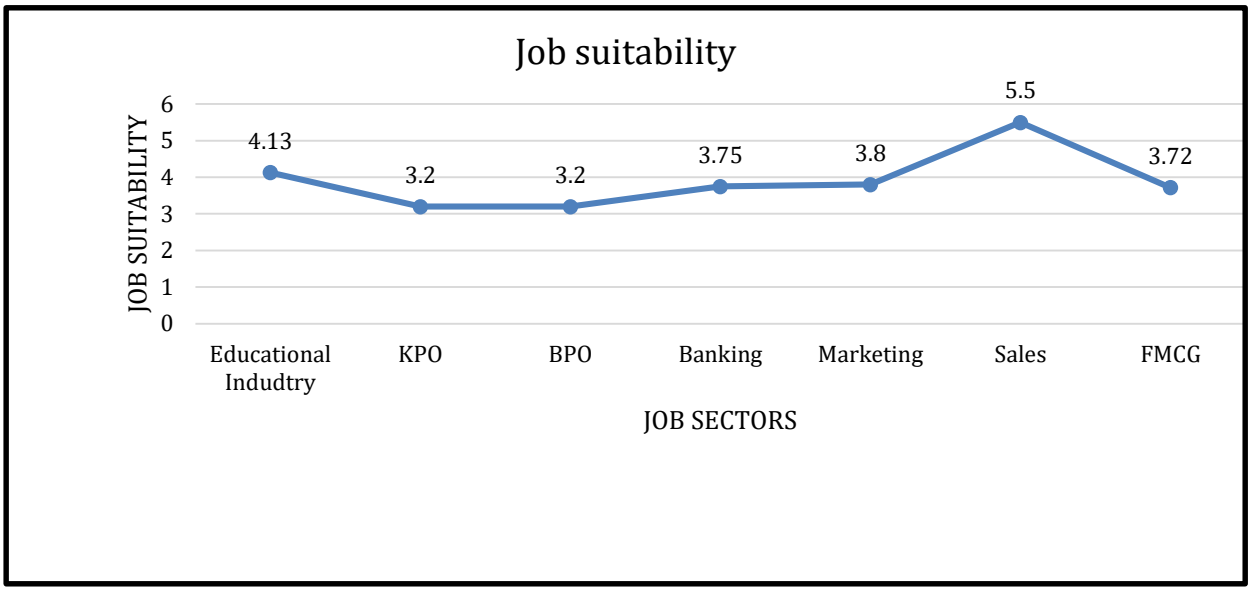
Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions. Keep up the good work, and we look forward to seeing how you continue to excel in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Educational Industry	**MEDIUM**	You're on the right path toward becoming a successful educationalist. To further enhance your prospects, focus on refining your lesson planning, student engagement, and assessment strategies. Participate in curriculum development projects or educational workshops to broaden your practical experience. Strengthen your communication and presentation skills—practice delivering complex concepts in a clear, relatable, and structured manner. Continuously update yourself with new teaching technologies and pedagogical methods to stay ahead in the evolving education landscape.
KPO	**LOW**	Your profile currently lacks alignment with KPO requirements. Start by strengthening your domain knowledge and research skills, and develop a clear understanding of data analysis, report writing, and client communication standards. Pay close attention to detail in all assignments and practice presenting information in a structured, professional manner. Work on documenting research findings accurately and become familiar with tools like Excel, Power BI, or other industry-specific platforms used for knowledge management and analysis.
BPO	**LOW**	Your current skill set does not strongly match the expectations for a role in the BPO sector. Focus on strengthening your communication skills, both verbal and written, along with developing strong customer service and problem-solving abilities. Try to gain familiarity with CRM tools and basic computer applications commonly used in the industry. Practice active listening, handling objections, and managing customer interactions professionally. Additionally, work on building your teamwork and adaptability skills, as they are crucial for success in real-world BPO environments.

Banking	**MEDIUM**	You're making progress—your understanding of banking processes and financial analysis is growing. Focus on deepening your knowledge of key banking concepts like risk management, financial modeling, and compliance regulations. Enhance your ability to analyze and interpret financial data, and familiarize yourself with banking software and tools. Keep refining your skills through real-world projects and internships to further develop your expertise in the sector.
Marketing	**MEDIUM**	You're building a solid foundation for a marketing role. Focus on hands-on experience—create and manage marketing campaigns, explore analytics tools, and simulate real-world scenarios. Learn how to manage social media accounts, develop content strategies, and adapt to new marketing technologies. A proactive learning approach will significantly enhance your expertise and boost your chances in the marketing sector.
Sales	**MEDIUM**	You're on the right path. You understand the fundamentals of sales but need more exposure to advanced topics like negotiation techniques, lead generation strategies, and customer retention. Start solving real-world sales scenarios and working with larger client portfolios. Focus on CRM strategies and building long-term customer relationships to strengthen your skills in the sales sector.
FMCG	**MEDIUM**	Your current skills may not fully align with the FMCG sector. Start with the basics—understand product lifecycle, market trends, and consumer behavior in FMCG. Learn about distribution channels, retail strategies, and how to manage supply chains. Practice engaging with consumers, analyzing market data, and creating effective promotional campaigns. Familiarity with FMCG marketing strategies and tools will be beneficial in advancing your skills in this field.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Strong	1. Practice timed mock tests to improve accuracy and speed. 2. Focus on improving logical reasoning and verbal ability sections. 3. Avoid overthinking questions—go with instinct where necessary. 4. Review explanations of wrong answers to understand your pattern of errors. 5. Be consistent in practice to reduce performance anxiety during the actual test.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student shows promising abilities in Group Discussion (GD) and Personal Interview (PI), suggesting strong communication and interpersonal skills. Performance in Logical, Verbal, and Quantitative Ability is currently average and has the potential to improve with strategic effort. Incorporating structured mock tests, guided mentoring sessions, and practice-focused class activities will help bridge the gap. With dedication and continuous learning, the student is well-positioned to elevate performance across all areas.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Quantitative (30)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %

PSYCHOMETRIC ABILITY

1	2	3	4	5	6	7	8	9	10

You're off to a good start with psychometric skills, and there's a solid foundation to build on. Your results suggest a fair understanding of the core concepts such as reasoning, attention to detail, and behavioral patterns. Now is the time to work on sharpening these skills further. Explore psychometric tests online to gain familiarity with different formats. Pay attention to the consistency of your responses in personality-based assessments—it's a sign of self-awareness. For aptitude-based components, focus on accuracy under time pressure. Strengthening emotional intelligence through self-reflection and social interaction exercises can also boost your overall profile. With sustained effort, you'll soon see significant progress.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

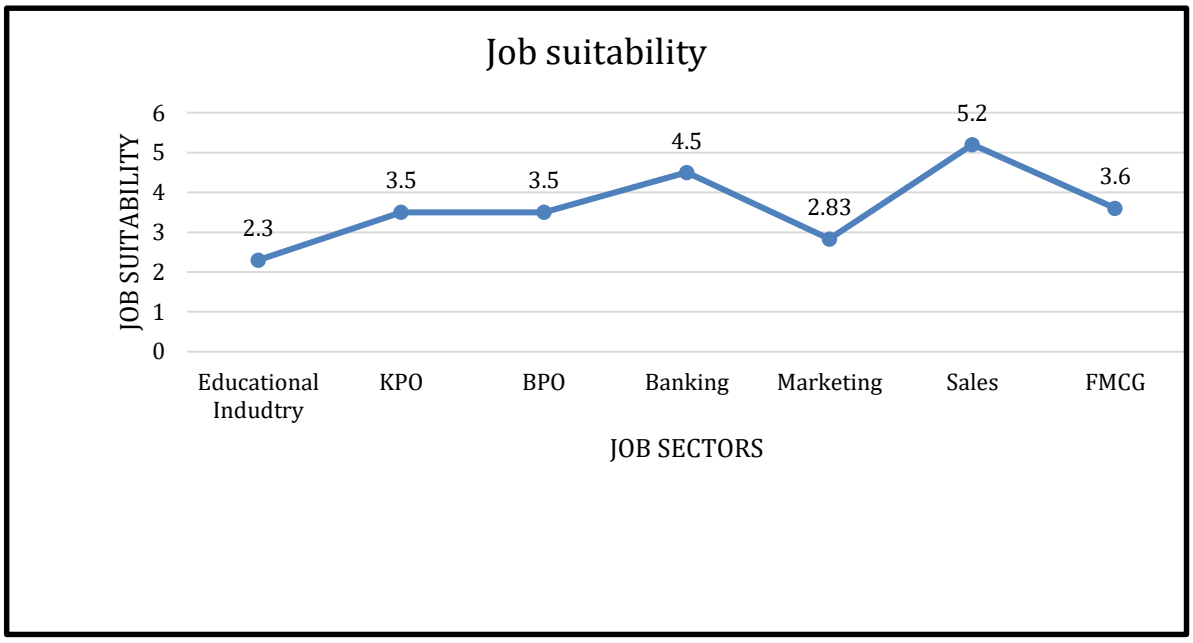
Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Educational Industry	**LOW**	Your current profile shows limited alignment with the evolving expectations in the education sector. Focus on strengthening your curriculum design, instructional skills, and learner engagement techniques. Work on becoming proficient in digital tools like Learning Management Systems (LMS), educational technology platforms, and data-driven teaching methods. Improve your communication, mentoring, and presentation abilities to effectively connect with diverse learners. Regular practice through workshops, lesson planning exercises, and participation in professional development programs can also enhance your educational impact.
KPO	**LOW**	Your profile currently lacks alignment with KPO requirements. Start by strengthening your domain knowledge and research skills, and develop a clear understanding of data analysis, report writing, and client communication standards. Pay close attention to detail in all assignments and practice presenting information in a structured, professional manner. Work on documenting research findings accurately and become familiar with tools like Excel, Power BI, or other industry-specific platforms used for knowledge management and analysis.
BPO	**LOW**	Your current skill set does not strongly match the expectations for a role in the BPO sector. Focus on strengthening your communication skills, both verbal and written, along with developing strong customer service and problem-solving abilities. Try to gain familiarity with CRM tools and basic computer applications commonly used in the industry. Practice active listening, handling objections, and managing customer interactions professionally. Additionally, work on building your teamwork and adaptability skills, as they are crucial for success in real-world BPO environments.
Banking	**MEDIUM**	You're making progress—your understanding of banking processes and financial analysis is growing. Focus on deepening your knowledge of key banking concepts like risk management, financial modeling, and compliance

		regulations. Enhance your ability to analyze and interpret financial data, and familiarize yourself with banking software and tools. Keep refining your skills through real-world projects and internships to further develop your expertise in the sector.
Marketing	**LOW**	Your current knowledge of marketing fundamentals could be expanded. Start by understanding key concepts like market research, consumer behavior, digital marketing, and branding. Practice analyzing trends, crafting campaigns, and exploring data-driven marketing strategies. Certifications in digital marketing or tools like Google Analytics can enhance your skills and strengthen your profile in the marketing sector.
Sales	**MEDIUM**	You're on the right path. You understand the fundamentals of sales but need more exposure to advanced topics like negotiation techniques, lead generation strategies, and customer retention. Start solving real-world sales scenarios and working with larger client portfolios. Focus on CRM strategies and building long-term customer relationships to strengthen your skills in the sales sector.
FMCG	**MEDIUM**	Your current skills may not fully align with the FMCG sector. Start with the basics—understand product lifecycle, market trends, and consumer behavior in FMCG. Learn about distribution channels, retail strategies, and how to manage supply chains. Practice engaging with consumers, analyzing market data, and creating effective promotional campaigns. Familiarity with FMCG marketing strategies and tools will be beneficial in advancing your skills in this field.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Strong	1. Practice timed mock tests to improve accuracy and speed. 2. Focus on improving logical reasoning and verbal ability sections. 3. Avoid overthinking questions—go with instinct where necessary. 4. Review explanations of wrong answers to understand your pattern of errors. 5. Be consistent in practice to reduce performance anxiety during the actual test.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

Mock Drive Analysis

Name:	*DARJI PAHAL*
Enrollment Number:	2301402007
Course:	*BBA*
Date:	*4th March 2024*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

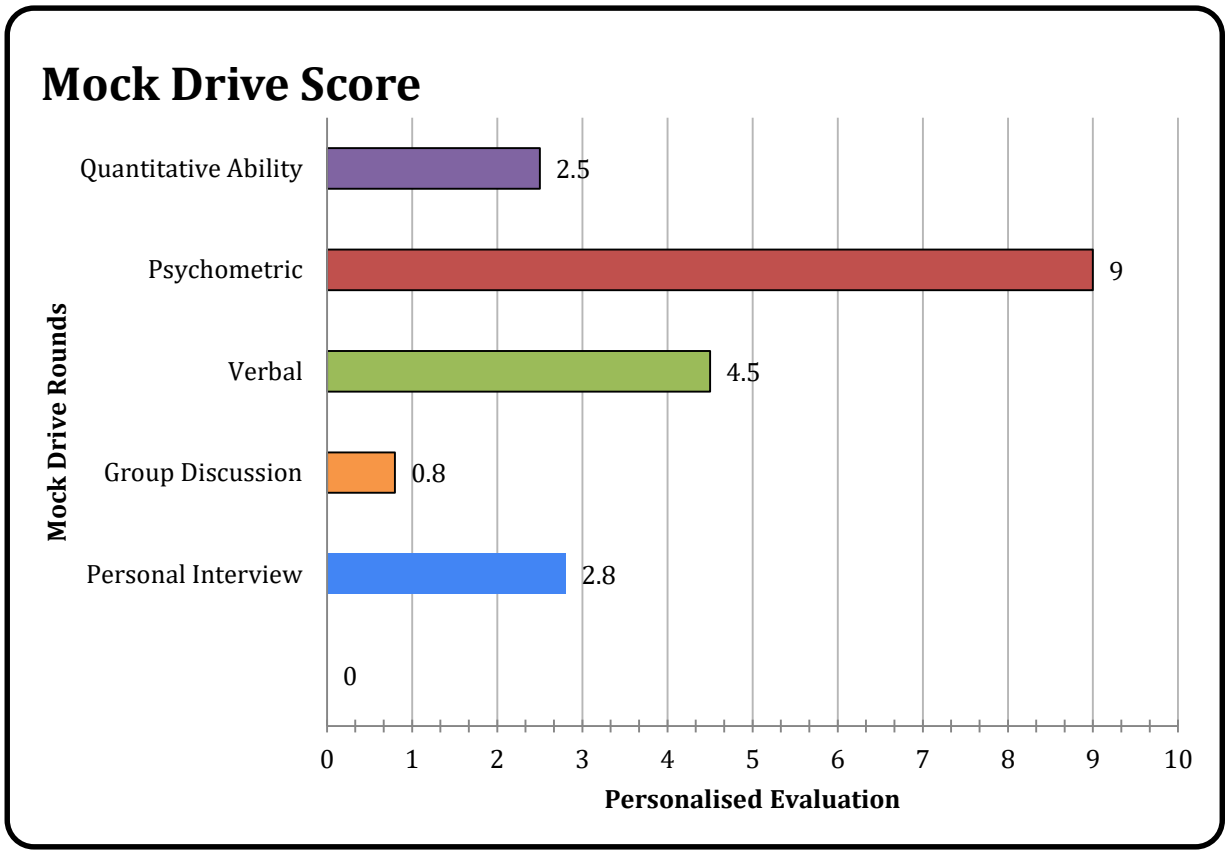
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC ABILITY

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

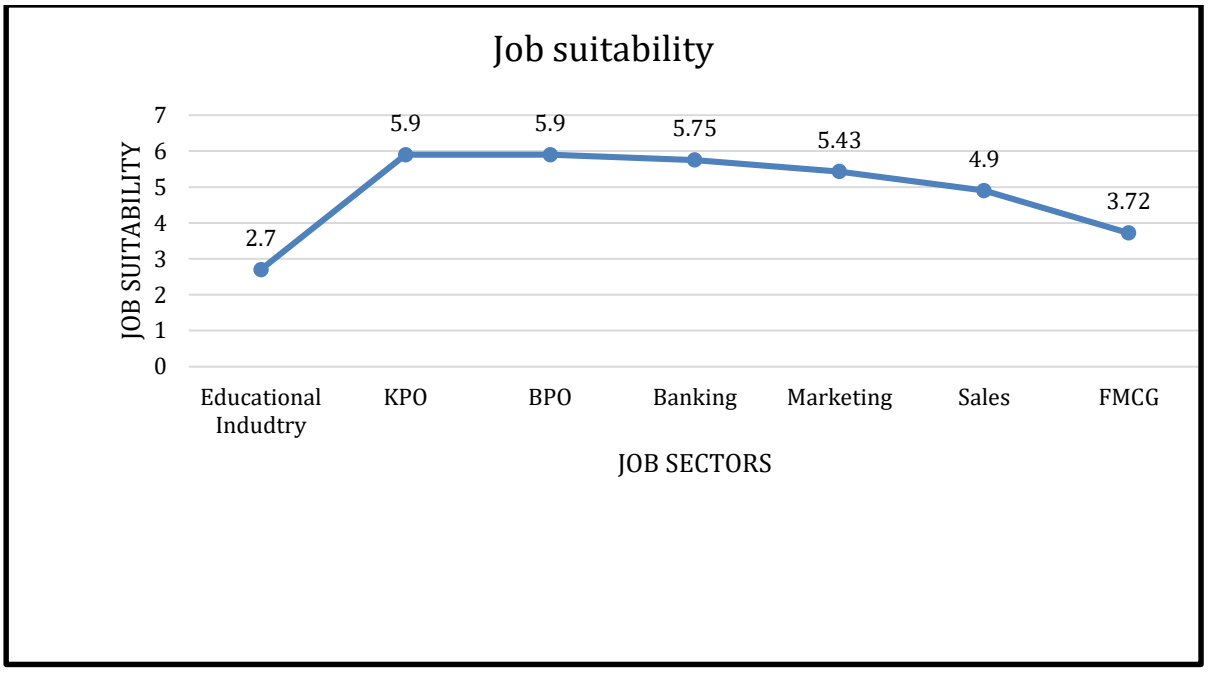
Your performace with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Educational Industry	**LOW**	Your current profile shows limited alignment with the evolving expectations in the education sector. Focus on strengthening your curriculum design, instructional skills, and learner engagement techniques. Work on becoming proficient in digital tools like Learning Management Systems (LMS), educational technology platforms, and data-driven teaching methods. Improve your communication, mentoring, and presentation abilities to effectively connect with diverse learners. Regular practice through workshops, lesson planning exercises, and participation in professional development programs can also enhance your educational impact.
KPO	**MEDIUM**	You have a strong foundation to pursue a role in the KPO sector, but there's room for growth. Strengthen your research, analysis, and documentation skills. Focus on delivering detailed, accurate reports and improving data interpretation. Regular practice with case studies and considering a certification in data analysis or knowledge management can help boost your profile.
BPO	**MEDIUM**	You have a basic foundation for a career in the BPO sector but need to build fluency in essential communication and customer handling skills. Expand your knowledge of customer relationship management (CRM) tools, process workflows, and professional email etiquette. Engage in real-time roleplays or mock call scenarios to strengthen your practical skills, and work on refining your ability to explain solutions clearly and calmly. With consistent effort and practice, your chances of succeeding in the BPO industry will greatly improve.

Banking	**MEDIUM**	You're making progress—your understanding of banking processes and financial analysis is growing. Focus on deepening your knowledge of key banking concepts like risk management, financial modeling, and compliance regulations. Enhance your ability to analyze and interpret financial data, and familiarize yourself with banking software and tools. Keep refining your skills through real-world projects and internships to further develop your expertise in the sector.
Marketing	**MEDIUM**	You're building a solid foundation for a marketing role. Focus on hands-on experience—create and manage marketing campaigns, explore analytics tools, and simulate real-world scenarios. Learn how to manage social media accounts, develop content strategies, and adapt to new marketing technologies. A proactive learning approach will significantly enhance your expertise and boost your chances in the marketing sector.
Sales	**MEDIUM**	You're on the right path. You understand the fundamentals of sales but need more exposure to advanced topics like negotiation techniques, lead generation strategies, and customer retention. Start solving real-world sales scenarios and working with larger client portfolios. Focus on CRM strategies and building long-term customer relationships to strengthen your skills in the sales sector.
FMCG	**MEDIUM**	Your current skills may not fully align with the FMCG sector. Start with the basics—understand product lifecycle, market trends, and consumer behavior in FMCG. Learn about distribution channels, retail strategies, and how to manage supply chains. Practice engaging with consumers, analyzing market data, and creating effective promotional campaigns. Familiarity with FMCG marketing strategies and tools will be beneficial in advancing your skills in this field.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student shows promising abilities in Group Discussion (GD) and Personal Interview (PI), suggesting strong communication and interpersonal skills. Performance in Logical, Verbal, and Quantitative Ability is currently average and has the potential to improve with strategic effort. Incorporating structured mock tests, guided mentoring sessions, and practice-focused class activities will help bridge the gap. With dedication and continuous learning, the student is well-positioned to elevate performance across all areas.
