Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

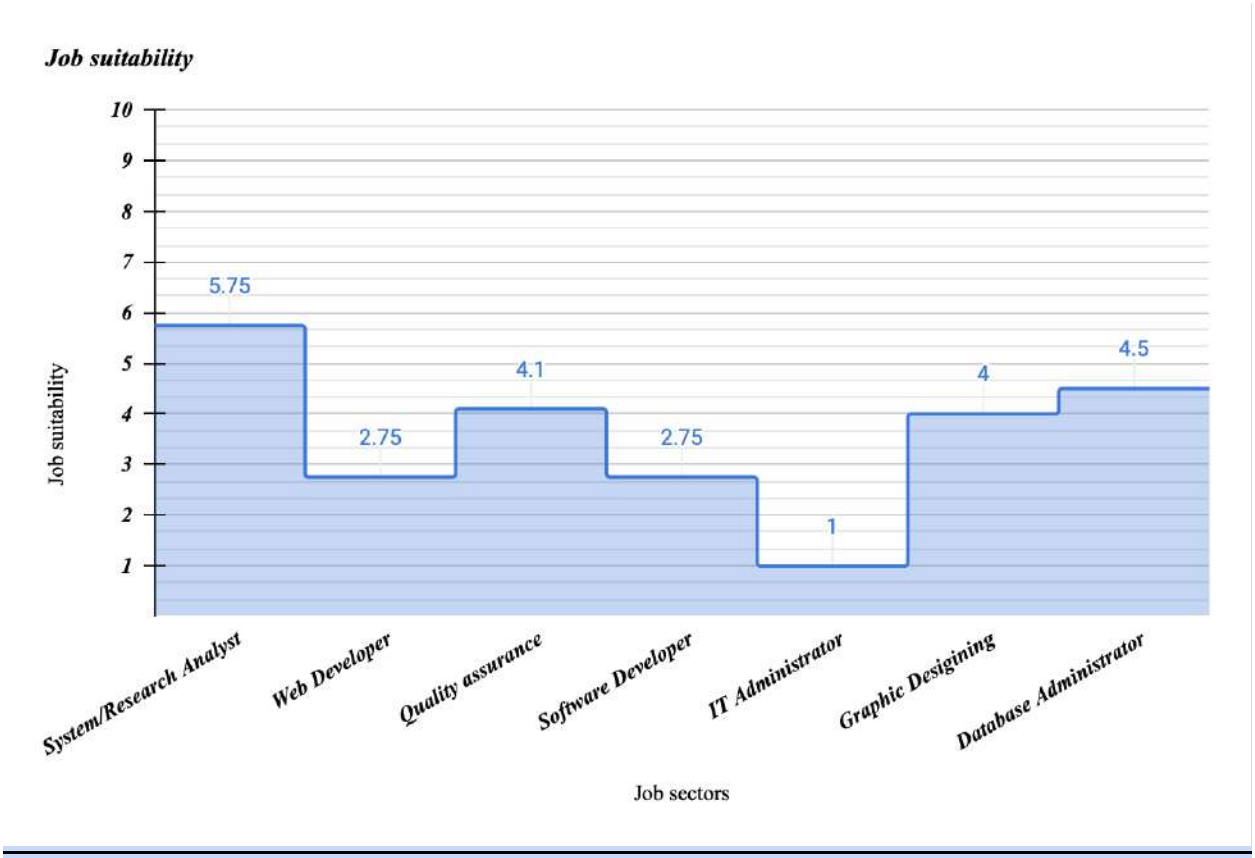
Your contributions during the group discussion were notable. You demonstrated good communication skills, expressing your thoughts clearly and effectively. Your ability to actively listen to others and engage in the conversation was evident, contributing positively to the overall dynamics of the group. While you did well in expressing your own ideas, consider actively seeking out and acknowledging diverse perspectives within the group. This can enrich the discussion and demonstrate a well-rounded understanding of the topic. Challenge yourself to delve deeper into counterarguments. While you presented your points effectively, exploring opposing viewpoints and addressing potential counterarguments can add depth to your contributions. Remember, these are just areas for potential growth, and your current performance is already commendable. Keep up the good work, and we look forward to seeing how you continue to excel in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems

		like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.
Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with

		large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Moderate	1. Blindly re- answer all questions after reviewing initial answers. 2. Write expository paragraphs and design multiple- choice questions. 3. Debate passage interpretations with a partner weekly. 4. Log idioms and practice using them correctly weekly. 5. Insert distracting questions and pause before answering
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Moderate	1. Structure your arguments in a logical flow: point, reason, example. 2. Practice initiating and summarizing GDs. 3. Use simple, impactful language to express complex ideas. 4. Learn to respectfully disagree and build on others points. 5. Work on controlling voice modulation and pitch for better engagement.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking.

		5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student shows promising abilities in Group Discussion (GD) and Personal Interview (PI), suggesting strong communication and interpersonal skills. Performance in Logical, Verbal, and Quantitative Ability is currently average and has the potential to improve with strategic effort. Incorporating structured mock tests, guided mentoring sessions, and practice-focused class activities will help bridge the gap. With dedication and continuous learning, the student is well-positioned to elevate performance across all areas.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Psychometric (20)	Subjective Knowledge (20)			A (Super Dream Company)	10 - 20 Lakh	80 - 89 %
	Quantitative (20)						
	Verbal (20)	Pseudo coding (30)			B (Dream Company)	6- 10 lakh	70- 79 %
	GD (20)	Programming (30)			C (Ideal Company)	3-6 Lakh	60 - 69 %
	PI (20)	Technical Interview (20)			D (Average Company)	Below 3 lakh	50 - 59 %

Course:	*BCA*
Date:	*10th April 2023*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

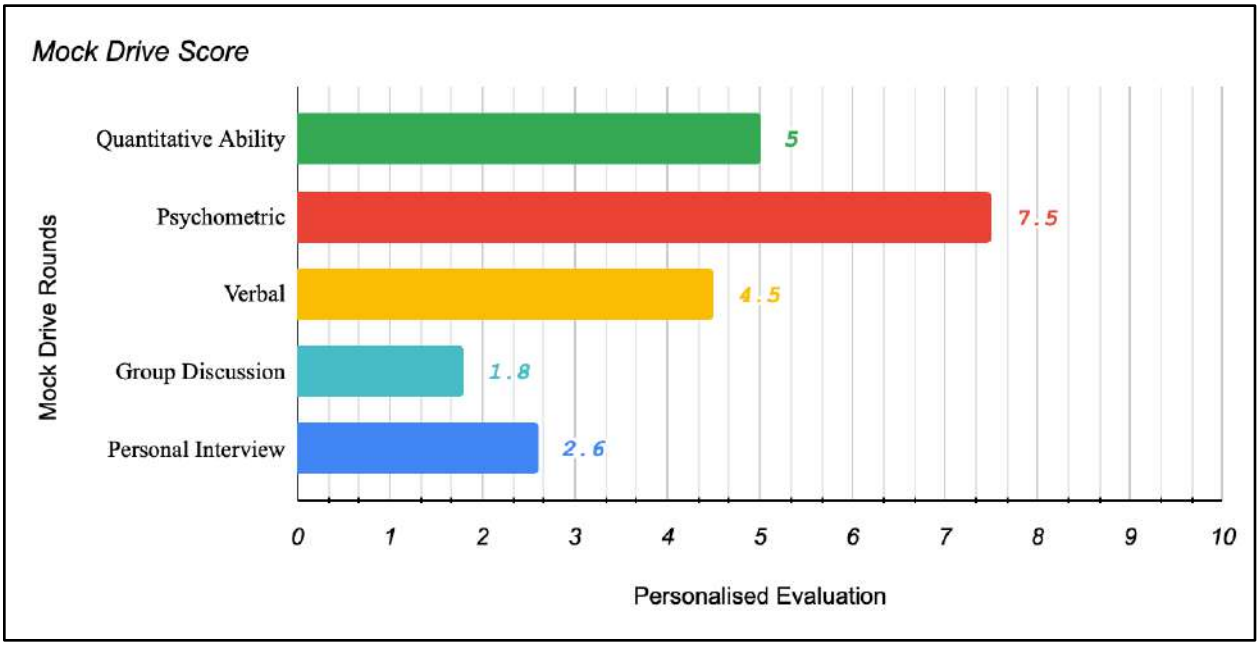
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

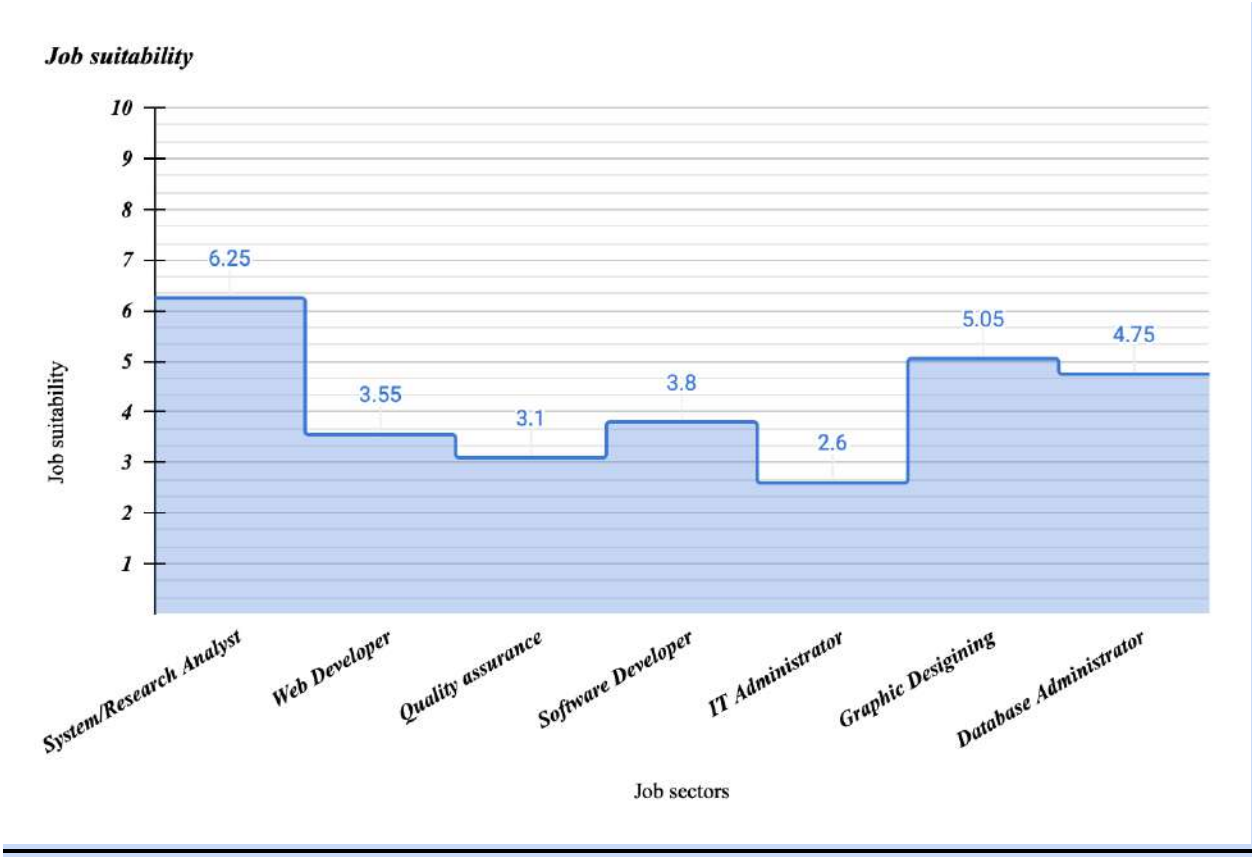
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**GOOD**	You have a strong potential to thrive as a System/Research Analyst. Your blend of analytical thinking, communication skills, and adaptability is promising. Continue to refine your knowledge of data tools and keep working on creating compelling presentations. With sustained effort, you are well-positioned for success in this role.
Web Developer	**MEDIUM**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech

		concepts clearly. With consistent effort, your chances of landing this role will improve.
Quality assurance	**MEDIUM**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Moderate	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

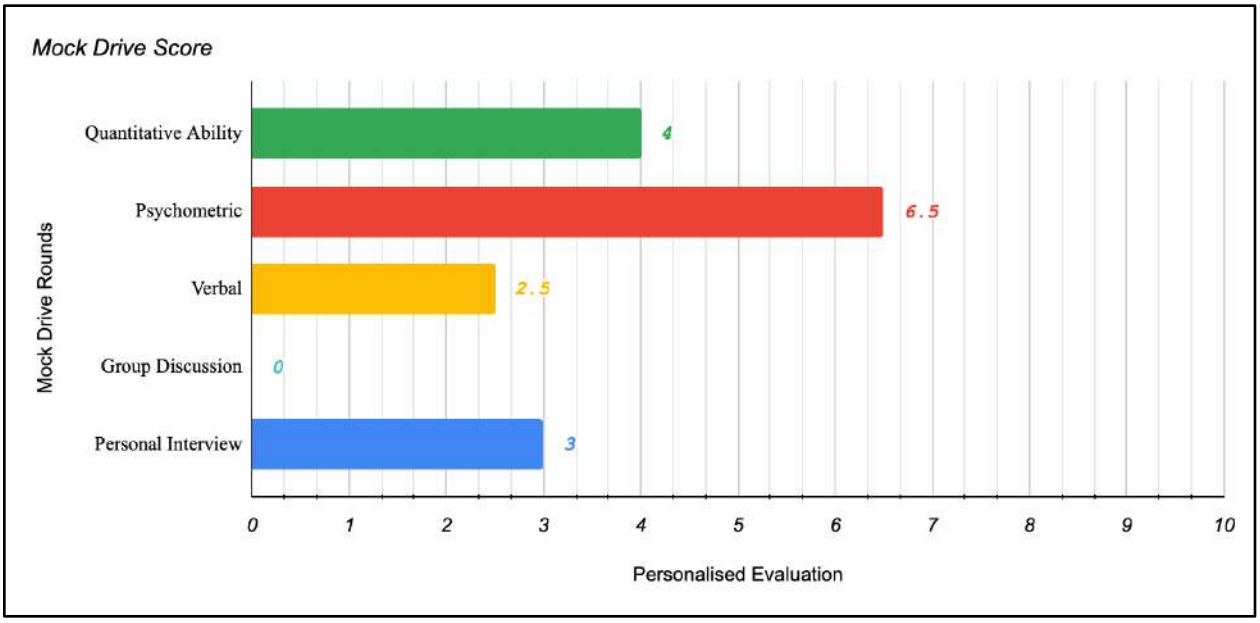
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

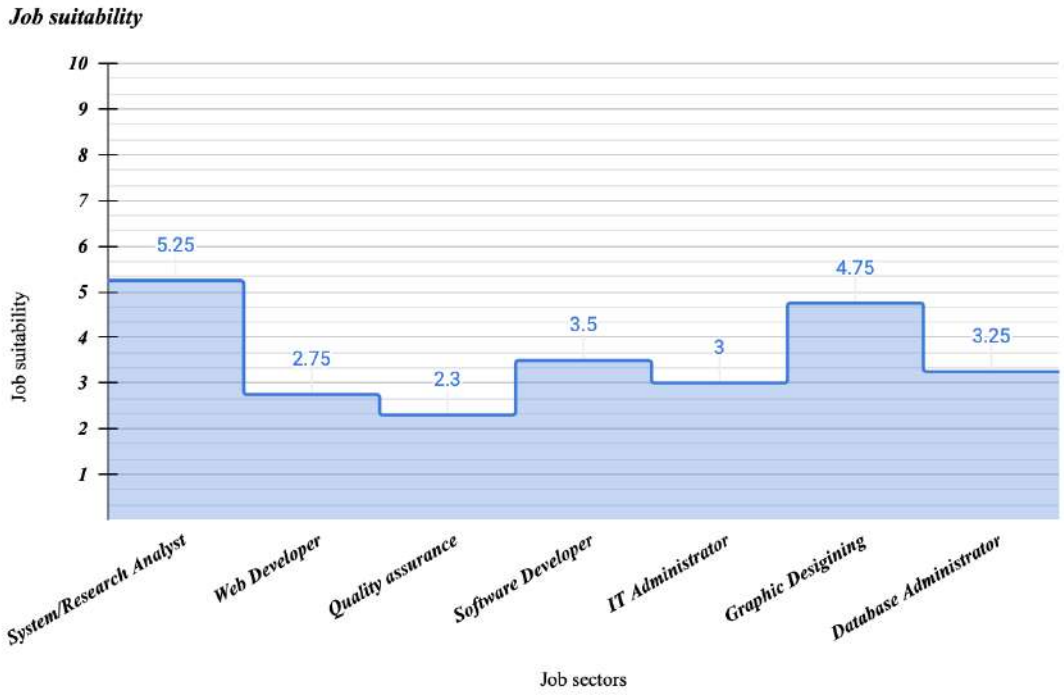
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and

		communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with

		database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions.

		2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Good luck!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an

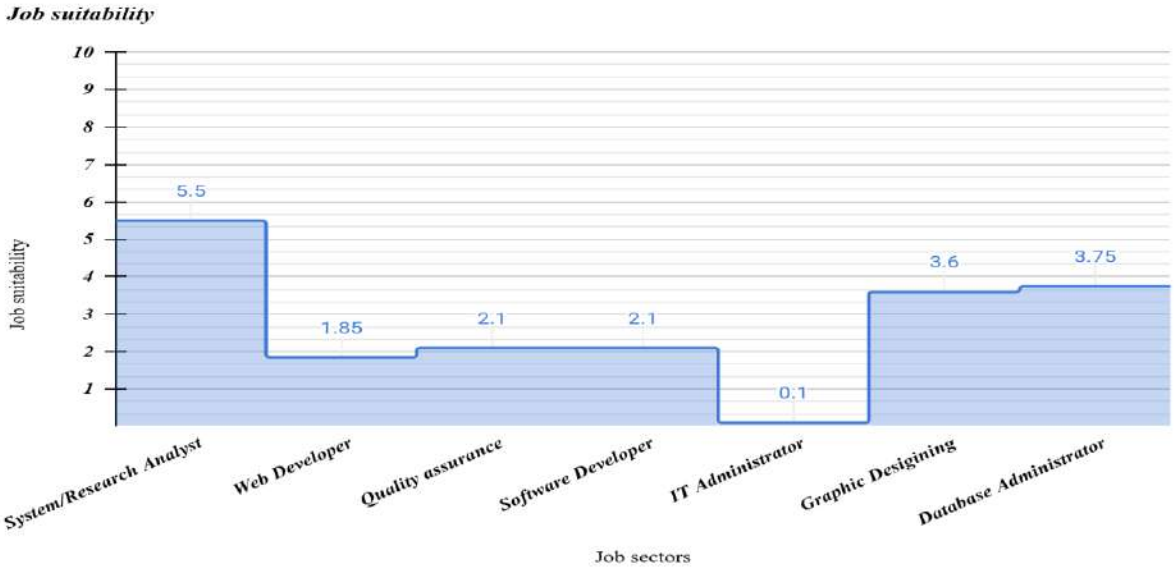
opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1.Familiarize yourself with common psychometric formats (aptitude, personality, etc.). 2. Work on building mental stamina by solving tests in one sitting. 3.Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Take a short quiz daily to pinpoint mistakes. 2. Learn five roots and use each in sentences. 3. Keep an error log and correct mistakes nightly. 4. Paraphrase reading chunks immediately after reading them. 5. Study one grammar rule and write three sentences.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking.

		5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the

fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

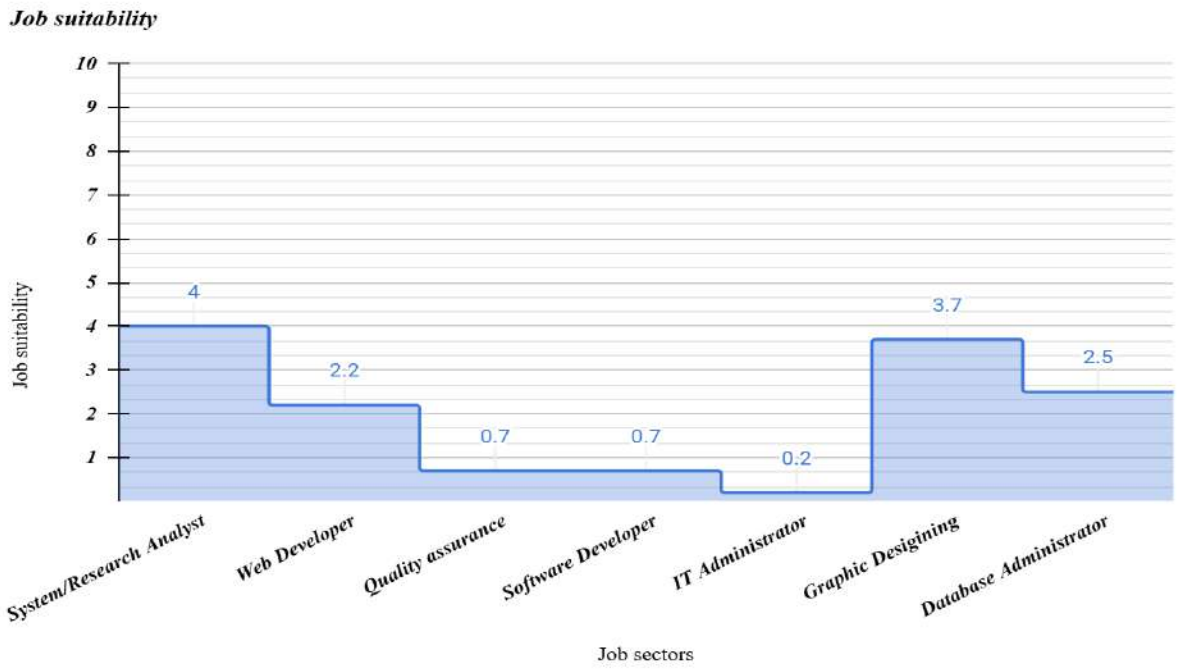
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher

		questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. Group Discussion (GD) and Personal Interview (PI) skills need to be developed and there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

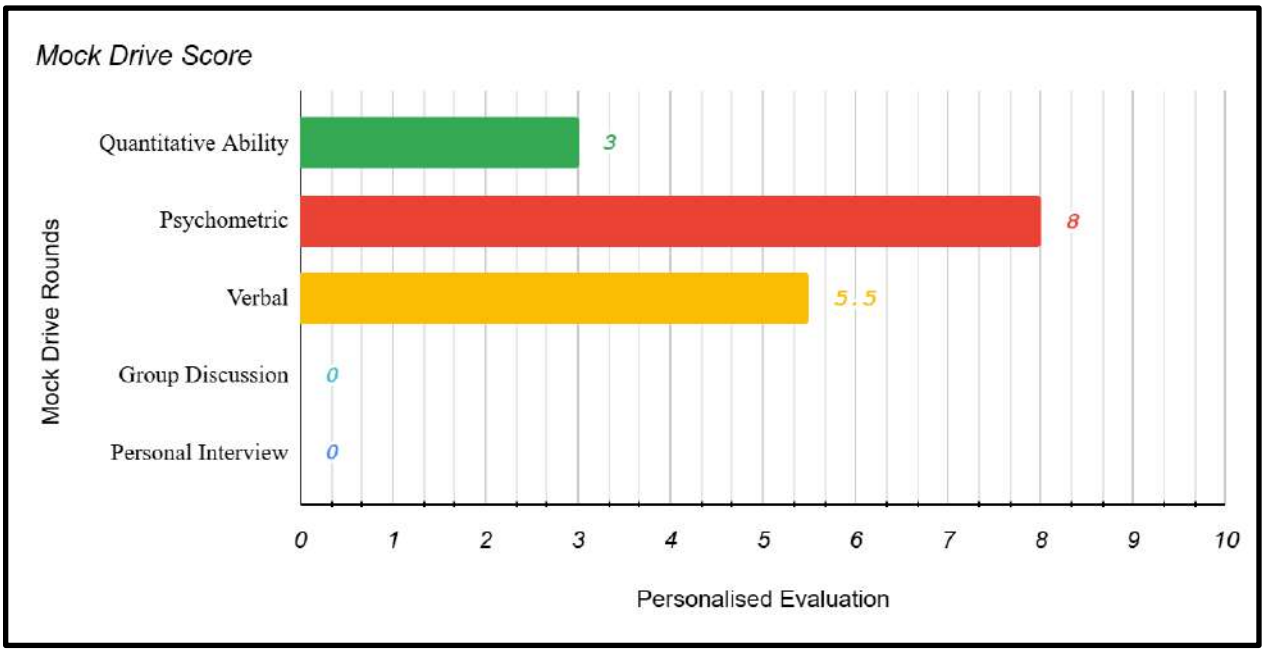
• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable

Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an

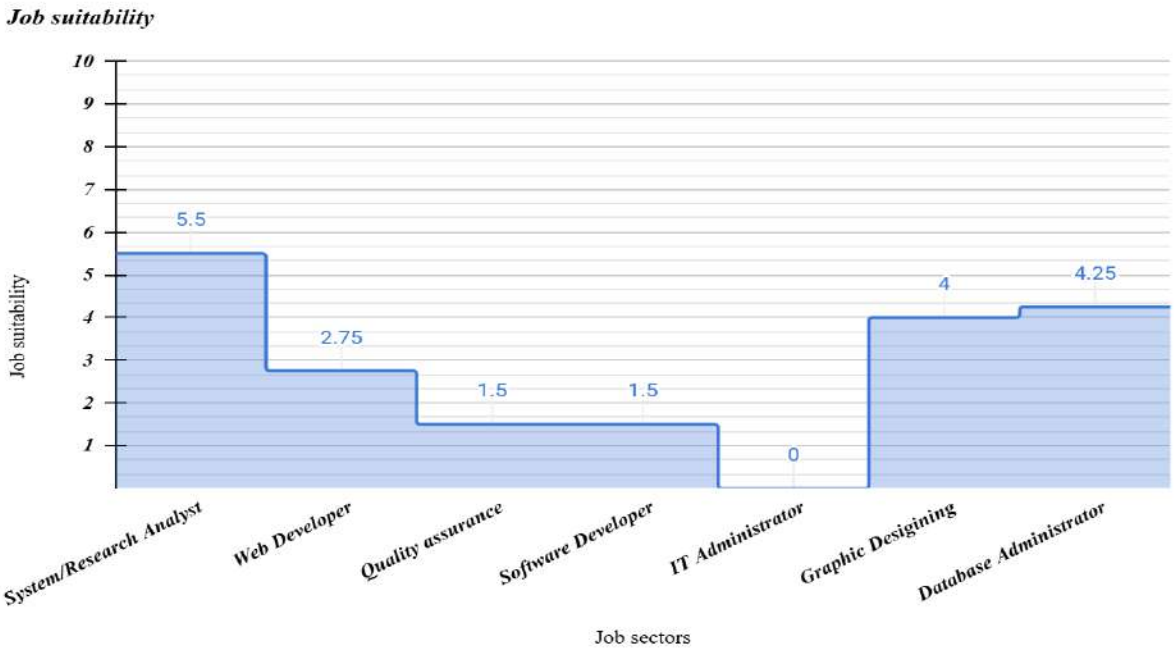
opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**MEDIUM**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Moderate	1. Blindly re- answer all questions after reviewing initial answers. 2. Write expository paragraphs and design multiple- choice questions. 3. Debate passage interpretations with a partner weekly. 4. Log idioms and practice using them correctly weekly. 5. Insert distracting questions and pause before answering
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. Group Discussion (GD) and Personal Interview (PI) skills need to be developed and there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher

		questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. Group Discussion (GD) and Personal Interview (PI) skills need to be developed and there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

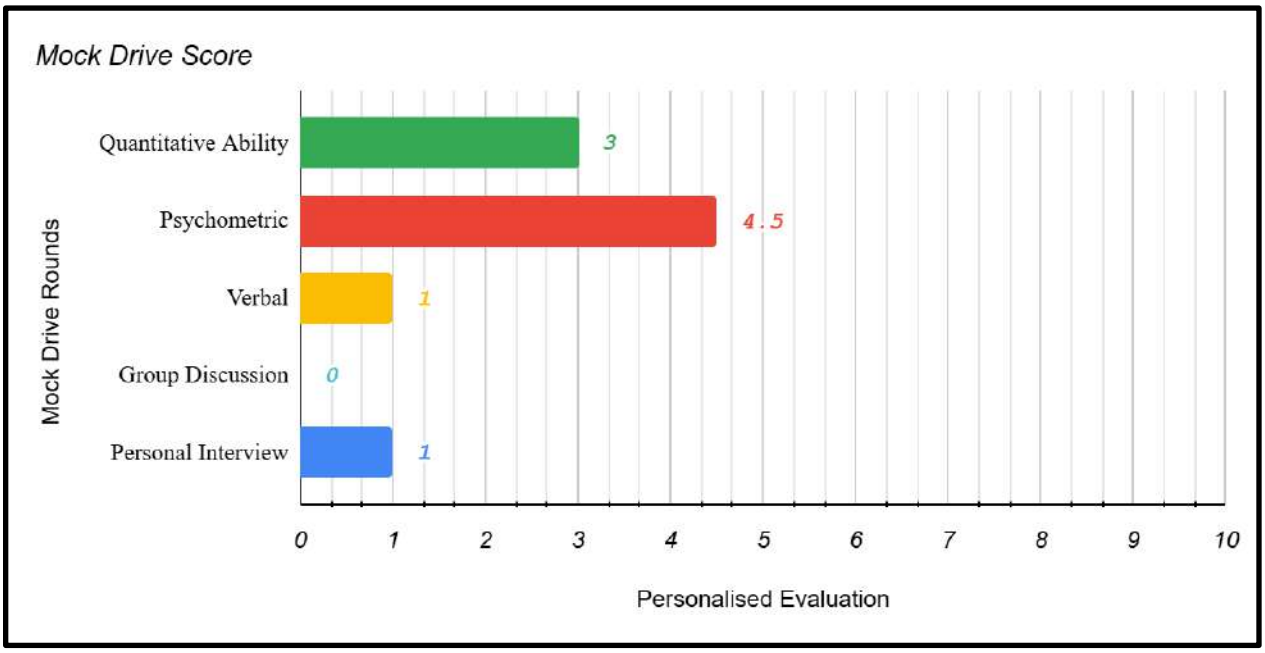
• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable

Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

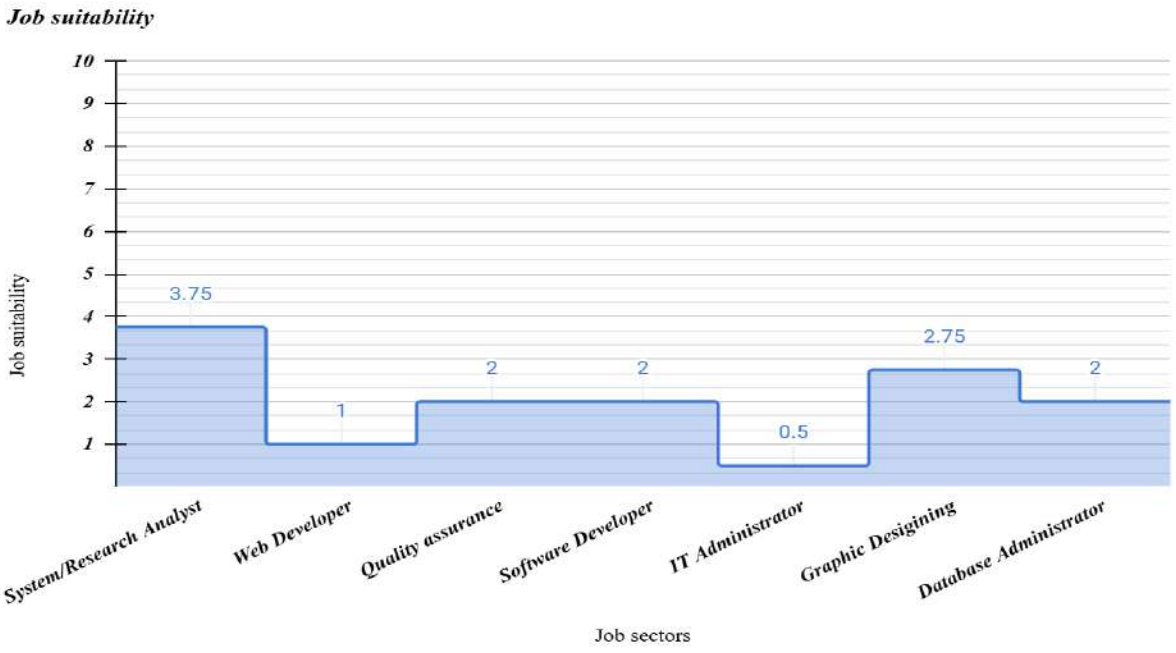
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.

Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**LOW**	Your current portfolio or skill set needs more work to align with graphic design expectations. Begin with mastering tools like Adobe Photoshop, Illustrator, and Canva. Understand design principles like balance, contrast, and typography. Try replicating existing designs to learn techniques, then move on to creating original work.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Strong	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Blindly re- answer all questions after reviewing initial answers. 2. Write expository paragraphs and design multiple- choice questions. 3. Debate passage interpretations with a partner weekly. 4. Log idioms and practice using them correctly weekly. 5. Insert distracting questions and pause before answering
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher

		questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. Group Discussion (GD) and Personal Interview (PI) skills need to be developed and there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

- **Knowledge Process Outsourcing (KPO) Companies**

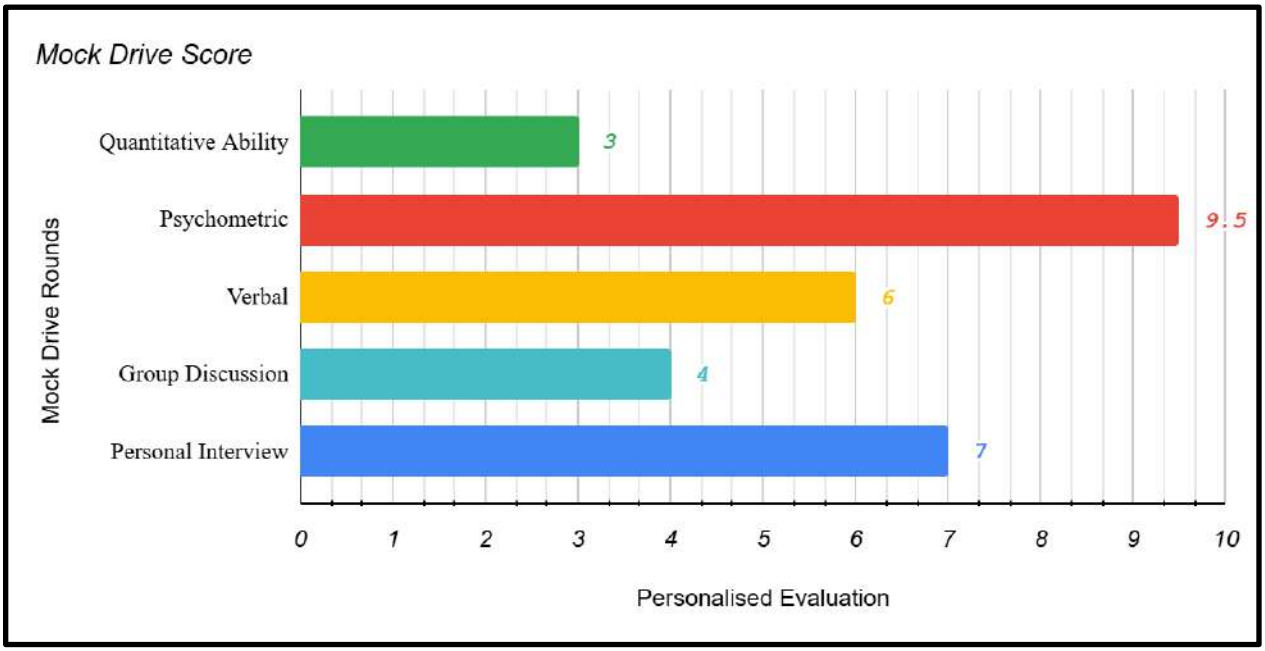
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

- **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental

concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are outstanding and reflect a high level of cognitive sharpness, emotional intelligence, and self-awareness. You demonstrate not just the ability to solve problems accurately, but also to approach them with strategic thinking and composure. Your consistency across reasoning, personality profiling, and attention-based tasks suggests a mature, well-rounded mindset ready for real-world challenges. To maintain and further polish this excellence, continue exposing yourself to diverse psychometric exercises, especially those that require adaptability and advanced decision-making. Focus on analyzing subtle patterns in data and human behavior, as these will enhance your already strong intuitive grasp. You are operating at a highly competitive level - stay curious, stay reflective, and you'll keep setting new benchmarks for yourself. Outstanding performance: truly impressive!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

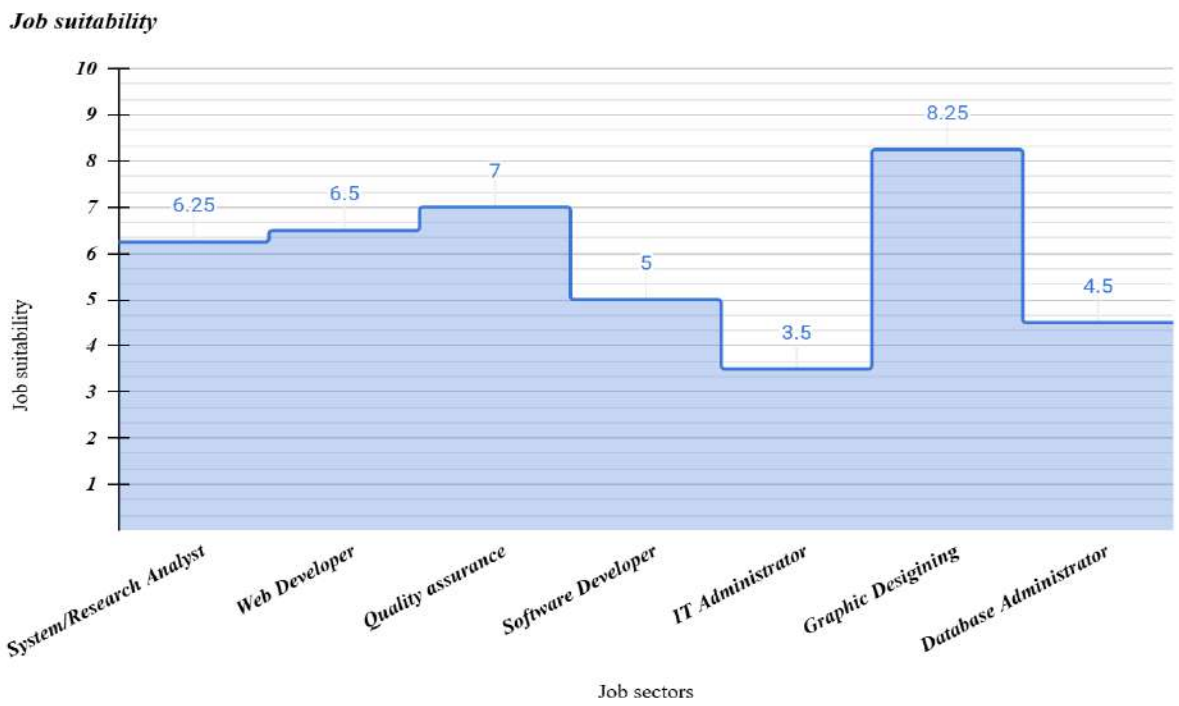
Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

You approached the PI round with professionalism and a clear sense of preparation. Your confidence and maturity came through well, which created a strong first impression. Your responses were generally clear and well-structured. To further enhance your performance, focus on backing your answers with specific, relevant examples from your experiences—whether academic, extracurricular, or personal. This will help you demonstrate depth of thought and a stronger connection between your experiences and the role you're aspiring for. In situations where a question feels vague or unclear, feel free to ask for clarification. Doing so not only reflects presence of mind but also ensures your response aligns with the interviewer's expectations. Continue building on the good foundation you've established. With more practice and reflection, you'll be well-prepared to handle even more challenging interviews. Keep up the effort, and best wishes for your next steps!

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**MEDIUM**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech concepts clearly. With consistent effort, your chances of landing this role will improve.

Quality assurance	**GOOD**	Your skills are well-aligned with QA roles. You exhibit a structured and detail-oriented mindset, and likely have some hands-on exposure to QA processes. To build on this strength, explore automation tools and keep refining your test documentation. With this proactive approach, you are in a good position to succeed in QA.
Software Developer	**MEDIUM**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**MEDIUM**	You're developing a good foundation for an IT Admin role. Focus on hands-on practice—set up local networks, explore admin panels, and simulate problem-solving scenarios. Learn how to manage servers, handle security protocols, and adapt to new IT tools. A proactive learning approach will significantly boost your chances.
Graphic Designing	**GOOD**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense. Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.
Database Administrator	**MEDIUM**	You're on the right path. You understand the fundamentals of databases but need more exposure to advanced topics like stored procedures, triggers, and performance tuning. Start solving real-time case studies and working with large datasets. Focus on data security and backup strategies too.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Moderate	1. Blindly re- answer all questions after reviewing initial answers. 2. Write expository paragraphs and design multiple- choice questions. 3. Debate passage interpretations with a partner weekly. 4. Log idioms and practice using them correctly weekly. 5. Insert distracting questions and pause before answering
Quantitative Ability	Strong	1. Focus on advanced concepts like number theory, probability, and combinatorics. 2. Practice complex problems that require multiple steps and concepts. 3. Develop strategies to solve problems quickly and efficiently. 4. Analyse and learn from mistakes in mock tests and practice sessions. 5. Practice solving problems under timed conditions to simulate exam pressure.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements to support them. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Moderate	1. Prepare an impressive “tell me about yourself” 2. Maintain positive body language 3. Put efforts to talk more about your strengths and accomplishments 4. Answer every question confidently and with a relevant example 5. Work on your CV 6. Practice relaxation techniques such as deep breathing or visualization to

		calm your nerves.

6.0 Performance Summary:

The student shows promising abilities in Group Discussion (GD) and Personal Interview (PI), suggesting strong communication and interpersonal skills. Performance in Logical, Verbal, and Quantitative Ability is currently average and has the potential to improve with strategic effort. Incorporating structured mock tests, guided mentoring sessions, and practice-focused class activities will help bridge the gap. With dedication and continuous learning, the student is well-positioned to elevate performance across all areas.

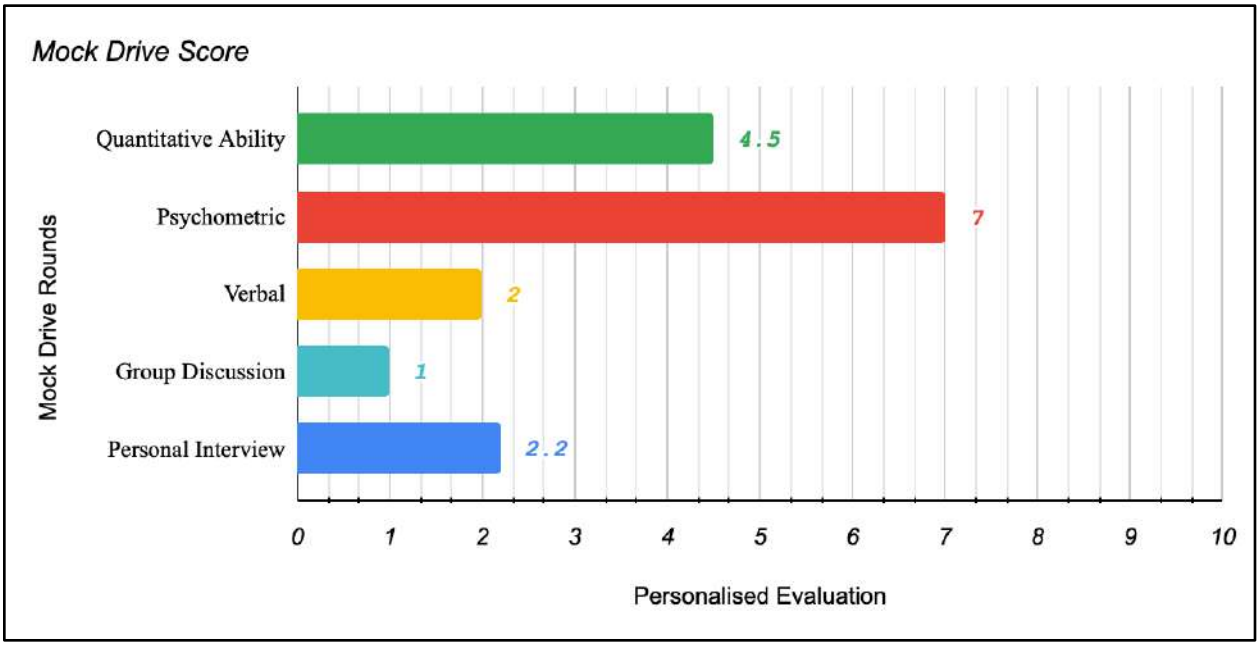
3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

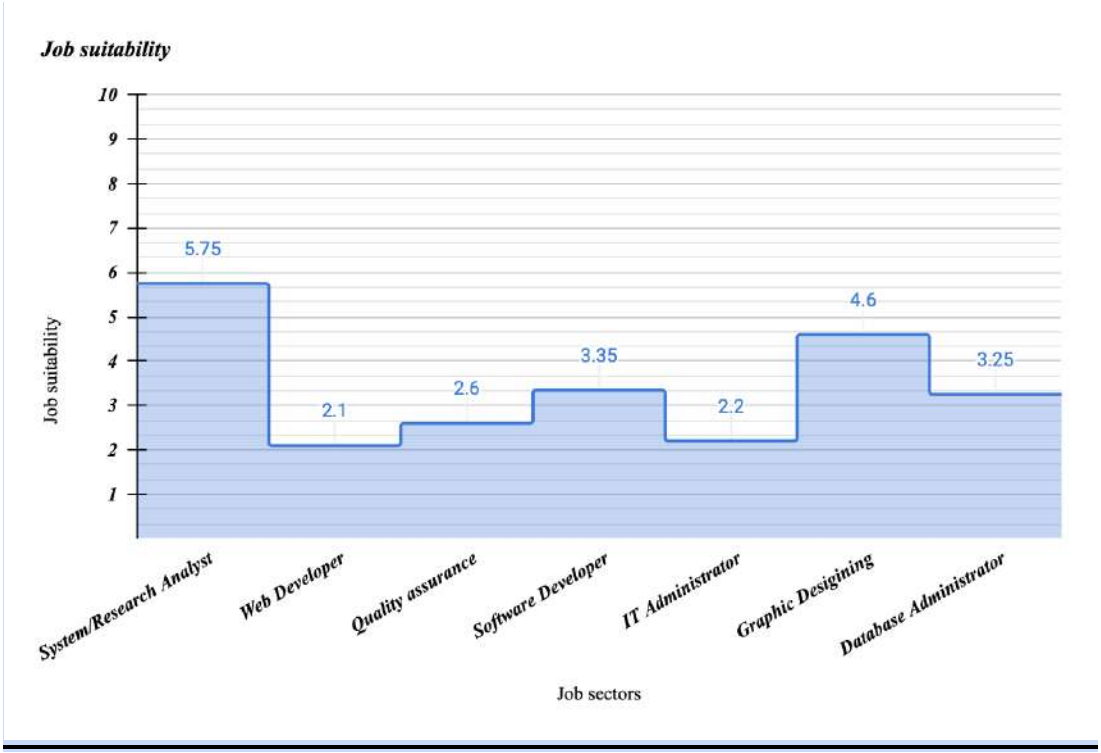
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	You have a basic foundation in web development but need to build fluency in frameworks and tools. Expand your knowledge of both frontend and backend technologies. Work on real-time collaborative projects, contribute to GitHub, and refine your communication for explaining tech

		concepts clearly. With consistent effort, your chances of landing this role will improve.
Quality assurance	**LOW**	You have the foundation to pursue a QA role, but there's room to grow. Strengthen your knowledge of testing tools and frameworks. Focus on writing precise documentation and increasing your attention to detail. Start practicing test cases and scenarios regularly, and consider earning a QA certification to boost your profile.
Software Developer	**LOW**	You're getting there—your skills in programming and problem-solving are developing. Improve your fluency in at least one programming language and focus on writing clean, efficient code. Try working with version control systems and learn about design patterns. Keep pushing your limits through real-world challenges and internships.
IT Administrator	**LOW**	You're developing a good foundation for an IT Admin role. Focus on hands-on practice—set up local networks, explore admin panels, and simulate problem-solving scenarios. Learn how to manage servers, handle security protocols, and adapt to new IT tools. A proactive learning approach will significantly boost your chances.
Graphic Designing	**MEDIUM**	Your creative flair and technical command over design tools make you a strong candidate for graphic designing roles. You understand visual communication and have a keen aesthetic sense. Keep pushing your creativity and explore user interface (UI) design, motion graphics, or branding projects to expand your scope.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions. 2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student shows promising abilities in Group Discussion (GD) and Personal Interview (PI), suggesting strong communication and interpersonal skills. Performance in Logical, Verbal, and Quantitative Ability is currently average and has the potential to improve with strategic effort. Incorporating structured mock tests, guided mentoring sessions, and practice-focused class activities will help bridge the gap. With dedication and continuous learning, the student is well-positioned to elevate performance across all areas.

	Corporate Readiness Chart

Course:	*BCA*
Date:	*10th April 2023*

Training and Placement Cell

1.0 Purpose of this report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. For large services companies, they look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. These companies primarily look for good programming skills and quantitative ability. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. These companies primarily look for average quantitative and logical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

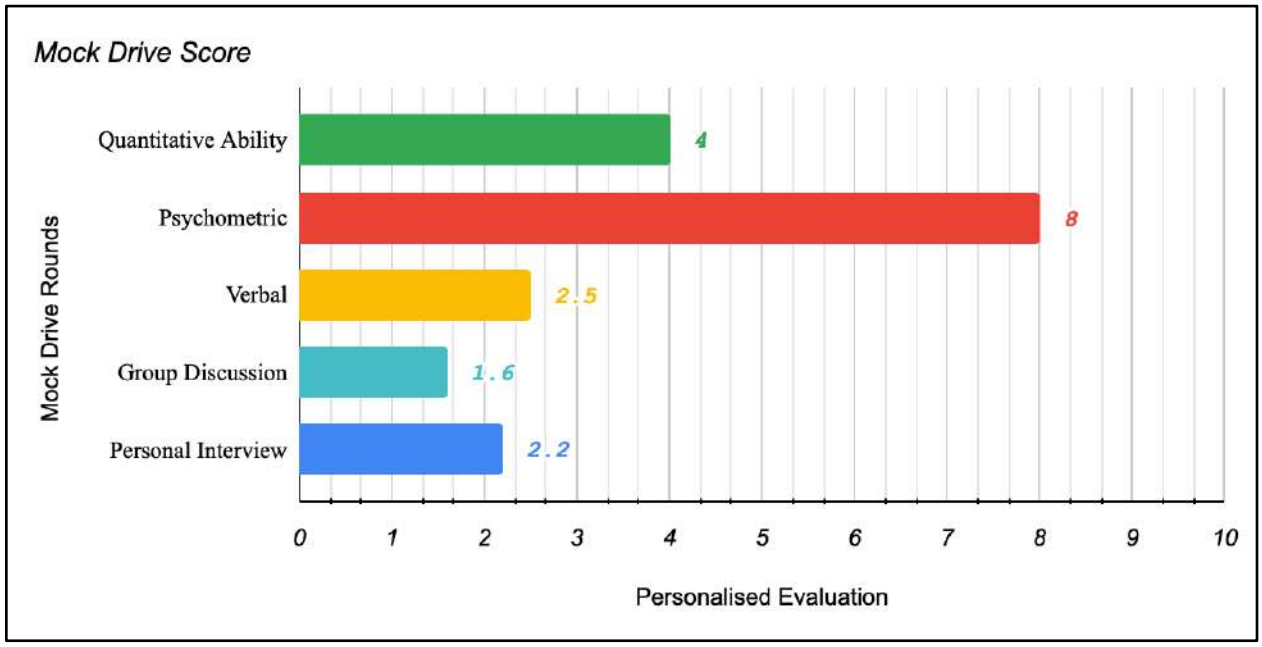
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations.These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

PSYCHOMETRIC SKILLS

1	2	3	4	5	6	7	8	9	10

Your psychometric skills are strong, and you demonstrate a clear ability to understand and respond to complex scenarios with logical thinking and self-awareness. Your responses indicate maturity, focus, and the ability to analyze situations both objectively and empathetically. You are likely aware of your strengths and weaknesses, which is a great asset in personal and professional growth. To enhance your performance further, practice tests that push your limits in time-bound conditions. Try to challenge your comfort zone by exploring new problem types and analyzing your personality trends over time. Continuous development in these areas will give you an edge in competitive environments. Keep up the great work!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Quantitative Ability is satisfactory. You need to start from the basics. First try to understand solved examples in books and then solve them yourself. Do not read quant examples, try to write, solve and practice them. That is the way to learn it. Once you are able to understand solved examples, move on to solving multiple-choice questions. Make sure you re-solve every question which you solve incorrectly in the first attempt. Finally, when you succeed in the same, proceed ahead and solve questions under time constraint. Start with basic algebra, concepts of factorization, divisibility; next move on to word problems and finally to advanced concepts such as logarithms, permutation-combination and probability. Good luck!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

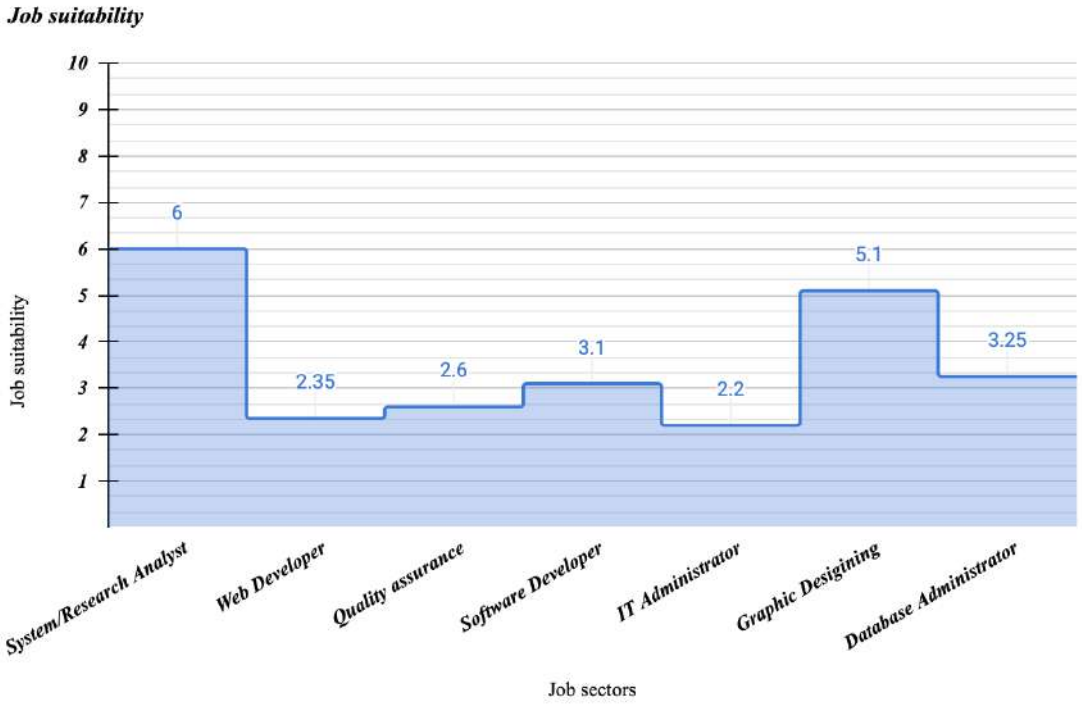
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:



Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
System/Research Analyst	**MEDIUM**	You're on the right path toward becoming a successful System/Research Analyst. To further improve your chances, refine your data interpretation and visualization skills. Try participating in data analysis projects or online hackathons. Build confidence in your communication and presentation abilities—practice explaining complex data in a simple, structured manner.
Web Developer	**LOW**	Your current skill set does not strongly match the expectations for a Web Developer role. Focus on mastering HTML, CSS, JavaScript, and at least one framework like React or Angular. Try to build small projects to apply your learning. Practice debugging and get comfortable using version control systems

		like Git. Also, develop your collaboration and communication skills—these are crucial in real-world development environments.
Quality assurance	**LOW**	Your profile currently lacks alignment with QA requirements. Start by understanding QA basics—testing methodologies, SDLC, and bug-tracking tools like JIRA. Pay attention to detail in all assignments and practice writing clear bug reports. Work on documenting processes accurately and become familiar with automated testing tools like Selenium or Postman.
Software Developer	**LOW**	Currently, your profile does not meet the core expectations for a Software Developer. Begin by strengthening your coding fundamentals and problem-solving through platforms like LeetCode or HackerRank. Work on developing logical thinking and debugging techniques. Build mini-projects to apply your learning and start collaborating with others to gain team experience.
IT Administrator	**LOW**	Your current knowledge of systems and network fundamentals is limited. Begin by understanding basic IT infrastructure, networking concepts, and operating systems. Practice troubleshooting simple system issues and explore basic cybersecurity principles. Certifications like CompTIA or Cisco's CCNA can boost your understanding and profile.
Graphic Designing	**MEDIUM**	You have creative potential, but your skills and tools usage need refinement. Start building a diverse portfolio that showcases your design versatility. Take feedback constructively, learn visual storytelling, and challenge yourself with real-time design briefs. Understanding user experience and adhering to deadlines will also help.
Database Administrator	**LOW**	Your current skills are not aligned with DBA roles. Start with the basics—learn SQL thoroughly and understand database concepts like normalization, indexing, and relationships. Practice writing queries and managing sample databases. Familiarity with

		database management systems like MySQL or Oracle will help.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Psychometric	Moderate	1. Familiarize yourself with common psychometric formats. 2. Work on building mental stamina by solving tests in one sitting. 3. Try personality questionnaires honestly without over-engineering responses. 4. Improve vocabulary and reading comprehension skills. 5. Focus on accuracy over speed in the beginning stages.
Verbal	Strong	1. Gradually increase speed and track accuracy improvements. 2. Remove every seventh word and fill missing blanks. 3. Write explicit premises and infer conclusions weekly. 4. Create word collocation clusters and review daily. 5. Rank mistake types and drill top weak areas.
Quantitative Ability	Strong	1. Learn basic formulas and concepts of geometry and algebra. Focus on basic arithmetic operations like addition, subtraction, multiplication, and division. 2. Learn shortcut methods for calculations like multiplication tables and squares. 3. Focus on improving calculation speed and accuracy. Start with simple mock tests to build familiarity with question patterns. 4. Practice data interpretation and data analysis questions. 5. Review and practice weak areas regularly.
Group Discussion	Strong	1. General knowledge needs to be increased. 2. Add more facts & figures in your statements. It is required to support your statements. 3. Clarity of thoughts is required while forming your points. 4. Active listening part needs to be improved. 5. Speak more when it comes to a discussion.
Personal Interview	Strong	1. Deeply introspect and prepare thoughtful answers to personal and career questions.

		2. Research thoroughly about the organization and current industry trends. 3. Strengthen your ability to justify decisions, achievements, and goals. 4. Improve articulation—avoid fillers, and pause to think before speaking. 5. Stay composed under pressure and practice mock interviews with tougher questions.

6.0 Performance Summary:

The student's current performance indicates notable challenges, particularly in Logical Ability, Verbal, and Quantitative domains. While strengths are evident in Group Discussion (GD) and Personal Interview (PI), there's considerable room for improvement in analytical and aptitude-based areas. Focused support through additional training sessions, mock tests, and regular class activities is essential. Proactive mentoring and targeted practice can significantly aid in building foundational skills. With consistent effort and guided strategies, improvement is well within reach.

Corporate Readiness Chart						
PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge

in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the

time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:

4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.

Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements.

		3. Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Corporate Readiness Chart

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

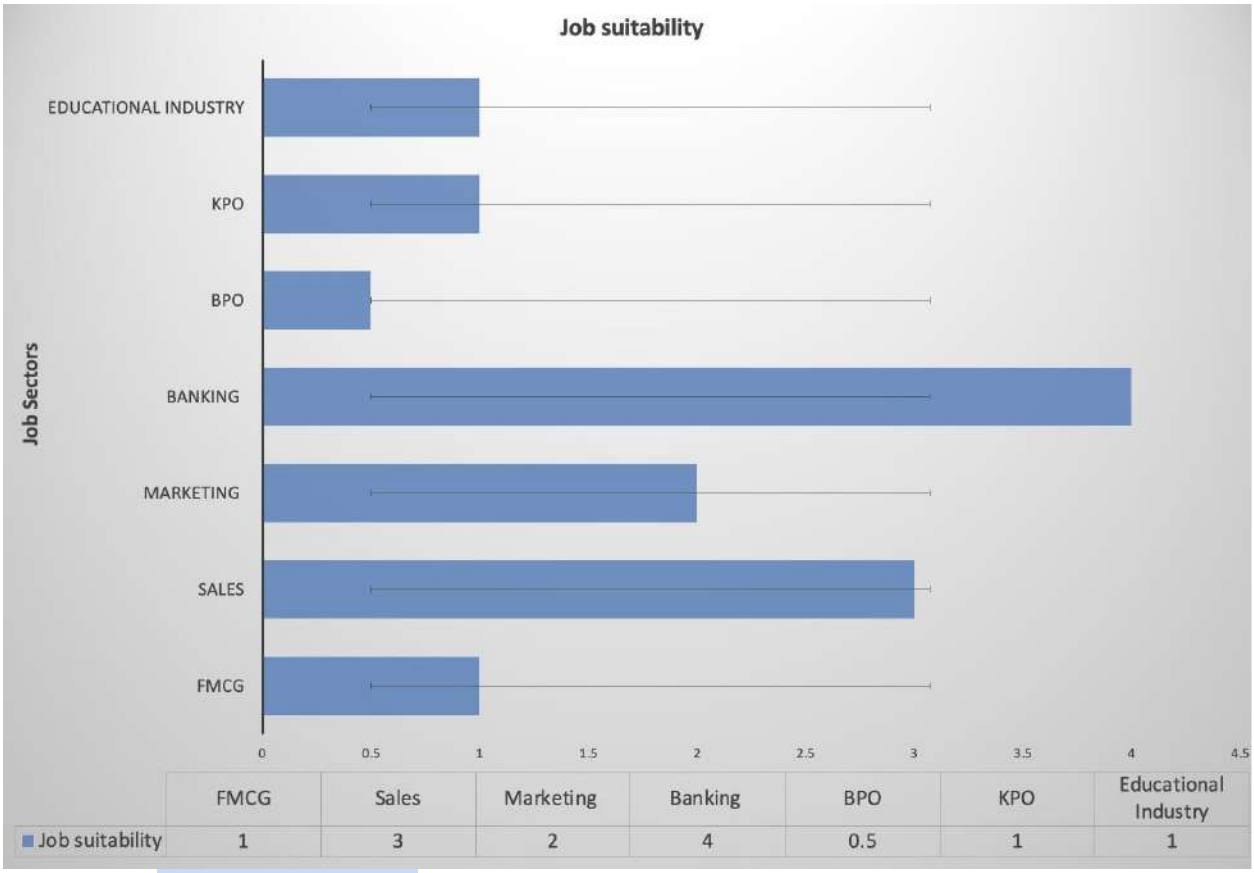
PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:



4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Corporate Readiness Chart

	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

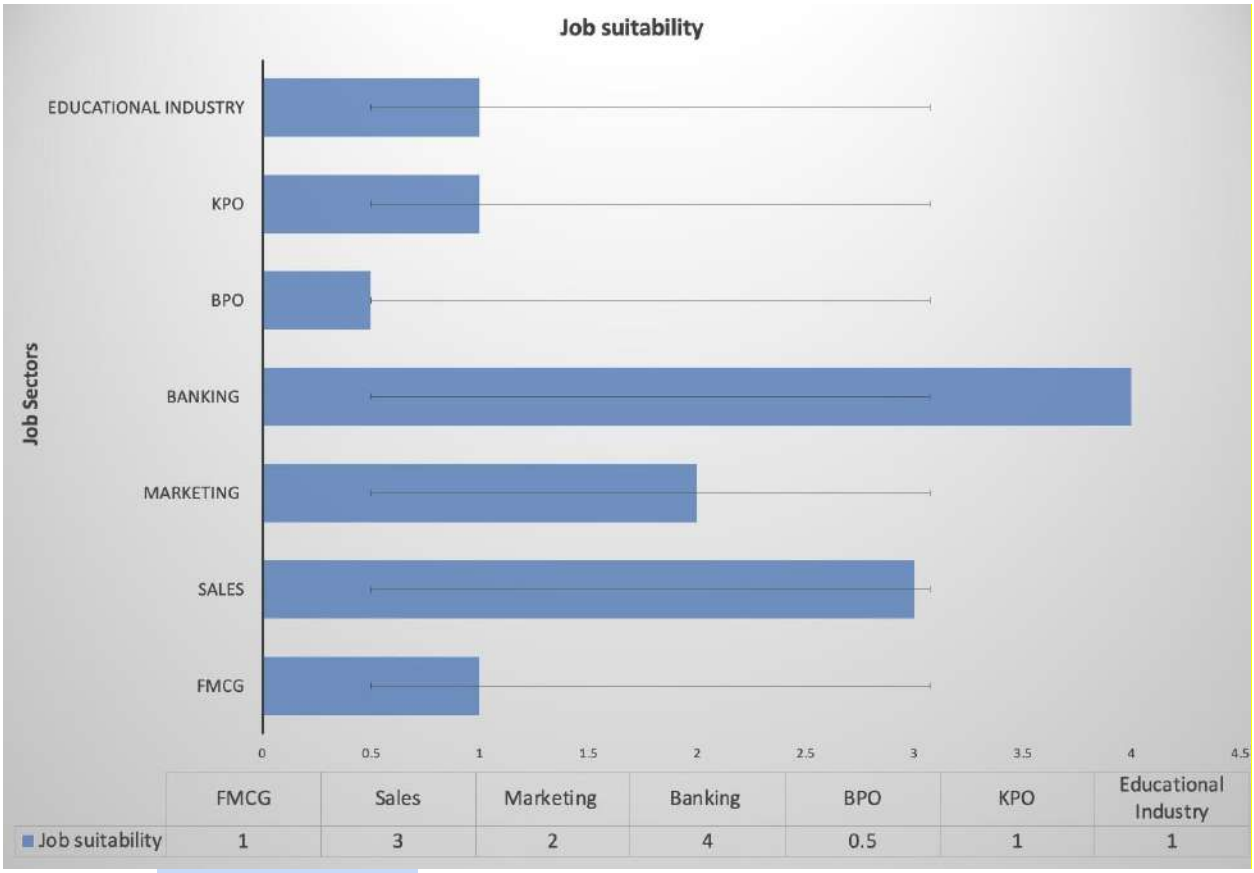
PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:



4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge

in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the

time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

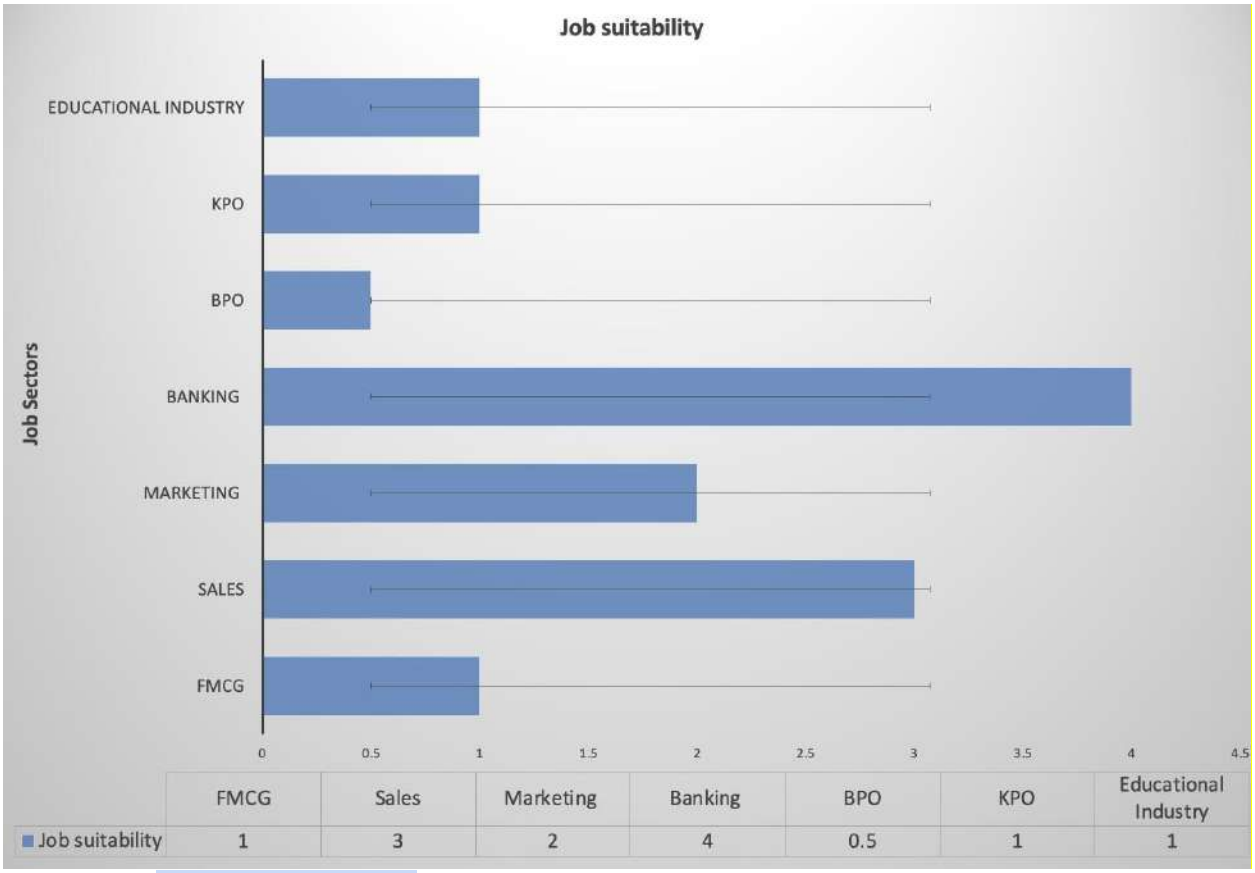
Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:



4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

	Corporate Readiness Chart

	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Quantitative (20)	Subjective Knowledge (20)			A (Dream Company)	10 - 20 Lakh	80 - 89 %

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:

Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge

in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the

time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

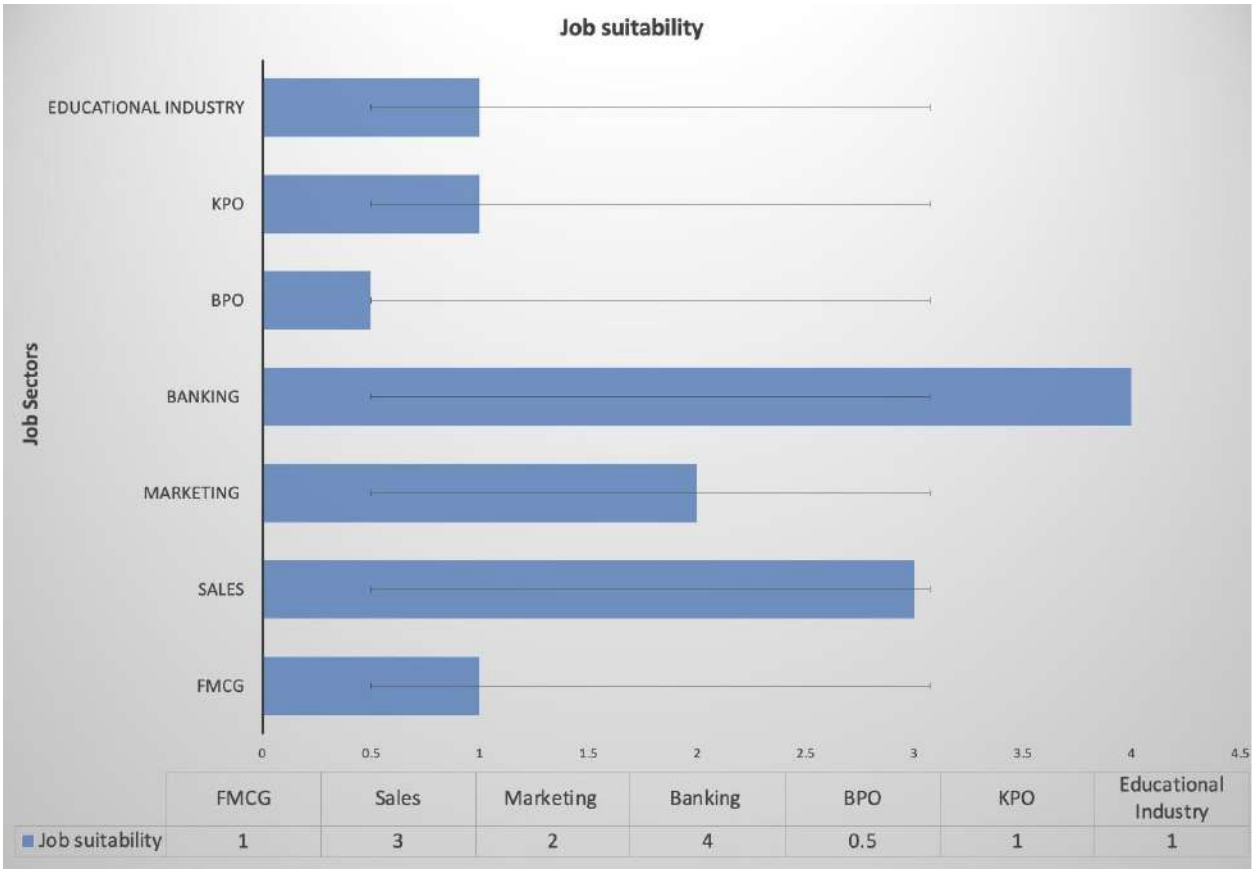
Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:



4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.

Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand.

		2. Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. 3. Conduct tests and quizzes under time constraints. 4. Read and write one page at least on a daily basis. 5. Pay special attention to grammar. 6. Make a phrasebook for yourself.
Quantitative Ability	Strong	1. Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. 2. Shortcut and short tricks to be taken care of. 3. Practice mental calculations. 4. Accuracy plays a key role. 5. Work on conceptual details.
Logical Ability	Strong	1. Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. 2. Practice conditional statements. 3. Filter out your biases. 4. Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive

guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the

time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:

	FMCG	Sales	Marketing	Banking	BPO	KPO	Educational Industry
Job suitability	1	3	2	4	0.5	1	1

4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.

Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand.

		2. Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive

guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance with logical ability is deemed satisfactory. It's evident that you possess a foundational understanding of logical concepts, and you have demonstrated the ability to apply them to a certain extent. You exhibit a reasonable grasp of fundamental logical principles. Your responses indicate that you comprehend the core concepts and can apply them to straightforward scenarios. Consider practicing with more complex logical scenarios. This will enhance your ability to handle intricate situations and will contribute to a more robust skill set. Work on providing clearer explanations for your reasoning process. While you may arrive at the correct answers, articulating your thought process more explicitly can enhance your overall communication of logical reasoning. Engage with a variety of logical reasoning question types. This will expose you to different challenges and further broaden your logical skill set.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

Logical Ability	Moderate	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Strong	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Strong	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student average in Logical ability and poor in Group Discussion (GD) Personal Interview (PI), Logical ability, Verbal and Quantitative ability. He need to put an extra efforts for tremendous difference in his performance. However, additional training sessions and corrective measures are required by him. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. He can also include proactive mentoring sessions for weak areas and review his skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for him to excel in his weak areas. The gain resulting from these training sessions and his continuous efforts will help in overall development and further enhancement of his abilities.

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

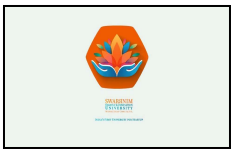
These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.



• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI

		3. Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI

		3. Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Quantitative (20)	Subjective Knowledge (20)			A (Dream Company)	10 - 20 Lakh	80 - 89 %
	Reasoning (20)	Pseudo coding (30)			B (Ideal Company)	6- 10 lakh	70- 79 %

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

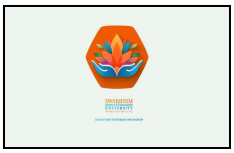
These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.



• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability checkup for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Cap Gemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability.
Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical

ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain - based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:

4.1 Sector Wise:

	FMCG	Sales	Marketing	Banking	BPO	KPO	Educational Industry
Job suitability	0.5	1	1	1	1	1	1

4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**LOW**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**LOW**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Strong	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student average in Group Discussion (GD) and poor in Personal Interview (PI), Logical ability, Verbal and Quantitative ability. He need to put an extra efforts for tremendous difference in his performance. However, additional training sessions and corrective measures are required by him. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. He can also include proactive mentoring sessions for weak areas and review his skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for him to excel in his weak areas. The gain resulting from these training sessions and his continuous efforts will help in overall development and further enhancement of his abilities.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI

		3. Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance with logical ability is deemed satisfactory. It's evident that you possess a foundational understanding of logical concepts, and you have demonstrated the ability to apply them to a certain extent. You exhibit a reasonable grasp of fundamental logical principles. Your responses indicate that you comprehend the core concepts and can apply them to straightforward scenarios. Consider practicing with more complex logical scenarios. This will enhance your ability to handle intricate situations and will contribute to a more robust skill set. Work on providing clearer explanations for your reasoning process. While you may arrive at the correct answers, articulating your thought process more explicitly can enhance your overall communication of logical reasoning. Engage with a variety of logical reasoning question types. This will expose you to different challenges and further broaden your logical skill set.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:

4.1 Sector Wise:

	FMCG	Sales	Marketing	Banking	BPO	KPO	Educational Industry
Job suitability	1	1	1	1.5	1	1	1.5

4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**LOW**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**LOW**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Strong	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student is moderate in Group Discussion (GD) and poor in Personal Interview (PI), Logical ability, Quantitative ability and Verbal. He need to put an extra efforts for tremendous difference in his performance. However, additional training sessions and corrective measures are required by him. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. He can also include proactive mentoring sessions for weak areas and review his skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for him to excel in his weak areas. The gain resulting from these training sessions and his continuous efforts will help in overall development and further enhancement of his abilities.

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability checkup for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Cap Gemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability.
Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical

ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• **Knowledge Process Outsourcing (KPO) Companies**

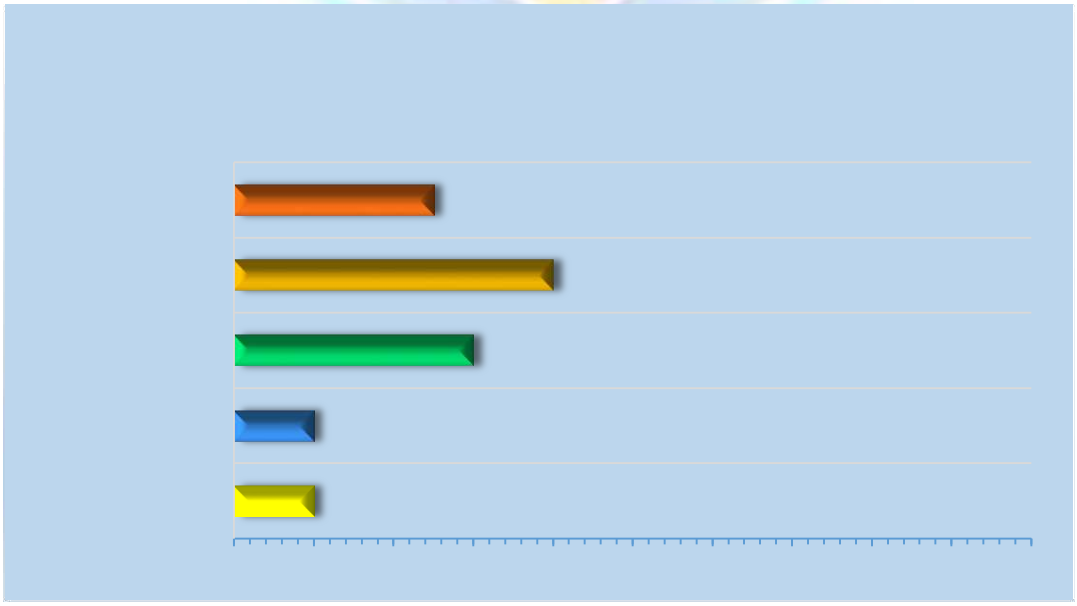
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain- based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.

Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI

		3. Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

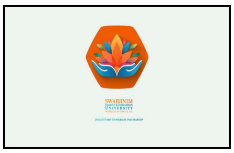
That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.



• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

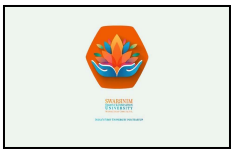
Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI

		3. Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Quantitative (20)	Subjective Knowledge (20)			A (Dream Company)	10 - 20 Lakh	80 - 89 %
	Reasoning (20)	Pseudo coding (30)			B (Ideal Company)	6- 10 lakh	70- 79 %
	Verbal (20)	Programming (30)			C (Good Company)	3-6 Lakh	60 - 69 %
	GD (20)	Technical Interview (20)			D (Average Company)	Below 3 lakh	50 - 59 %
	PI (20)				E (Not Fit for Corporate)	NFC	Less than 50 %



Wishing you all the very best for your future endeavors!!!!

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability checkup for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Cap Gemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability.
Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical

ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain - based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your effort and performance with the PI round was good. The preparations were evident, and you demonstrated several positive qualities throughout the round. You presented yourself in a professional manner, demonstrating a level of maturity and confidence. While your responses were generally clear, consider delving deeper into your answers. Providing more detailed examples or expanding on certain points can showcase a more comprehensive understanding of the topics. If faced with a question that is unclear, don't hesitate to seek clarification. It shows your commitment to understanding the question thoroughly and ensures your responses are on target. Remember, improvement is a continuous process, and I believe that with focused effort, you can excel in future interviews. Wishing you all the very best!

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI

		3. Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

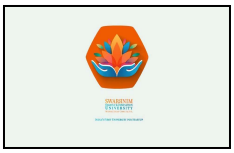
These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.



• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI

		3. Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:

4.1 Sector Wise:

4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**LOW**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**LOW**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Strong	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student average in Group Discussion (GD) and poor in Personal Interview (PI), Logical ability, Verbal and Quantitative ability. He need to put an extra efforts for tremendous difference in his performance. However, additional training sessions and corrective measures are required by him. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. He can also include proactive mentoring sessions for weak areas and review his skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for him to excel in his weak areas. The gain resulting from these training sessions and his continuous efforts will help in overall development and further enhancement of his abilities.

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

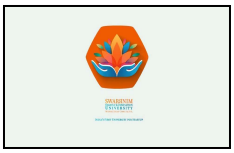
These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain- based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.



• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

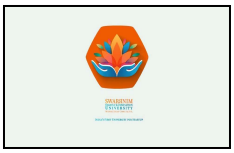
These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.



• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI

		3. Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Quantitative (20)	Subjective Knowledge (20)			A (Dream Company)	10 - 20 Lakh	80 - 89 %

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

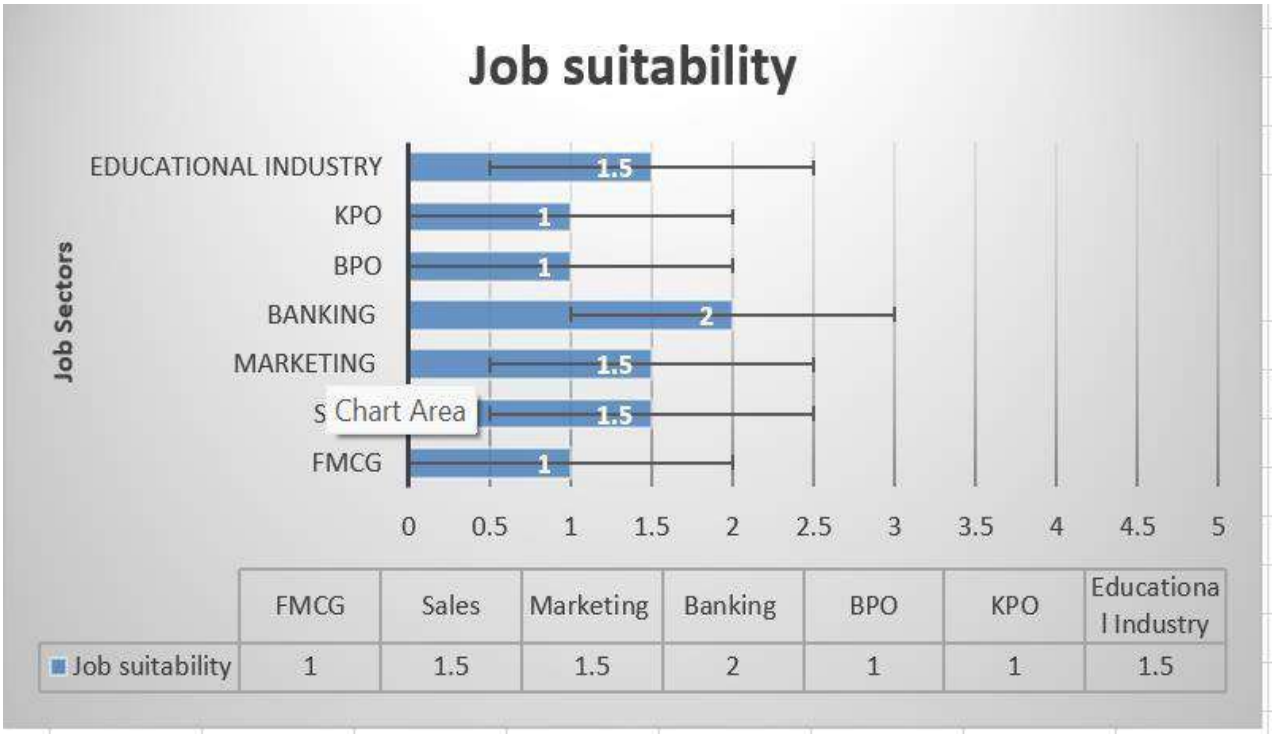
It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:

4.1 Sector Wise:



4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.

day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance with logical ability is deemed satisfactory. It's evident that you possess a foundational understanding of logical concepts, and you have demonstrated the ability to apply them to a certain extent. You exhibit a reasonable grasp of fundamental logical principles. Your responses indicate that you comprehend the core concepts and can apply them to straightforward scenarios. Consider practicing with more complex logical scenarios. This will enhance your ability to handle intricate situations and will contribute to a more robust skill set. Work on providing clearer explanations for your reasoning process. While you may arrive at the correct answers, articulating your thought process more explicitly can enhance your overall communication of logical reasoning. Engage with a variety of logical reasoning question types. This will expose you to different challenges and further broaden your logical skill set.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:

	FMCG	Sales	Marketing	Banking	BPO	KPO	Educational Industry
Job suitability	1	2	2	2	1	1	2

4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**MEDIUM**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**LOW**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**MEDIUM**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Moderate	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Logical ability, Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability checkup for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Cap Gemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability.
Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical

ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

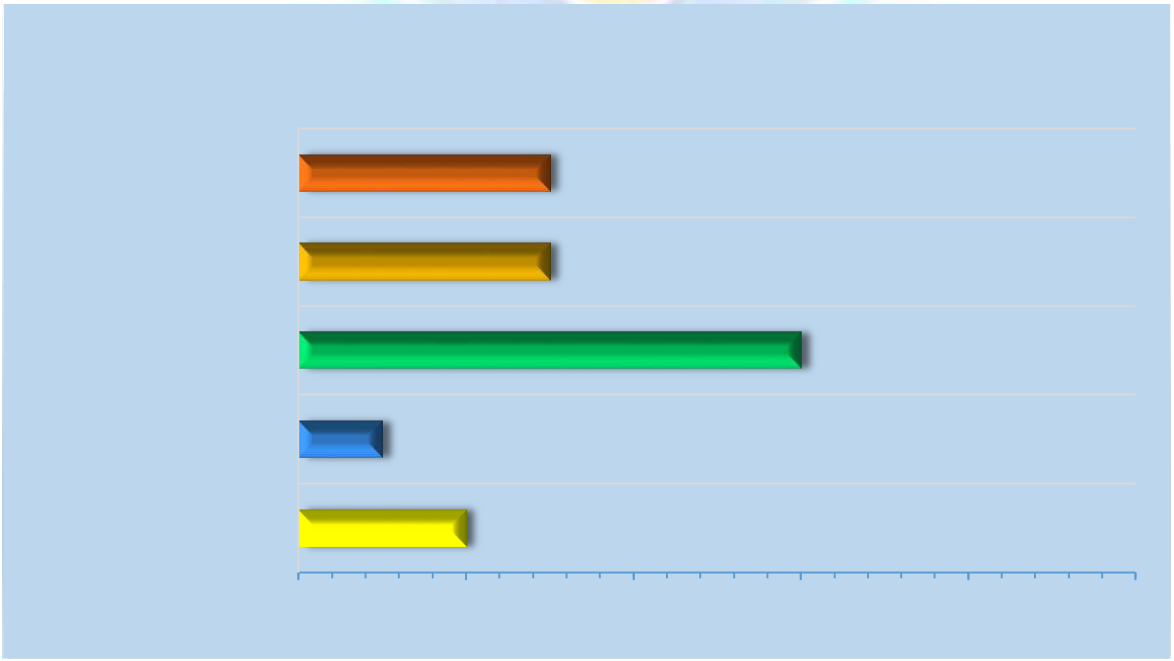
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain- based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance with logical ability is deemed satisfactory. It's evident that you possess a foundational understanding of logical concepts, and you have demonstrated the ability to apply them to a certain extent. You exhibit a reasonable grasp of fundamental logical principles. Your responses indicate that you comprehend the core concepts and can apply them to straightforward scenarios. Consider practicing with more complex logical scenarios. This will enhance your ability to handle intricate situations and will contribute to a more robust skill set. Work on providing clearer explanations for your reasoning process. While you may arrive at the correct answers, articulating your thought process more explicitly can enhance your overall communication of logical reasoning. Engage with a variety of logical reasoning question types. This will expose you to different challenges and further broaden your logical skill set.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:

4.1 Sector Wise:

	FMCG	Sales	Marketing	Banking	BPO	KPO	Educational Industry

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

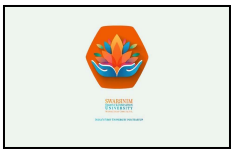
These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.



• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

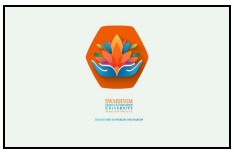
Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI

		3. Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Quantitative (20)	Subjective Knowledge (20)			A (Dream Company)	10 - 20 Lakh	80 - 89 %
	Reasoning (20)	Pseudo coding (30)			B (Ideal Company)	6- 10 lakh	70- 79 %
	Verbal (20)	Programming (30)			C (Good Company)	3-6 Lakh	60 - 69 %
	GD (20)	Technical Interview (20)			D (Average Company)	Below 3 lakh	50 - 59 %
	PI (20)				E (Not Fit for Corporate)	NFC	Less than 50 %



Wishing you all the very best for your future endeavors!!!!

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Strong	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Strong	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student is poor in all. He need to put an extra efforts for tremendous difference in his performance. However, additional training sessions and corrective measures are required by him. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. He can also in clude proactive mentoring sessions for weak areas and review his skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for him to excel in his weak areas. The gain resulting from these training sessions and his continuous efforts will help in overall development and further enhancement of his abilities.

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability checkup for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Cap Gemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability.
Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical

ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

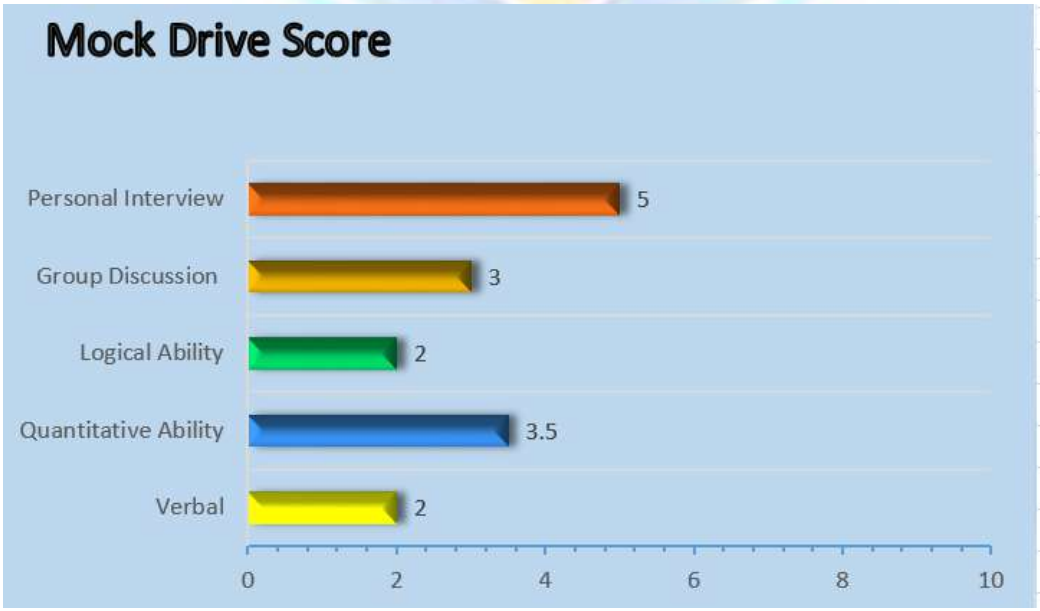
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain- based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

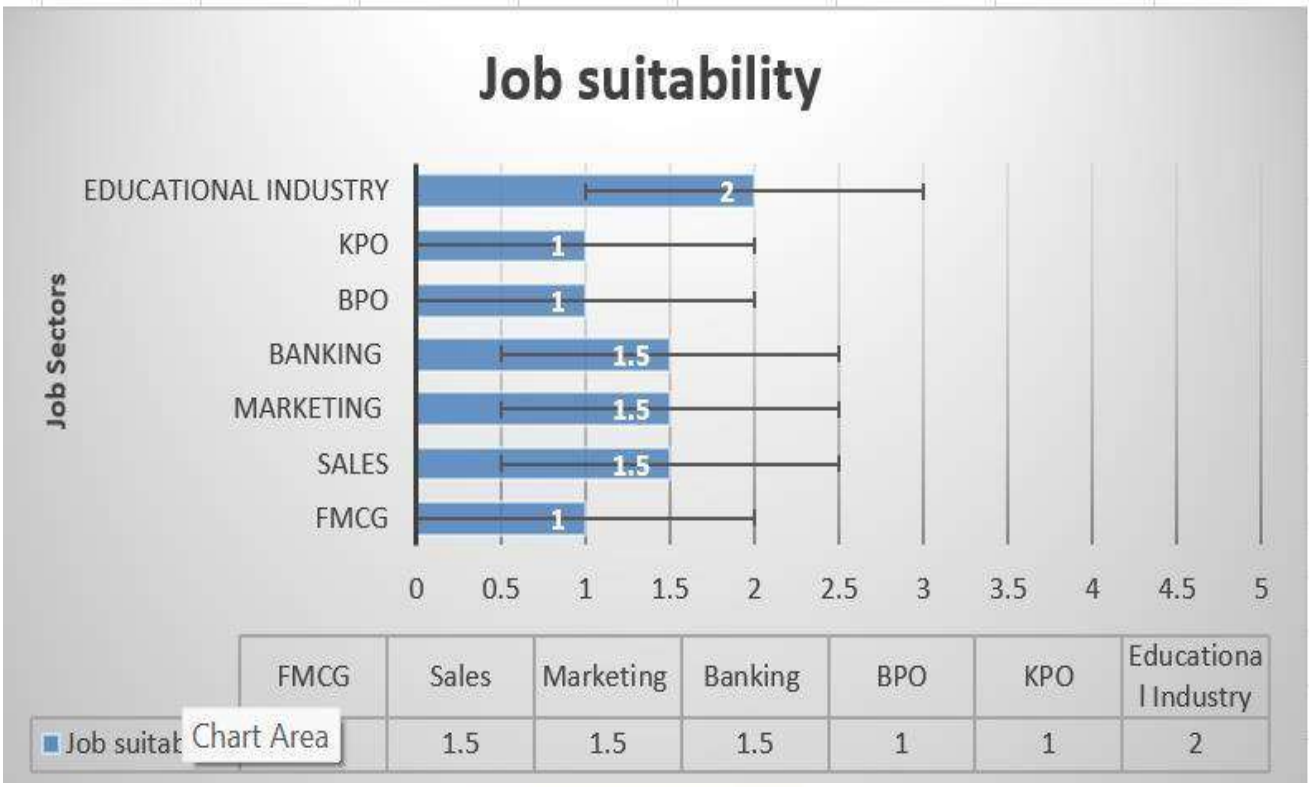
PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:



4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**LOW**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**MEDIUM**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**LOW**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Strong	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student is moderate in Personal Interview (PI), but low in Group Discussion (GD), Logical and Quantitative ability and in Verbal. She need to put an extra efforts for tremendous difference in his performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review his skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in his weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain - based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance with logical ability is deemed satisfactory. It's evident that you possess a foundational understanding of logical concepts, and you have demonstrated the ability to apply them to a certain extent. You exhibit a reasonable grasp of fundamental logical principles. Your responses indicate that you comprehend the core concepts and can apply them to straightforward scenarios. Consider practicing with more complex logical scenarios. This will enhance your ability to handle intricate situations and will contribute to a more robust skill set. Work on providing clearer explanations for your reasoning process. While you may arrive at the correct answers, articulating your thought process more explicitly can enhance your overall communication of logical reasoning. Engage with a variety of logical reasoning question types. This will expose you to different challenges and further broaden your logical skill set.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is **LOW.** One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

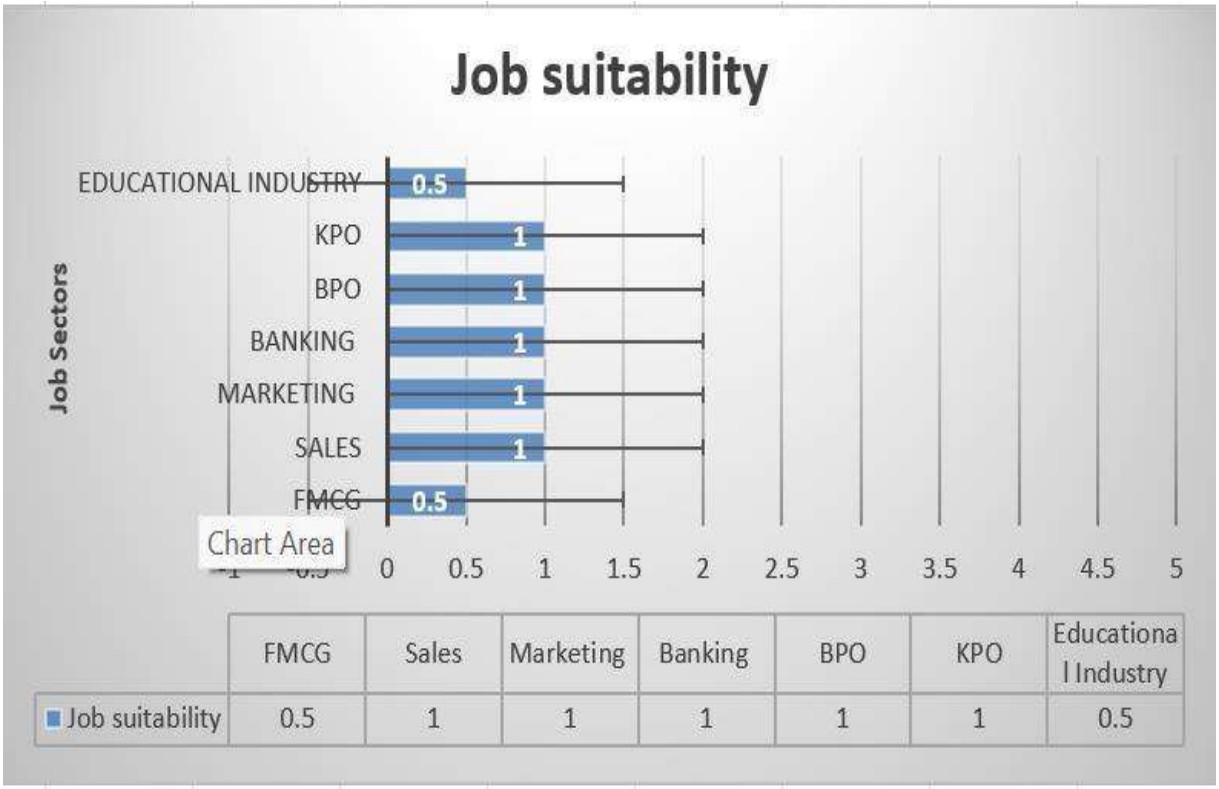
PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:

4.1 Sector Wise:



4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**LOW**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**LOW**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Strong	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. 4. Need to work upon body language. 5. Active listening part needs to be improved.
Personal Interview	Strong	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student is poor in all. She need to put an extra efforts for tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review his skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

	Corporate Readiness Chart

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability checkup for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Cap Gemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability.
Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical

ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain - based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. Your comprehension skills are developing, and you demonstrate an understanding of the main ideas in the passages. You are able to identify some key details and draw connections within the text. Consider expanding your vocabulary to express ideas more precisely. Utilize resources such as word lists, reading diverse materials, and incorporating new words into your everyday language. Work on deeper analysis of the passages. Try to identify the author's purpose, tone, and underlying themes. This will not only improve your comprehension but also strengthen your ability to interpret complex texts. Pay attention to the structure of your sentences. Vary sentence lengths and employ a mix of simple and complex sentences to enhance the flow of your writing.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each

day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Congratulations on achieving a 'GOOD' score! Your performance indicates a solid foundation in logical reasoning, and you're on the right track. Your ability to analyze and interpret information logically is commendable. It's clear that you have a good grasp of the fundamental principles. Your aptitude for problem-solving is evident in your responses. You show promise in approaching challenges with a logical mindset. While your responses demonstrate a strong understanding of logic, consider focusing on time management during the assessment. Allocate time strategically to ensure you can address all questions without feeling rushed. Challenge yourself with more complex logical scenarios. This will not only enhance your problem-solving skills but also prepare you for a broader range of challenges. Explore a variety of logical puzzles and problems outside of the assessment format. Engaging with different types of problems will help you develop a more versatile skill set. Remember, improvement is a journey, and you 've already made great strides. Keep up the good work!

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Moderate	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Moderate	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is quite good in Personal Interview (PI), Group Discussion (GD), Verbal and Logical ability, which is highly appreciable but very low in Quantitative ability. Whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability checkup for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

- **Large Services Companies**

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Cap Gemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability.
Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical

ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain - based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:

4.1 Sector Wise:

	FMCG	Sales	Marketing	Banking	BPO	KPO	Educational Industry
Job suitability	0.5	1	1	1	1	1	1

4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**LOW**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**LOW**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Strong	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student average in Group Discussion (GD) and poor in Personal Interview (PI), Logical ability, Verbal and Quantitative ability. He need to put an extra efforts for tremendous difference in his performance. However, additional training sessions and corrective measures are required by him. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. He can also include proactive mentoring sessions for weak areas and review his skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for him to excel in his weak areas. The gain resulting from these training sessions and his continuous efforts will help in overall development and further enhancement of his abilities.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI

		3. Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Quantitative (20)	Subjective Knowledge (20)			A (Dream Company)	10 - 20 Lakh	80 - 89 %

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

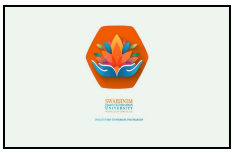
These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.



• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies
These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies
These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies
These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI

		3. Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI

		3. Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

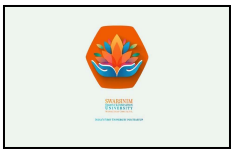
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.



• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

Infosys, Accenture, TCS, Cognizant, Cap Gemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

- **Product or Core Technology Companies**

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

- **Hardware and Networking Companies**

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability.
Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical

ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

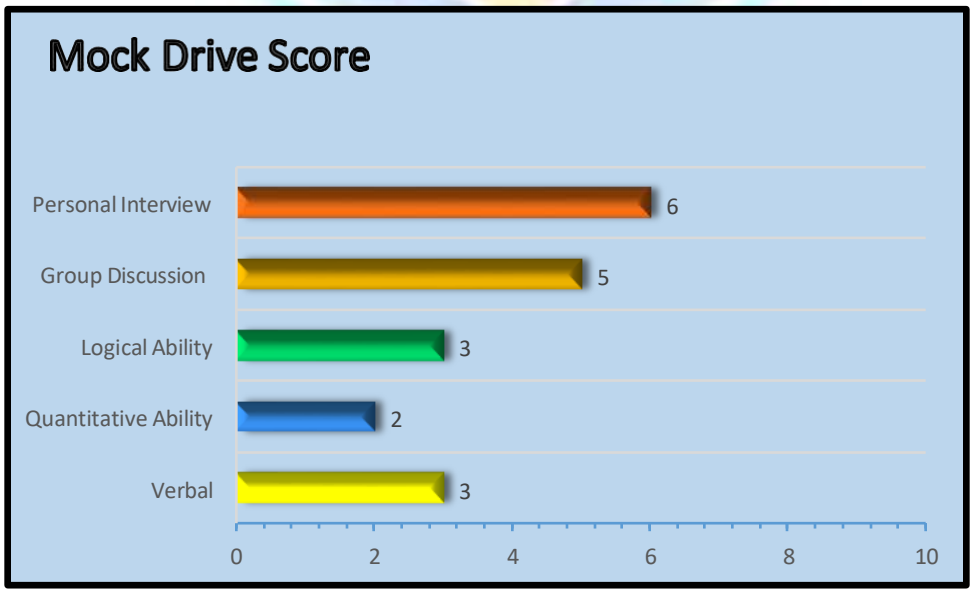
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain - based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:

Job suitability	1	3	3	2	2	2	3

4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**LOW**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. He has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in his performance. However, additional training sessions and corrective measures are required by him. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. He can also include proactive mentoring sessions for weak areas and review his skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

	Corporate Readiness Chart

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

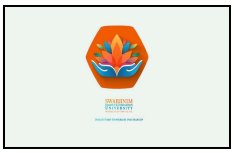
These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.



• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

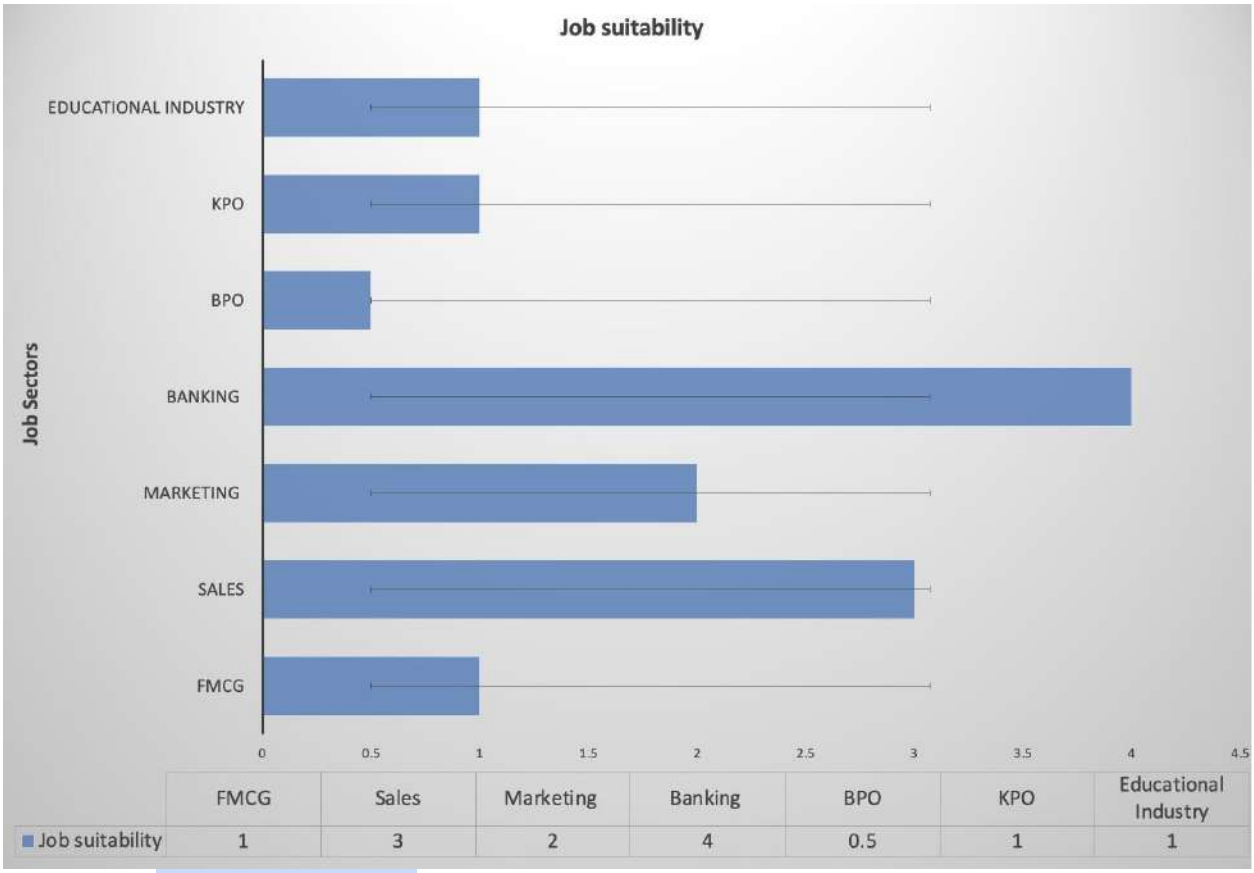
PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:



4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain- based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back-office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

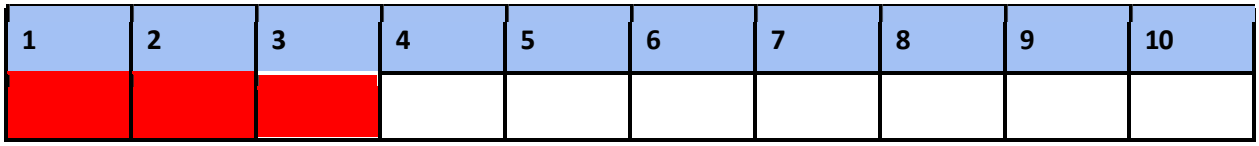
- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

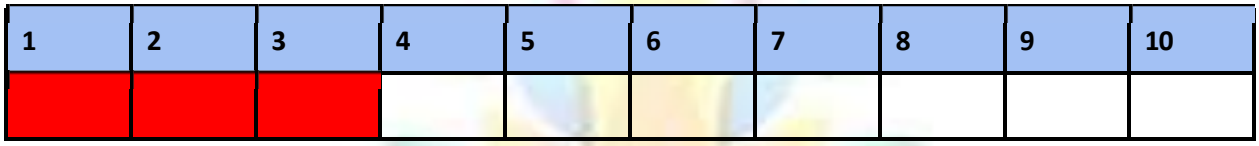
This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL



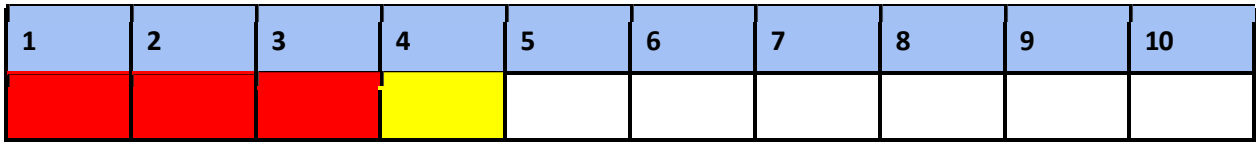
Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY



While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

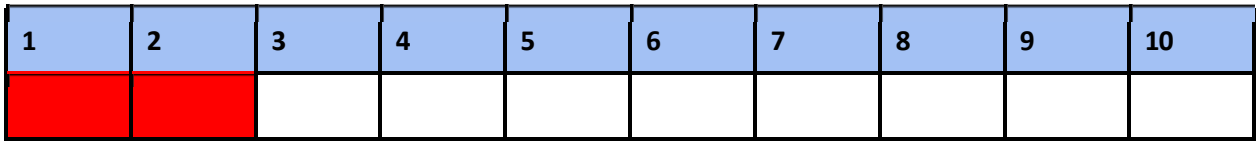
LOGICAL ABILITY



Your performance with logical ability is deemed satisfactory. It's evident that you possess a foundational understanding of logical concepts, and you have demonstrated the ability to apply them to a certain extent. You exhibit a reasonable grasp of fundamental logical principles. Your responses indicate that you comprehend the core concepts and can apply them to straightforward scenarios. Consider practicing with more complex logical scenarios. This will enhance your ability to handle intricate situations and will

contribute to a more robust skill set. Work on providing clearer explanations for your reasoning process. While you may arrive at the correct answers, articulating your thought process more explicitly can enhance your overall communication of logical reasoning. Engage with a variety of logical reasoning question types. This will expose you to different challenges and further broaden your logical skill set.

GROUP DISCUSSION



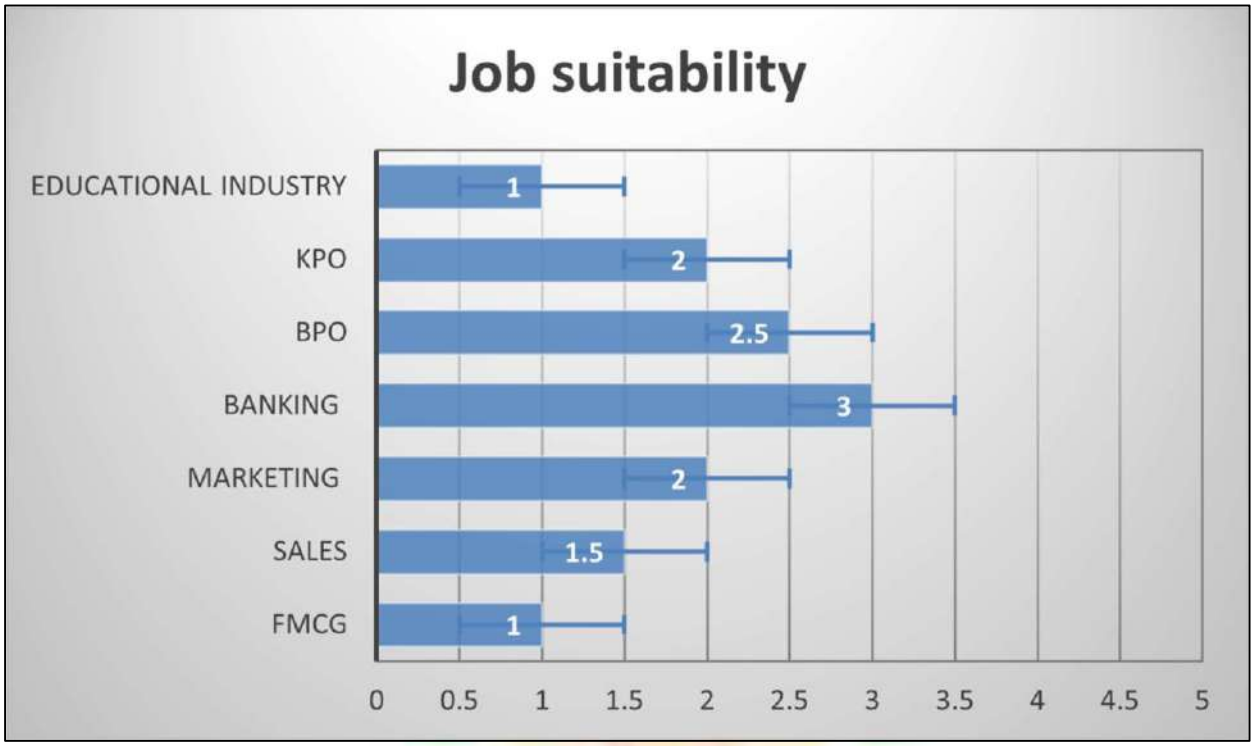
Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:

4.1 Sector Wise:



4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**MEDIUM**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

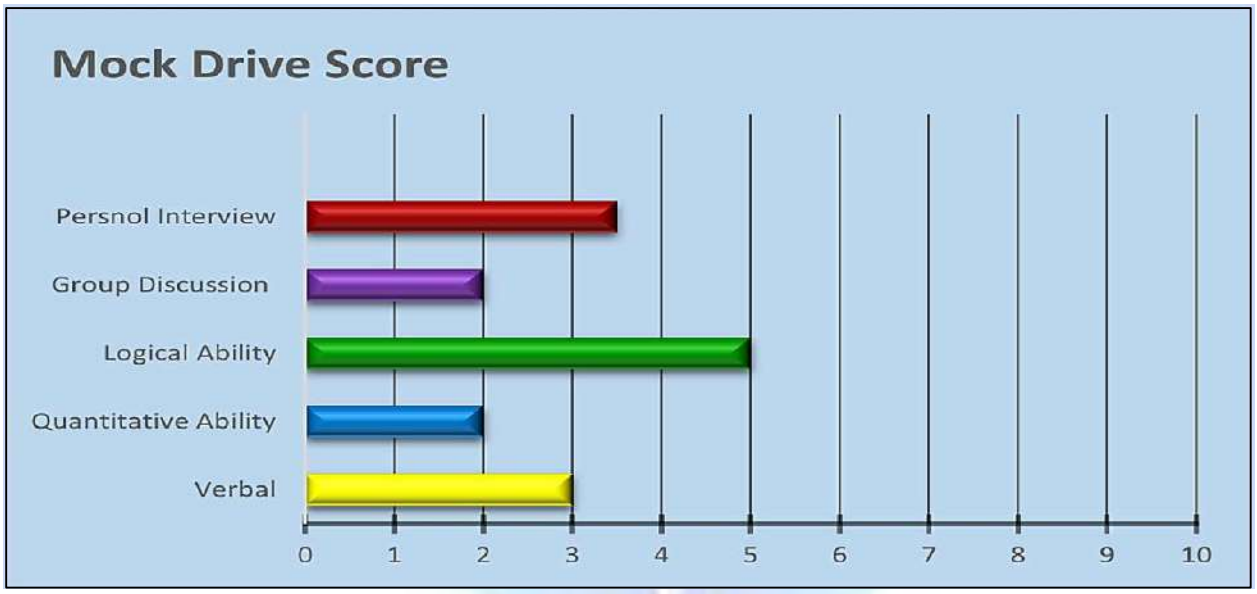
• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back- office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

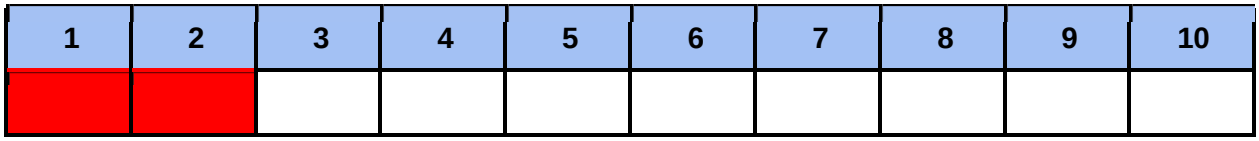
LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance with logical ability is deemed satisfactory. It's evident that you possess a foundational understanding of logical concepts, and you have demonstrated the ability to apply them to a certain extent. You exhibit a reasonable grasp of fundamental logical principles. Your responses indicate that you comprehend the core concepts and can apply them to straightforward scenarios. Consider practicing with more complex logical scenarios. This will enhance your ability to handle intricate situations and will contribute to a more robust skill set. Work on providing clearer explanations for your reasoning process.

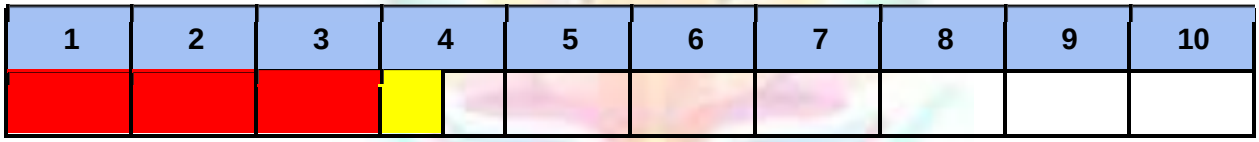
While you may arrive at the correct answers, articulating your thought process more explicitly can enhance your overall communication of logical reasoning. Engage with a variety of logical reasoning question types. This will expose you to different challenges and further broaden your logical skill set.

GROUP DISCUSSION



Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

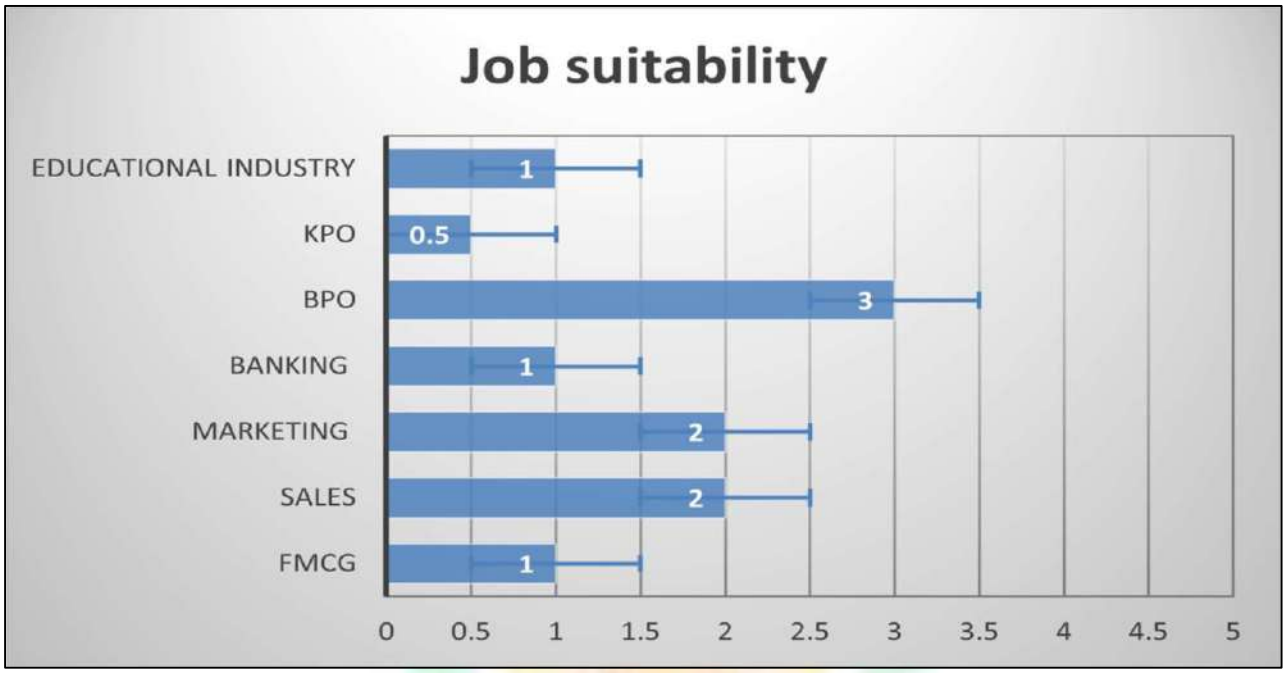
PERSONAL INTERVIEW



It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:

4.1 Sector Wise:



4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**LOW**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

	Corporate Readiness Chart

Course:	*BBA*
Date:	*17/02/2022*

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

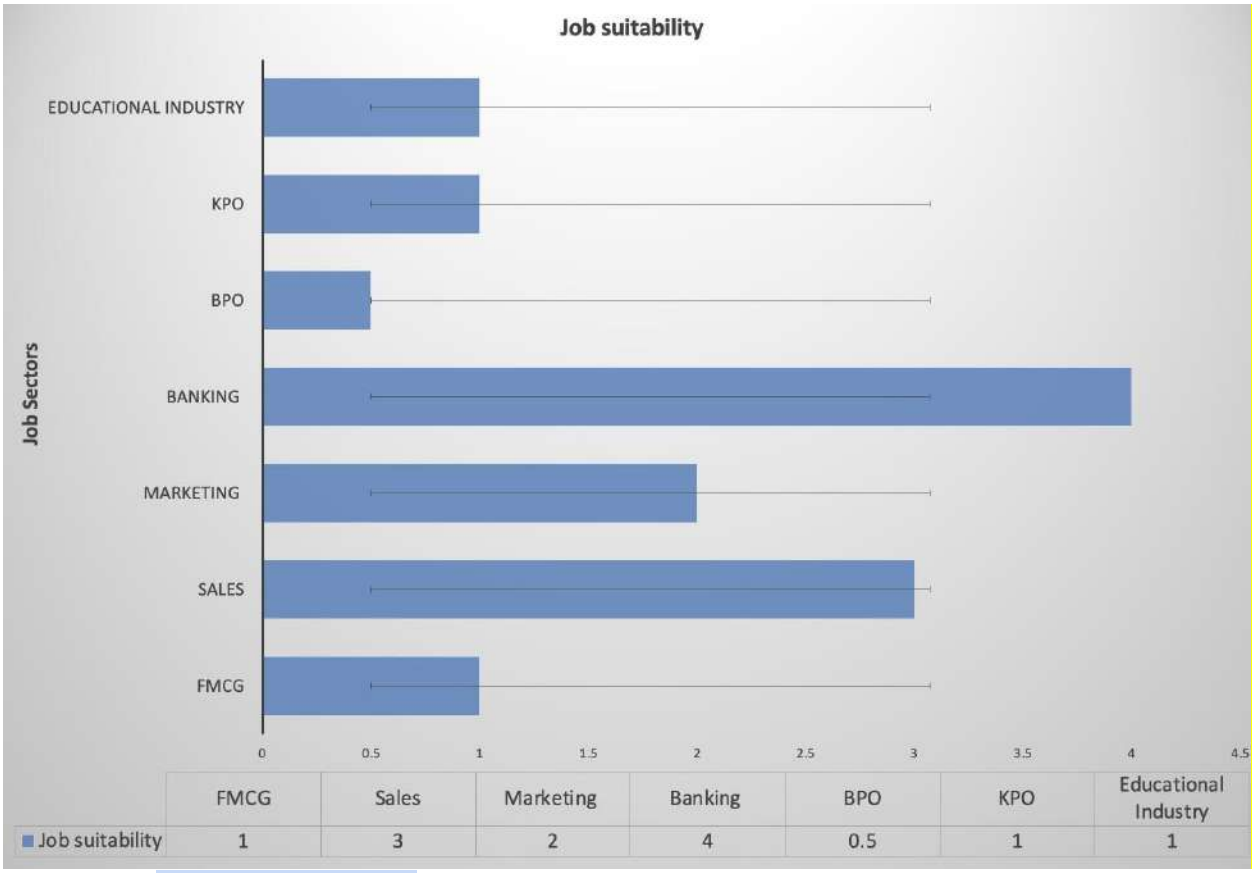
PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:



4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check-up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large-scale service-based companies.

• Product or Core Technology Companies

These types of product-based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product-based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain- based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

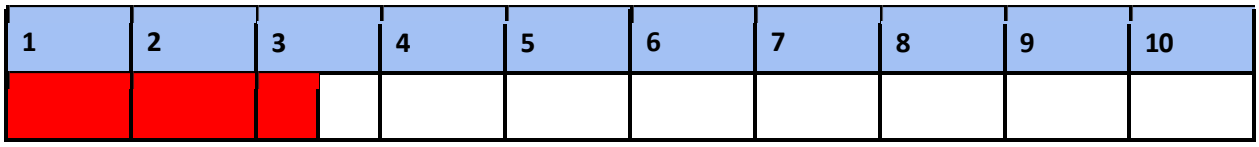
LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

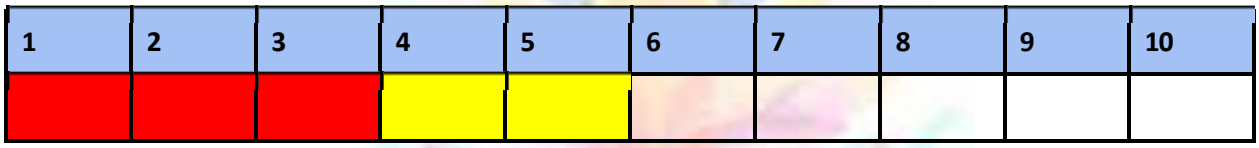
often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION



Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

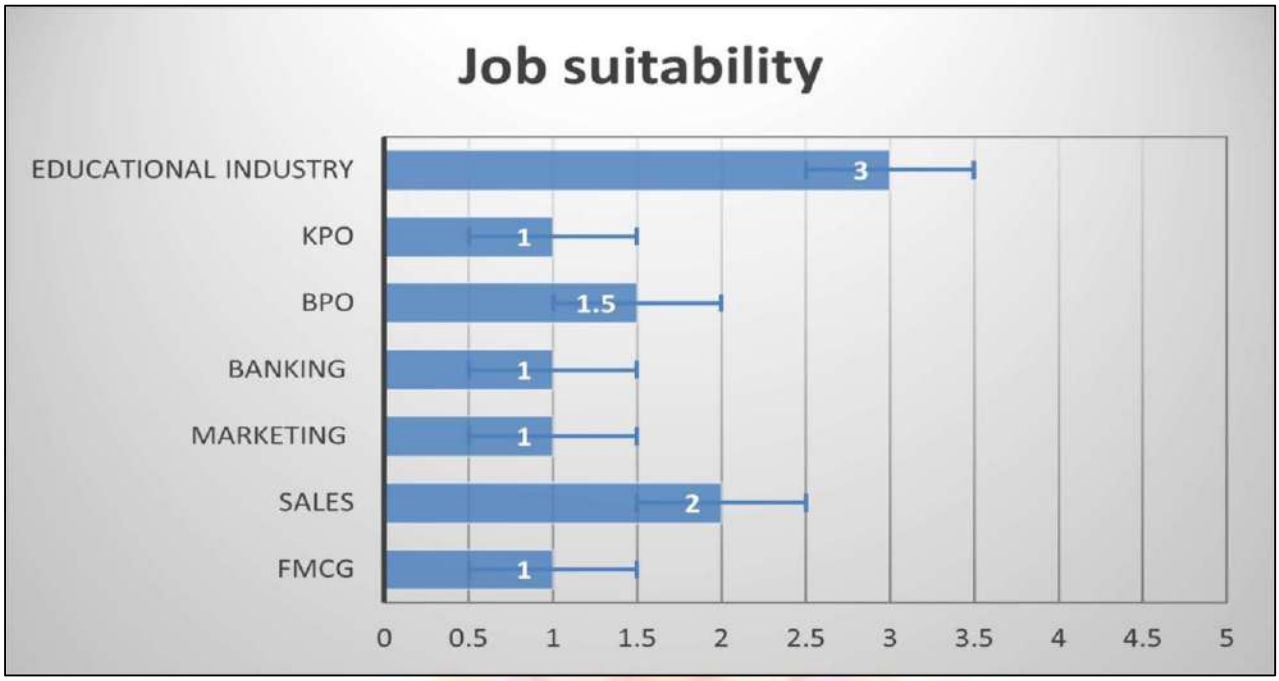
PERSONAL INTERVIEW



Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:



4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**MEDIUM**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**LOW**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**MEDIUM**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

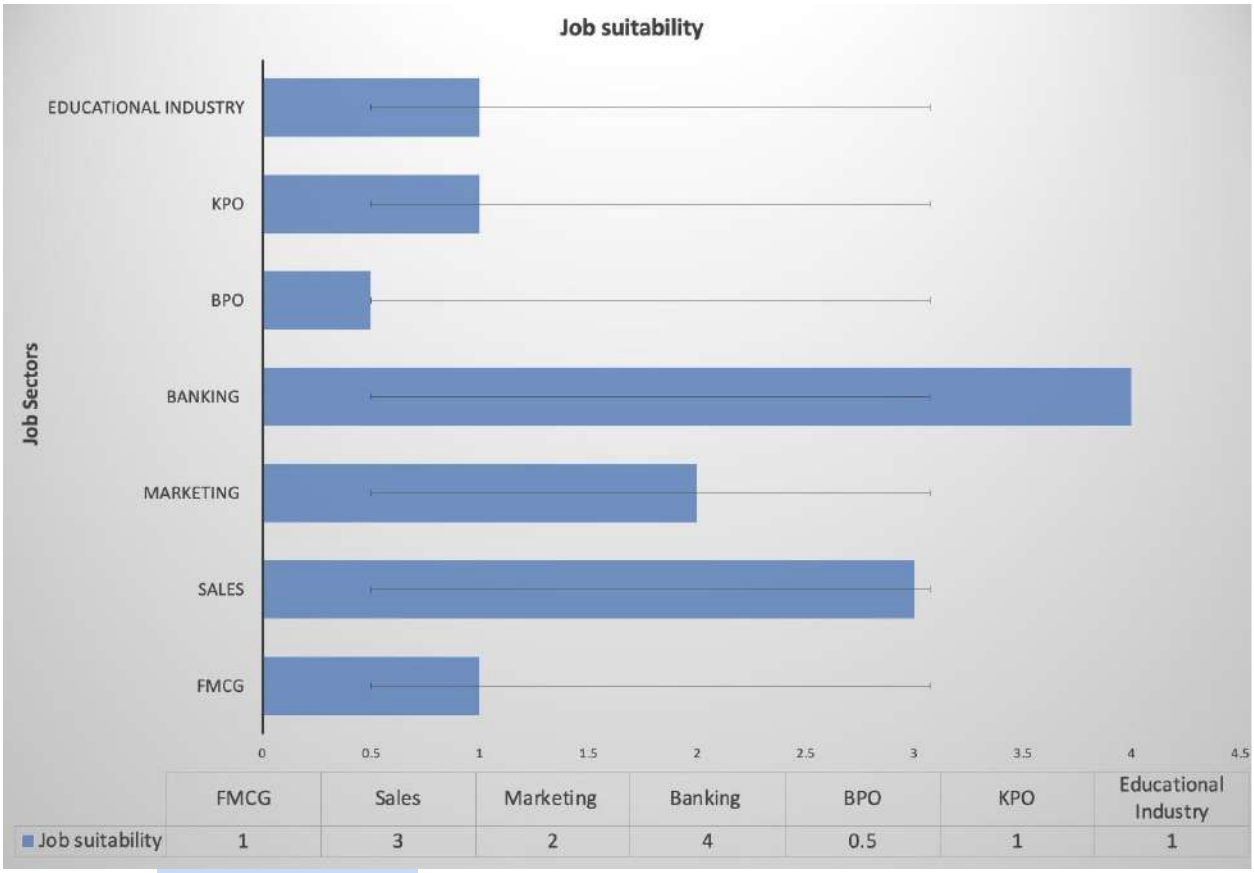
PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:



4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge

in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the

time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:

	FMCG	Sales	Marketing	Banking	BPO	KPO	Educational Industry
Job suitability	1	3	2	4	0.5	1	1

4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.

Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand.

		2. Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive

guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

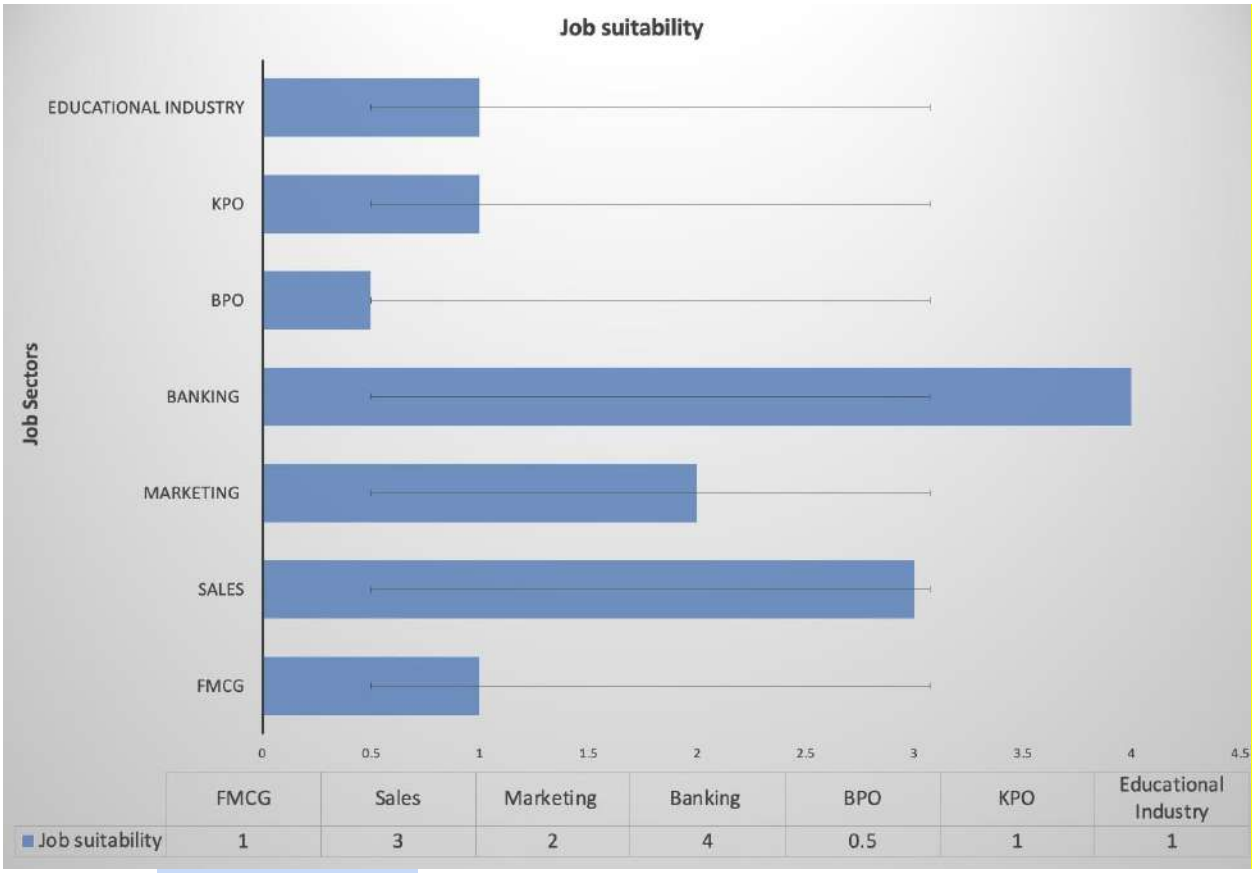
Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:



4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge

in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the

time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:

4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Corporate Readiness Chart

	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Quantitative (20)	Subjective Knowledge (20)			A (Dream Company)	10 - 20 Lakh	80 - 89 %

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

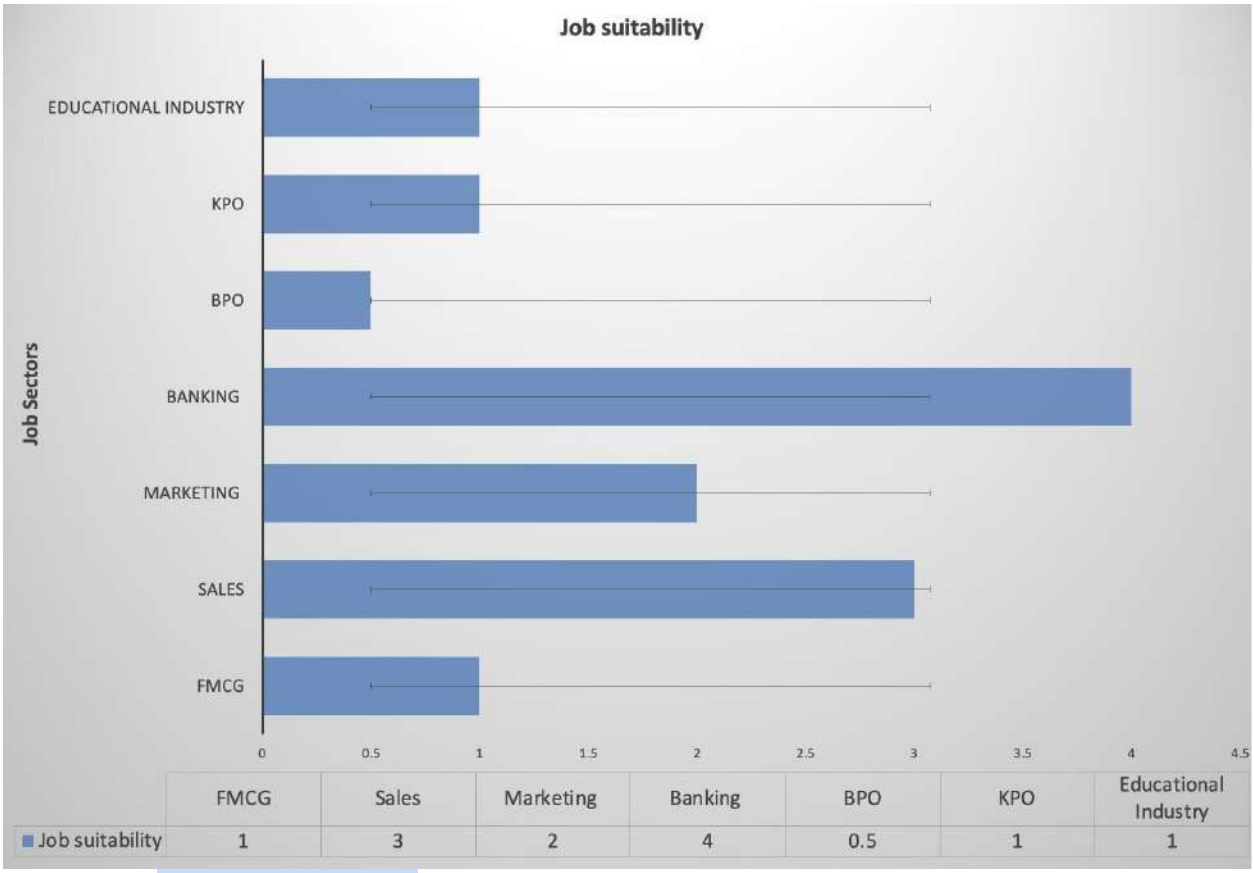
Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:



4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

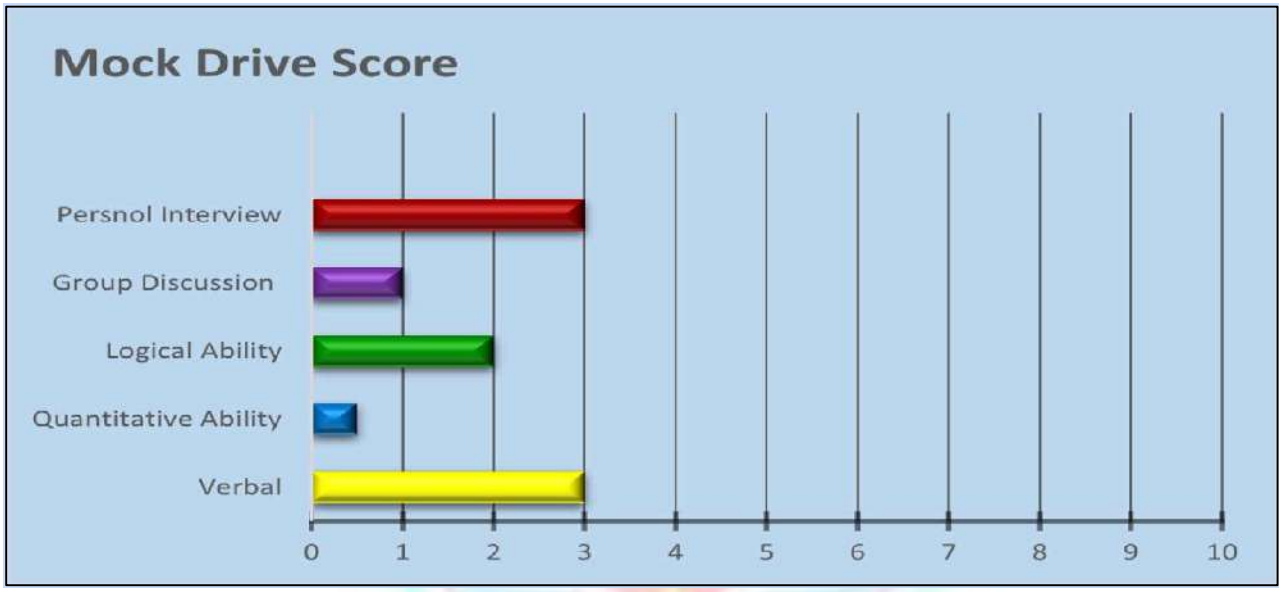
The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

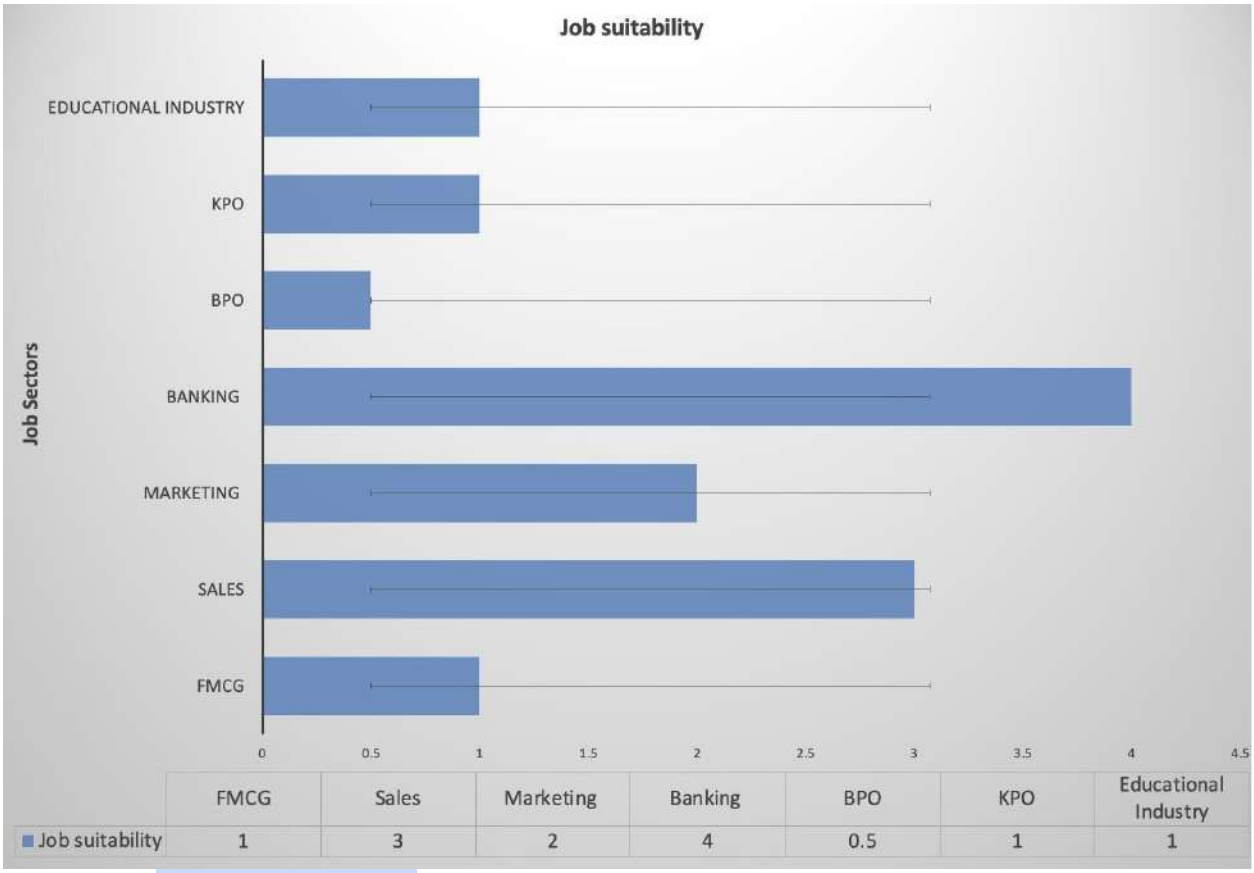
Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:



4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

	Corporate Readiness Chart

	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Quantitative (20)	Subjective Knowledge (20)			A (Dream Company)	10 - 20 Lakh	80 - 89 %
	Reasoning (20)	Pseudo coding (30)			B (Ideal Company)	6- 10 lakh	70- 79 %
	Verbal (20)	Programming (30)			C (Good Company)	3-6 Lakh	60 - 69 %
	GD (20)	Technical Interview (20)			D (Average Company)	Below 3 lakh	50 - 59 %
	PI (20)				E (Not Fit for Corporate)	NFC	Less than 50 %

Course:	*BBA SEM-1*
Date:	*17/02/2022*

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability checkup for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report
give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants
over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc. are some of the major large-scale service-based companies.

• Product or Core Technology Companies

These types of product-based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop them own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product-based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help

manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain- based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back- office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

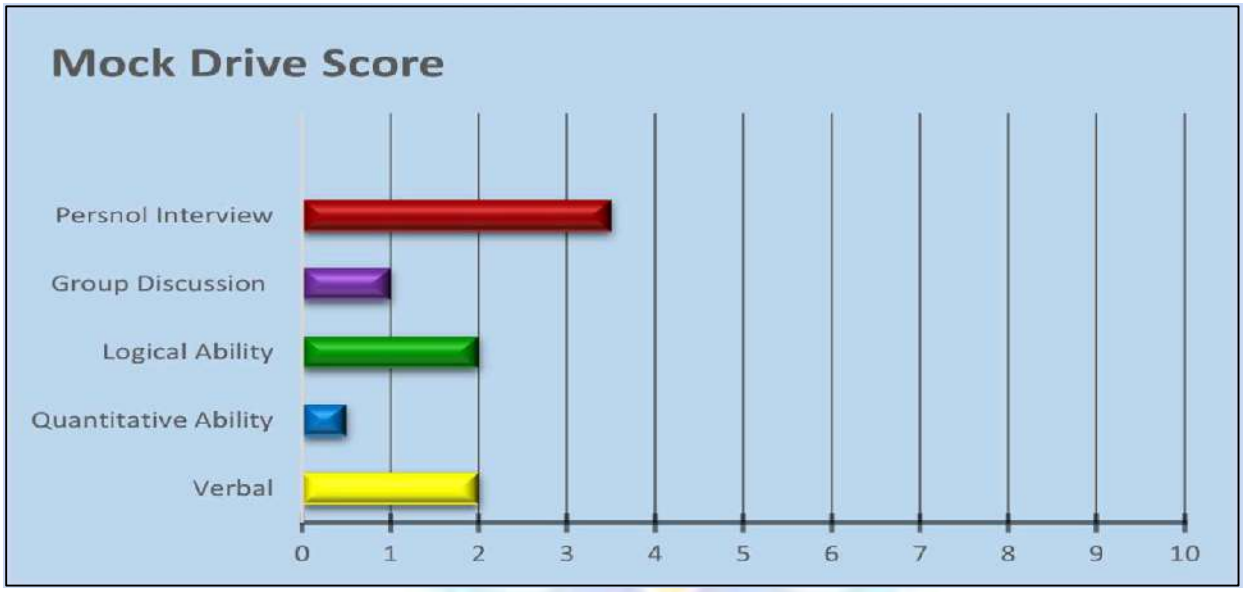
3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

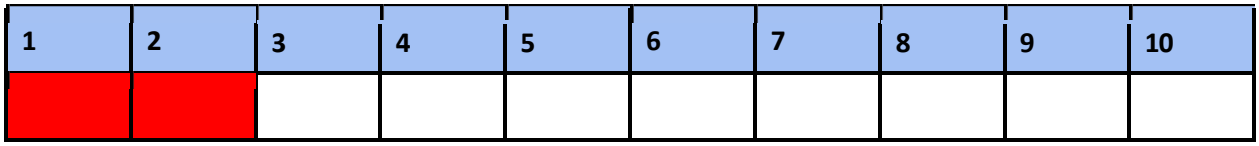


3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

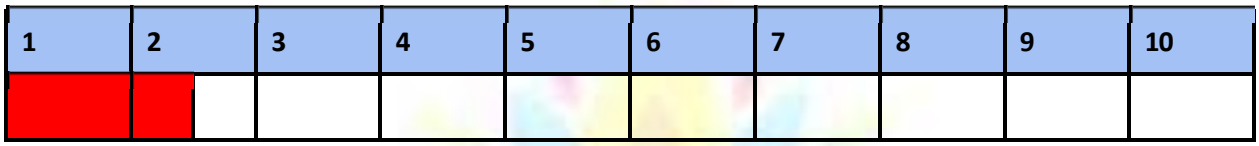
This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL



Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY



While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

Your performance with logical ability is deemed satisfactory. It's evident that you possess a foundational understanding of logical concepts, and you have demonstrated the ability to apply them to a certain extent. You exhibit a reasonable grasp of fundamental logical principles. Your responses indicate that you comprehend the core concepts and can apply them to straightforward scenarios. Consider practicing with more complex logical scenarios. This will enhance your ability to handle intricate situations and will contribute to a more robust skill set. Work on providing clearer explanations for your reasoning process.

While you may arrive at the correct answers, articulating your thought process more explicitly can enhance your overall communication of logical reasoning. Engage with a variety of logical reasoning question types. This will expose you to different challenges and further broaden your logical skill set.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Your performance with group discussion is LOW. One area that stood out for improvement is the clarity of your expression. Ensure that your ideas are communicated in a clear and concise manner. Take a moment to organize your thoughts before speaking to avoid any confusion among your peers. It's important to stay on topic during a group discussion. Try to relate your points directly to the topic at hand and avoid straying into unrelated areas. This ensures that your contributions add value to the overall discussion. While it's great that you actively participated, be mindful of the balance in your contributions. Ensure that you give others an opportunity to express their thoughts and avoid dominating the discussion. A balanced conversation fosters a more inclusive and collaborative environment.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

It was observed that there were instances where your confidence appeared to waver. Consider practicing speaking with assertiveness and maintaining a confident posture to leave a lasting impression. Some of your responses lacked clarity and conciseness. Focus on articulating your thoughts in a structured manner, ensuring that your key points are communicated effectively. It seemed that you were caught off guard by certain common questions. Take some time to anticipate and prepare responses for standard interview questions to enhance your overall performance. Consider incorporating more storytelling elements into your responses. This can make your experiences more memorable and help the interviewer better understand your qualifications and achievements. Remember that improvement is a gradual process, and everyone faces challenges in their journey. We believe that with dedication and focused effort, you can make significant strides in enhancing your personal interview skills.

4.0. Corporate Readiness:

Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies
These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies
These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies
These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is on the average side. You can further improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your effort in this area is on the average side, it appears that your score in this area could use some improvement. With the right focus and strategies, you can make significant progress. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability is average. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick

decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was on the average side. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. We look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is on the lower side. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is on the average side. You can further improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your effort in this area is on the average side, it appears that your score in this area could use some improvement. With the right focus and strategies, you can make significant progress. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability is average. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick

decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was on the average side. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. We look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is on the average side. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Quantitative (20)	Subjective Knowledge (20)			A (Dream Company)	10 - 20 Lakh	80 - 89 %

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies
These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies
These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies
These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

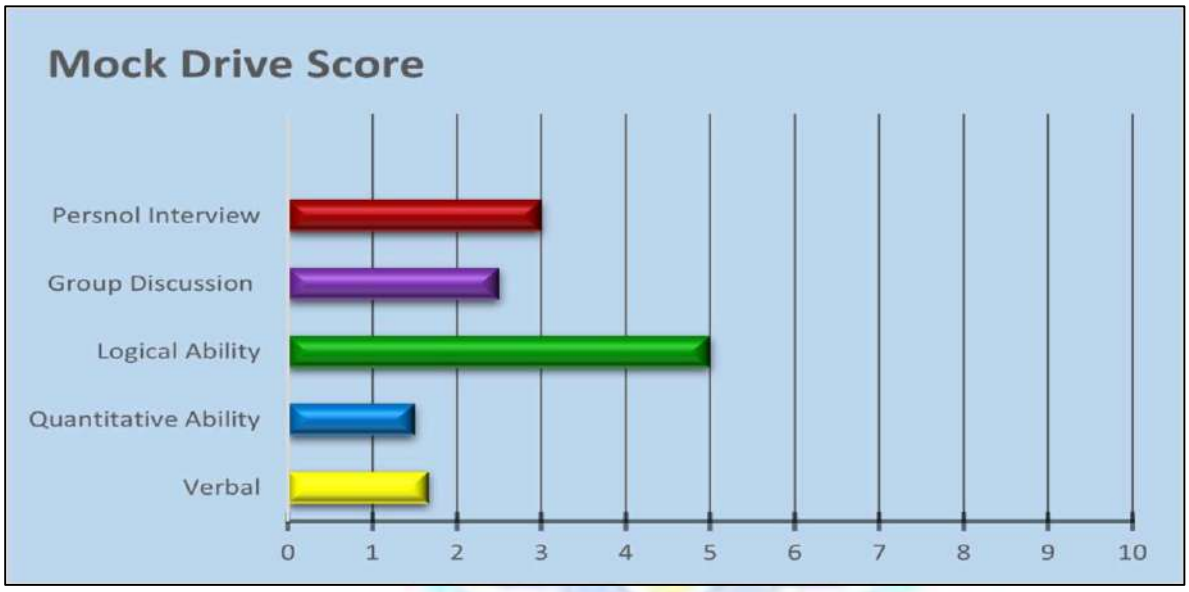
3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.



3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is on the average side. You can further improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your effort in this area is on the average side, it appears that your score in this area could use some improvement. With the right focus and strategies, you can make significant progress. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability is average. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick

decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was on the average side. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. We look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is on the average side. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is on the average side. You can further improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your effort in this area is on the lower side, it appears that your score in this area could use some improvement. With the right focus and strategies, you can make significant progress. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability is satisfactory. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick

decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was on the lower side. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. We look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is on the average side. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies
These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies
These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies
These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is on the average side. You can further improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your effort in this area is on the average side, it appears that your score in this area could use some improvement. With the right focus and strategies, you can make significant progress. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability is satisfactory. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick

decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was on the lower side. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. We look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is satisfactory. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is on the average side. You can further improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your effort in this area is on the average side, it appears that your score in this area could use some improvement. With the right focus and strategies, you can make significant progress. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability is on the lower side. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick

decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was on the lower side. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. We look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is on the average side. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Quantitative (20)	Subjective Knowledge (20)			A (Dream Company)	10 - 20 Lakh	80 - 89 %

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.

10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is on the average side. You can further improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your effort in this area is on the average side, it appears that your score in this area could use some improvement. With the right focus and strategies, you can make significant progress. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability is average. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick

decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was on the average side. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. We look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is on the average side. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is on the average side. You can further improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your effort in this area is on the lower side, it appears that your score in this area could use some improvement. With the right focus and strategies, you can make significant progress. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability is average. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick

decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was on the lower side. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. We look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is on the lower side. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your effort in this area is on the average side, it appears that your score in this area could use some improvement. With the right focus and strategies, you can make significant progress. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability is average. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick

decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was on the average side. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. We look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is on the average side. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

	Corporate Readiness Chart

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies
These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies
These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies
These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is on the average side. You can further improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your effort in this area is on the average side, it appears that your score in this area could use some improvement. With the right focus and strategies, you can make significant progress. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability is average. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick

decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was on the average side. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. We look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is on the average side. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies
These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies
These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies
These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is on the lower side. You can further improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your effort in this area is on the average side, it appears that your score in this area could use some improvement. With the right focus and strategies, you can make significant progress. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability is satisfactory. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick

decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was on the lower side. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. We look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is average. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies
These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies
These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies
These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is on the average side. You can further improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your effort in this area is on the average side, it appears that your score in this area could use some improvement. With the right focus and strategies, you can make significant progress. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability is average. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick

decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was on the average side. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. We look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is on the average side. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. You can further improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your effort in this area is on the average side, it appears that your score in this area could use some improvement. With the right focus and strategies, you can make significant progress. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs just a little improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to

reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was on the average side. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. We look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely needs some improvement. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Quantitative (20)	Subjective Knowledge (20)			A (Dream Company)	10 - 20 Lakh	80 - 89 %

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies
These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies
These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies
These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies
These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies
These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies
These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is on the lower side. You can further improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your effort in this area is on the average side, it appears that your score in this area could use some improvement. With the right focus and strategies, you can make significant progress. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability is on the average side. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often

involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was on the lower side. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. We look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is on the average side. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is on the average side. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies
These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies
These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies
These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is satisfactory. You can further improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your effort in this area is on the average side, it appears that your score in this area could use some improvement. With the right focus and strategies, you can make significant progress. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs just a little improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to

reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was on the lower side. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. We look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely needs some improvement. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies
These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is on the lower side. You can further improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your effort in this area is on the average side, it appears that your score in this area could use some improvement. With the right focus and strategies, you can make significant progress. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability is on the average side. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often

involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was on the lower side. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. We look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is on the average side. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies
These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies
These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies
These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies
These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies
These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies
These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is on the average side. You can further improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your effort in this area is on the average side, it appears that your score in this area could use some improvement. With the right focus and strategies, you can make significant progress. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability is average. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick

decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was on the average side. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. We look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is on the average side. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your effort in this area is on the average side, it appears that your score in this area could use some improvement. With the right focus and strategies, you can make significant progress. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability is average. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick

decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was on the average side. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. We look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is on the average side. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies
These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies
These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies
These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is on the average side. You can further improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies
These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies
These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies
These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is on the average side. You can further improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

Your effort in this area is on the average side, it appears that your score in this area could use some improvement. With the right focus and strategies, you can make significant progress. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability is average. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick

decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was on the average side. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. We look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is on the average side. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.**Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.**Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.**Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

	Corporate Readiness Chart						
	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:

4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:

4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Corporate Readiness Chart

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge

in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:

4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:

4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:

4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Corporate Readiness Chart

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:

4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge

in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the

time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:

	FMCG	Sales	Marketing	Banking	BPO	KPO	Educational Industry
Job suitability	1	3	2	4	0.5	1	1

4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.

Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand.

		2. Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive

guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies
These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies
These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies
These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:

4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:

4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge

in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the

time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:

	FMCG	Sales	Marketing	Banking	BPO	KPO	Educational Industry
Job suitability	1	3	2	4	0.5	1	1

4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.

Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.
Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	*Degree of Improvement*	*Suggestion*
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand.

		2. Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.
Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive

guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:

4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:

4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Corporate Readiness Chart

	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Quantitative (20)	Subjective Knowledge (20)			A (Dream Company)	10 - 20 Lakh	80 - 89 %

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Corporate Readiness Chart

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

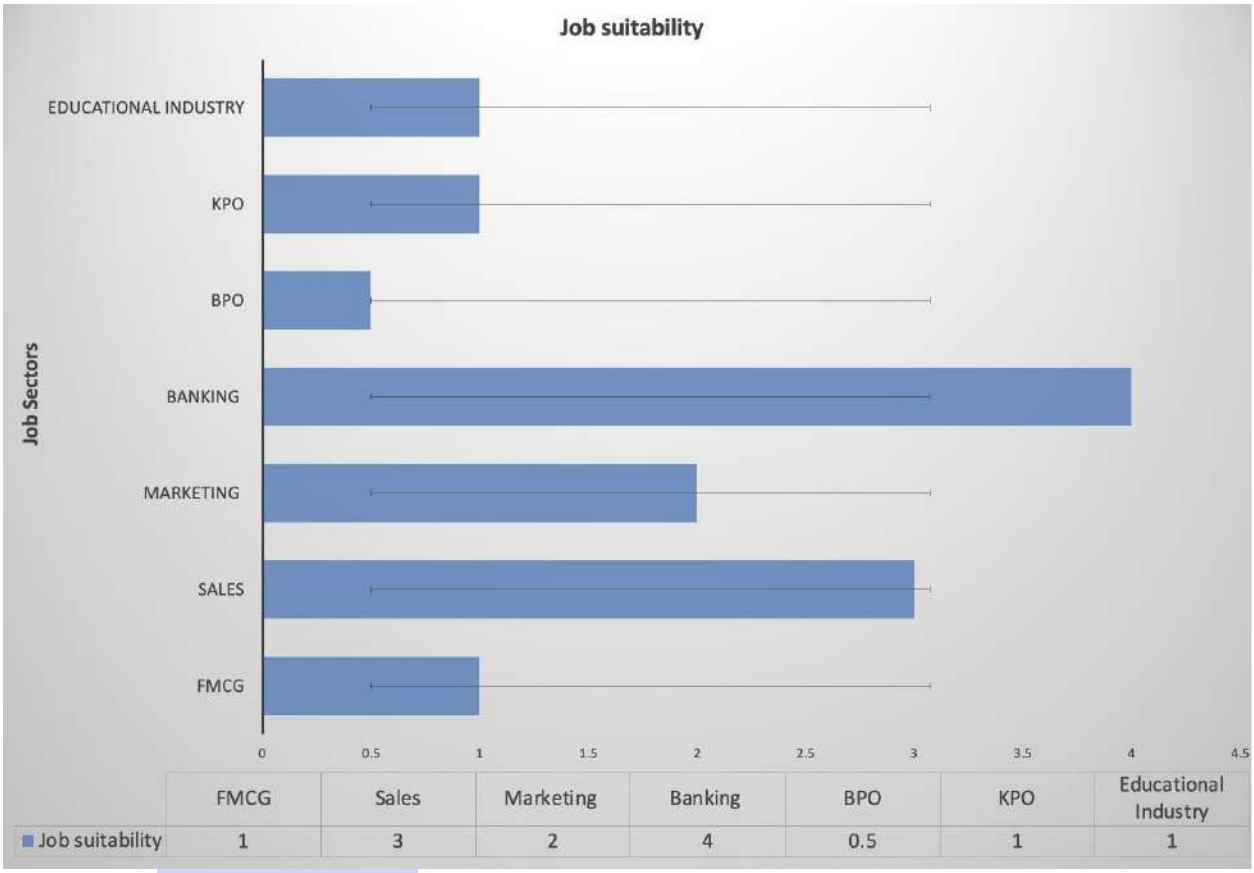
Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:



4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

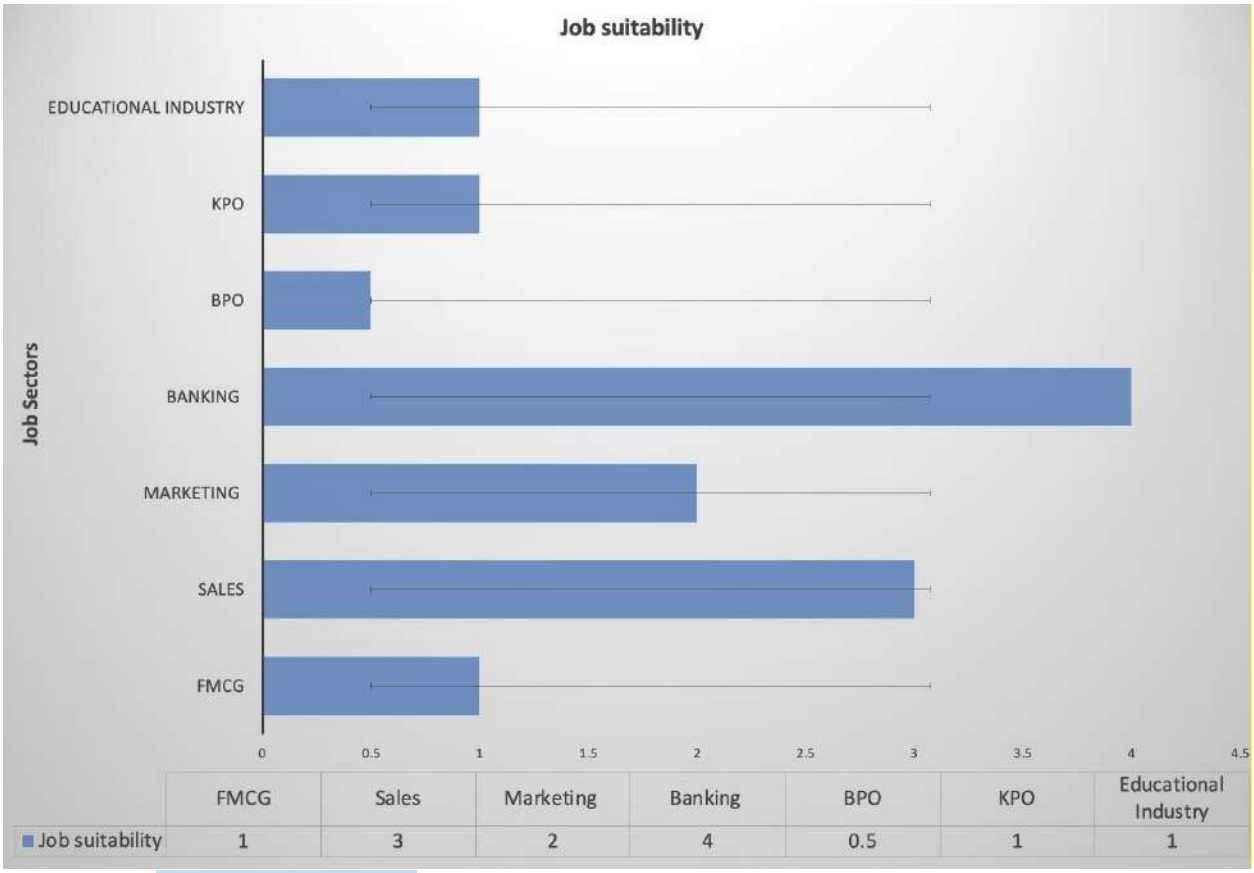
Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

4.1 Sector Wise:



4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Corporate Readiness Chart

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge

in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the

time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

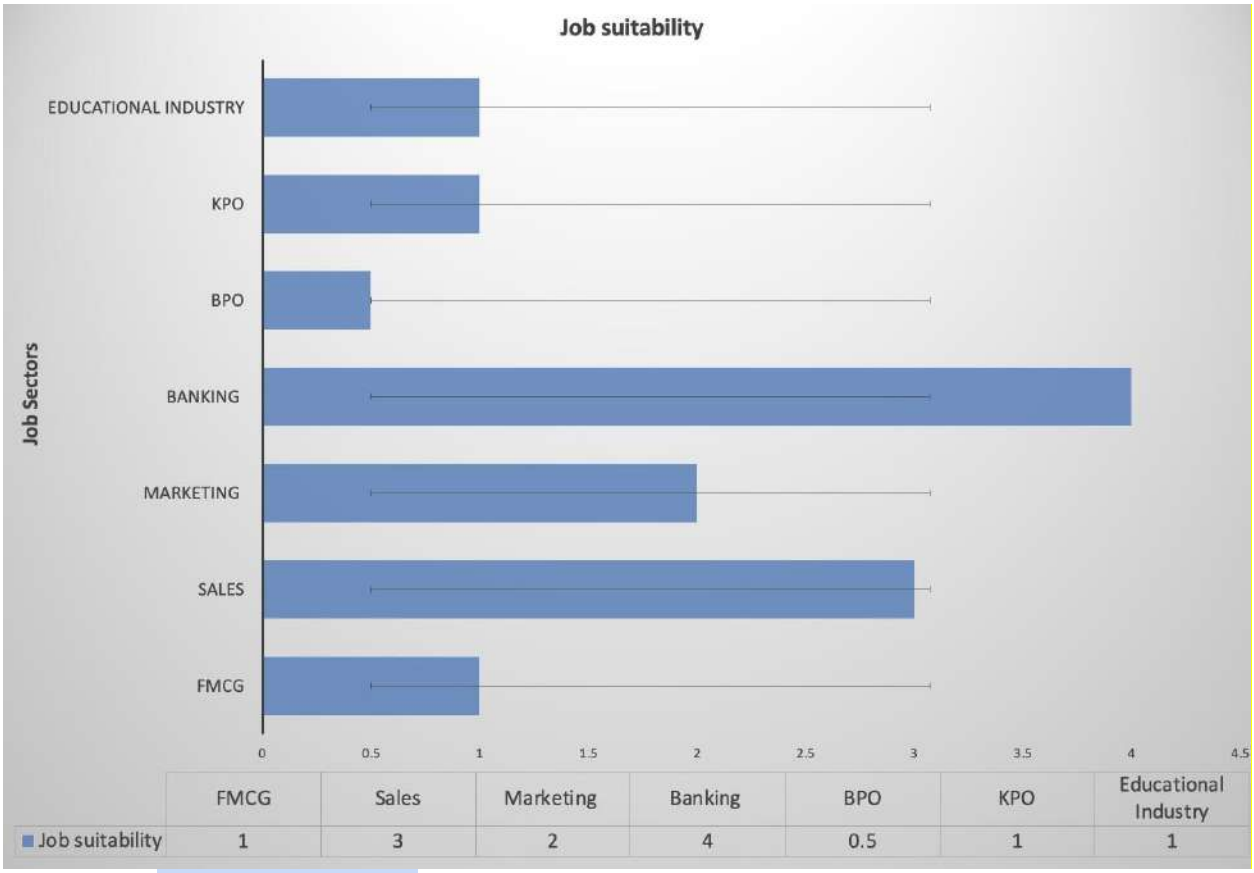
4.1 Sector Wise:



4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

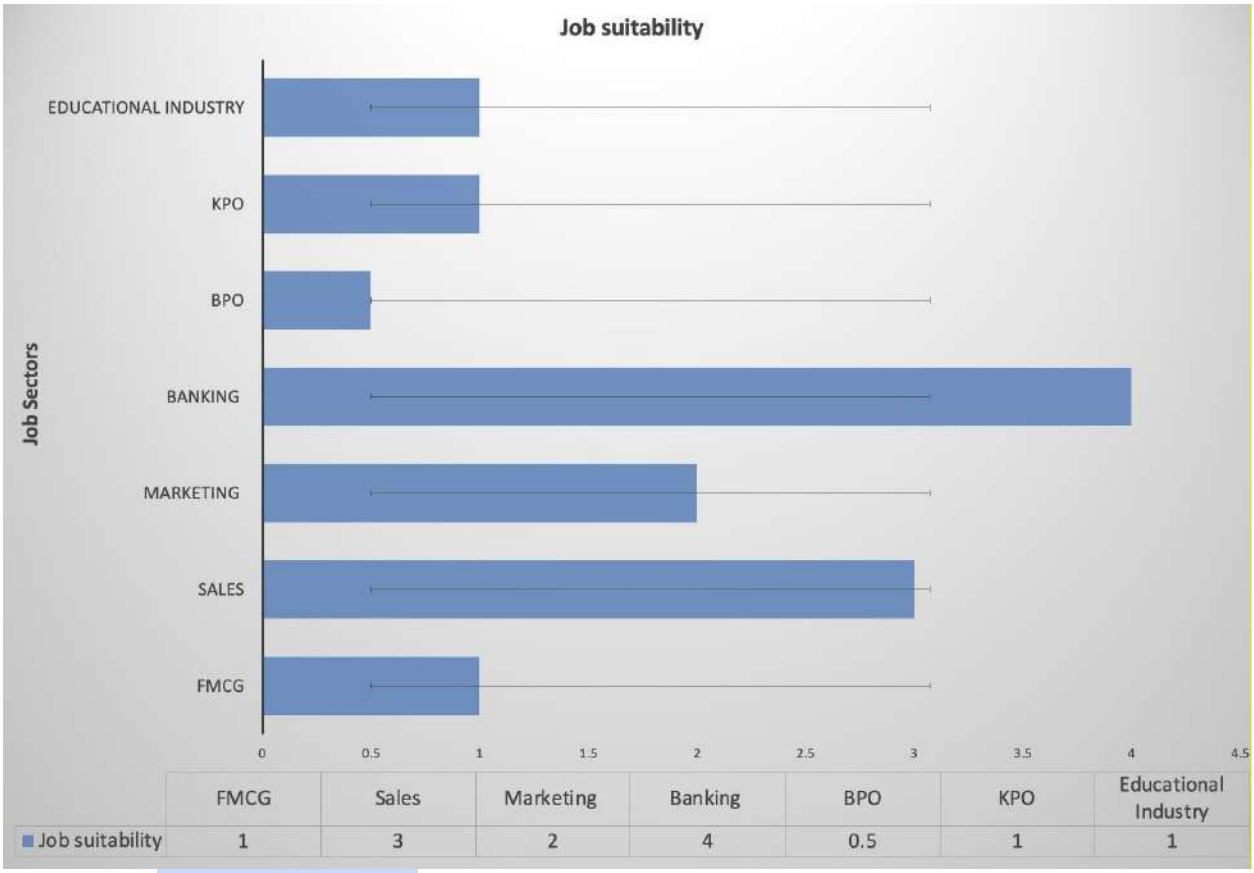
4.1 Sector Wise:



4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Training and Placement Cell

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• **Business Process Outsourcing (BPO) Companies**

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

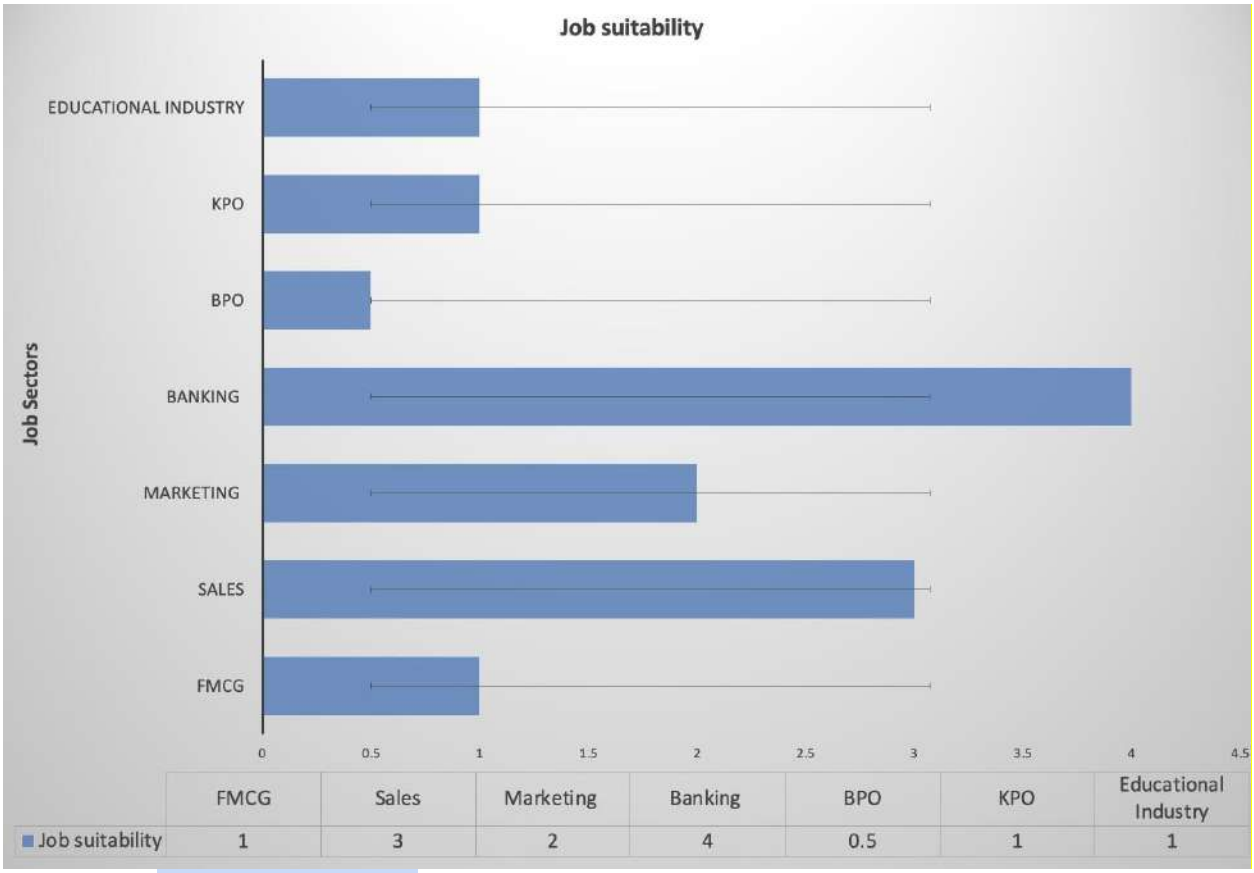
4.1 Sector Wise:



4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Corporate Readiness Chart

	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Quantitative (20)	Subjective Knowledge (20)			A (Dream Company)	10 - 20 Lakh	80 - 89 %
	Reasoning (20)	Pseudo coding (30)			B (Ideal Company)	6- 10 lakh	70- 79 %

Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

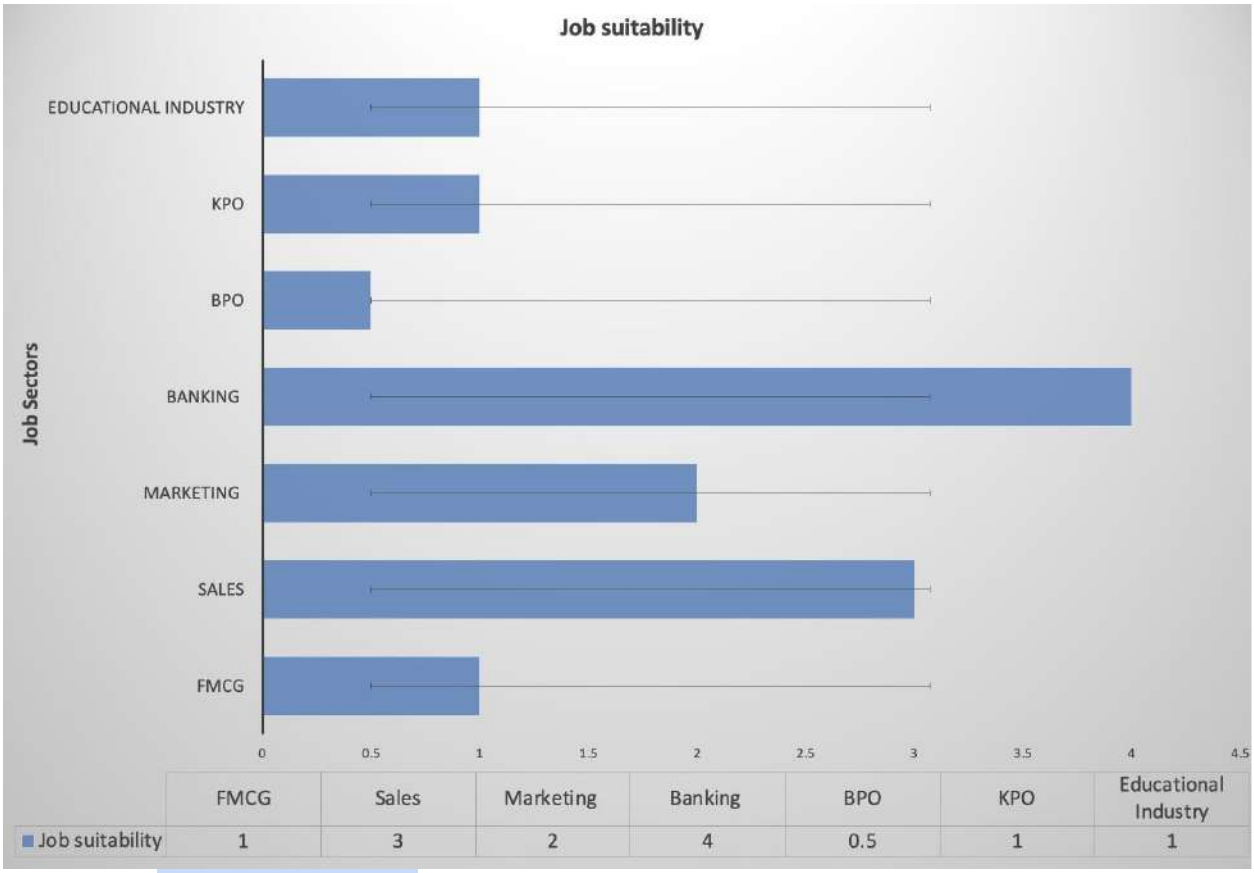
4.1 Sector Wise:



4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*
Creative content developer	**LOW**	These companies look for good creativity skills. Proper command over English plus good Logical and Quant sections along with high scores in the domain of your field.
Sales Executive	**LOW**	These companies look for candidates to have good knowledge of the domain in which they would be handling sales. A command over the English language and decent Quant and reasoning skills are also required.

Business analyst	**LOW**	These companies look for candidates having proficiency in English with good Quantitative and Reasoning abilities.
BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

1.0 Purpose of this Report:

The student Analysis Report provides a detailed analysis of student quality and his/her employability in the industry. Our aim is to produce a report which is useful to the university and includes a comprehensive comparison across different degrees, streams and batches. All such analysis will serve as an employability check up for students and accordingly, the campus can prioritize efforts to increase the overall student employability.

The sections containing tables and charts in this report are those we constructed after an in-depth analysis of students collected from the mock drive. Different sections of this report give a broad view on numerous aspects related to the performance of students. We evaluate students with the national average, which is calculated on a sample of entry-level job-aspirants over 12 states in India.

This comparison reveals the areas in which your students fare better (or otherwise) than the average student assessed by us, and determines the employability of students for diverse industries. This report will give a clear picture of the status of students eligible for the listed companies and also help the institute to work on the weak areas figured by the Training & Placement department of the university.

2.0 Perspective on Company Shortlisting Criteria:

Different companies use custom benchmarks to shortlist the types of candidates they require.

• Large Services Companies

These types of service companies have large training setups of their own. They provide system integration solutions, software application development, testing solutions and many other services. For large services companies, Computer Programming score is not an important criterion. They look for candidates with acceptable English and Logical Reasoning along with strong Quantitative Ability skills. A good score in computer subjects along with the programming module is a must. Infosys, Accenture, TCS, Cognizant, Capgemini, HCL, Wipro, Satyam, Tech Mahindra, Polaris etc are some of the major large scale service based companies.

• Product or Core Technology Companies

These types of product based companies analyze the future requirements of market and come up with exact solutions and product enhancements. That is, they develop their own products/applications based on the market requirements. These companies primarily look for good programming skills and quantitative ability. Since the job does not include interaction with clients, they do not focus on good scores in English. Microsoft, Google, AWS, Salesforce, Atlassian, Trilogy, Texas Instruments, etc. are some of the product based technology companies.

• Hardware and Networking Companies

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies

Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge

in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the

time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

These companies specialize in Hardware and Network Support and basically provide integrated solutions for business enterprise applications, networking equipment and network management. That is they help manage organization's computing resources up and running. These companies primarily look for average quantitative and logical ability. Since the job does not include a lot of interaction with clients, they do not necessarily require good scores in English Comprehension. These companies primarily look for good programming skills and core technical ability. Cisco, Hewlett Packard, Nortel, NEC, Citrix and Netgear are some of the Hardware/Networking companies.

• Knowledge Process Outsourcing (KPO) Companies
Knowledge Processing Outsourcing (popularly known as KPO) calls for the application of specialized domain pertinent knowledge. KPO business entities provide typical domain-based processes, advanced analytical skills and business expertise, rather than just process expertise. These companies look for an impressive command in English and sound knowledge in both Quantitative and Logical Reasoning along with core technical skillset. Evalueserve, Ugam Solutions, 24/7 Customer, ICICI OneSource, etc. are some of the leading KPOs in India.

• Business Process Outsourcing (BPO) Companies

Business process outsourcing companies can be aptly defined as those that act to utilize the services of a third party in order to perform its back office operations. The BPO market is forecast to hit $450 billion by 2012. These companies look at moderate to outstanding/ exceptionally good English, depending on whether they have national or international clients. The other parameters they use for short listing are acceptable Logical Reasoning and Computer skills. GE Capital, Convergys, Wipro Spectramind and Dell are some of the prominent BPO entities.

3.0 Your Mock Drive Score:

- Mock Drive is a thorough process. The bar is a representation of your performance in the module. Each bar represents your score in an individual category.
- Score of one module should not be compared with the score of another, but should be compared against the 50 percent of that module.
- Your score is on a scale of 1 to 10 with 1 being the minimum and 10 maximum.

3.1. Your Personalized Feedback:

Feedback Range:
1-2-3 = POOR
4-5-6 = AVG
7-8-9 = GOOD
10 = PERFECT

This section provides you with personalized feedback based on your strong and weak areas in a module, it provides you feedback to improve yourself.

VERBAL

1	2	3	4	5	6	7	8	9	10

Your performance in Verbal is low. You can improve your verbal skills by practicing reading a variety of texts and paying close attention to understanding the main ideas, supporting details, and the author's tone. This will help improve your comprehension skills. Work on expanding your vocabulary by learning new words and their meanings. Try incorporating these words into your everyday conversations and writing. Review basic grammar rules and sentence structures. Improve your verbal skills by actively listening to others. Engage in discussions, ask questions, and participate in conversations to enhance your communication skills. Try to exceed your current level of performance by expanding your grammar vocab and learning about subtleties and basics of this wonderful language. All the best!

QUANTITATIVE ABILITY

1	2	3	4	5	6	7	8	9	10

While your effort is commendable, it appears that your score in this area is currently on the lower side. I understand that tackling quantitative problems can be challenging, but I believe with the right focus and strategies, you can make significant improvements. Review the fundamental concepts in quantitative aptitude. Make sure you have a strong grasp of basic arithmetic, algebra, geometry, and data interpretation. Quantitative Ability requires consistent practice. Dedicate a specific amount of time each day to solving problems. Utilize resources like textbooks, online platforms, and practice tests to reinforce your skills.

LOGICAL ABILITY

1	2	3	4	5	6	7	8	9	10

Your performance in Logical Ability needs more improvement. Engage in regular logical reasoning exercises to build familiarity with different types of problems. When you encounter a problem, take the time to analyze the solution thoroughly. Understand the underlying logic and identify alternative approaches. Collaborate with peers who excel in logical reasoning. Discussing problems with others can provide valuable insights. Practice managing your time effectively during assessments. Logical reasoning

often involves quick decision-making. Utilize textbooks, online resources, and tutorial materials to reinforce your understanding of logical concepts. Remember, improvement is a gradual process, and with consistent effort and a targeted approach, you can enhance your Quantitative Ability skills.

GROUP DISCUSSION

1	2	3	4	5	6	7	8	9	10

Upon reviewing your results, your performance in GD was satisfactory. Consider focusing on improving your communication skills, ensuring that your points are articulated clearly and concisely. Actively listen to your peers and respond thoughtfully to their contributions. This will not only enrich the discussion but also demonstrate your ability to collaborate effectively within a group setting. Try to build on your current strengths, as these areas for improvement will undoubtedly contribute to a more impactful and successful GD experience. Keep up the good work, and we look forward to witnessing your continued growth in future discussions.

PERSONAL INTERVIEW

1	2	3	4	5	6	7	8	9	10

Your ability to express yourself clearly and concisely is a notable strength. Your responses were generally well-structured and articulated. Your enthusiasm and positive demeanor during the interview were appreciated. It created a welcoming atmosphere and showcased your genuine interest. You demonstrated a good understanding of the topics discussed and were able to provide relevant information. While your answers were clear, there is room to delve deeper into certain topics. Consider providing more specific examples or elaborating further on your experiences to showcase a more comprehensive understanding. Take a moment to reflect on each question before responding. This can help ensure that your answers are well-thought-out and directly address the question being asked. Remember, improvement is a gradual process, and your dedication to refining your interview skills will undoubtedly lead to success in future endeavors.

4.0. Corporate Readiness:

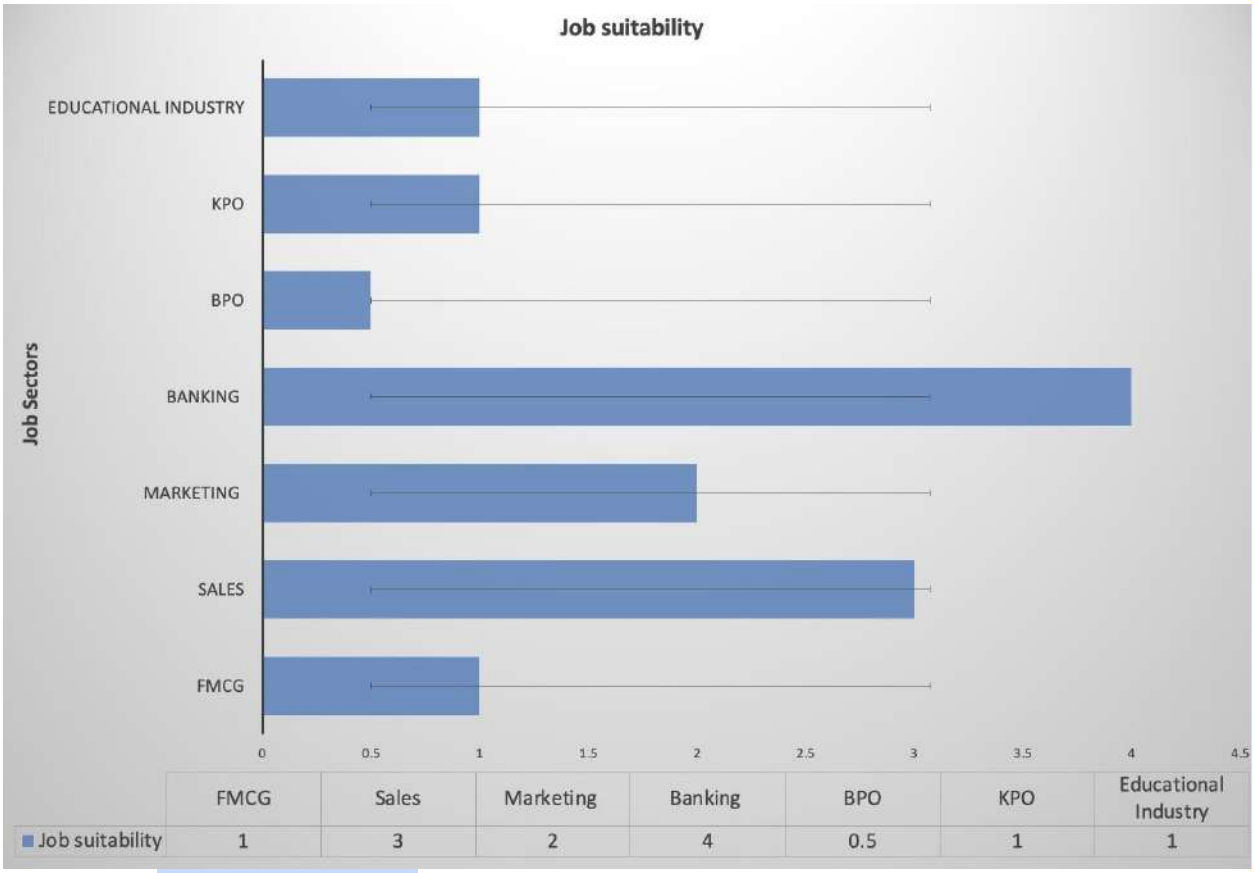
4.1 Sector Wise:



4.2 Profile Wise:

Job Profile	*Your chance of selection for these job profiles*	*Job profile criteria and areas to work on for improving your chances*

BPO / KPO Executive	**MEDIUM**	These companies look for candidates proficient in English with average Logical and Quantitative abilities.
Administrative Profiles	**LOW**	These companies look for candidates with proficiency in English with good reasoning abilities.
BDM / BDE	**MEDIUM**	These companies look for candidates with proficiency in Technical along with English combined with convincing and negotiation skills.
Financial Consultant	**LOW**	These companies look for a candidate which is good with financial management skills as well as a proper command over the English language and decent Quant and reasoning skills.

5.0 Training Suggestions:

This section consists where students need to improve on the basis of their performance in the Mock Drive. For each module, according to the degree of the improvement needed, suggestions are provided so that the performance of students can be improved.

Training Requirement Table

Area to Improve Upon	***Degree of Improvement***	***Suggestion***
Verbal	Strong	**1.** Practice a number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Encourage playing games like Scrabble, Crossword, etc. that are based on English vocabulary. **3.** Conduct tests and quizzes under time constraints. **4.** Read and write one page at least on a daily basis. **5.** Pay special attention to grammar. **6.** Make a phrasebook for yourself.

Quantitative Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Shortcut and short tricks to be taken care of. **3.** Practice mental calculations. **4.** Accuracy plays a key role. **5.** Work on conceptual details.
Logical Ability	Strong	**1.** Practice number of mock tests on both platforms online as well as offline which will help them to know where they actually stand. **2.** Practice conditional statements. **3.** Filter out your biases. **4.** Crystal clear understanding of terminologies.
Group Discussion	Moderate	**1.** General knowledge needs to increase. **2.** Well awareness of facts & figures is required to support your statements. **3.** Clarity of thoughts is required while forming your points. **4.** Active listening part needs to be improved.
Personal Interview	Moderate	**1.** Polish your first impression. **2.** Work on your observation skills to understand the nature of the PI **3.** Put efforts to talk more about your strengths and accomplishments **4.** Need to have more patience level while answering your PI questions

6.0 Performance Summary:

From the above analysis, it is clearly visible that the performance of the student among others is good in Group Discussion (GD) and Personal Interview (PI), which is highly appreciable. She has performed low in Logical Ability, Verbal and Quantitative Ability, whereas extra efforts can make a tremendous difference in her performance. However, additional training sessions and corrective measures are required by her. Methodologies such as mock tests, class activities and extra training sessions can become a valuable strategy for the benefit of the student. She can also include proactive mentoring sessions for weak areas and review her skills in the given area(s). Another approach can be to hold training sessions focusing on comprehensive guidance for her to excel in her weak areas. The gain resulting from these training sessions and her continuous efforts will help in overall development and further enhancement of her abilities.

Corporate Readiness Chart

	PDP Score (100)	**Technical Score (100)**	**Corporate Readiness (PDP + Technical)**		***Companies***	***Avg Salary Bracket***	***Overall Grading Criteria***
	Quantitative (20)	Subjective Knowledge (20)			A (Dream Company)	10 - 20 Lakh	80 - 89 %
	Reasoning (20)	Pseudo coding (30)			B (Ideal Company)	6- 10 lakh	70- 79 %
